- Wellness Coach Certificate
- Written Communication Skills Certificate

Associate Degree Programs

Associate in Arts (A.A.) Degree

The Associate in Arts (A.A.) is awarded for successful completion of 60 designated credits and is designed to constitute the first two years of a liberal arts bachelor degree program. The Associate in Arts degree is a liberal arts degree intended primarily for students who plan to transfer to another college or university to complete a bachelor's degree. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirements of the desired transfer institution. An A.A. degree includes the entire Minnesota Transfer Curriculum (MnTC), 40 semester credits of general education requirements. Pursuant to Minnesota state statute, the MnTC must transfer to any institution within the Minnesota State Colleges and Universities system or the University of Minnesota.

Students are encouraged to develop an educational plan with an advisor to ensure they are meeting degree requirements and planning for a successful transfer. The A.A. Degree requires a minimum of 60 semester credits.

In order to graduate, a student shall:

- Complete 40 credits in the Minnesota Transfer Curriculum, satisfying the requirements for each of the 10 goal areas.
- Earn a minimum of 15 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Earn a cumulative grade point average of 2.00 (C) or higher in courses taken and North Hennepin Community College.
- Grades of A, B, C, and D are accepted in the MnTC; however, a cumulative 2.0 grade point average is required to complete the entire 40 credit, 10 goal area MnTC.
- Complete at the Wellness Requirement for each AA degree with Health and Exercise Science courses. Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher. If the student intends to transfer, they are encouraged to work with an Academic Advisor to fulfill requirements for transfer to the other institution.
- Students have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Student taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of the MnTC and/or the completion of an Associate Degree fulfills the MnTC Goal Area 2 Critical Thinking requirement.

North Hennepin Community College offers the following A.A. Degree Programs:

- Communication Studies Transfer Pathway
- Economics Transfer Pathway
- Gender and Women's Studies Emphasis
- English Transfer Pathway
- Ethnic Studies Emphasis
- Film Emphasis
- Gender and Women's Studies Emphasis
- History Transfer Pathway
- Liberal Arts
- Math Transfer Pathway
- Political Science Transfer Pathway
- Psychology Transfer Pathway
- Sociology Transfer Pathway

Associate in Fine Arts (A.F.A.) Degree

An Associate in Fine Arts (A.F.A.) degree is intended for students whose primary goal is to complete a program in a designated discipline in fine arts. The A.F.A. degree is designed for transfer to a baccalaureate degree.

In order to graduate, a student shall:

- Earn a minimum of 60-68 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of the fine arts courses at North Hennepin Community College.
- Earn a cumulative grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Grades of A, B, C, and D are accepted in the degree; however a cumulative 2.0 grade point average is required to complete the degree.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of the MnTC and/or the completion of the AFA degree fulfills the MnTC Goal Area 2 Critical Thinking requirement

North Hennepin Community College offers the following A.F.A Degree Programs:

- Art Transfer Pathway
- Creative Writing
- Music

Theatre Transfer Pathway

Associate in Science (A.S.) Degree

The Associate in Science (A.S.) degree is intended for students whose primary goal is to prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an transfer agreement and/or complete the credentials for a specific career. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

In order to graduate, a student shall:

- Earn a minimum of 60-68 semester credits as required in the program, with a grade point average of 2.0 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Grades of A, B, C, and D are accepted in the degree; however a cumulative grade point average is required to complete the degree.
- Earn 30 credits in at least 6 MnTC goal areas.
- Earn additional professional/technical credits.
- Students have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Student taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of the MnTC and/or the completion of the AS Degree fulfills the MnTC Goal Area 2 Critical Thinking requirement.

North Hennepin Community College offers the following A.S. Degree Programs:

- Accounting Transfer Pathway
- Biology Transfer Pathway
- Business Transfer Pathway
- Business Computer Systems and Management
- Chemistry Transfer Pathway
- Construction Technology
- Construction Management and Supervision
- Corporate Wellness
- Corrections
- Computer Science Transfer Pathway
- Criminal Justice
- Data Science
- Elementary Education Foundations Transfer Pathway
- Engineering Broad Field
- Exercise Science Transfer Pathway
- Graphic Design
- Health
- Health Science Broad Field
- Human Services
- Individualized Studies
- Law Enforcement Transfer Pathway
- Paralegal
- Pre-Social Work Transfer Pathway
- Registered Nursing (MANE)*

Associate in Applied Science (A.A.S.) Degree

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). Many of the A.A.S. degree programs have articulation agreements with four-year institutions for transfer of the program.

In order to graduate, a student shall:

- Earn a minimum of 60 semester credits as required in the program with a grad point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of the professional/technical courses at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas.
- Earn 40 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of the MnTC and/or the completion of the AAS Degree fulfills the MnTC Goal Area 2 Critical Thinking requirement.

North Hennepin Community College offers the following A.A.S Degree Programs:

- Accounting Technology
- Business Computer Systems and Management
- Construction Technology
- Entrepreneurship
- Finance Management
- Management
- Marketing Specialist
- Medical Laboratory Technology

Certificate Programs

Concentrated programs of study are available in certain areas as certificates. Certificates are designed for those students who wish to develop vocational skills for specific career areas. Certificates shall include 9 to 30 semester credits.

In order to earn a certificate, a student shall:

Complete courses in the certificate program with a minimum grade point average of 2.00 (C).

Complete at least one-third of the total credits required for each certificate at North Hennepin Community College.

Students have two year to complete the certificate requirements as published in the catalog in effect at the time of their initial enrollment. Students taking longer than two years to complete their certificate requirements may follow any catalog published during the two-year period preceding their completion.

North Hennepin Community College offers the following Certificate Programs:

- .Net Programming
- Accounting Skills
- Accounting, Management, and Computer Information Systems
- Application Programming
- American Sign Language
- Business, Communications, and Technology
- Building Inspection Technology
- Business Principles
- Chemical Laboratory Assistant
- Communication and Computers
- Construction Management
- Construction Quality Assurance and Quality Control
- Corrections
- Digital Knowledge Analysis
- English Language for Academic Purposes
- Entrepreneurship
- Finance and Investment
- Game Programming
- Internet Programming
- Management
- Marketing Specialist
- Microsoft Office Principles
- Microsoft Office Specialist
- Object-Oriented Programming
- Project Management Essentials
- Paralegal
- Personal Training
- Phlebotomy Technician Certificate
- Racial Justice and Social Transformation
- Spanish
- Wellness Coach
- Web Graphic Design, Programming, and E-commerce Graphic Design
- Written Communication Technologies

Minnesota Transfer Curriculum

At North Hennepin Community College, the Minnesota Transfer Curriculum (MnTC) provides the general education distribution requirements for the Associate of Arts degree and provides the general education component for each of the career programs. The MnTC is designed to give students a college-level general education curriculum that focuses on the knowledge and skills necessary to be successful in modern society.

The Minnesota Transfer Curriculum (MnTC) is an agreement among Minnesota public institutions that aids in transfer among public colleges and universities in Minnesota. Upon full completion of the MnTC, a student will receive credit for all lower-division general education requirements (40 credits) upon admission. Partial completion of the MnTC will first be evaluated for completion of any of the 10 Goal Areas within the MnTC and then on a course-by-course basis. In all cases, courses recognized within particular Goal Area(s) by the previous institution will be accepted at North Hennepin Community College within the same Goal Area(s). Grades of A, B, C, or D are accepted in the MnTC; however, a cumulative 2.00 MnTC GPA is required for recognition of a student's completion of the entire Minnesota Transfer Curriculum with or without completing an associate degree.

Goal Area 1: Communication

Goal: To develop writers and speakers who use the English language effectively and who read, write, speak and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills are reinforced through multiple opportunities for interpersonal communication, public speaking and discussion.

MnTC Approved Courses for Goal Area 1:

ENGL	1201	College Writing I	4
ENGL	1202	College Writing II	2
ENGL	1800	Introduction to Journalism	3
TFT	1710	Oral Interpretation and Traditions	3

Goal Area 2: Critical Thinking

Goal: To develop thinkers who are able to unify factual, creative, rational and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum to develop students' awareness

of their o thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems. Completion of the MnTC and/or the completion of an Associate Degree fulfills the Critical Thinking requirement.

MnTC Approved Courses for Goal Area 2:

PSYC	2000		Statistics for the Behavioral Sciences	4

Goal Area 3: Natural Science

Goal: To improve students' understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today's scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students are encouraged to study both the biological and physical sciences.

Students must complete a minimum of seven (7) credits. The courses must come from at least two different departments and at least one must be a traditional lab course-designated by *.

Goal Area 4: Mathematical/Logical Reasoning

Goal: To increase students knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments and detect fallacious reasoning. Students will learn to apply mathematics, logic and/or statistics to help them make decisions in their lives and careers.

Minnesota's public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra.

Goal Area 5: History and the Social and Behavioral Sciences

Goal: To increase student's knowledge of how historians and social and behavioral scientists discover, describe and explain the behaviors and interactions among individuals, groups, institutions, events and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

Students must complete a minimum of nine (9) credits in three of these courses.

Goal Area 6: Humanities and Fine Arts

Goal: To expand students' knowledge of the human condition and human cultures, especially in relation to behavior, ideas and values expressed in works of human imagination and thought. Through study in disciplines such as literature, philosophy and the fine arts, students will engage in critical analysis, form aesthetic judgments and develop an appreciation of the arts and humanities as fundamental to the health and survival of any society. Students should have experiences in both the arts and humanities.

Students must complete a minimum of nine (9) credits in three of these courses. Courses must come from at least two different departments.

Goal Area 7: Human Diversity

Goal: To increase students' understanding of individual and group differences (e.g. race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States' historical and contemporary responses to group differences.

Goal Area 9: Ethical and Civic Responsibility

Goal: To develop students' capacity to identify, discuss and reflect upon the ethical dimensions of political, social and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others' positions and be part of the free exchange of ideas and function as public-minded citizens.

Goal Area 10: People and the Environment

Goal: To improve students' understanding of today's complex environmental challenges. Students will examine the interrelatedness of human society and the natural environment. Knowledge of both biophysical principles and socio-cultural systems is the foundation for integrative and critical thinking about environmental issues.

-------------------------------	-----------

Program Overview

2022-2023

The .NET Programming Certificate provides students with an opportunity to learn .NET application development. It targets students who want to acquire skills needed for .NET programming, web programming, and web site development. It also covers ASP.NET, a technology for creating Web applications. The Certificate's database management course utilizes Microsoft SQL Server.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, including:

- Designing appealing and functional user interfaces

Intellectual and Practical Skills, including:

- How to program in one of the major .NET computer languages
 - How to design and deploy a Web site
 - Specifics of programming Internet based applications and services
 - How to program ASP.NETbased Web sites utilizing C# language
 - How to employ Microsoft SQL Server to process and store the data associated with .NET applications
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

An Accountant examines, analyzes and interprets accounting data for the purpose of giving advice and preparing financial statements. Duties may include performing such activities as recording receipts and disbursements, and preparing state and federal reports. The accountant may prepare reports and financial statements electronically.

North Hennepin Community College offers this degree for students who are interested in moving directly into an accounting career.

NHCC also offers an Associate in Science A.S. degree in Accounting for students who are interested in transferring their credits to earn a baccalaureate degree at a four year institution.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- The theory and practice of the accounting process
- Basic knowledge of business taxation and payroll

Intellectual and Practical Skills:

- How to analyze financial information and make business decisions using critical thinking and problem solving skills
- How to communicate effectively, in oral and written forms

Personal and Social Responsibility and Engagement:

- How to evaluate professional responsibilities, including ethical issues

Integrative and Applied Learning:

- Use of technology including Microsoft Word, Excel and QuickBooks

Upon completion of the program the student will be prepared for entry level work in the accounting field. Courses in this degree may transfer to four-year colleges. Consult with an advisor for further information.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iSeek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four-year institutions for transfer of the program.

A student shall:

- Earn a minimum of 60-71 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.

- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

The Accounting Transfer Pathway Associate of Science Degree is designed for students who are interested in transferring after graduation to pursue a four-year baccalaureate degree in accounting. This transfer pathway specifically ensures that a student who successfully completes an Accounting Transfer Pathway Associate of Science Degree can transfer the entire completed degree into a designated parallel baccalaureate degree program in Accounting at any of the following universities. Minnesota State Universities: Bemidji State University Metropolitan State University Minnesota State University Mankato Minnesota State University Moorhead Southwest Minnesota State University St. Cloud State University Winona State University.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- The theory and practice of the accounting process

Intellectual and Practical Skills:

- How to analyze financial information and make business decisions using critical thinking and problem solving skills
- How to communicate effectively, in oral and written forms

Personal and Social Responsibility and Engagement:

- How to evaluate professional responsibilities, including ethical issues

Integrative and Applied Learning:

- Use of technology including Microsoft Word, Excel and PowerPoint

Upon completion of the program the student will be prepared to transfer to a baccalaureate program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelors degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the fouryear period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Total Credits Required		10		

Program Overview

2022-2023

The Accounting, Management, and Computer Information Systems Certificate is designed to provide a foundation in the study of accounting, business, and computer information systems. Students can use this certificate to enhance their skills in these areas of study or apply these credits to other certificates or associate's degrees with or without the intent to transfer.

Program Outcomes

Upon completion of this certificate, students will be able to:

1. Create, format, analyze, and present documents such as Word documents, Excel documents, Access documents, and PowerPoint presentations to effectively communicate in business in accordance with professional standards. (NHCC ELOs 1, 2, 4)

2. Within the context of the topics covered, exercise judgment to solve real-world accounting problems using accounting data (NHCC ELOs 3, 4)

3. Analyze managerial cases in planning, organizing, directing, and controlling and apply basic management concepts to develop proactive solutions (NHCC ELOs 2, 4)

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least onethird of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The Art Transfer Pathways AFA prepares students to continue their studies in a baccalaureate art program. In addition to a general education core set of courses, students will take a Fine Arts core set of courses designed to transfer into B.F.A. and B.A. art programs at four year institutions.

Program Outcomes

Program Outcomes including Essential Learning Outcomes

Completion of the ART AFA Transfer Pathway degree will meet all lower division major content and competency requirements needed to prepare students to enroll in the major at a Minnesota State University. Additionally, students will:

Develop a foundation of essential knowledge about the cultural, social, natural worlds, and individual wellbeing including:

- The study of creative accomplishments, in the context of other people and cultures, past and present, in a visual arts framework. (ELO 1, 2a, 3b, 4b, c, d, e)

Develop intellectual and practical skills, including:

- Visual problem solving that employs technical skills and comprehension of art historical context with application for contemporary art work. (ELO 1, 2a, 3b, 4a, b, c, d, e)
- Oral and written ability to think critically and analyze contemporary and historical works of art from multiple cultures. (ELO 2a, b, e, 3b, 3c, 4b, c, d, e)
- General rules of visual literacy (two- and three-dimensional design principles, drawing from observation, color theory, digital and photographic technology, and ceramic methodologies) (ELO 1, 2a, e, 3b, 4c, d, e)

Demonstrate personal and social responsibility, including:

- Understanding forms and concepts associated with the history of art including western, nonwestern, modern and contemporary art. (ELO 1, 3b, 4b)
- Developing constructive, organized studio work habits (ELO 1, 2e, 4e)
- Developing safe practices in the use of art materials and equipment. (ELO 1, 2e)
- Communicating issues of critical thinking skills via the creation of artworks and participation in the formal critique process. (ELO 1, 2b, c, 3b, c, 4b, d, e)

Integrative Learning, including:

- Producing a portfolio of artworks (ELO 4c, e)
- Producing work for inclusion in the juried student art exhibition (ELO 4c, e)
- Participating in the capstone practicum course (ELO 1, 2a, 4c, e)

Having art works published in Under Construction, the literary art magazine. (ELO 2a, 4c, e)

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the [iseek](#) and

Transfer Information

Degree Information

An Associate in Fine Arts (A.F.A.) degree is intended for students whose primary goal is to complete a program in a designated discipline in fine arts. The A.F.A. degree is designed for transfer to a baccalaureate degree.

1. Earn a minimum of 60-68 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
2. Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of the fine arts courses at North Hennepin Community College.
3. Earn a cumulative grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
4. Grades of A, B, C, and D are accepted in the degree; however a cumulative 2.0 grade point average is required to complete the degree.
5. Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
6. Completion of the MnTC and/or the completion of the AFA degree fulfills the MnTC Goal Area 2 Critical Thinking requirement.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. History the Social/Behavioral Sciences (Goal Area 5) - 3 credits
--

The Humanities Fine Arts (Goal Area 6) - 3 credits
--

Recommended Courses to total 60 credits*

* ** 13-15 Additional Elective Credits to equal 60 total credits. Chosen based on major transfer University

*Goal area requirements for the AS requires 6 of 10 MNTC goal areas (courses may count for more than one goal area)

**CHEM 2061 Organic Chemistry I CHEM 2062 Organic Chemistry II are recommended for some university programs

NHCC Residency and GPA

15 Credits must be earned at NHCC

Total Credits Required

60

Notes

Under some circumstances, students may substitute Biology 1001 for Biology 1101 if the appropriate chemistry and mathematics prerequisites are met prior to enrolling in Biology 1102. Students who have completed Biology 1001 and 1002 under the previous NHCC course numbering system may substitute these courses for Biology 1101/1102. Students may take Math 1150 or HIGHER for this requirement. Students planning to transfer to a BA/BS program are advised to consult the mathematics requirements of the program and institution to which transfer is planned. It is recommended that MATH 1210 is taken. Students planning to transfer to a BA/BS program are advised to consult the mathematics requirements of the program and institution to which transfer is planned. *13-15 Additional Elective Credits to equal 60 total credits. Chosen based on major track and transfer University (CHEM 2061 and CHEM 2062 are highly recommended).

Program Overview

2022-2023

The Associate of Science Biology Transfer Pathway offers students an opportunity to earn course credits that directly transfer to a designated Biology bachelors degree program at Minnesota State universities. The entire curriculum has been carefully designed to meet bachelors degree program requirements for transfer students planning and initial study at a Minnesota State college. Students planning to transfer to non-system universities are advised to consult with their intended transfer institution as early as possible to determine transferability of the courses in this curriculum.

In partnership with Bemidji State University, students can earn a bachelor's degree in Biology on NHCC's campus.

The Biology Transfer Pathway AS will transfer to any of the following universities:

Minnesota State Universities: Bemidji State University Metropolitan State University Minnesota State University Mankato Minnesota State University Moorhead Southwest Minnesota State University St.

Program Outcomes

Scientific Method

Science is a process of trial and error by which we hope to improve our understanding of the natural world incrementally, by making predictions, testing them, and improving their accuracy. The Scientific Method includes the ability to propose testable hypotheses and carry out experiments to test them, and relies on standardized international systems of measurement.

Data Interpretation and Statistical Analysis

Students should be able to analyze simple data sets using appropriate descriptive and inferential statistics. Navigating and Reading the Scientific Literature Students should be able to use public literature databases to find appropriate published material, and should be able to read, understand, and evaluate the validity and importance of the scientific literature and to integrate new concepts into their existing knowledge frameworks.

Scientific Communication

Students should be able to communicate their own and others data and analysis in oral and written format, using computers where necessary to visualize data or to create clear and compelling papers, posters, or presentations.

Science and Society/Civic Engagement

Students should be able to analyze scientific studies in light of their ecological, social, economic, ethical, and cultural implications.

Collaboration

Students should learn to communicate and work productively with others in designing, conducting, and evaluating projects, experiments, and other course related deliverables as an essential skill in science.

Interdisciplinary Nature of Science

Science depends upon knowledge, skills, and tools from other scientific and nonscientific disciplines. Students should develop their ability to utilize other disciplines as sources of context and skills to inform the learning and work they are engaged in.

Microscopy

The microscope is a tool used extensively in biology for observation and investigation. Skill development in basic light microscopy and exposure to more advanced forms of microscopy and digital imaging is fundamental to further study in biology.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelors degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the fouryear period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. -------------------------------	-----------

Program Overview

2022-2023

This accelerated certificate program provides students the foundational knowledge to pursue a career in construction code enforcement or for existing professionals to upgrade their skills. The courses meet one night a week and the program can be completed in two semesters. Successful completion of the Building Inspection Technology Certificate gives students the required training and points to take the State of Minnesota's Certified Building Official Limited exam

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Understand the purpose and intent of construction codes.

Personal and Social Responsibility, including:

- Apply building codes and referenced standards to construction projects.

Integrative Learning, including:

- Perform inspections and plan reviews on both residential and commercial construction projects.
 - Prepare for and take the Minnesota Building Official Limited exam
-

NHCC Residency and GPA

3 Credits must be earned at NHCC

Total Credits Required	9
-------------------------------	----------

Program Overview

2022-2023

This certificate is for students who want to combine business, communication and technology. Students will learn communication principles and techniques, computer presentation skills and project management software, concepts and process, used by successful managers. Courses can be applied to the Business Computer Systems and Management A.A.S. or A.S. Degrees. The courses from this program are delivered in the classroom and/or online. This certificate qualifies for the Workforce Investment Act.

Program Outcomes

Intellectual and Practical Skills, focused by:

- Demonstrate business communication effectiveness in a global and technological business environment.
- Apply improved verbal, nonverbal, listening, writing, team, conflict and negotiation skills in organizational situations.
- Effectively use webbased communication, video conferencing, email, presentation technologies, teleconferencing and telephone usage.
- Develop, create and deliver a variety of wellprepared presentations in multiple formats, analyzing the audience and environment to choose and create appropriate visuals.

Integrative and Applied Learning:

- Understand, apply and communicate the project management process using software tools.

Career Opportunities

Program Overview

2022-2023

The Business Computer Systems and Management program is designed for students interested in immediate employment or enhancing current career skills. The program is designed for students interested in a business management background with an opportunity to concentrate on utilizing the computer in managerial decision making. Careers exist in administration, management, sales, marketing, or technology departments of a business or organization. This degree combines essential knowledge of business and advanced technology skills using the latest computer technology and software programs. The courses from this program are delivered in the classroom and/or online.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Effective use of up to date technology and computer applications.
- Develop management and business principles, advanced technical and communication skills along with critical, independent and creative problem solving skills.

Intellectual and Practical Skills, focused by:

- Competent use of digital resources to access and evaluate information using current technology to perform basic business tasks.
- Demonstrate global thinking, working in teams, applying knowledge and focusing on hands on real world situations.
- Develop teamwork, and critical and creative thinking practices to become more effective, efficient and productive.

Personal and Social Responsibility and Engagement, focused by:

- Collaborate as a member of a team solving diverse and complex problems common in business today.
- Develop ethical practices in using technology.

Integrative and Applied Learning, including:

- Integrate computer technology as it relates to a career in a variety of business career pathways.

Upon completion of the program the student will be prepared for entry level work in the business, computer, or management field.

Courses in this degree may transfer to four year colleges. Consult with an advisor for further information.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

The Associate of Science Degree in Business Computer Systems and Management is designed for students who after completion of this degree are interested in continued study in a baccalaureate degree program in a related field as well as for students who are interested in careers in computers, management, business, education, or training. This degree is also meant for students who wish to enhance their computer and management knowledge in today's business world to help further their career. Students should consult an advisor/counselor for transfer opportunities to various Minnesota colleges. The courses from this program are delivered in the classroom and/or online.

This degree will articulate/transfer to Metropolitan State University for their Business Administration BS Degree.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Effective use of up-to-date technology and computer applications.
- Develop management and business principles, advanced technical and communication skills along with critical, independent and creative problem solving skills.

Intellectual and Practical Skills, focused by:

- Competent use of digital resources to access and evaluate information using current technology to perform basic business tasks.
- Demonstrate global thinking, working in teams, applying knowledge and focusing on hands-on real world situations.
- Develop team work, and critical and creative thinking practices to become more effective, efficient and productive.

Personal and Social Responsibility and Engagement, focused by:

- Collaborate as a member of a team solving diverse and complex problems common in business today.
- Develop ethical practices in using technology.

Integrative and Applied Learning, including:

- Integrate computer technology as it relates to a career in variety of business career pathways.

Upon completion of the program the student will be prepared for entry level work in the business, computer, or management field.

Courses in this degree may transfer to four-year colleges. Consult with an advisor for further information.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelors degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the fouryear period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

The Associate in Science Business Transfer Pathway is designed for students who are interested in transferring after graduation to pursue a baccalaureate or a professional degree in business, management, marketing, education, or training. This business degree transfers directly into upper division business programs at 4 year institutions within the state. Successful Business Transfer Pathway AS graduates can transfer in as juniors if admitted into specific business programs at the following schools. In partnership with Metropolitan State University, students can take classes toward a bachelor's degree in Business on NHCC's campus.

Minnesota State Universities: Bemidji State University Metropolitan State University Minnesota State University Mankato Minnesota State University Moorhead Southwest Minnesota State University St. Cloud State University Winona State University.

Program Outcomes

Management Concentration Option

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of American businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world and apply to daily business practice.
- Describe supervisory issues in planning, human resources, team building, and motivation and apply basic supervisory concepts to develop proactive solutions.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.
- Effectively use prevalent business software and technology to access information and solve basic business tasks.
- Use quantitative analysis of financial information and accounting concepts to interpret information.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.

Integrative and Applied Learning, including:

- Develop a managerial strategic plan that includes critical elements of planning, organizing, leading, and controlling.
- Illustrate the marketing concept through the completion of a comprehensive marketing plan.
- Production of a business model and business plan.

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelors degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the fouryear period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The Associate in Science degree in Chemistry is designed for students to work as a chemical lab assistant or who are interested in transferring after graduation to pursue a 4-year baccalaureate in chemistry. The pathway to a baccalaureate degree was created to ensure minimum competency requirements are met at the associate degree level and that students are academically prepared to transfer into the parallel bachelor degree program as juniors in chemistry at all of the following Minnesota State Institutions:

Minnesota State Universities: Bemidji State University Metropolitan State University Minnesota State University Mankato Minnesota State University Moorhead Southwest Minnesota State University St. Cloud State University Winona State University.

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Demonstrate basic knowledge and understanding of the fundamentals of experimental and theoretical chemistry.
- Explain and apply skills in analytical thinking and problem solving, and apply scientific methods to experimental data.

Intellectual and practical skills including:

- Demonstrate skills in laboratory operations including making accurate and precise measurements, preparing solutions, operating instrumentation, experimental design, and the interpretation and reporting of quantitative and qualitative data and results.

Personal and social responsibility and engagement, including:

- Work both independently and collaboratively in the classroom and in the laboratory.
- Apply learned concepts to everyday situations and experiences and critically evaluate contributions to science reported in the media; identify valid approaches to scientific problem solving and reporting.

Integrative and applied learning, including:

- Communicate their own data and analysis in oral and written communications that uses tables and graphs, describes detailed experimental procedures, and clearly explains conclusions, in order to create clear and compelling papers, posters, or presentations.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

The Certificate in Communication & Computer Skills is designed to provide a foundation in the study of various communication skills including written, interpersonal, and digital. The program is designed for students who plan to complete the certificate as well as students who want to pursue an associate's degree with or without intending to transfer

This certificate supports the 2015 Minnesota legislation Educational Attainment Goal 2025: Working to increase the percent of Minnesotans age 25 to 44 who have attained a postsecondary certificate or degree to 70 percent by 2025.

Program Outcomes

- Understand/demonstrate the writing and speaking processes through invention, organization, drafting, revision, editing and presentation. (NHCC ELO Intellectual and Practical Skills; NHCC ELO Integrative and Applied Learning; MnTC G1, comp. a; MnTC G2, comp. a)
 - Participate effectively in groups with emphasis on listening, critical and reflective thinking, and responding. (NHCC ELO Intellectual and Practical Skills; NHCC ELO Integrative and Applied Learning; MnTC G1, comp. b)
 - Select appropriate communication choices for specific audiences. (NHCC ELO Intellectual and Practical Skills; NHCC ELO Integrative and Applied Learning; MnTC G1, comp. d; MnTC G2, comp. a)
 - Analyze the role of verbal and nonverbal communication in various interpersonal interactions and diverse contexts. MnTC 1, b, d, f, g, MnTC 7, b, c, ELO 1, 2, & 3.
 - Demonstrate effective written, verbal and nonverbal communication skills in business situations (ELO 1, 2, 3)
 - Develop management and business principles, advanced technical and communication skills along with critical, independent and creative problem solving skills. (NHCC ELOs 1 & 2)
 - Demonstrate the process of planning and creating business presentations. (NHCC ELOs 1, 2, 4)
-

Career Opportunities

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental CoursesSome students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Computer Science Transfer Pathway AS offers students a powerful option: the opportunity to complete an Associate of Science degree with course credits that directly transfer to designated Computer Science bachelors degree programs at Minnesota State Universities.* The curriculum has been specifically designed so that students

completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelors degree programs in a related field.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

Intellectual and Practical Skills, including:

- Employing methodical and technical processes in designing and programming software applications.
- Designing databases to access, manage and store data.

Personal and Social Responsibility and Engagement:

- Following best practices of software development.
- Designing and coding robust programs that conform to industry standards.

Integrative and Applied Learning: Applying computer technology to solve real world problems.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Total Credits Required	60
-------------------------------	-----------

Notes

It is recommended that students intending to transfer to the University of Minnesota B.A.S. or Minnesota State University Moorhead B.S. program consult with a counselor about the best course selection options. Students may best be served by choosing MATH courses to fulfill the electives. University of Minnesota students should take MATH 1200 or 1221. Minnesota State University Moorhead students should take MATH 1200. It is further recommended that students intending to transfer to the Minnesota State University Moorhead B.S. program should select BUS 1220 and BUS 1300 as electives.

Program Overview

2022-2023

This program will prepare students for supervisory and management positions in the construction industry. The curriculum combines basic fundamentals with key courses in applied management, engineering, design, and business that are required to manage complex construction projects.

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, and individual wellbeing.

- Understand and utilize information that describes and prescribes the physical basis, technical specifics and sequential process of building construction
- Formulate a consistent system of actions involving the study of the construction process and the management of that process in an organized and knowledgeable manner

Develop intellectual and practical skills, including:

- Develop a basic understanding of building codes and regulations
- Understanding of construction documents system and organization

- Be able to prepare a construction project cost estimates
- Be able to prepare construction project schedules
- Apply the principles of the Critical Path Method
- Organize and schedule construction activities
- Refine communications skills with subordinates, peers and superiors
- Deduce essential data that is required to prepare cost estimates from construction drawings
- Evaluate and use computer technology in estimating and scheduling

Demonstrate personal and social responsibility, including enhance personal development in:

- Good work attitudes, values, and habits
- Selfconfidence
- Responsibility
- Better understanding of career options
- Realistic appraisal of strengths
- Prepare, develop, and refine individual CPM and PDM networks in classroom exercises upon an individual and team bases
- Gain firsthand experiences associated with supervisory and/or management roles in an industrial setting
- Refine communications skills with subordinates, peers and superiors
- Implement, develop and/or refine skills in production, management, and personnel matters

Integrative Learning, including:

- Apply construction management techniques to an actual construction management project
- Apply the principles, knowledge and skills learned in the classroom to onthejob practices and procedures in the construction industry real life situations
- Develop and refine problemsolving techniques
- Formulate systematic and sequential plans, monitor plans, and evaluate projects to assure that quality control goals are achieved

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

Construction Quality Assurance and Quality Control is the student of the principles of the construction quality management. It begins with carefully developed project requirements adhere to by the contractor, the owner and regulating agencies. It assures that the quality standards established by the designer in the projects plan and specification are achieved during the construction of a project. Students are prepared for management roles in both public and private organizations ensuring the projects in the build environment meet all applicable contract standards and requirements.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Conduct civil material tests in compliance with MnDOT standards
- Understand the purpose and intent of construction codes

Integrative and Applied Learning:

- Perform inspections and plan reviews on both residential and commercial construction projects.
 - Prepare for and take the Minnesota Building Official-Limited exam
-

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

Associate of Science in Corrections provides students with a broad overview of corrections in the United States. Principles of Evidence-Based practices are used to prepare students to work in the field of corrections. The program is designed for entry-level positions in correctional facilities, including jails and management of offenders in community settings.

Program Outcomes

The Corrections A.S. is designed to prepare students for entry level work in the field of corrections. The A.S. in Corrections is a combination of general education, sociology, psychology, criminal justice with an emphasis in corrections coursework.

The coursework in Corrections is designed to foster an understanding of our Correctional system including the following goals.

- Evidence-based corrections practices
 - Risk assessment in institutional facilities and community based programs
 - Cognitive-behavioral interventions and practices
 - Case management planning
 - A commitment to the principles of social justice, respect, acceptance, dignity and worth of all persons.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- engagement with literary arts in multiple genres across diverse cultures and societal perspectives, both by critically successful authors and through student writing
- significant and critical awareness of the contemporary world, from local to global

Focused by engagement with big questions, both contemporary and enduring

Intellectual and Practical Skills:

- analysis and examination of stylistic and literary elements of critically successful authors and student writing within multiple genres
- demonstration of critical and creative thinking through large and small group workshop style discussion and textual analysis of writing
- strategic application of practical and applicable creative writing modes and approaches to effective revision
- knowledge of historically successful literary elements and the artists who have used them

Practiced extensively, across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance

Personal and Social Responsibility and Engagement:

- understanding of cultural variation in forms of contemporary and historical literature, as well as important ways in which the contextual framework of the literature reflects culture
- interacting with college, local, national, and/or global publications with an awareness of audience and social ramifications
- developed skills in time management, deadlines, and collaborative experiences

Anchored through active involvement with diverse communities and realworld challenges

Integrative and Applied Learning:

- participation in literary arts publication and public performance
- investigation of careers related to critical and creative writing and the literary arts
- demonstration of proficiency in at least one genre of creative writing

Demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problems

Graduates will be prepared to transfer to, and succeed at, an upper level academic institution.

Career Opportunities

<p>Notes</p> <p>A cooperative agreement between North Hennepin Community College and Metropolitan State University exists for students earning the A.S. degree in Criminal Justice who intend to transfer to Metropolitan State to pursue their B.A. degree in Criminal Justice.</p>	

Program Overview

2022-2023

North Hennepin Associate of Science degree program in Criminal Justice provides students with a broad analysis of the relationship between law and society as well as a thorough examination of the interrelationships, functions and operations of the different components of the criminal justice system. It is designed to transfer to a four year institution and provide preparation for a variety of entry level positions in state, county, and municipal law enforcement agencies.

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, including:

- demonstrating knowledge of history, current issues, concepts, organization, philosophies and theories in the field of criminal justice.
- demonstrating an understanding of local ordinances, State Statutes and Federal Law, the purpose and function of police, courts, and corrections.
- demonstrating an understanding of the judicial review process, political, cultural and social forces which impact the police, courts, corrections, suspects, victims, and other parties involved in the criminal justice system.

Develop intellectual and practical skills, including:

- communicating appropriately and effectively in work situations.
- obtaining and refining the necessary skills in interpersonal communication, mathematics, basic crime statistics, as the skills are related to public contact and employment in the criminal justice system.
- utilizing the intellectual and practical skills necessary to represent a private or public agency in a professional manner
- developing the writing and public speaking skills necessary to communicate in small and large groups to prepare employment and further education.

Demonstrate personal and social responsibility, including:

- identifying career opportunities in criminal justice and the skills and attributes that employers are seeking and creating an understanding that employers often require continued higher education, citizenship, and service to others for initial placement and promotion.
- comparing and contrasting traditional, developing and future trends and ideas in criminal justice.
- developing a basic understanding of race, sex, color, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identification, and social class as related to criminal justice issues. This basic understanding should lead to tolerance, valuing differences, and leading to the acceptance of others.

Demonstrate integrative and applied learning, including:

- articulating the history and application of Criminal Justice with respect to Law Enforcement, as well as its relationship to the other social sciences.
- analyzing complex material, including constitutional law, State and Federal court rulings and having the ability to read and understand basic criminal justice related and court documents.
- applying concepts used in the Criminal Justice profession.

Upon completion of the program the student will be prepared to transfer to a baccalaureate program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

Data scientists require knowledge in a variety of information technology sub-fields, including algorithms, data structures, programming languages and statistical methods. While the field of Data Science is computer science centric, statistical and domain expertise is required. Accordingly, the data scientist may specialize in various fields, including business, physics, biology, finance and economics. The Data Science AS gives students the skills to analyze, procure, store and process large amounts of data. The study of Data Science will have students dealing with data that comes from disparate sources in the modern context of the Internet, in various unstructured forms and across academic disciplines.

The Data Science AS Degree will Transfer/Articulate to:

Metropolitan State University for a Data Science BS Degree, which can be completed through NHCC's University Center.

Program Outcomes

Program outcomes:

After successfully completing this program, a student will be able to:

1. Empirically support business decisions and scientific research.
 2. Properly interpret and communicate statistical measures.
 3. Select relevant data for system development and analysis.
 4. Apply general analytical models to specialized areas in other disciplines.
 5. Derive meaning from data in relevant contexts.
 6. Properly assess and apply systems of algorithms, databases and third party software.
 7. Understand the role of networked systems and their topologies for data analysis.
 8. Determine appropriate resource allocations for solving data oriented problems.
 9. Explain how data is procured, stored and analyzed.
 10. Apply methods of data preparation such as parsing and normalization.
 11. Interpret statistical parameters for understanding data in context.
 12. Evaluate models of data analysis.
 13. Develop algorithmic solutions using appropriate programming structures.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The Digital Knowledge Analysis Certificate is designed to provide a foundation in the study of digital knowledge analysis incorporating computer information systems and computer science to meet the growing need for business analysis using available digital software. The program is designed for students who plan to complete the certificate, complete an associate's degree, complete a four year degree, or returning students who are seeking additional skills.

This certificate supports the 2015 Minnesota Legislation Educational Attainment Goal 2025: Working to increase the percent of Minnesotans age 25-44 who have attained a postsecondary certificate or degree to 70% by 2025.

Program Outcomes

- Create, format, analyze, and present documents such as Word documents, Excel documents, Access documents, and PowerPoint presentations to effectively communicate in business in accordance with professional standards.
 - Analyze data presented in business cases requiring information management effectively using Access to create databases to show information in a variety of formats.
 - Use SQL Server integrated information for query building by analyzing the results.
 - Develop, analyze, and evaluate spreadsheets using advanced technical skills. Students will think critically, independently, creatively and resourcefully to apply knowledge to solve new problems and provide information to guide business decision making, complete real world business tasks, use ethical practices and communicate results.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least onethird of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The Elementary Education Foundations Transfer Pathway Associate of Science (AS) degree program offers students a powerful option: the opportunity to complete the Associate of Science degree with course credits that directly transfer to designated Elementary Education degree bachelor's degree programs at Minnesota State Universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor's degree programs in a related field.

Program Outcomes

North Hennepin Community College's future educators will:

1. Engage in activities and actions that develop teacher identity and criticality.
2. Understand systemic racism by examining structural policies historically practiced in our housing, economic, employment, and education institutions.
3. Critically examine teacher beliefs and instructional practices to provide equitable curricula.
4. Critically examine teacher beliefs and instructional practices regarding student achievement.
5. Critically examine teacher beliefs and instructional practices regarding assessment practices.
6. Access resources to aid instructional design in equitable curriculum and pedagogy.
7. Engage in a variety of cultural and professional experiences to challenge current teacher beliefs and instructional practices.
8. Present an ongoing professional development plan to address white supremacy characteristics and challenge teacher beliefs and instructional practices.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Total Credits Required

60

Program Overview

2022-2023

An Associate of Science (AS) in Engineering Broad Field is designed to prepare students for transfer to a 4-year program in a variety of engineering majors.

Program Outcomes

Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics (ELO 1; 2a, d; 4a, d, e) Apply engineering design processes to provide engineering solutions which take into consideration multiple needs. (ELO 1; 2a, d; 4a, d, e) Conduct experiments, as well as analyze and interpret results from these experiments. (ELO 2 a, d, e; ELO 4d) Communicate problem solutions, design solutions, and experimental findings, analysis, and interpretations in a variety of formats. (ELO 2b, c)

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation

requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Accreditation

North Hennepin Community College is accredited by the:
Higher Learning Commission of the North Central Association of Colleges and Schools

Program Overview

2022-2023

This certificate recognizes that a student in the EAP (English Language for Academic Purposes) program has demonstrated a high level of proficiency in academic English language and literacy skills to support student academic and career success. Students also gain skills for education and employment through the completion of elective courses which support continued development of written, verbal, and technology communication, advancement of international perspectives, and career exploration.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Compare diverse global perspectives.

Intellectual and Practical Skills:

- Demonstrate advanced proficiency in academic English.
- Develop critical thinking for college and career goals.
- Employ academic skills and active learning strategies.
- Select learning practices according to learning needs.

Personal and Social Responsibility:

- Analyze the effects of one's personal beliefs and experiences on learning.
 - Investigate ways to participate on campus and in the community.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The English Transfer Pathway AA offers students a powerful option: The opportunity to complete an AA degree with course credits that directly transfer to designated English bachelor's degree programs at Minnesota State universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor's degree program in a related field.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- broad knowledge of literary periods, ancient to present, including knowledge of chronology, place, and significance of the literature in those periods
- broad knowledge of literary genres, literary criticism, and methods of interpretation.

Intellectual and practical skills, including:

- ability to evaluate primary and secondary source material
- ability to develop a critique of literature based on primary and secondary source material
- ability to communicate using personal response enlarged and checked by textual support that connects literary works to the world
- ability to discern intent through syntax, semantics, and context

Personal and social responsibility, including:

- ability to identify and evaluate narrative bias and perspective in written and audio-visual materials, including digital, internet, and broadcast media
- insight into literature's distinctive treatment of historical events with attention to biographical and contextual sources

Integrative learning, including:

- ability to critically analyze, interpret, and synthesize various types of literary genres and literary criticism

- ability to understand of the role of literature as response to current events, conflicts, and problems, and its richness as a source of possible solutions
-

Career Opportunities

Program Overview

2022-2023

The Entrepreneurship program is designed for students interested in managing or buying a small business or franchise, and for students interested in starting a new business. The courses from this program are delivered in the classroom and/or online.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of American businesses and the global aspects and legal and

ethical responsibility of businesses operating profitably in a changing world and apply to daily business practice.

- Describe supervisory issues in planning, human resources, team building, and motivation and apply basic supervisory concepts to develop proactive solutions.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.
- Effectively use prevalent business software and technology to access information and solve basic business tasks.
- Use quantitative analysis of financial information and accounting concepts to interpret information.
- Apply legal principles to problems commonly experienced in the business world.
- Apply legal principles to problems commonly experienced in the business world.
- Describe the basic concepts of finance as it relates to business and quantitatively apply knowledge gained to assess financial risks of both individual and business decisions.
- Prepare quantitative and qualitative market research within the scope of consumer behavior.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.

Integrative and Applied Learning, including:

- Develop a managerial strategic plan that includes critical elements of planning, organizing, leading, and controlling.
- Illustrate the marketing concept through the completion of a comprehensive marketing plan.
- Production of a business model and business plan.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

Program Overview

2022-2023

The Environmental Science AS degree program prepares students for introductory jobs in the field of environmental science, environmental technology and for transfer into a four-year Bachelor of Science Degree Program in Environmental Science/Studies as well as other Biological or Natural Science related programs. Students will complete a strong base of science and math courses along with other core program and general education courses.

This Environmental Studies AS will Transfer to Bemidji State for their Environmental Studies, B.S. (Ecosystems Emphasis)

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Demonstrate a general understanding of the interconnected and interdisciplinary nature of environmental issues.
- Identify and explain environmental processes, ecosystems and human-environment interactions.
- Explain and apply the scientific process by making observations, developing hypotheses, designing experiments and interpreting, analyzing and synthesizing data.
- Recognize and articulate the impact of human development on natural systems, including global, regional and local examples.

Intellectual and Practical Skills:

- Demonstrate proficiency in quantitative methods, qualitative analysis and critical thinking for scientific problem solving.
- Communicate science and environmental issues effectively through written reports and oral presentations.
- Work effectively both individually and as a member of a group.

Personal and Social Responsibility and Engagement:

- Reflect critically and from a diversity of viewpoints about their roles and identities as citizens, consumers and environmental actors in a complex, interconnected world.
- Identify and justify key stakeholders in humanities and social sciences that need to be part of sustainable solutions

Integrative and Applied Learning:

- Integrate facts, observations, concepts and methods from multiple disciplines to solve scientific and environmental problems.
- Be prepared to transfer to a baccalaureate program.
- Be prepared for work in the environmental technology field.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

This AA degree will provide students with the foundations and theories of ethnic studies. Students will engage in an interdisciplinary study of race and ethnicity.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Accreditation

North Hennepin Community College is accredited by the:
Higher Learning Commission of the North Central Association of Colleges and Schools

Exercise Science Transfer Pathway AS

Students in the Exercise Science Transfer Pathway Associate of Science degree examine the effects of exercise and physical activity on people in order to optimize their physical and mental health. This degree prepares students to transfer, and choose from a broad range of careers, such as clinical testing, personal training and performance enhancement, sports management, physical therapy, strength and conditioning, athletic training, cardiac rehabilitation, and many more.

Program Overview

2022-2023

This program will examine the effects of exercise and physical activity on people in order to optimize their physical and mental health. Students will focus on the anatomy, physiology, biochemistry, biophysics of human movement, and applications to exercise and therapeutic rehabilitation.

This degree will prepare students for a plethora of career options, including clinical testing, personal training, sports management, physical therapy, strength and conditioning, athletic training, and cardiac rehabilitation among many others.

In partnership with Southwest Minnesota State University, students can earn a bachelor's degree in Exercise Science on NHCC's campus.

The Associate of Science in Exercise Science Transfer Pathway will examine the effects of exercise and physical activity on people in order to optimize their physical and mental health. This program focuses on the anatomy, physiology, biochemistry and biophysics of human movement, and application to exercise and therapeutic rehabilitation. This degree can prepare students to transfer and choose from a broad range of careers such as clinical testing, personal training and performance enhancement, sports management, physical therapy, strength and conditioning, athletic training, cardiac rehabilitation and many more.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World.

Apply principles, skills, and methods related to biomechanics, exercise physiology, health promotion, exercise prescription and sport psychology.
and sport psychology.

Intellectual and Practical Skills, Including: Apply the clinical and epidemiological evidence linking physical activity and exercise to mental and physical health. Apply the scientific method to solve problems related to physical activity and health. Utilize oral and written communication that meets appropriate professional and scientific standards in the field of Kinesiology/Exercise Science. Evaluate the effectiveness of human movement using mechanical principles. Associate the organic, skeletal, and neuromuscular structures of the human body to psychological factors associated with diverse physical activities. Work effectively in teams by valuing collaboration, providing service to others, and developing relational techniques for lifelong learning and problem solving.

Personal and Social Responsibility and Engagement, Including Apply Exercise Science related skills to real-world problems through empirical research, internships, field experience, and/or service learning. Demonstrate leadership and social responsibility to improve quality of life for others and ensure equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle. Model behavior consistent with that of a Kinesiology professional, including 1) advocacy for a healthy, active lifestyle, 2) adherence to professional ethics, 3) service to others, 4) shared responsibility and successful collaboration with peers, and 5) pursuit of learning beyond NHCC. Safely Develop an individualized exercise prescription based on scientific principles and appropriate evaluation techniques designed to reduce the risk of chronic disease and avoid injuries.

Integrative and Applied Learning, Including Synthesis and advanced accomplishment across general education, liberal studies, specialized studies and activities in the broader campus community. Assimilate, analyze, synthesize and integrate concepts related to the exercise science field. Students will also be able to sit for professional certifications related to personal training, including but not limited to those offered by the National Academy of Sports Medicine, the American Council on Exercise, and select others.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their

graduation requirements may follow any catalog published during the fouryear period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Film Emphasis AA

Students in the Film Emphasis AA degree gain an understanding of how to communicate through film. Through this process, students will learn how film can produce an effect on an audience and how these media principles can be applied in their life and career. This experience combined with film theory provide a solid foundation to continue education toward a bachelor's degree.

Program Overview

2022-2023

The Associate of Arts (A.A.) degree with an emphasis in film gives students an understanding of – and experience with – audiovisual communication. You will learn how film and video actually work to produce an effect on an audience and how these media principles can be applied in your life and career. Such skills are now in high demand by employers as more and more companies look for people who can communicate through audiovisual media. The A.A. with emphasis in Film provides a solid foundation in film theory should you decide to continue your film studies at a four year institution.

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- How film traditions and filmmaking developments in America have contributed to our culture – at times both inhibiting and developing our understanding of our own cultural diversity.
- How film traditions and developments in non-English speaking countries have contributed to filmmaking and world culture.
- How the elements of film work together to produce an effect on an audience; how cinematography, design, editing, sound, theme, screenplay, performance, and directing combine to make those impacts.
- How a film's social context and its political and religious influence show that film is not only an entertainment, but also a powerful tool for communication of a point of view.

Intellectual and Practical Skills, including:

- Using critical skills (interpretive, evaluative, and analytical) toward understanding a film's intent, evaluating its effect, and judging its quality, not only from a United States perspective, but from a World perspective.
- Demonstrating an ability to employ the elements of film to effectively and artistically communicate a message.
- Experiencing a wide variety of approaches to filmmaking.

Personal and Social Responsibility, including:

- The ability to work independently and collaboratively in a high pressure creative environment.
- Acting with sensitivity to cultural differences in films and filmmaking, both in what's portrayed as well as toward the people making them.

Integrative Learning, including:

- Participating in the various aspects of filmmaking mentioned above.
- Demonstrating a required level of proficiency in creating images and sounds that work together to produce the effect they intend on an audience.
- Investigating careers in film and television.

Be prepared to transfer to a four year institution in this discipline:

- Currently articulates to Metropolitan State University's Screenwriting B.A. Program; pending with Film Studies at St. Cloud State University and Moorhead State University.
 - Graduates will have completed all 10 Goal Areas of the Minnesota Transfer Curriculum requirements and have a foundation of knowledge in film to prepare them for transfer to a baccalaureate program in Film Studies or Screenwriting.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of

the 10 goal areas.

- Complete at least 4 credits for the Wellness requirement with at least one course from each of the following areas: Health (all courses) and Physical Education (all courses).
- Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

This certificate covers the basic functions of finance: business finance, financial planning and investments for professional development and/or career exploration. Many of the courses can be taken online. Courses can be applied to the A.A.S. degree in Finance Management. The courses from this program are delivered in the classroom and/or online. The certificate qualifies for the Workforce Investment Act.

Program Outcomes

Intellectual and Practical Skills, focused by:

- Solve application problems involving basic business calculations such as percent's, interests, time value of money among others.
- Describe the basic concepts of finance as it relates to business and quantitatively apply knowledge gained to assess financial risks of both individual and business decisions.
- Describe the basic concepts of finance as it relates to business and quantitatively apply knowledge gained to assess financial risks of both individual and business decisions.
- Identify financial opportunities and examine the viability or feasibility of a new business concept through analyzing financial cases and applying central financial concepts.
- Interpret, compare, and critique a company's financial statements.

Integrative and Applied Learning, including:

- Demonstrate the ability to utilize criteria for segmenting and evaluating alternative investments by conducting quantitative and qualitative primary investment research.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Finance Management program provides a background for entry positions in financial occupations. It includes courses in business and personal finance, credit and collections, and investments as well as general business and management courses. The courses from this program are delivered in the classroom and/or online.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of American businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world and apply to daily

business practice.

- Describe supervisory issues in planning, human resources, team building, and motivation and apply basic supervisory concepts to develop proactive solutions.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.
- Effectively use prevalent business software and technology to access information and solve basic business tasks including the use of spreadsheet tools and formulas.
- Use quantitative analysis of financial information and accounting concepts to interpret information.
- Solve application problems involving basic business calculations such as percent's, interests, time value of money among others.
- Describe the basic concepts of finance as it relates to business and quantitatively apply knowledge gained to assess financial risks of both individual and business decisions.
- Identify financial opportunities and examine the viability or feasibility of a new business concept through analyzing financial cases and applying central financial concepts.
- Interpret, compare, and critique a company's financial statements.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.

Integrative and Applied Learning, including:

- Demonstrate the ability to utilize criteria for segmenting and evaluating alternative investments by conducting quantitative and qualitative primary investment research.
- Illustrate the marketing concept through the completion of a comprehensive marketing plan.
- Production of a comprehensive sales plan that reflects specific sales concepts and tactics.
- Production of a business model and business plan.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

-------------------------------	-----------

Program Overview

2022-2023

The Game Programming Certificate provides students with an opportunity to learn how to create interactive computer games, including web-based ones. It targets students who want to acquire skills needed for game design and programming. The required Game Programming course utilizes the programming language chosen by the instructor. The Certificate offers a choice between the three most popular programming languages: Java, C++ and C#.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, including:

- Designing appealing and functional user interfaces.

Intellectual and Practical Skills, including:

- How to plan an interactive game
 - Specifics of game design for Internet delivery
 - How to design and deploy a website
 - How to program in one of the major general computer languages
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

In this program students will examine gender through many lenses, including history, psychology, sociology, arts and humanities. They will also gain an understanding of the relationships of power, sexuality, race, class,

nationality, religion and age as they intersect with gender. Students will become familiar with the cultural aspects of gender inequality and oppression.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Graphic Design AS

If you love to create, the Graphic Design AS degree is a great opportunity to turn your passion into a career. Students begin the program with a solid foundation in fine arts, including drawing, painting, color theory, and photography to begin thinking like designers, then transition to courses utilizing the latest digital tools and software to create advanced concepts and projects. Small class sizes and instruction from accomplished faculty artists and designers prepare students for a career in graphic design in a variety of settings.

Program Overview

2022-2023

NHCC's Graphic Design program starts with a fine arts foundation that gives students hands on experience with design concepts. Drawing, painting, color theory, photography, dimensional design (2D, 3D) and art history classes help students to begin thinking like designers, with or without a computer. Of course, as foundation skills are gained, graphic design courses then emphasize industry standard digital tools and software (Apple computers, Adobe Creative Suite) to harness design thinking and developing technical skills for more advanced concepts and projects.

NHCC graphic design majors work across different media: print, packaging, and book publication; web design and web animation; video and social media; sometimes street art and temporary installations. We learn digital and technical tools, but also how the design industry operates. We learn the actual language of design, we learn about audiences and work cultures, we learn strategies for developing a professional network of contacts, we learn about accepting constructive criticism and acknowledging the importance of other opinions, we learn interpersonal communication strategies to prepare for real professional situations. We work with real clients in advanced classes on projects that have an impact in the "real world." Small class sizes and one on one time with accomplished faculty artists and designers allow students to form the skills and opportunities needed to pursue, and get, jobs with graphic design industry employers. In fact, starting in the spring of 2015 NHCC's Graphic Design Program began working with metro area employers for paid graphic design internships. Students with consistently strong performance in their degree coursework are able to compete for these opportunities.

NHCC alumni have gone on to own their own graphic design studios and have worked for a long list of employers such as The Minnesota Twins, Nickelodeon, 3M, the Smithsonian Institution, Target, Best Buy, Colle+McVoy, and Minnesota Public Radio, to name just a few. NHCC's annual collection of student art and writing, Under Construction, is designed by students and has earned 30 national awards for content and design since 1968. It offers a rare chance to be a published writer and/or artist as part of a community college experience. See Under Construction as an epublication at <http://nhcc.edu/publications>.

The NHCC Associate of Science in Graphic Design degree is for students who are interested in: Working as graphic designers, web/interactive designers, art directors, production artists, illustrators or in related jobs at design studios, advertising agencies, marketing and public relations companies, corporate art departments, magazines, websites and newspapers, working as self employed (freelance) graphic designers, web/interactive designers, or illustrators, continuing study in a baccalaureate or professional degree program for graphic design, web/interactive design, or illustration. The degree is friendly towards continuing studies in graphic design at a 4year college/university. Talk with an academic advisor (<http://nhcc.edu/studentresources/academicadvising>) about possibilities for continuing study, and about determining the best sequence of fine arts core courses to take before moving into graphic design courses.

Make your dreams take shape, literally, with Graphic Design at NHCC!

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, and individual wellbeing by:

- Demonstrating skill in the foundation studio arts courses

Develop intellectual and practical skills, including:

- Verbally and visually communicating their knowledge of design
- Competently critiquing design
- Designing effectively with type and images
- Communicating traditional design concepts with the latest technology so as to be effective graphic designers in today's environment

Demonstrate personal and social responsibility, including:

- Developing constructive, organized work habits and professional presentation skills
- Developing an understanding of the creative accomplishments of other people and cultures, past and present, in the development of the field of graphic design
- Studying the ethics in the use of ideas and technical information as a foundation for respect of intellectual ownership

Integrative Learning, including:

- Managing a design problem from conceptualization to a finished layout
- Writing and designing a professional portfolio
- Demonstrating visual problem solving that employs technical skills and comprehension of the historical context of graphic design with application for contemporary design

Be prepared to transfer to and succeed at an upper level academic institution.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Associate of Science Degree in Health is a rewarding field for individuals interested in making a difference in the lives of others through the promotion of healthy lifestyles, healthy family functioning, and improving conditions that make it possible to live healthy lives. It is a vitally important field that is experiencing rapid growth and demand. This AS degree prepares students for a wide range of occupations in the health field, relating to stress techniques, nutrition and wellness, drugs and alcohol awareness, healthy sexuality and global implications in health. Students will be prepared to transfer to a 4 year institution upon completion as well as work in a variety of career settings including, but not limited to, family planning agencies, nonprofit agencies, state and federal health agencies, schools and community health agencies.

This degree has an articulation agreement to Minnesota State University Mankato for their Community Health Program, BS and Winona State University for their Public Health - Community Health Specialist Emphasis, BS and their Health and Wellness Management BAS.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Identify and develop a background of knowledge to address the major healthrelated, cultural and social needs of the communities we live and work in.

Intellectual and Practical Skills:

- Inquiry and analysis.
- Critical and creative thinking.
- Written and oral communication.
- Quantitative literacy.
- Information literacy.
- Teamwork and problem solving.
- Examine the importance of ethnic and cultural factors for health practices in the community. promote holistic health care standards.

Personal and Social Responsibility and Engagement:

- Promote healthy behaviors through evidencebased data and apply these findings to strategies in the classroom to promote holistic health care standards.
- Identify the socioeconomic, behavioral, biological, environmental, and other factors that impact human health and contribute to health disparities.
- Ethical reasoning and action.
- Foundations and skills for lifelong learning.

Integrative and Applied Learning:

- Apply the data presented in these classes to analyze and synthesize pertinent and current information which will help educate students and their future clients.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

This program in health sciences prepares individuals for transfer to a variety of baccalaureate degree programs. Includes instruction in the basic sciences and aspects of the subject matter related to various health occupations.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Demonstrate comprehension of human and biological systems

Intellectual and Practical Skills:

- Use the English language effectively to read, write, speak, and listen critically

- Use the English language effectively to read, write, speak, and listen critically

Personal and Social Responsibility and Engagement:

- Employ awareness and understanding of health, wellness and liberal arts; Develop the capacity to identify, discuss, and reflect upon social and behavioral issues

Integrative and Applied Learning:

- Apply mathematical and logical thinking

Upon completion of the program the student will be prepared to transfer to a baccalaureate program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

The Associate of Arts History Transfer Pathway Program provides students with a firm foundation in history and related disciplines to allow them to transfer to a four year institution with a junior standing in the History major. Students who successfully complete the History Transfer Pathway are guaranteed junior standing in History and admission to universities* in the Minnesota State system.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Broad knowledge of world history, ancient to present, including knowledge of chronology, place, and significance.
- Broad knowledge of major fields of history and schools of historical interpretation.

Intellectual and Practical Skills, including:

- Ability to evaluate primary and secondary source material
- Ability to develop and critique historical arguments based on primary and secondary source material
- Ability to communicate using the standards of the discipline
- Ability to develop and complete a program of historical research, beginning with the development of a research topic, through producing an original secondary source of publishable quality

Personal and Social Responsibility, including:

- Ability to identify and evaluate bias and perspective in written and audiovisual materials, including digital, internet, and broadcast media.
- Insight into the construction of historical knowledge as reflective of personal and social contexts

Integrative Learning, including:

- Ability to critically analyze, interpret, and synthesize various types of historical materials.
- Understanding of the role of the past in causing current events, conflicts, and problems, and its richness as a source of possible solutions.

Be prepared to transfer to a four year institution in this discipline:

- Graduates will have completed all 10 Goal Areas of the Minnesota Transfer Curriculum requirements and have a foundation of knowledge in history to prepare them for transfer to a baccalaureate program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

This degree has an articulation agreement to Metropolitan State University for their Human Services BS Program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Associate of Science in Individualized Studies is designed for students who are currently working or have experience in a professional career. The student defined curriculum is designed to offer students the opportunity to develop career related goals and pursue a program which is uniquely special and focuses on educational and professional development. There is a separate application required for this degree program.

The Associate of Science in Individualized Studies is designed to articulate to:Metropolitan State University B.A. in Individualized Studies degree.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World

- Develop a background of essential knowledge about the cultural, social, and natural worlds particularly in relationship to one's educational and/or career objectives.

Intellectual and Practical Skills

- Use clear and effective communication skills.
- Understand the relationship between chosen course work and career goals.
- Apply critical thought to problems and situations
- Develop computer skills necessary for personal use and a competitive job market

Personal and Social Responsibility and Engagement

- Create plans and actualize goals for achieving personal, educational and/or career objectives.

Integrative and Applied Learning

- Effectively utilize the components of credit for prior learning to make educated decisions regarding future higher education goals.
 - Plan and execute a program focus that matches career goals and/or further education goals and provides a liberal arts background.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Program Overview

2022-2023

The Internet Programming Certificate concentrates on the methodological and technical aspects of software design and programming. The students will acquire expertise in software design, coding and testing in addition to essential knowledge of development methodology. To ensure their success in the workplace, students will learn how to design and then program robust, interactive programs conforming to industry standards. The students will get sufficient knowledge to enter the job market related to Web development.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, including:

- Designing appealing and functional user interfaces

Intellectual and Practical Skills, including:

- How to program in Java
 - How to design and deploy a Web site
 - Specifics of programming Internet based applications and services
 - How to program ASP.NETbased Websites utilizing C# language
 - How to handle the data associated with Web applications and services
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Total Credits Required	68
Notes Applicants to the theorybased courses of the "Professional Licensing Program must complete the nine prerequisite courses, or their equivalent, with at least a C grade (2.00 on a 4.00 scale) in each course and a cumulative GPA of 2.5. US citizenship is not required for admission to the Professional Licensing Program, however, applicants must be US citizens before being hired by a law enforcement agency. Applicants may not be convicted of a crime that would prohibit them from being admitted to the law enforcement program under the rules of the Minnesota Board of Peace Officer Standards and Training (POST).	

Program Overview

2022-2023

The Law Enforcement Transfer Pathway AS offers students a powerful option: the opportunity to complete an AS degree with course credits that directly transfer to designated Law Enforcement degree programs at Minnesota State universities. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter the university with junior year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor degree programs in a related field.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, including:

- an understanding of the history, organization and functions of the criminal justice system including legal issues, the purpose and function of police, courts, and corrections.
- an understanding of political, cultural and social class forces which impact the police, suspects, victims, and other parties involved in law enforcement.

Develop intellectual and practical skills, including:

- communicating effectively in work situations.
- obtaining and refining the necessary skills in interpersonal communication, mathematics, basic crime statistics, and report writing, as these skills relate to public contact and criminal activity.
- utilizing the intellectual and practical skills necessary to represent a public agency in a professional manner during routine public contacts, high stress situations, and arrests.

Demonstrate personal and social responsibility, including:

- identifying career opportunities in public law enforcement and private security agencies and the attributes that employers are seeking and creating an understanding that employers often require continued higher education, citizenship, and service to others for initial placement and promotion.
- developing a basic understanding of race, sex, color, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identification, and social class as related to criminal justice issues. This basic understanding should lead to tolerance, valuing differences, and leading to the acceptance of others.

Demonstrate integrative and applied learning, including:

- articulating the history and application of Criminal Justice with respect to Law Enforcement, as well as its relationship to the other social sciences.
- understanding concepts used in the Law Enforcement profession and how they will be applied in the field.
- understanding techniques and strategies used in crime investigation, patrol operations, and daily police work.

Upon completion of the program, be prepared to transfer to a baccalaureate program.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

MnTC Note

40 Credits from ALL MNTC Courses, Goal Areas 1-10

Health Requirement

Health Exercise Science - 2 courses, 4 credits, one Health course one Exercise Science course

Electives

Elective credits, excluding under 1000 level, to reach 60 credits

NHCC Residency and GPA

15 Credits must be earned at NHCC

Total Credits Required

60

Program Overview

2022-2023

The Associate of Arts (A.A.) is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre-major requirements of the desired transfer institution.

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, and individual wellbeing.

Develop intellectual and practical skills, including:

- Understanding the commonalities and diversity of the human experience, values, and opinions
- Understanding the forms of artistic expression and their inherent creative processes
- Thinking critically, applying systematic reasoning, and developing information management quantitative skills
- Communicating clearly and effectively

Demonstrate personal and social responsibility, including:

- Developing a code for personal and civic life as a responsible citizen in a democracy
- Maintaining good mental and physical health and social adjustment
- Seeking new knowledge independently

Integrative and applied learning, including:

- The ability to apply General Education to the issues of our times

Be prepared to transfer to, and succeed, at an upper level academic institution.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the [iseek](http://www.iseek.org) and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 4 credits for the Wellness requirement with at least one course from each of the following areas: Health (all courses) and Physical Education (all courses).
- Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Note: Courses can satisfy more than one goal area, however, credits may only be counted once toward the 60 credit minimum.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Associate of Applied Science in Management is designed for students wanting a diversified business background with an opportunity to concentrate on specialized functions of management. Courses are delivered in the classroom and/or online. This certificate qualifies for the Workforce Investment Act.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of American businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world.

- Describe supervisory issues in planning, human resources, team building, and motivation and apply basic supervisory concepts to develop proactive solutions.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.
- Effectively use prevalent business software and technology to access information and solve basic business tasks.
- Use quantitative analysis of financial information and accounting concepts to interpret information.
- Apply legal principles to problems commonly experienced in the business world.
- Apply legal principles to problems commonly experienced in the business world.
- Apply the tools and techniques used by real life operations professionals in controlling the operations system.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.

Integrative and Applied Learning, including:

- Develop a managerial strategic plan that includes critical elements of planning, organizing, leading, and controlling.
- Illustrate the marketing concept through the completion of a comprehensive marketing plan.
- Production of a comprehensive sales plan that reflects specific sales concepts and tactics.
- Production of a business model and business plan.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

Total Credits Required	12

Program Overview

2022-2023

This certificate is for students who want to learn the essentials involved with managerial and supervisory positions. All of the courses can be taken online. Courses can be applied to the Business Administration A.S. Degree Management Concentration or various A.A.S. degrees.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of American businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.

Integrative and Applied Learning, including:

- Develop a managerial strategic plan that includes critical elements of planning, organizing, leading, and controlling.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Accreditation

Total Credits Required

60

Program Overview

2022-2023

Marketing Specialist Certificate students experience hands-on class projects such as new product launches, sales presentations, and advertising media plans. Specialized courses in consumer behavior, promotion, sales, and digital marketing are taught by outstanding marketing and design faculty, bringing real world expertise using state-of-the-art business software. Courses can be applied to the Marketing Specialist A.A.S. Degrees in Business.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, focused by:

- Describe the major functional areas of businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world.
- Define the role of consumer behavior, promotion, sales, and digital marketing in the marketing process and how they are integrated within an organization's overall strategy.
- Explore the decision-making skills and software needed in businesses.
- Describe the purposes for descriptive statistics and the purposes of inferential statistics.

Intellectual and Practical Skills, focused by:

- Apply effective listening, written, verbal, persuasive and nonverbal communication appropriate to professional situations locally and globally.
- Effectively use prevalent business software and technology to access information and solve basic business tasks.
- Use quantitative analysis of financial information and accounting concepts to interpret information.
- Role-play sales situations individually or in teams to dramatize specific sales concepts and tactics.
- Proficiently use computers and graphic design software for graphic design projects.

Personal and Social Responsibility and Engagement, focused by:

- Identify and appreciate differences in personality, differences in communication styles and diversity in general and demonstrate behavior that respects those differences.
- Identify and understand ethical dilemmas within the marketing, promotion, sales, and digital marketing environments.

Integrative and Applied Learning, including:

- Illustrate the marketing concept through the completion of a comprehensive marketing plan.
 - Analyze consumer behavior situations and apply consumer behavior concepts to develop solutions.
 - Analyze marketing communication situations and develop promotional strategic solutions.
 - Apply various sales concepts in the construction of a comprehensive sales plan or the solutions to various comprehensive sales cases.
 - Learn to develop, evaluate, and execute a comprehensive digital marketing strategy and plan.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program.

A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.

- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. MnTC Electives

Natural Science - 2 courses, 7 credits from 2 different disciplines, one must be a lab course
History the Social Behavioral Sciences - Must complete 9 credits
Humanities Fine Arts - 9 credits from 2 different disciplines
Goal Areas 7, 8, 10 - Courses can 'double dip' also count in Goal Areas 1-6. Credits only count once.
Additional Electives, if needed, to reach 40 total MnTC credits

NHCC Residency and GPA

15 Credits must be earned at NHCC	
Total Credits Required	60

Program Overview

2022-2023

This transfer pathway specifically ensures that a student who successfully completes a Mathematics Transfer Pathway Degree AA can transfer the full degree into a parallel baccalaureate degree program in Mathematics at a Minnesota State University.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Learning to value and enjoy mathematics
- Confidence in one's ability to do mathematics

Intellectual and Practical Skills, including:

- Ability to be a mathematical problem solver
- Ability to communicate mathematical ideas clearly, efficiently, and effectively in both written and oral forms
- Ability to reason mathematically

Personal and Social Responsibility, including:

- Ability to function in a mathematical, statistical, and technological society

Integrative Learning, including:

- Addressing complicated problems, applying mathematical methods to arrive at solutions, and validating solutions
 - Synthesizing ideas, applying disciplined thinking techniques to new settings, and approaching situations with multiple perspectives
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Medical Laboratory Technology AAS

The North Hennepin Community College Associate of Applied Science Medical Laboratory Technology (MLT) Program is designed to prepare students for a career in the medical laboratory. Medical Laboratory Technology is a rewarding, dynamic, and in-demand career with many opportunities for growth. By performing testing on blood and body fluids using highly specialized skills and complex instrumentation, MLTs provide information that is vital to both diagnosing and treating disease. In fact, over 70% of all health care decisions are made based on laboratory results.

Total Credits Required	60
-------------------------------	-----------

Notes

Day or evening option for MLT didactic courses. The program concludes with a clinical component that is only offered on the day shift.

Program Overview

2022-2023

The North Hennepin Community College Associate of Applied Science Medical Laboratory Technology (MLT) Program is designed to prepare students for a career in the medical laboratory. Medical Laboratory Technology is a rewarding, dynamic, and in demand career with many opportunities for growth. By performing testing on blood and body fluids using highly specialized skills and complex instrumentation, MLTs provide information that is vital to both diagnosing and treating disease. In fact, over 70% of all health care decisions are made based on laboratory results.

Through NHCC's MLT program, students will gain both knowledge and hands-on experience, making them highly desirable employees. Coursework includes theory in phlebotomy, urinalysis, clinical chemistry, hematology, immunology, microbiology, and immunohematology. Practical experience will be gained in student laboratories at NHCC and through a 19week clinical experience during the program's final semester. Upon completion of the program, students will be eligible to sit for the American Society of Clinical Pathology Board of Certification Exam. All on campus MLT courses are offered in both day and evening formats. However, in the final semester students are required to participate in clinical rotations, which are only offered during the day Monday-Friday. Admission into the MLT Program requires a separate application and entrance exam. The selection process is competitive, and the college may not be able to accept all applicants that meet the minimum standards. MLT application deadline is March 1st for the fall semester start.

The Associate of Applied Science in Medical Laboratory Technology is designed to articulate to: Saint Cloud State University B.S. in Medical Laboratory Science degree

Completion of current Minnesota Human Services Background Check including fingerprints. If an applicant has been arrested, charged, or convicted of any criminal offense, he or she should investigate the impact that the charge or conviction may have on his or her chances of employment and the students chances to obtain federal, state, and other higher education financial aid (by Minnesota Statute 135A. 157). If the applicant refuses, or is disqualified because of the background study, the applicant will be unable to successfully complete the requirements of the program.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Develop entry level medical laboratory technology skills in a clinical setting to prepare them for the workplace.

Intellectual and Practical Skills:

- Develop and demonstrate professionalism and concern for the customer.
- Develop competence in the theoretical knowledge and technical skills necessary for proficient performance of clinical laboratory procedures.
- Utilize effective interpersonal communication skills with customers and coworkers.
- Utilize effective written communication skills appropriate for the professional setting.
- Develop competence in the theoretical knowledge necessary to prepare for the national certification examination of the profession.

Personal and Social Responsibility and Engagement:

- Value participation in continuous professional development.
- Develop awareness of the role and responsibilities of the medical laboratory technician as a member of the health care team.

Integrative and Applied Learning:

- Apply critical thinking skills to correlating laboratory findings and common disease processes.
- Apply critical thinking skills to learning new techniques and procedures.

Upon successful completion of the program, the student will be eligible to sit for the national certification examination.

Upon successful completion of the program, students may be eligible to transfer to the B.S. in Medical Laboratory Science program at St. Cloud State University.

NAACLS requires accredited programs to meet the following program outcomes:

70% Graduation Rate (This is calculated based on students who began and completed the second half of the program.)

75% Board of Certification Pass Rate (This is calculated based on students who completed their exam within 1 year of graduation.)

70% Job Placement Rate (This is based on graduates that either entered the field or continued with higher education in the field.)

MLT outcomes for our program at NHCC are listed below. The BOC pass rates, and job placement rates, reflect students that graduated during the specified period of time:

	7/1/18 – 6/30/19	7/1/19 – 6/30/20	*7/1/20 – 6/30/21	Average
Graduation Rates	100%	100%	100%	100%
Board of Certification pass rates	100%	100%	86%	94%
Job placement rates	100%	100%	100%	100%

*Students have until 7/1/22 to complete their certification exam successfully. These numbers may change as the remaining students sit for the exam.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four year institutions for transfer of the program. A student shall:

- Earn a minimum of 6071 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Program Overview

2022-2023

This certificate provides essential computer skills needed in industry today. Students will use Microsoft Office products as well as other computer software applications that can be applied in business situations. Courses can be taken online. A course completed while earning a certificate can be applied to the A.A.S. or A.S. in Business Computer Systems and Management degrees and also some courses will be applied towards more advanced certificates. The courses from this program are delivered in the classroom and/or online. This certificate qualifies for the Work Investment Act.

Program Outcomes

- Perform specialized tasks using Microsoft Office applications
 - Maintain computer information records
 - Use of Microsoft Office for reports creation
 - Verify information using information technology
 - Gain advanced knowledge of Microsoft Office applications
 - Communicate in a business environment: written, verbal, and nonverbal
 - Access and evaluate information effectively
 - Demonstrate the use of uptodate technology and computer applications
 - Formulate solutions to business problems using facts, logic, creativity, and values
 - Solve mathematical problems related to business operations
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Music AFA

If you're passionate about music, the Music AFA degree is a great place to start developing the skills and talents to pursue a musical career. The curriculum, taught by experienced faculty, provides a broad background in music, and allows students to transfer credits to complete a bachelor's degree in music performance, music education, or music business. In addition to completing coursework, students will have the opportunity to participate in solo and group performances, and individual lessons.

Music Curriculum

MnTC Electives

Natural Sciences (Goal Area 3) - 4 credits
Mathematics/Logical Reasoning (Goal Area 4) - 3 credits
History the Social Behavioral Sciences (Goal Area 5) - 6 credits
Goal Areas 7, 9, 10 - 3 credits

NHCC Residency and GPA

15 Credits must be earned at NHCC

Total Credits Required	68
-------------------------------	-----------

<p>Notes</p> <p>To complete the Minnesota Transfer Curriculum, in addition to the courses listed above the student will need to take these additional MnTC Goal Area Goal Area 3&#58; 3 credits with one Goal Area 3 course that includes a lab component. Goal Area 5&#58; 3 credits Goal Area 9 or 1&#58; 3 credits in each goal area required; remaining credits depend on studentandrsquo;s choices of electives. Some courses fulfill two goal areas.</p>

Program Overview

2022-2023

The Associate of Fine Arts in Music is designed to provide a broad background in music for students planning to transfer to another college or university to complete a bachelor's degree in music performance, music education, or music business. The degree includes rigorous academic studies along with group performance experiences, individual lessons and solo performance opportunities.

Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, and individual wellbeing by:

- Demonstrating skill in the foundation music courses

Develop intellectual and practical skills, including:

- Verbally and visually communicating their knowledge of music history, theory and performance
- Competently analyzing and critiquing their own performance as well as that of others
- Competently using the concepts of theory, history and performance in creative processes

Demonstrate personal and social responsibility, including:

- Developing constructive, organized work habits and professional interpersonal and communication skills
- Developing an understanding of the creative accomplishments of other people and cultures, past and present, in the development of the field of music
- Studying the ethics of the use of ideas, information and creative works as a foundation for respect of intellectual ownership

Integrative Learning, including:

- Managing the process of creative problems in music from conceptualization to performance
- Performing competently and artistically as an individual and in groups
- Demonstrating problem solving that employs technical skills and comprehension of the historical context of music with application in theory and performance

Be prepared to transfer to and succeed at an upper level academic institution.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

An Associate of Fine Arts (A.F.A.) degree is intended for students whose primary goal is to complete a program in a designated discipline in fine arts. The A.F.A. degree is designed for transfer to a baccalaureate degree.

Completion of an A.F.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Coursework Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The North Hennepin Community College Associate Degree Nursing Program is designed to educate students who are prepared to begin professional nursing careers as competent, caring members of today's healthcare team. The NHCC program is a partner in the Minnesota Alliance for Nursing Education (MANE). Coursework includes nursing theory focusing on holistic assessment, therapeutic nursing interventions including communication, levels of prevention, critical thinking, collaboration and leadership/management concepts. Clinical application occurs in a variety of settings including: acute, subacute and long term care facilities, community clinics, schools and home health settings. Safe, caring, competent nursing care across the lifespan and along the wellness continuum is fostered.

Program Outcomes

NHCC Associate Degree Nursing Program

Outcomes:

NCLEXRN First Time Pass rate: 85.92% (2021)

Expected Level of Achievement:

The program's most recent annual licensure examination pass rate will be at least 80% for all first-time test takers during the same 12-month period.

Actual:

1/1/2021-12/31/2021 85.92%

MN Average: 78.65%

National Average 78.78%

Outcome:

Program Completion rate: 69% (2021)

Expected Level of Achievement:

70% of students will complete the program in 150% of program length

Actual:

69%

Outcome:

Job Placement rate: 100% (2020)

Expected Level of Achievement:

Within 12 months of completing semester 5, 70% of students will be employed as a Registered Nurse

Actual:

2020: 100%

Program Overview

2022-2023

The Nutrition Associates of Science is designed for students who plan to pursue a bachelor's or post-baccalaureate degree in nutrition, food science, or other allied-health fields. Our program course work provides foundational knowledge in biology, chemistry, math, writing, communication, cultural humility, and research – with an emphasis on nutrition and wellness. Nutrition is a contributing factor in bettering health and performance, as well as preventing and treating disease. Understanding how nutrition impacts health can help change lives.

Nutrition professionals work in a variety of public, private, and community settings applying nutrition-related research to everyday habits and routines.

Students admitted to the program will explore the science of nutrition, how it relates to culture, and the changing nutritional needs as we age.

This degree has an articulation agreement to Minnesota State University Mankato.

Program Outcomes

Describe the relationship between nutrition, health promotion, and disease prevention. – 1, 3

Demonstrate ability to locate, evaluate, and apply evidence-based nutrition research, guidelines, and recommendations for individuals and communities – NHCC ELO 1, 2, 3, 4

Recognize how environmental, cultural, economic, biological, and psychosocial factors impact nutritional status, health, and disease – NHCC ELO 1, 2, 3, 4

Utilize awareness of the cultural and life-stage perspective through active listening, digital literacy, and oral/written communications – NHCC ELO 1, 2, 3, 4

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Total Credits Required	12

Program Overview

The ObjectOriented Programming Certificate provides students with the opportunity to learn the fundamentals and more advanced topics of object oriented design and programming. The certificate is designed in the way allowing the students to select one or two programming languages, among the most popular ones. The major language elements are introduced in connection with the related algorithms. The students will also learn about the major abstract data types and the efficient ways to manipulate data.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, including:

- Designing appealing and functional user interfaces.

Intellectual and Practical Skills, including:

- Debugging and testing computer programs.
 - Designing professional grade object oriented applications in Java.
 - Programming in another major computer language (optional).
 - Utilizing the standard data structures to handle and store the data associated with the applications.
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Paralegal AS

One of only a few programs in the Twin Cities that is approved by the American Bar Association, since 1979, North Hennepin's Paralegal AS degree and Certificate program offer students an ABA approved education for one of the lowest costs in the state. In addition, our students pay on a per-credit basis, permitting paralegal students to take as many, or as few, courses as they wish at the same low cost per credit.

Program Overview

2022-2023

This program prepares students to assist lawyers and administrators of law-related occupations in providing efficient legal services to the public. The program of study includes general education courses, law-related courses, and legal specialty courses.

The paralegal courses are offered primarily in the evening. Courses prepare students for entry into a paralegal career and provide presently employed paralegals an opportunity to enhance their legal knowledge and skills. The Paralegal Program does not train graduates to provide legal services directly to the public. Any person who attempts to provide legal services directly to the public, but is not licensed to practice law, engages in the illegal and unauthorized practice of law.

The Paralegal Program is approved by the American Bar Association.

Students must take at least nine semester credits or the equivalent of legal specialty courses through traditional classroom instruction as required by the American Bar Association

Students wishing to enroll in the Paralegal Program, must complete an Admission Request. Students must make an appointment to meet with an advisor to present the Admission Request for processing. For more information or to schedule an appointment, please contact the Advising Office at 763-424-0703.

The Associate of Science in Paralegal is designed to articulate to: Concordia University B.A. in Organizational Management and Leadership degree Concordia University B.A. in Business degree Concordia University B.A. in Public Policy degree Concordia University B.A. in Criminal Justice degree Hamline University B.A. in Legal Studies degree Metropolitan State University B.A. Individualized Studies degree Winona State University B.S. in Legal Studies.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

Knowledge of human cultures and the physical and natural world.

- Demonstrate an understanding of the sources of law, legal procedure, and operation of legal systems within state and federal government and apply that knowledge to the work of paralegals.

Intellectual and Practical Skills:

- Demonstrate written, verbal, and interpersonal skills appropriate to various legal and business settings.
- Think critically and creatively analyze, synthesize, and organize information.
- Demonstrate ability to use word processing, spreadsheets, data base and case management software as they are used in the legal profession.

Personal and Social Responsibility:

- Understand and apply the Rules of Professional Conduct as they relate to the practice of law and demonstrate ethical behaviors in all settings.

Integrative Learning:

- Conduct legal research using print and electronic resources, apply results to fact situations, and report findings in an appropriate format.
- Successfully complete projects performed by paralegals in the various substantive areas of law.

This program prepares students to perform paralegal work in private law firms, government agencies or large corporations or transfer to a four year institution in this discipline.

Program Goal: Deliver a comprehensive paralegal education that will graduate ethical, employable, competent professionals for careers in the legal field.

Program Outcomes: Upon completion of the paralegal program, NHCC graduates will be able to:

1. Demonstrate an understanding of the sources of law, legal procedure, and operation of legal systems within state and federal government and apply that knowledge to the work of paralegals.
2. Understand and apply the Rules of Professional Conduct to the practice of law and demonstrate ethical behaviors in all settings.
3. Demonstrate written, verbal, and interpersonal communication skills appropriate to various legal and business settings.
4. Think critically and creatively analyze, synthesize, and organize information.
5. Conduct legal research using print and electronic resources, apply results to fact situations, and report findings in an appropriate format.
6. Successfully complete projects performed by paralegals in the various substantive areas of law.

7. Demonstrate ability to use word processing, spreadsheets, data base and case management software as they are used in the legal profession.

Notes Upon completion of EXSC 2100, the student will have the opportunity to complete the NASM certification exam for Personal Training. Students who complete the Personal Trainer Certificate Program may choose to continue their education by completing their A.S. Degree at NHCC. In addition, after completing their A.S. Degree, they may further their education by transferring to St. Cloud State University or Augsburg College, to which the current degree allows a seamless transfer.	

Program Overview

2022-2023

This certificate program prepares students to develop individualized exercise programs and provide knowledgeable information on weight loss, weight gain, muscle strengthening, and flexibility. According to the American College of Sports Medicine, Personal Training is the third fastest growing occupation in the nation. The certificate program is designed to assist students in developing skills to be successful in the areas of the fitness industry, business, sports, and coaching. Areas of study include: health and fitness, kinesiology, and concepts of personal training. Included in the program is an internship on campus which would allow practical application of concepts learned in the areas of exercise prescription and implementation of individualized programs for fellow students or employees. Included in the program are on campus opportunities which would allow practical application of concepts learned in the areas of exercise prescription and implementation of individualized programs.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World

- Apply principles, skills, and methods related to biomechanics, exercise physiology, health promotion, exercise prescription and sport psychology..

Intellectual and Practical Skills

- Inquiry and analysis: Apply the clinical and epidemiological evidence linking physical activity and exercise to mental and physical health..
- Critical and creative thinking: Apply the scientific method to solve problems related to physical activity and health..
- Written and oral communication: Utilize oral and written communication that meets appropriate professional and scientific standards in the field of Kinesiology/Exercise Science..

- Quantitative literacy: Evaluate the effectiveness of human movement using mechanical principles.
- Information literacy: Associate the organic, skeletal, and neuromuscular structures of the human body to psychological factors associated with diverse physical activities..

Teamwork and problem solving: Work effectively in teams by valuing collaboration, providing service to others, and developing relational techniques for lifelong learning and problem solving.

Personal and Social Responsibility and Engagement

- Civic knowledge and involvement andnddash; campus, local and global: Apply Fitness/Kinesiology related skills to realworld problems through empirical research, internships, field experience, and/or service learning.
- Intercultural knowledge and competence: Demonstrate leadership and social responsibility to improve quality of life for others and ensure equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.
- Ethical reasoning and action: Model behavior consistent with that of a Kinesiology professional, including 1) advocacy for a healthy, active lifestyle, 2) adherence to professional ethics, 3) service to others, 4) shared responsibility and successful collaboration with peers, and 5) pursuit of learning beyond NHCC.
- Foundations and skills for lifelong learning: Safely Develop an individualized exercise prescription based on scientific principles and appropriate evaluation techniques designed to reduce the risk of chronic disease and avoid injuries.

Integrative and Applied Learning:

- Synthesis and advanced accomplishment across general education, liberal studies, specialized studies and activities in the broader campus community.
- Assimilate, analyze, synthesize and integrate concepts related to the exercise science field.
- Students will also be able to sit for professional certifications related to personal training, including but not limited to those offered by the National Academy of Sports Medicine, the American Council on Exercise, and select others.

Total Credits Required		9		

Program Overview

2022-2023

The Phlebotomy Technician certificate program will prepare students for an entry level career in healthcare and will provide foundational and transferable skills for students who wish to continue their education in medical laboratory, nursing, radiology and others. Accreditation through NAACLS will be sought.

Program Outcomes

Program Outcomes including Essential Learning Outcomes

1. Demonstrate knowledge of health care delivery system and medical terminology
 2. Demonstrate knowledge of infection control and safety
 3. Demonstrate basic understanding of the anatomy and physiology of body systems and anatomic terminology in order to relate major areas of clinical laboratory to general pathologic conditions associated with the body systems
 4. Demonstrate basic understanding of age specific or psycho-social considerations involved in the performance of phlebotomy procedures on various age groups of patients
 5. Demonstrate understanding of the importance of specimen collection and specimen integrity in the delivery of patient care
 6. Demonstrate knowledge of collection equipment, various types of additives used, special precautions necessary and substances that can interfere in clinical analysis of blood constituents
 7. Follow standard operating procedures to collect specimens via venipuncture and capillary (dermal) puncture
 8. Demonstrate understanding of requisitioning, specimen transport, and specimen processing
 9. Demonstrate understanding of quality assurance and quality control in phlebotomy
 10. Communicate (verbally and nonverbally) effectively and appropriately in the workplace

Program Overview

2022-2023

The Political Science Transfer Pathway AA offers students a powerful option: the opportunity to complete and Associate of Arts degree with core credits that directly transfer to designated Political

Science bachelor's degree programs at Minnesota State Universities*. The curriculum has been specifically designed so that students completing this pathway degree and transferring to one of the seven Minnesota State universities enter with junior-year status. All courses in the Transfer Pathway associate degree will directly transfer and apply to the designated bachelor's degree program in a related field.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

- Knowledge: Identify and discuss core concepts, institutions, and processes in the study of Political Science
 - Inquiry and Analysis: Recognize methods and data used in the study of Political Science
 - Civic Knowledge and Engagement: Demonstrate ways to exercise the rights and responsibilities of democratic citizenship
 - Global Learning: Reflect on the roles and responsibilities of global citizens
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Program Overview

2022-2023

The Pre-Social Work Transfer Pathway AS awards students the opportunity to complete the AS degree with course credits that directly transfer to designated Social Work bachelor's degree programs at Minnesota State universities. Students will complete the designated general education curriculum as well as Human Services courses designed to prepare students for the broad-based helping professions.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the [iseek](http://www.iseek.org) and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.

A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four year period preceding their graduation.

Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. MnTC Electives

Natural Science- 1 lab course, 4 credits
The Humanities Fine Arts- 6 credits
Additional MnTC Electives- 4 Credits
History the Social Behavioral Sciences- 6 credits, at least one course from Goals 5 8

Health Requirement

Health Exercise Science - 2 credits

Electives

Additional Electives, if necessary, for a total of 60 credits

NHCC Residency and GPA

15 Credits must be earned at NHCC

Total Credits Required	60
-------------------------------	-----------

Program Overview

2022-2023

The Associate of Arts Psychology Transfer Pathway will introduce students to the key concepts, principles and overarching themes of psychology. Students will explore scientific inquiry and critical thinking to interpret psychological phenomena and tackle ethical and social responsibilities.

Completing the Psychology Transfer Pathway AA, degree at NHCC fulfills the Minnesota Transfer Curriculum requirements, and the American Psychological Association Learner Outcomes for the Undergraduate Major in Psychology at the foundational level. It prepares students to articulate as psychology majors, at the junior level, at any of the seven Minnesota State Universities.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 7634930555 or through the Minnesota Relay Service at 18006273529.

Accreditation

North Hennepin Community College is accredited by the:
Higher Learning Commission of the North Central Association of Colleges and Schools

Program Overview

2022-2023

The Certificate in Racial Justice and Social Transformation is designed to provide students with the knowledge to be advocates for racial justice in various career paths and lead others to do the same.

Program Outcomes

Upon completion of this certificate students will be able to:

1. Apply anti-racist approaches to personal and real-world problems to model racial justice advocacy (MnTC 7d, ELO 3d)
 2. Explain the social construction of race and systems of oppression in the United States (MnTC Goal 7b and ELO 1)
 3. Give examples of structural racism and the perpetuation of social inequities (MnTC 7b and ELO 3c)
 4. Identify aspects of Critical Race Theory within US political, social, cultural, and economic institutions (ELO 3c)
 5. Explain how one's racial and social identities can dismantle systemic injustices or uphold oppressive practices (MnTC Goal 7c and ELO 3d)
 6. Explain anti-racism and the qualities of social justice agents (MnTC 7d and ELO 3c)
-

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the [iseek](http://www.iseek.org) and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Additional Electives, if needed, to reach 40 total MnTC credits: AMST1010(3), AMST1020(3), AMST2210(3), AMST2220(3), ANTH1010(3), ANTH1020(3), ANTH1130(3), ANTH1140(3), ARBC1030(3), ARBC1101(4), ARBC1102(4), ARBC2201(4), ART1010(3), ART1020(3), ART1040(3), ART1050(3), ART1101(3), ART1102(3), ART1160(3), ART1170(3), ART1270(3), ART1301(3), ART1302(3), ART1310(3), ART1320(3), ART1340(3), ART1341(3), ART1361(3), ART1362(3), ART1401(3), ART1402(3), ART1550(3), ART1601(3), ART1602(3), ART1650(3), ART1770(3), ART1810(1), ART1820(2), ART2180(3), ART2190(3), ART2300(2), ART2611(3), ART2612(3), ART2640(3), ART2740(1), ART2750(1), ART2780(1), ART2781(1), ART2782(1), ART2800(1), ART2820(1), ART2860(1), ART2900(1), ART2970(1), ASL1101(4), ASL1102(4), ASL1300(3), ASL2201(4), ASL2202(4), BIOL1000(4), BIOL1001(4), BIOL1002(4), BIOL1030(4), BIOL1101(4), BIOL1102(4), BIOL1120(3), BIOL1130(4), BIOL1140(4), BIOL1160(4), BIOL1200(4), BIOL1350(3), BIOL1360(4), BIOL1600(1), BIOL1610(1), BIOL1650(1), BIOL2020(4), BIOL2030(4), BIOL2100(4), BIOL2111(4), BIOL2112(4), BIOL2121(4), BIOL2360(4), CHEM1000(4), CHEM1010(4), CHEM1030(4), CHEM1061(4), CHEM1062(4), COMM1010(3), COMM1110(3), COMM1210(3), COMM1310(3), COMM1410(3), COMM1510(3), COMM1550 (3), COMM1610(3), COMM1710(3), COMM1810(3), COMM1910(3), COMM2610(3), ECON1050(3), ECON1060(3), ECON1070(3), ENGL1111(3), ENGL1112(3), ENGL1150(3), ENGL1200(4), ENGL1201(4), ENGL1202(2), ENGL1250(2), ENGL1400(3), ENGL1450(3), ENGL1900(3), ENGL1950(3), ENGL2010(3), ENGL2020(3), ENGL2030(3), ENGL2150(3), ENGL2250(3), ENGL2270(3), ENGL2300(3), ENGL2310(3), ENGL2320(3), ENGL2330(3), ENGL2340(3), ENGL2350(3), ENGL2360(3), ENGL2370(3), ENGL2380(3), ENGL2390(3), ENGL2410(3), ENGL2450(3), ENGL2460(3), ENGL2540(3), ENGL2550(3), ENGL2560(3), ENGL2570(3), ENGL2580(3), ENGL2590(3), ENGL2900(3), ENGL2950(3), GCST1030(3), GCST1040(3), GCST1210(3), GCST1211(3), GCST1212(3), GCST1213(3), GCST1220(2), GCST1301(3), GCST1320(3), GCST1501(3), GCST1502, GCST1503(3), GCST1504(3), GCST1501(3), GCST1700(3), GCST1978(3), GCST1964(4), GCST2250(3), GCST2510(3), GEOG1000(2), GEOG1010(3), GEOG1040(3), GEOG1100(3), GEOG1190(3), GEOL1010(2), GEOL1020(2), GEOL1030(2), GEOL1040(2), GEOL1110(4), GEOL1120(4), GEOL1130(4), GEOL1150(4), GEOL1160(4), GEOL1850(3), GEOL1851(1), GERM1030(3), GWS1501(3), GWS1502(3), GWS1503(3), GWS1504(3), GWS1505(3), HIST1010(3), HIST1020(3), HIST1030(3), HIST1110(3), HIST1120(3), HIST1130(3), HIST1140(3), HIST1200(3), HIST1210(3), HIST1220(3), HIST1230(3), HIST1240(3), HIST1270(3), HIST1700(3), HIST1800(3), HIST1900(1), HIST2500(3), HIST2600(3), HIST2700(3), HUM1210(3), INTD1030(3), INTD1040(3), INTD1210(3), INTD1211(3), INTD1212(3), MATH1010(3), MATH1031(3), MATH1032(3), MATH1080(3), MATH1090(4), MATH1130(3), MATH1140(3), MATH1150(3), MATH1160(4), MATH1170(4), MATH1180(5), MATH1190(5), MATH1200(3), MATH1221(5), MATH1222(5), MATH2010(3), MATH2220(5), MATH2300(4), MATH2400(4), MUSC1130(1), MUSC1160(1), MUSC1170(1), MUSC1180(1), MUSC1200(3), MUSC1220(3), MUSC1241(3), MUSC1242(3), MUSC1300(3), MUSC1320(1), MUSC1350(3), MUSC1370(3), MUSC1500(2), MUSC1501(2), MUSC1502(2), MUSC1510(1), MUSC1560(1), MUSC1600(2), MUSC1610(1), MUSC1800(2), MUSC1801(2), MUSC1802(2), MUSC1810(1), MUSC1830(1), MUSC1850(1), MUSC1860(1), MUSC1870(1), MUSC2010(2), MUSC2170(3), MUSC2180(3), MUSC2241(3), MUSC2242(3), MUSC2970(1), NSCI1000(4), NSCI1010(1), NSCI1020(1), NSCI1030(1), NSCI1050(4), NSCI1060(3), NSCI1061(1), NSCI1070(3), NSCI1071(1), NSCI1110(4), NSCI1120(4), PHIL1010(3), PHIL1020(3), PHIL1030(3), PHIL1040(3), PHIL1050(3), PHIL1060(3), PHIL1070(3), PHIL1080(3), PHIL1110(3), PHIL1120(3), PHIL1200(3), PHIL1210(3), PHIL1220(3), PHIL1230(3), PHYS1000(4), PHYS1030(4), PHYS1050(4), PHYS1060(3), PHYS1061(1), PHYS1070(3), PHYS1071(1), PHYS1120(4), PHYS1140(3), PHYS1201(5), PHYS1202(5), PHYS1231(4), PHYS1232(4), PHYS1400(3), PHYS1410(1), PHYS1450(3), PHYS1460(1), PHYS1601(5), PHYS1602(5), POLS1100(3), POLS1140(3), POLS1600(3), POLS1700(3), POLS2130(3), PSYC1110(3), PSYC1150(3), PSYC1160(4), PSYC1165(3), PSYC1170(3), PSYC1210(3), PSYC1220(3), PSYC1250(4), PSYC2110(3), PSYC2320(3), PSYC2330(3), PSYC2340(3), PSYC2350(3), SOC1110(3), SOC1130(3), SOC1710(3), SOC1750(3), SOC2110(3), SOC2200(3), SOC2210(3), SOC2410(3), SOC2730(3), SPAN1030(3), SPAN1101(5), SPAN1102(5), SPAN2201(5), SPAN2202(5), SOC2750(3), TFT1200(3), TFT1210(3), TFT1250(3), TFT1260(3), TFT1270(3), TFT1280(3), TFT1310(3), TFT1320(3), TFT1350(3), TFT1500(3), TFT1510(3), TFT1520(3), TFT1531(3), TFT1532(3), TFT1540(3), TFT1600(1), TFT1610(1), TFT1710(3), TFT2010(3), TFT2500(3), TFT2950(1)

Total Credits Required

60

Program Overview

2022-2023

The Sociology Transfer Pathway AA provides students with a powerful option: the opportunity to directly transfer to a designated Sociology bachelor's degree program at one of seven Minnesota State universities. Students who transfer with this AA degree can enter with junior standing and may complete the bachelor's degree with an additional 60 credits.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four year college by following the pre major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.

- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four year period preceding their date of graduation.

Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Courses Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Equal Opportunity Employer and Disability Access Information North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. Spanish Language Certificate

In today's global world, familiarity and proficiency in a second language can help you stand out in the job marketplace. The Spanish Language Certificate is designed to introduce students to the Spanish language and culture, and can complement students who are already in the workforce, and/or prepare students pursuing a bachelor's degree in Spanish. With just three courses, students can complete the certificate in two semesters.

Spanish Language Curriculum

Curriculum

Program Courses

Course Code	Title	Course Outlines	Goal Areas	Credits
SPAN 1030	Spanish and Latin American Culture	View-SPAN 1030	n/a	3
SPAN 2201	Intermediate Spanish I	View-SPAN 2201	n/a	5
SPAN 2202	Intermediate Spanish II	View-SPAN 2202	n/a	5

NHCC Residency and GPA

4 Credits must be earned at NHCC	
Total Credits Required	13

Program Overview

2022-2023

The purpose of the Spanish Certificate is to prepare students who wish to gain a fair command of the Spanish language and understand the culture of the Spanish speaking world. This certificate is appropriate for students who are currently employed in an area related to the use of the Spanish language. Students who complete this certificate will be able to use the language for communication with Spanish speaking colleagues or customers. Students could include the Certificate on their resume and in a portfolio, indicating a conversational level of Spanish language proficiency. The Certificate helps highlight to employers both in the U.S. and in other countries a student's Spanish language ability and communication skills. This certificate is also applicable to students who are planning to pursue a Spanish major or minor in a four year college or university.

Program Outcomes

- Develop awareness of and articulate the importance of the Hispanic cultures within a global context.
 - Demonstrate broad knowledge of the Hispanic World history and civilization, ancient to present, including knowledge of chronology and significance.
 - Apply appropriate verbal, nonverbal, listening, writing and reading skills in everyday situations.
 - Demonstrate the appropriate use of language structures for communicative purposes in everyday situations.
 - Develop constructive, organized work habits and presentation skills.
 - Be prepared to transfer to and succeed in Spanish major or minor at an upper level academic institution.
-

Theatre Transfer Pathway AFA

Find your place onstage or backstage through NHCC’s Theatre Transfer Pathway AFA. Learn the essentials from experienced faculty and renowned working artists. Core offerings of the Theatre Pathway curriculum establish a strong foundation through courses such as: Acting I and Acting II, Movement & Voice, Stagecraft, Play Analysis, and vital practicum opportunities in performance and stagecraft, which apply course knowledge gained to live production settings. Electives such as Movement & Voice, Digital Video Production, Fundamentals in Directing, as well as offerings in drawing, design, and playwriting will further enhance students’ creative thinking, design, and performance skills. Thrive in an environment that places emphasis on “hands-on,” experiential learning and embraces diverse and inclusive programming.

Program Overview

2022-2023

The Associate of Fine Arts Theatre Transfer Pathways includes rigorous studies in performance and production, along with hands on experience in theatre methods and practices. These studies will allow students to gain a deep understanding and working knowledge of theatre fundamentals. It will also prepare students for direct transfer to an established bachelor's degree program in Theatre. The 40 credits Minnesota Transfer Curriculum (MnTC) is completed with the AFA degree to assist the transfer to the MN State University system via the Theatre Transfer Pathways Program.

Minnesota State Universities: Bemidji State University, Metropolitan State University, Minnesota State University Mankato, Minnesota State University Moorhead, Southwest Minnesota State University, St. Cloud State University, Winona State University.

Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- identifying in an historical, cultural and societal perspective the genres of theater with exemplary authors and works

Intellectual and Practical Skills, including:

- analyzing and effectively communicating stylistic elements of theater pieces and significant authors, including structural parameters, language, aesthetic factors, and interdisciplinary requirements
- demonstrating technical proficiency and artistic synthesis in vocal, physical and emotional development in performance
- experiencing multiple modern and classical approaches to performance, script interpretation, and character formation
- using a wide range of creative and critical approaches to relate theater art to society

Personal and Social Responsibility, including:

- the ability to work independently and collaboratively in a high pressure creative environment
- understanding cultural differences in theater practices

Integrative Learning, including:

- participating in theatrical productions at varied levels including design, makeup, stagecraft, and production
- demonstrating a required level of proficiency in acting and directing
- investigating careers in the theater arts

Be prepared to transfer to a four year institution in this discipline.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

An Associate of Fine Arts (A.F.A.) degree is intended for students whose primary goal is to complete a program in a designated discipline in fine arts. The A.F.A. degree is designed for transfer to a baccalaureate degree.

Completion of an A.F.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Developmental Coursework Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

Program Overview

2022-2023

The Video Game Studies Certificate centers on artistic design, visual narratives, communication skills, and critique of games, at both a personal and societal level. Students will develop audience analysis and teamwork skills, engage in the development of game narratives, and learn to analyze the impact of existing and emerging game technologies.

Program Outcomes

1. Articulate the connections between different professional roles within the video games industry, including but not limited to artists, coders, promoters, and reviewers (ELO 2a, 4d).
 2. Explain the impact of the history and development of the video games medium on social and cultural interactions (ELO 2a, 3b).
 3. Demonstrate how to adapt game development related messages to different audiences (ELO 2b, c).
 4. Compare and contrast different games in terms of formats, narratives, and design (ELO 2a, 4d).
 5. Analyze video game narratives as they relate to communication processes and cultural variations in use and representation (ELO 4b, d).
 6. Develop an artistic, communicative, and narrative concept for an original video game (ELO 4b, d).
-

Program Overview

2022-2023

The Wellness Coach certificate aims to prepare students to be ready to employ health and wellness programs to individuals, including but not limited to weight loss, lifestyle coaching and behavior change, disease risk prevention, and athletic performance training.

The program is rooted in behavior-change science and the principles of lifestyle medicine and addresses all the core competencies of health and wellness coaching within a single learning experience. Students will learn practical and effective strategies that can be implemented to facilitate lifestyle change and positively impact health and well-being.

This program is for exercise professionals and even those in the clinical setting who want to learn and practice active listening, motivational interviewing, and client-centered goal-setting as powerful tools to help others take charge of their health and wellness, regardless of age, gender, and race.

Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World.

Apply principles, skills, and methods related to biomechanics, exercise physiology, health promotion, exercise prescription and sport psychology.

Intellectual and Practical Skills, Including

- Inquiry and analysis - Apply the clinical and epidemiological evidence linking physical activity and exercise to mental and physical health.
- Critical and creative thinking - Apply the scientific method to solve problems related to physical activity and health.
- Written and oral communication - Utilize oral and written communication that meets appropriate professional and scientific standards in the field of Kinesiology/Exercise Science.
- Quantitative literacy - Evaluate the effectiveness of human movement using mechanical principles.
- Information literacy - Associate the organic, skeletal, and neuromuscular structures of the human body to psychological factors associated with diverse physical activities.
- Teamwork and problem solving - Work effectively in teams by valuing collaboration, providing service to others, and developing relational techniques for lifelong learning and problem solving.

Personal and Social Responsibility and Engagement, Including

- Civic knowledge and involvement – campus, local and global Apply exercise science related skills to real-world problems through empirical research, internships, field experience, and/or service learning.
- Intercultural knowledge and competence - Demonstrate leadership and social responsibility to improve quality of life for others and ensure equitable access for diverse groups by creating appropriate environments to initiate and maintain a physically active, healthy lifestyle.
- Ethical reasoning and action - Model behavior consistent with that of a Kinesiology professional, including 1) advocacy for a healthy, active lifestyle, 2) adherence to professional ethics, 3) service to others, 4) shared responsibility and successful collaboration with peers, and 5) pursuit of learning beyond NHCC.
- Foundations and skills for lifelong learning - Safely Develop an individualized exercise prescription based on scientific principles and appropriate evaluation techniques designed to reduce the risk of chronic disease and avoid injuries.

Integrative and Applied Learning, Including

- Synthesis and advanced accomplishment across general education, liberal studies, specialized studies and activities in the broader campus community. Assimilate, analyze, synthesize and integrate concepts related to the exercise science field. Students will also be able to sit for professional certifications related to personal training, including but not limited to those offered by the National Academy of Sports Medicine, the American Council on Exercise, and select others.

Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: [Transfer Information](#)

Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one third of the total credits required for each certificate must be completed at North Hennepin Community College.

Developmental Courses Some students may need preparatory course(s) in Math and/or English.

Courses numbered below 1000 will not apply toward a degree.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ACCT	1000	Small Business Accounting	4	This course is for the student who wants to understand and practice accounting in a small business environment. Topics include: assets, liabilities, equity, revenue, expenses, accruals, deferrals, preparation/analysis of financial statements, fixed assets and cash control. This course does not transfer to four-year colleges.
ACCT	2111	Financial Accounting	4	This course is a study of the accounting principles and concepts used to understand and develop financial statements. Topics include accruals and deferrals, revenues, expenses, assets, liabilities, equities, and cash flows. The course will analyze current industry financial statements from the point of view of investors and creditors for profitability, liquidity and risk.
ACCT	2112	Managerial Accounting	4	Managerial accounting focuses on the three main activities performed by managers: planning, controlling, and decision-making. This course consists of preparing a variety of reports for internal use and analyzing them in the company's decision-making process. Prerequisite: ACCT 2111
ACCT	2230	Computerized Accounting with QuickBooks	3	This course provides a hands-on approach to learning how current (on the market) computerized accounting systems are used and installed. The following modules are covered: general ledger, financial statements, accounts receivable, accounts payable, purchasing, inventory and payroll. Note: Knowledge of accounting debits and credits and CIS 1101 or computer experience is recommended. Prerequisite: Acct 2111
ACCT	2250	Small Business Payroll	2	Students taking this course will prepare and analyze payroll transactions, federal/state payroll tax reports. Prerequisite: Acct 2111
ACCT	2260	Small Business Income Taxes	2	This course will assist the student in understanding corporation and personal (Schedule C) tax requirements. It will also show students what they must do to prepare and maintain tax information for the year end business income tax statements. Prerequisite: Acct 2111
ACCT	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ACCT	2300	Accounting Capstone	4	<p>This final capstone course in the accounting sequence is designed to extend and integrate your understanding of theoretical and practical issues in accounting, including the analytical and decision making processes for business enterprises. Further development of theoretical and practical issues from prerequisite courses and reinforcement of communication skills (writing, discussion, and presentation) are central elements of this course. This course will provide the student with the ability to enter the job market or transfer to a four year school with a good understanding of the accounting functions of a small business. Prerequisites: ACCT 2111, ACCT 2112 and CIS 1220 (or with instructor approval)</p>
ADEV	951	College Reading and Learning Strategies I	4	<p>This course prepares students for success in future college coursework. This course emphasizes learning strategies to improve comprehension and understanding of how various texts are organized. This course requires students to examine their existing learning strategies and introduces students to learning practices, processes, techniques and/or strategies necessary for college success, such as prereading, underlining and annotating, and/or developing study aids. Credit does not apply to a degree. Placement in this class is determined by student's score on the reading assessment test.</p> <p>Students who place into ADEV 0951 are required to enroll in the full reading sequence (ADEV 0951 and ADEV 0952) during the first two terms at NHCC.</p> <p>Students who place into ADEV 0951 are required to enroll in this course during their first term at NHCC.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ADEV	952	College Reading and Learning Strategies II	3	<p>The academic focus of this course is the introduction of critical literacy skills. Students enrolled in this course are offered extended practice with various literary and informational texts. Students will be expected to produce written products that demonstrate their comprehension of these texts. Students who successfully complete this course will have acquired learning strategies for comprehending and studying a variety of college-level materials. Credit does not apply to a degree.</p> <p>Placement in this class will be determined by student's reading assessment score and/or successful completion of ADev 0951.</p> <p>Prerequisite: For Nursing program students, ADEV 0951 with a grade of B better OR equivalent reading assessment test score. For non-nursing program students, ADEV 0951 with a grade of C or better OR equivalent reading assessment test score.</p>
ADEV	1950	Reading Texts Critically	3	<p>This course will focus on developing critical literacy and critical thinking strategies necessary for dealing efficiently and effectively with different kinds of college reading assignments. This course lays the foundation for other courses which students will need to use critical thinking.</p>
ADEV	1990	Topic:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
ADEV	1051	Academic Learning Strategies	1	<p>This course introduces students to the principles of learning and critical thinking required for academic success. The focus of the course will be the elements of learning related to emotional intelligence including anxiety, attitude, concentration, motivation, and metacognition. The course will provide techniques and strategies to improve self-regulation to include time management and procrastination. The students will be introduced to campus resources that designed to help students succeed.</p>
ADEV	1052	Academic Learning Strategies II	1	<p>This course provides an overview of efficient study habits and is intended for study who which to improve their academic study skills. It emphasizes study strategies that will assist students in making a smooth transition to college level study. Topics include: active listening and effective notetaking, test preparation and test taking strategies, memory and concentration skills, and creating effective study tools.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ALTH	1020	Phlebotomy Technology	4	In this course, you will learn about the role of the phlebotomist in healthcare and learn the skills necessary to obtain a job as phlebotomist. You will learn about the healthcare setting including basic medical terminology and human anatomy as it applies to the phlebotomist role. You will learn about and practice infection control and safety, healthcare ethics, blood collection procedures, special collection procedures, specimen processing, point-of-care testing, and quality assurance. This course will prepare you to perform the duties of a phlebotomist in a hospital and/or clinic setting.
ALTH	1025	Phlebotomy Practicum	2	In this course, you will apply the phlebotomy skills learned to the healthcare setting. You will be in a hospital or clinic setting and will perform the tasks of a phlebotomist including blood draws, special collections, and specimen processing as well as interact with patients and members of the healthcare team.
ANTH	1010	Introduction to Anthropology: Cultural Anthropology	3	This course examines the nature of culture by studying the forms of conventional behavior (language, ideology, social organization, and technology) and their material manifestations. It also seeks to explain the variation in cultures of representative ethnic groups and societies of present and recent past in terms of ecological adaptation and cultural evolution.
ANTH	1020	Intro to Anthropology: Physical Anthropology, Archaeology & Prehistory	3	This course studies the relationship of prehistoric physical and cultural origins and development of humankind to the establishment of the first civilizations of the Old and New worlds. It examines the archaeological evidence for the theory of bio-cultural evolution, which helps to explain both the prehistoric developments and much of the cultural variation that is in the world today. The course does include a lab-like experience.
ANTH	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ANTH	1130	The Archaeology of Ancient Europe	3	<p>Anthropology is concerned with the many ways that humans have adapted to their physical and social environments, including the systems of meaning and social organization that they use, as well as the historical development of those adaptations. There are a number of subfields within Anthropology in America: (Archaeology, Physical Anthropology, Linguistics, and applied Anthropology), and this course focuses on the remote past of Europe before the advent of writing (history), as revealed through archaeological research. We will focus primarily on Temperate Europe (north of the Alps), but to do so we will repeatedly run into the sophisticated cultures of the Mediterranean Basin. Evidence will be considered starting with the first people in Europe, through millennia of hunting and gathering, and then then the broad changes that occurred with the advent of agriculture and metal use, and the increasing societal complexity, ending with the coming of the Romans who brought "civilization" to their northern neighbors.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ANTH	1140	Anthropology of Religion	3	<p>This course involves the study and comparison of religious institutions from a wide variety of cultures. We will consider the wonderful array of beliefs and practices of humanity. We will consider religion, magic, and witchcraft, and how these cultural constructions shed light on the societies in which they were created. Through seminar-style discussions of a variety of essays on religion and some videos, students will engage with the material on a deeper level than they normally would in a lecture format. Throughout the course, students will learn about the development of a wide variety of religious group identities, and their changing meanings across a wide range of cultures, and periods of history. They will learn about the dynamics of social stratification that religious groups experience today. Students will study the diversity of religion, and the racism and bigotry that often plagues peoples ideas and behavior towards other religious groups. This material will bring to light the institutional exclusion and discrimination that certain groups have endured. Through the consideration and discussion of numerous religious groups of America and beyond, students will learn the role(s) that these groups have played in our culture, and contributions they have made. Through presenting their two research projects to the class, students will exercise communication skills that involve great tact in discussing religious practices in a neutral and objective manner. We will practice those skills every class, in our seminar discussions of the reading. These discussions will get directly at the disparate explanatory systems offered by world religions, compare them, and critique the various views. In these ways, students will be using the method and data that anthropologists employ in the investigation of religion.</p>
ARBC	1030	Arab Cultures	3	<p>This course discusses the history and culture of the Arab world, examining various aspects of this rich and venerable civilization, the importance attached to education, the achievements of Arab science and also the internal conflicts, widespread poverty, and the role of women. This course is also an introduction to how the religion of Islam created a far-flung Arab Muslim world that embraces lands reaching from the shores of the Atlantic to the Indian Ocean, and examines how social institutions and culture are intertwined with politics and economics. This course is taught in English; no previous knowledge of Arabic language is required.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ARBC	1101	Introduction to Arabic	4	<p>Designed for the student with little or no previous experience with a second language, this course gives students the opportunity to learn basic communication needs in Arabic. The four language skills of reading, listening, writing, and speaking will be implemented and practiced. The class begins with learning the Alphabet and progresses into learning reading elementary level Arabic, writing simple sentences, speaking basic and introductory idioms. Listening drills and exercises are employed in the class. Students will also learn basic grammar and its applicability, especially in writing.</p> <p>The course also introduces students to the culture of the Arabic-speaking people. Some aspects of Arab heritage, traditions, and customs will be highlighted and explained.</p>
ARBC	1102	Beginning Arabic II	4	<p>This course is the second of two-course series to fulfill the needs of our students as well as our community. It is designed for non-native beginners to learn formal Arabic also known as Modern Standard Arabic.</p> <p>Prerequisite: Arbc 1101</p>
ARBC	1990	Topic:	3	<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
ARBC	2201	Intermediate Arabic I	4	<p>This course continues the development of the multiple language skills introduced in the beginning sequence. The student is introduced to the literature and culture of Arabic speaking nations.</p> <p>Prerequisite: Arbc 1102 or equivalent</p>
ART	1101	Photography I	3	<p>This is an introduction to the fundamentals of black and white photography. Both technical and creative skills are developed in the use of the camera, exposing and developing film, enlarging and finishing the black and white photograph. Class critiques help articulate individual visual growth while artist presentations and field trips to galleries and museums help acquaint students with significant photographers. Students use film-based cameras with adjustable shutter speed and f-stop. A limited number of cameras are available for rental.</p>
ART	1102	Photography II	3	<p>This course is for students with a basic background in camera operations and darkroom procedures. There is a greater emphasis on the photograph as a fine print, the student's personal growth and perceptions in the medium. Class time will include discussions, slide shows and guest lectures. Students must have a film-based camera with adjustable shutter speed and f-stop. Course may be repeated for credit. Prerequisite: Art 1101</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1160	Digital Photography	3	A logical sequence to Art 1101 or 1140, this class emphasizes the computer as a digital darkroom to create photographic images through the traditional camera or a digital camera.): Course content includes an overview of basic photographic techniques and a rigorous examination of Adobe Photoshop through assignments and personal exploration, class critiques and artist presentations, to help student understanding of photographic art. Students must have their own digital or analog camera.
ART	1301	Two Dimensional Design I	3	This course introduces a visual vocabulary and tools essential for all flat design and space, and investigates basic principles related to composition, pattern making, illusory space, and self expression. Various techniques and materials are explored including paint, pencil, pen, brush, and pastels. This course also introduces students to artists and design elements from a variety of cultures. 3 Strongly recommend taking Drawing I before this course.
ART	1302	Two Dimensional Design II	3	This course expands the study of flat design with emphasis on solving design problems. Students will be engaged in the more complicated tasks of integrating contrasting elements such as nonobjective and objective shapes, naturalism and idealism, shape and mass. Personal expression, design development and visual thinking as well as specialized techniques and materials are included. Design from different cultures and different artists will be discussed. 3 Prerequisite: Art 1301
ART	1401	Drawing I	3	This course introduces basic drawing concepts such as line, value, gesture, proportion, composition, and space; and techniques using traditional and contemporary drawing media. A variety of subjects from still life, architectural forms, nature and the human figure are used as inspiration for the student's drawings. Students will also be introduced to the art of important artists who have used drawing successfully in their work.
ART	1402	Drawing II	3	This course continues the study of drawing concepts using various media to explore color, the human figure, and representational as well as non-representational subject matter. Personal expression is emphasized. Students will examine the art of important artists who have used drawing successfully in their work. 3 Prerequisite: Art 1401
ART	2180	Art History: Pre-History to the Age of Cathedrals	3	This course examines painting, sculpture and architecture of cultures from prehistory to the end of the 15th Century. While the emphasis is on developments in Western art, the course includes overviews of the arts of Asia, Africa and the Americas. Museum visits support the lectures and text.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	2190	Art History: Renaissance to 21st Century Art	3	This course examines painting, sculpture and architecture of cultures from the 16th century to the present, as well as new media of the modern era. While the emphasis is on developments in Europe and the United States, the course will include overviews of the arts of Asia, Africa and the Americas. Museum visits support the lectures and text.
ART	2300	Architectural History	2	This course is a survey of the history of Western architecture from pre-history to the present day. The student will gain knowledge and understandings of the characteristics of the architecture of Western cultures, the ideas and intentions which motivated builders, as well as terminology related to architectural design and construction.
ART	2611	Painting I	3	This course is an introduction to the basic skills and techniques of painting. The study of paint and materials, the use of color in painting and the development of ideas are important elements in this class. Exploration of realism, abstraction and contemporary painting are all important aspects of Painting I. Recommended: Art 1340.
ART	2612	Painting II	3	Using advanced painting techniques, this course emphasizes student's development of a personal style. Prerequisite: Art 2611
ART	2642	Watercolor II	3	No course description found 6/4/19 - MR
ART	2800	Painting Workshop	1	This is a basic course in painting. The emphasis of this course is on painting procedures, color use and composition, but students also will explore the connection of art to historical context. Subject matter, visual elements and principles, and technique will be explored.
ART	2820	Drawing Workshop	1	This workshop is an introduction to basic concepts in drawing and visual perception using traditional drawing materials and techniques.
ART	2860	Photography Workshop	1	This basic course is an intensive, personal exploration of various photo-related topics for those who wish a sampler. Topics for separate workshops are color photography, digital photography, nature and landscape photography, among others.
ART	2870	Video Workshop	1	No description found 6/4/19 - MR
ART	2970	Art Appreciation Field Trip	2	This course consists of tours to various cultural centers to experience a variety of art exhibits, lectures, demonstrations and facilities. This course may be repeated for credit. Students will need to provide their own transportation to Twin Cities area museums or galleries.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1990	Topic:	3	This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ART	1310	Three Dimensional Design	3	As an introduction to the basic language of three-dimensional design, this course includes constructive, additive, subtractive and substitution techniques using traditional and contemporary media. Various methods of presentation are explored ranging from small freestanding works to site-specific models and proposals.
ART	1320	Introduction to Sculpture	3	This course is a specialized study on an individual basis in wood, metals, plaster, clay, stone or mixed media. The student will work with the sculptural possibilities of these materials and refine their ability to work in one particular medium.
ART	2740	Jewelry Workshop	1	This workshop is a basic introduction to rudimentary jewelry-making techniques which includes fabrication of metals through hand piercing, sawing, forging, soldering, riveting and forming raw materials such as silver, copper, brass and found objects. May be repeated for credit.
ART	1340	Fundamentals of Color	3	The course teaches fundamental color theory by introducing the physical, perceptual, and artistic aspects of color. The dimensions of color are explored through theory and practice using paint and colored papers. Students also are introduced to the theories of the physiology and the psychology of color reception, cultural taste and preferences as they relate to color choices, and the color usage of well known artists, of art movements, and of different world cultures. Strongly recommend taking Drawing I before this course.
ART	2640	Watercolor	3	This course is an introduction to the basic skills and techniques of watercolor painting. The special characteristics of watercolor application will be explored to create both traditional and abstract results.
ART	2781	Quiltmaking Workshop I	1	This is a basic workshop introducing the processes and technical skills of quilting along with an introduction to artistic principles such as color, texture, line, form, and composition. Students are also introduced to information about the history of quilting and the cultural connections quilting holds within our society.
ART	2782	Quiltmaking Workshop II	1	This is an advanced workshop which further develops the processes and technical skills of quilting along with artistic principles such as color, texture, line, form, and composition. This course may be repeated for credit.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1770	Quilt Arts	3	This class explores the visual and expressive possibilities of quilting as a fine art. Students will solve design problems using fabric. Traditional and non-traditional quilting techniques will be used to enhance personal expression and to create innovative visual communications.
ART	2750	Ceramics Workshop	1	Ceramics Workshop is a basic studio course for art and non-art students which provides a fundamental understanding of the hand building and wheel throwing processes in clay. Ceramics Workshop will introduce all methods of forming clay including pinch, throwing, coil and slab building. This course is repeatable for credit.
ART	1361	Ceramics I	3	Ceramics is an introductory studio course that presents students with a fundamental understanding of the hand building and wheel throwing processes in clay. This course will focus on a creative and imaginative approach to solving visual problems in clay. Ceramics will introduce all methods of forming clay including pinch, throwing, coil and slab building.
ART	1362	Ceramics II	3	Ceramics II is an advanced studio course that presents students with an in-depth understanding of the hand building and wheel throwing processes in clay. This course emphasizes student's development of a personal creative style taking an imaginative approach to solving visual problems in clay. Ceramics II will introduce all methods of forming clay combining pinch, throwing, coil and slab building with comprehensive glazing techniques. Prerequisite: Art 1361
ART	1270	Digital Video Production	3	This course introduces basic video production concepts and techniques with an emphasis on using the elements of motion and sound as creative artistic tools. Students will critically analyze video in terms of genre, context, meaning, visual language and form and then produce and edit their own short projects that explore creative and experimental applications of the medium rather than the traditional mass communication form. Students are encouraged to use their own computer for editing if possible. Basic knowledge of the computer is helpful.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	2900	Studio Arts Capstone Practicum	1	This course is intended for students who have completed a significant portion of coursework in the Studio Arts AFA program and are within a semester of completion. It is a capstone experience in which students will refine their skills in portfolio building, artistic presentation in the professional arts world, resume building, critique skills, exhibition preparation, and use of web resources for artists' representation. Students will work closely with faculty to integrate concepts learned throughout their program into a final portfolio of work in preparation for continued study or work. Prerequisites: Art 1301, Art 1310, Art 1340, and Art 1401
ART	1170	Advanced Photography	3	This course blends traditional and digital photography introducing a variety of both film based and digital technology to support creative and personal visual investigation. Prerequisites: Art 1101 and/or Art 1160
ART	2810	Publication Design	2	This course introduces the history and techniques of publication design and production and advances the student's skills in on-paper publication layout and page design. Concepts in multi-page media formats such as magazines and books are studied through lectures, presentations and studio projects. Printing technology is explored from design to production, as well as budgeting and the economics of book production. Through experimentation and group discussions, students will learn to conceptualize visual ideas and refine their design concepts professionally and appropriately for these media formats to produce Under Construction, an actual book.
ART	2550	Typography	3	This course explores basic concepts of typography including: history, anatomy and mechanics, copyfitting, legibility, syntax, and communication within the context of process-oriented, problem-solving projects. Students will learn the effective use, importance and impact of typography in graphic design. This is an advanced course in the techniques of typography for graphic design. Students work on projects that involve complex visual ideas and are encouraged to develop a personal style in their visual communication. Students will demonstrate and incorporate the techniques and theories of typographic design in design projects, develop skill in typographic design and proficiency using computer graphics in design projects, critically and competently evaluate and analyze design projects that incorporate typographic elements, and creatively solve typographic design problems.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	2540	Illustration	3	This course introduces students to illustrating for major areas of the commercial illustration marketplace. Students will be encouraged to develop illustrative skills that can be applied to design. Through creative problem solving and research, students will learn to develop and refine imagery for specific audiences.
ART	1820	Studio Art Workshop	2	<p>The 2-credit Studio Art Workshop is a studio course that presents to art and non-art students the fundamentals required to complete projects in a particular art medium or art application process. The class covers fundamental technical use as well as incorporating personal aesthetics into ones output in the medium. In addition, this class helps students see the creative process as a method of developing a concept and solving related problems. Aesthetic Critique and artistic reflection is a component of this class.</p> <p>NOTE: the particular medium used will be noted on the semester schedule but will not show up in the student transcript. Students desiring to transfer this course may need to obtain a copy of the course syllabus to show the particular medium emphasized in a given semester.</p> <p>This course is repeatable for credit.</p>
ART	1810	Studio Art Workshop	1	<p>The 1-credit Studio Art Workshop is a basic studio course that presents to art and non-art students the fundamentals required to complete projects in a particular art medium or art application process. The class covers fundamental technical use as well as incorporating personal aesthetics into ones output in the medium.</p> <p>NOTE: The particular medium covered in a given semester will be noted on the semester class schedule but will not show up in the student transcript. Students desiring to transfer this course may need to obtain a copy of the course syllabus to show the particular medium emphasized in a given semester.</p> <p>This course is repeatable for credit.</p>
ART	1980	Internship		<p>This course will provide the flexibility of offering a discipline specific internship opportunity. It is designed to ready the student for transition from the classroom to the work place, emphasizing practical skill development and additional development of the students organizational, communication and critical analysis skills. The course may be repeated for credit.</p> <p>Permissions from instructor is required.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1704	Casting - Bench Jewelry	1	This class introduces a variety of casting methods with an emphasis on lost wax casting. Students will learn to sprue and invest wax models, calculate metal requirements, control the burnout cycle and cast projects.
ART	1705	Repair 1 - Bench Jewelry	1	This class covers the most common jewelry repairs. Students will learn ring sizing, chain repair, prong repair, and clasp repair.
ART	1701	Fabrication 1 - Bench Jewelry	1	This class introduces the basic equipment used in jewelry fabrication, such as hand tools, torches, flex shafts, polishers, rolling mills. Students will learn how to lay out, drill, pierce, file, form, solder, and polish metal. Students will fabricate jewelry pieces such as rings, earrings and bezel pendants. No experience required
ART	1702	Fabrication 2 - Bench Jewelry	1	Continuing and extending the skills attained in Fabrication I, this class introduces advanced fabrication techniques used in jewelry fabrication, such as soldering, pierced overlays and intricate patterning skills. Prerequisite: ART 1701
ART	1703	Fabrication 3 - Bench Jewelry	1	Continuing and extending the skills attained in Fabrication II, this class builds on advanced fabrication techniques used in jewelry fabrication. Prerequisite: ART 1702
ART	1706	Repair 2 - Bench Jewelry	1	Building on the skills acquired in Repair 1, students will be introduced to more advanced repair problems, such as adding settings, repairing prongs, rebuilding tips, installing spring inserts, replacing a half shank and cleaning up castings. Prerequisite: ART 1705
ART	1707	Settings 1 - Bench Jewelry	1	This class introduces the basic setting concepts of bezel and prong settings, the most common settings used in jewelry. Students will learn to prepare and use pushers, punches, and hammers. Prerequisite: ART 1701
ART	1708	Settings 2 - Bench Jewelry	1	Building on the skills acquired in Repair 1, students will be introduced to more advanced repair problems, such as adding settings, repairing prongs, rebuilding tips, installing spring inserts, replacing a half shank and cleaning up castings. Prerequisite: ART 1707
ART	1709	Polishing and Finishing - Bench Jewelry	1	Students will learn the critical skills of professionally finishing a jewelry project and will be introduced to the theory and practice behind artistic and beautiful finishes on jewelry, using a variety of buffing and polishing tools such as wheels, buffs, brushes, abrasives and compounds. Prerequisite: ART 1701

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1710	Trade Practices - Bench Jewelry	1	<p>This course will introduce students to effective business and resource practices for jewelers, the legalities to know when working in the industry, and industry organizations in which to participate in order to stay current. Students will learn about recycling scrap gold, testing gold, taking in jobs, tool maintenance, health precautions, trade organizations, industry events, insurance, resources, laws, copyrights, trademarks.</p>
ART	1970	Graphic Design Internship Experience		<p>This course facilitates an internship experience between a student, an engaged employer, and provides accountability for both to assess the status of an internship when it is happening. 50-150+ aggregate hours of dedicated, graphic design-specific work with an engaged employer to be completed within a reasonable time-line. Internships may begin and end during any month of the calendar year. Credits will correspond with the aggregate hours of work designated per internship: 50 hours of aggregate work = 1 credit, 100 hours of aggregate work = 2 credits, 150 or more hours of aggregate work = 3 credits. Participating employers must be substantial, preexisting organizations with an organizational purpose/need for graphic design work, and a work culture or mentorship potential that can offer appropriate duties to an intern. Each employer will by nature have differing specific circumstances.</p>
ART	1100	Creative Cloud Essentials	2	<p>An introduction to creating art, designing for print and audience interactivity using Adobe Creative Cloud and/or relevant digital tools from other developers. Students will learn how to use Photoshop, Illustrator, InDesign, and either Dreamweaver or other interactive design software to produce creative graphic projects intended for consumption on paper or screens. Students will learn to use Photoshop to improve digital photos and create original artwork, Illustrator to create original vector-based artwork, and InDesign for page layout and preparation of artwork for personal or commercial printing. They will learn how to use software to engage an audience with interactivity on a screen about a topic of choice.</p> <p>This course is for: beginning artists, freelance artists, professional fine artists, graphic designers, writers, self-employed or small business owners, communication specialists, marketing specialists, and anyone with an interest in learning more about art, graphic design, and Adobe Creative Cloud.</p> <p>Basic computer skills are necessary for success in this class.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	2561	Web Design I	3	<p>This course explores the foundations of interactive design for the (world-wide) web. Using industry-relevant tools, students will learn the fundamentals of designing and building a website. Students will be introduced to the concepts of user interface (UI) design, user experience (UX), and front-end development. Experience with digital photography and image editing (Photoshop) is suggested. Students will demonstrate and incorporate the techniques and theories of web design in design projects, build websites incorporating appropriate file formats, file sizes, functionality, site plan and organizational concepts, develop skill in web design and proficiency using the tools of web design software in design projects, critically and competently evaluate and analyze web projects, creatively solve web design problems and work on a web portfolio.</p>
ART	2562	Web Design II	3	<p>This is the second of two courses focusing on graphic design for the internet (world-wide web) and/or interactivity. This course explores advanced concepts from a graphic designer's perspective. Students will adapt graphic design and illustration to web design using current web design and animation software/technologies. Students will explore web user interface (UI) topics, user experience (UX) topics, web animation techniques, integration of video and sound, and the use of type design in web applications. Students will explore prototyping a web site and working with a developer/programmer. Understand and incorporate the techniques and theories of graphic design, web design and animation projects. Critically and competently evaluate and analyze advanced web design projects. Creatively solve web design problems. Develop skill in project design and computer graphic proficiency using current web technologies.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	2601	Advanced Graphic Design I	3	<p>This course is a study of Graphic Design theory and applications. Students explore the creative process in the development of visual communication and its relationship to creating graphic design ideas. The visual language of design is explored as students design a variety of projects through application of computer graphics and use of software. Students will be taught to understand the techniques and theories of graphic design for design projects, make appropriate creative choices in design and execution of graphic design projects using the design principles presented in this course, demonstrate facility with and appropriate use of graphic design software packages used in this course, evaluate and analyze design projects from the several perspectives including design principles, audience, intent, appropriateness of media choice for the project, and skill of execution using media, generate manageable and appropriate graphic design project solutions from among a large set of possible variables and strategies, and exercise self-motivation and creative problem-solving in addressing design challenges, time constraints, and media limitations of graphic design project management.</p> <p>Prerequisites: Art 1301, Art 1340 and Art 2901.</p>
ART	2602	Advanced Graphic Design II	3	<p>This is an advanced studio course in graphic design. The content and scope of the projects will help students to understand the nature of the graphic design industry as well as the research and content knowledge necessary to achieve professional design solutions. Students will assemble a portfolio necessary for success in the field of professional design. Students will demonstrate and incorporate the techniques and theories of visual design, visual language and graphic design principles in design projects, critically and competently evaluate and analyze design projects, use computer software and hardware effectively to design and develop design projects.</p>
ART	2902	Graphic Design Tools II	3	<p>This course is a continuation of Graphic Design Tools I. Advanced skills in Adobe Photoshop? (color photo manipulation), Adobe Illustrator? (drawing and design) and Adobe InDesign? (page design and layout) are introduced, as well as concepts of design and production workflow.</p>
ART	2901	Graphic Design Tools I	3	<p>This course introduces students to the use and function of industry-standard graphic design software applications Adobe Photoshop, Adobe Illustrator, and Adobe InDesign. Students will learn to effectively use the essential techniques, tools, and principles of each application by emulating a professional approach to design projects. Students will apply problem solving techniques to design projects that simulate real-world design challenges faced in today's graphic design industry.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1550	Video Game Entertainment	3	This course will examine the development of the video game industry and research on social effects of video game play. Issues discussed include video game violence, effects of gender and cultural representation, visual messages in gaming, pro-social relationships, and emerging technologies in gaming.
ART	1010	Art Museum Tour: European Art	1	This course consists of tours to various cultural centers to experience a variety of art exhibits, lectures, demonstrations and facilities. The content of this course centers on historical and contemporary European Art. Students will need to provide their own transportation to Twin Cities area museums or galleries.
ART	1020	Art Museum Tour: World Art	1	This course consists of tours to various cultural centers to experience a variety of art exhibits, lectures, demonstrations and facilities. The content of this course centers on historical and contemporary African, Asian, and Indigenous Art. Students will need to provide their own transportation to Twin Cities area museums or galleries.
ART	1050	Foundation of Digital Imaging	3	Introduction to the technical and aesthetic practices of computer-generated Art as a creative fine arts tool. Student projects explore creative and technical aspects of digital imaging, symbolism and visual content incorporating computer software programs including, but not limited to, Photoshop and Lightroom. Topics included are digital image manipulation, scanning, image composition and inkjet printing. Development of critique and related vocabulary.
ART	1601	Art History I: Ancient to Medieval	3	This course examines painting, sculpture and architecture of cultures from prehistory to the end of the 14th Century. Students will explore the history of the world through visual art and material culture with a global perspective.
ART	1602	Art History II: 15th Century to Contemporary	3	This course examines painting, sculpture and architecture of cultures from the 15th Century to Contemporary. Students will explore the history of the world through visual art and material culture with a global perspective.
ART	1650	Architectural History	2	This course is a survey of the history of Western architecture from pre-history to the present day. The student will gain knowledge and understandings of the characteristics of the architecture of Western cultures, the ideas and intentions which motivated builders, as well as terminology related to architectural design and construction.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ART	1040	Art Appreciation	3	This course introduces the basic concepts of the visual arts, the organization of art forms, and the historical development of architecture, painting, and sculpture with an emphasis on contemporary art. A general world view of art is presented through lecture and discussion. Students will investigate the creative aspects of the visual arts through in-class examples and a field trip to a Twin Cities museum.
ASL	1101	American Sign Language I	4	This course teaches the basics for communication with Deaf and Hard-of-Hearing individuals. The course includes receptive and expressive finger-spelling, signing, conversational behaviors, and various aspects of Deaf Culture.
ASL	1102	American Sign Language II	4	This course is a continuation of ASL 1101. The student's signing and finger-spelling will be increased to improve their signing skills. Prerequisite: ASL 1101
ASL	2201	Intermediate American Sign Language I	4	This course gives students an opportunity to practice their signing skills while increasing their knowledge of various vocabularies, using appropriate body language and facial expression. The course also will prepare students to read signers and will introduce more complex ASL structures. Prerequisite: ASL 1102
ASL	2202	Intermediate American Sign Language II	4	This course gives students an opportunity to increase their listening and signing skills in depth. Students will meet Deaf people in a field trip setting to expose them to the Deaf world. Students may do observations with Deaf and Hard-of-Hearing people approximately three times. Prerequisite: ASL 2201
ASL	1300	Deaf Culture	3	This class provides students with an understanding of the History and Culture of Deaf People. Students will learn about Deaf and Hard of hearing people in the Deaf Community in all areas of the United States and how the culture has progressed since the 1800's.
ASL	1400	Fingerspelling and Numbers	3	Fingerspelling and Numbers course provides students the fundamentals to learn basic letters, words, and numbers in American Sign Language. This course will prepare students to communicate with Deaf and Hard of Hearing people on a basic level. Practice time in class will allow students to easily increase their speed signing.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ASL	1990	Special Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ASL	1320	Black Deaf Culture and History	3	This online course provides students with an understanding of the Black History & Culture of Black Deaf people. Students will learn about Black Deaf & Hard of Hearing people in the Black Deaf Community in all areas of the United States and how the culture has progressed since in 1800's.
BIOL	1000	Life Science	4	The course introduces the breadth of biology from the principles of chemistry to ecology. The production and utilization of biological energy is explored at the cellular and organism level. The principles of inheritance and cellular reproduction are explored at the molecular, cellular level and organism levels. The unity and diversity of life and life processes is emphasized. The laboratory focuses on the techniques required to discover biological principles. Activities are hands-on. (3 hours lecture, 3 hours lab).
BIOL	1001	Biology I	4	This course focuses on the concepts of biological chemistry, cell structure and function, cellular metabolism, molecular genetics and heredity reproduction and development. The course is intended for allied health majors and others not requiring a majors-level introductory biology. (3 hours lecture, 3 hours lab).
BIOL	1040	Rocky Mountain Field Biology	4	This course considers field characteristics and ecological relationships of Rocky Mountain flora and fauna. It includes principles of plant and animal anatomy, identification, practical (edible, poisonous wild plants and animals) and economic considerations. Students participate in a nine-day field trip in the Rocky Mountains of Colorado. This course is open to all students. This course will likely and be part of a two or three course package/program and have co-requisite courses.
BIOL	1120	Human Biology	3	This introductory level course provides students with a one semester overview of the structure and function of the human body. The course is open to all students; however, it does not fulfill the human anatomy and physiology requirement for those who are planning to pursue a career in the health sciences. This course fulfills the lab-like experience requirements for MnTC Goal Area 3.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	1200	Current Environmental Issues	4	Using an interdisciplinary approach, this course examines various aspects of natural and human-made ecosystems, human's intervention, and the subsequent impact on society and nature. It emphasizes current problems, values, and projection for the future. The lab involves internet exercises, videos, group discussion, individual and group projects, field trips and other outdoor activities. (3 hours lecture, 4 hours lab) Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension
BIOL	1350	Biology of Women	3	This course is designed to allow students to explore the biological aspects of being female throughout her life cycle from sex cell formation through menopause and aging. Students will also gain an historical perspective of women over the ages including women in science, will be introduced to the nature of science and the scientific method, study the biology of gender differences, gain a multicultural perspective of women's health issues as well as a comprehensive study of female and male reproductive biology. Topics that will be covered include sex cell formation, genetic inheritance, gene expression, sex determination, pregnancy and birth as well as other health issues such pre-menstrual syndrome, birth control, sexually transmitted diseases, and cancer. This course includes a lab-like experience. The course is open to both male and female students. Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension
BIOL	1600	Biology of Nature Series	1	Explore the natural history of Minnesota! A series of courses on topics as diverse as wetlands, wild flowers, edible plants, predatory birds, prairie ecology, and winter biology are offered throughout the year. These one-credit courses are taught on an introductory level. Each course may be taken for one credit.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	1650	Human Biology Series	1	<p>This course provides students with an Intensive overview of sophisticated, timely topics in biology related to the human condition. This course is intended for general audiences. The overview will include development of scientific background for understanding the topic historical perspective, significance of the issue in both a societal and a scientific context, and exploration of the scientific processes related to the topic. These courses include a variety of topics of interest to any student. Topics have included: Bioethics, Biology of Alcoholism, Biology of HIV, Biology of Viruses, Emerging Diseases, and other current topics pertaining to human biology. This course fulfills the lab-like experience requirement for MnTC Goal area 3. Check web site for each semester's topics. This course is open to all students.</p> <p>Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension</p>
BIOL	2020	Animal Biology	4	<p>This course provides a framework for understanding the phylogenetic relationships among the major groups (phyla) of animals. Knowledge of the ecology, morphology, and evolutionary history of the phyla informs the student's understanding of how diverse groups of animals have solved the common problems of existence (e.g., feeding, movement, respiration, and reproduction) and how their solutions have given rise to increasing levels of structural complexity. The laboratory is an integral part of the course; activities are hands-on and require dissection of preserved animals.(3 hours lecture, 4 hours lab) Pre-requisite: Biology 1001/1101 and Biology 1002/1102 with a grade of C or better, or consent of the professor.</p>
BIOL	2030	Plant Biology	4	<p>This course is an introduction to plant biology, and is intended for students majoring in biology and related fields. The course includes a survey of the major taxonomic groups of plants, fundamentals of plant anatomy, physiology, reproduction and development, evolution, and systematics. (3 hours lecture, 3 hours lab)</p> <p>Prerequisite: Biol 1001/1101 and Biol 1002/1102 with a grade of C or better, or consent of the professor.</p>
BIOL	2100	Microbiology	4	<p>This course is a study of bacteria, viruses, fungi and protozoa, infection, immunity, human diseases and microbiology of food and water. Laboratory exercises stress detection, isolation and control of microorganisms. (3 hours lecture, 3 hours lab)</p> <p>Prerequisite: Biol 1001 or 1101 with grade of "C" or better</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	2111	Human Anatomy and Physiology I	4	<p>This course is the first course of a two-course sequence. The course offers students a comprehensive study of the structure and function of the human body in a classroom and laboratory setting. Topics include anatomical terminology, homeostasis, cell structure and function, histology, as well as the anatomy and physiology of the following organ systems; integumentary, skeletal, articular, muscular, nervous, special senses and endocrine. Utilization of preserved specimens in the laboratory is a required part of the course. (3 hours lecture, 3 hours lab) Strongly recommend college level reading abilities, a working knowledge of elementary algebra and a medical terminology course.</p> <p>Prerequisite: Biol 1001 or 1101 with grade of "C" or better. Recommendations for student success in this class include: a prior course in medical terminology, college level reading and basic algebra skills</p>
BIOL	2112	Human Anatomy and Physiology II	4	<p>This course is the second course of a two-course sequence. This course offers students a comprehensive study of the structure and function of the human body in a classroom and laboratory setting. Topics include the anatomy and physiology of the following organ systems: circulatory, non-specific and specific defenses, respiratory, digestive, urinary, reproductive and early development. Strongly recommend college level reading abilities, a working knowledge of elementary algebra and a medical terminology course. Utilization of preserved specimens in the laboratory is a required part of the course. (3 hours lecture, 3 hours lab)</p> <p>Prerequisite: Biol 2111 with a grade of "C" or better.</p>
BIOL	1610	Field Ecology	1	<p>This course is a team-taught, field-based introduction to the flora, fauna and biological communities of the woodland, lake, and wetland ecosystems of northern Minnesota and Wisconsin. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. A three-day trip to a university biological field station provides the venue for this hands-on course which is open to all students.</p>
BIOL	1030	Boundary Waters Canoe Area Field Biology	4	<p>This is a lecture, lab, and field based course in which students will study the biological communities and ecology of the mixed coniferous/deciduous forests, lakes, and wetland ecosystems of the BWCA region. The course culminates with an eight to nine day long field trip to the area. This course is open to all students.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	1230	Medical Terminology I - Basics	1	This course is designed to introduce students to the Greek and Latin derivatives used to form medical terminology. Students will learn how to build and analyze medical terms. Emphasis will be placed on proper spelling, definition, usage, and pronunciation of medical terms. Other topics include: prefixes, suffixes, combining forms, introduction to basic biology, and introduction to body systems.
BIOL	1231	Medical Terminology II - Application	1	This course is a continuation of Biol 1230 Medical Terminology I - Basic. The focus is on applying proper medical terminology in reading medical reports, case histories and using the medical dictionary. Prerequisite: Biol 1230
BIOL	1160	Global Environment Field Biology	4	This course will introduce students to the ecology and environmental issues of various locations abroad, and present them within the context of the social, cultural and political conditions of that country or region. Students will examine how various cultures and societies approach ecological and environmental problems. The impact of globalization on these issues will be a major focus of the course. Students will travel to the country or region of study to examine first-hand the issues covered in the course.
BIOL	1990	Special Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
BIOL	1360	Biology of Women with a Lab	4	This course is designed to allow students to explore the biological aspects of being female throughout her life cycle from sex cell formation through menopause and aging. Students will also gain an historical perspective of women over the ages including women in science, will be introduced to the nature of science and the scientific method, study the biology of gender differences, gain a multicultural perspective of women's health issues as well as a comprehensive study of female and male reproductive biology. Topics that will be covered include sex cell formation, genetic inheritance, gene expression, sex determination, pregnancy and birth as well as other health issues such pre-menstrual syndrome, birth control, sexually transmitted diseases, and cancer. The course is open to both male and female students. (3 hours lecture/2 hours lab) NOTE: This course has a lab component that incorporates active learning in a lab setting to support classroom material. Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	1300	Careers in Biology	1	Career choice is based upon your personal values, needs and goals. Through outside speakers, networking and workshops, we will explore the diversity of biology-related careers and industries to match your values and needs. We will learn how to make academic plans that involve course selection and experiences that allow us to achieve our goals. Prerequisite: Biol 1000, 1001 or concurrent enrollment
BIOL	1130	Human Biology with a Lab	4	This introductory level course provides students with a one semester overview of the structure and function of the human body. The course is open to all students: however, it does not fulfill the human anatomy and physiology requirement for those who are planning to pursue a career in the health sciences. This course has a laboratory experience and fulfills the requirements for MnTC Goal Area 3. (3 hours lecture, 2 hours lab)
BIOL	1101	Principles of Biology I	4	This is the first course in a two-semester biology sequence. This course introduces students to the concepts of cell structure and function, cellular metabolism, heredity and genetics. This course is intended for students for biological and physical science majors or those planning to enter a professional program. (3 hours lecture, 3 hours lab) Strongly Suggested Prerequisite: CHEM 1061 or Concurrent Registration with CHEM 1061
BIOL	1102	Principles of Biology II	4	Principles of Biology II is a continuation of Principles of Biology I, and covers fundamental concepts of biology at the organismal level and above. Evolution, principles of ecology, and a survey of biodiversity are the major foci of this course. Students apply these concepts in rigorous laboratory exercises. This course, coupled with Biology I, prepares students for further, advanced studies in the biological sciences. Completion of both courses is a prerequisite for many upper-division biology courses. Audience: Biological and physical science majors or those planning to enter a professional program.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIOL	1140	Introduction to Human Genetics and Origins	4	<p>This course is an introduction to human genetics and origins including evolution and ancestry. Students are introduced to cell biology, inheritance, epigenetics, DNA, chromosomes, mutations, population genetics, genetics of health and behavior, genomics and genetic technologies. Students will use the process of scientific inquiry to analyze personal genetic data from direct-to-consumer DNA testing in a guided independent project. Testing with a direct-to-consumer (DTC) testing company will be done at the start of the course, or students may opt-out and use available genomes. Students who have previously tested with a DTC company should consult with the instructor. This course is suitable for both biology majors and non-majors. (3 hours lecture, 3 hours lab) Prerequisite: ENGL 0990 or a 78 on the Accuplacer Reading Comprehension</p>
BIOL	2360	Genetics	4	<p>We will examine the organization, storage, maintenance, transfer, and expression of genetic information. Molecular data and Mendelian principles will be applied to understand genetics at the molecular, cellular, organismal, and population levels. Skills of professional biologists will be practiced, such as reading primary literature, designing/carrying out experiments, and evaluating qualitative and quantitative data. Prerequisite: BIOL 1101 or BIOL 1001, and BIOL 1102, and MATH 1150, with a C or better in each. Co-enrollment in BIOL 1102 can be considered with instructor permission. 3 hours lecture, 3 hours lab</p>
BIOL	2610	General Ecology	4	<p>We will examine the interrelationships of organisms and their environments, emphasizing the historic development of fundamental principles at the levels of individuals, population, community, and ecosystem through examination of theoretical and empirical findings. Skills of professional biologists will be practiced, such as reading primary literature, designing/carrying out experiments, and evaluating qualitative and quantitative data. Prerequisite: BIOL 1102, and placement above MATH 1150 or successful completion of MATH 1150 or higher, with a C or better.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	1100	Field Inspection	2	<p>This course provides a basic understanding of how to conduct field inspections under the IRC. Students will learn about building components and systems and how building code requirements are applied to these systems during construction. This course is intended for a student working toward a career in the construction industry as an inspector or as a project manager.</p> <p>For BIT students it is recommended that BIT 1000 be completed before this course.</p>
BIT	1300	Plan Review Non-Structural	2	<p>This course is designed to give the experienced construction inspector an understanding of the more detailed requirements of the International Building Code. Topics covered will include standards referenced in the International Building Code, which are considered an extension of the code. Emphasis will be on commercial, industrial, and multi-story buildings.</p> <p>For BIT students it is recommended that BIT 1100 be completed before taking this course.</p>
BIT	1310	Plan Review Structural	2	<p>This course will introduce the techniques of conducting the structural plan review of a building design with special emphasis on wood frame construction, wood beams, joists, rafters, studs, columns and shear-resisting elements. Students will learn how to apply relevant equations to computer load, shear and other relevant structural forces.</p> <p>Ability to deal with equational material is essential, therefore prior math skills are recommended.</p> <p>For BIT students CMSV 2860 or equivalent knowledge is recommended before taking this course.</p>
BIT	1410	Mechanical Inspection	4	<p>This course acquaints the student with the methods and techniques using the Minnesota Mechanical Code in plan review and field inspection of mechanical systems that including heating, ventilation, air conditioning and refrigeration. The course is intended for anyone looking for a BIT degree/certificate, students pursuing a Construction Management degree, or those entering the mechanical inspection field.</p> <p>Ability to deal with equational material is essential, therefore prior math skills are recommended.</p> <p>For BIT students BIT 1000, Math 0901 and CMSV 2860 or equivalent knowledge are recommended before taking this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	1420	Electrical Inspection	2	<p>This course acquaints the student with a working knowledge of plan review and field inspection relative to the international electrical code and the state code. Students will have the opportunity to study electrical design and perform electrical computations.</p> <p>Prior math skills are recommended.</p> <p>For BIT students it is recommended that CMSV 2860 or equivalent knowledge be completed before taking this course.</p>
BIT	1600	Energy Conservation in Building Construction	2	<p>This course presents the principles involved in the design of energy efficient buildings and familiarizes the student with the Minnesota Energy Code and its application to different types of buildings.</p>
BIT	1700	Plumbing Code	3	<p>The objective of this course is to familiarize the student with the Minnesota Plumbing Code, including code provisions, plan review, and field inspection. This course also provides a comprehensive overview of common plumbing materials and practices.</p> <p>For BIT students it is recommended that BIT 1000 be completed before taking this course.</p>
BIT	1800	Housing Field Inspection Fundamentals	2	<p>This course provides both new and experienced housing inspectors with historical and current techniques and materials used in the construction of the structural, electrical and mechanical components within existing residential structures. The course focuses on common construction and installation techniques and equipment, while giving special emphasis to the visible indicators of system deterioration and failure and hazardous and/or non-professional installations.</p>
BIT	1810	Multi Housing	2	<p>This course provides a basic understanding of fire stopping, general fire codes, and state codes which apply to rental and/or multi-housing. Students will learn about plumbing and mechanical elements, management/owners role in property maintenance, and tenant/landlord issues of multi-housing. Right of entry issues and rental licensing programs will be covered.</p> <p>For BIT students it is recommended that BIT 1000 be completed before taking this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	2000	Public Administration for the Code Official	3	The course covers establishment and maintenance of a building inspection department and its relationship with other community departments. Typical problems of functions, duties, intra- and inter-department relations, personnel, budget, legislative, public relations, and records-keeping are discussed.
BIT	2300	Advanced Plan Review Structural	2	This course acquaints the inspector with engineering principles and provides some understanding of their application in the design and plan review areas. The course covers design of wood trusses; steel and wood beams; and columns and reinforced concrete systems. Prerequisite: BIT 1310
BIT	2400	Land Use Zoning	2	This course has been designed to give the student an understanding of land-use and zoning regulations. These regulations include variances, conditional-uses, grading and preliminary plats. Students will learn what a municipal ordinance is and the, state regulations for county and municipal governments to enforce them. Also included are the DNR regulations pertaining to shoreline and flood plane elevations.
BIT	2500	Fire Suppression Systems	2	This course will provide a review of the National Fire Prevention Guidelines along with a review of fire suppression blueprint. Field inspection and design of fire suppression systems also is covered.
BIT	2600	Building Inspection Internship	2	Supervised work experience in a municipal building inspection department provides a variety of experiences for people new to the field. Prerequisite: Consent of instructor
BIT	2020	Legal Aspects of Building Inspection	2	The class will consist of an overview of modern administrative government, legal responsibilities in building inspection, inspector's authority, courtroom procedures, building inspection liability, the application of legal rules pertaining to public negligence, governmental liability and ethics. This class is intended for governmental officials, building inspectors, elected officials, contractors and real estate professionals. For BIT students it is recommended that BIT 1000 be completed before taking this course.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	1305	Advanced Plan Review: Non-Structural	2	<p>This course emphasizes techniques for plan review on commercial, industrial and multi-family structures in accordance with the Minnesota State Building Code. Discussion topics shall include, but not be limited to, occupancy classification, allowable area, types of construction, fire resistive construction, fire protection requirements, exiting and accessibility.</p> <p>For BIT students it is recommended that BIT 1000 and BIT 1300 be completed before taking this course.</p>
BIT	1210	Advanced Field Inspection	2	<p>This course is designed to give the experienced construction inspector an understanding of the more detailed requirements of the International Building Code. Topics covered will include standards referenced in the International Building Code, which are considered an extension of the code. Emphasis will be on commercial, industrial, and multi-story buildings.</p> <p>For BIT students it is recommended that BIT 1100 be completed before taking this course.</p>
BIT	1805	Advanced Housing Field Inspection	2	<p>This course provides students with information about housing construction elements that extend beyond basic structural, electrical and mechanical systems. The primary emphasis is to look at non-technical issues, including legal and constitutional requirements for enforcement as well as personal liability concerns. How to become an effective communicator and how to evaluate the supplemental housing elements are important components of the course. In addition, the course considers the leadership and management skills required for directing a comprehensive municipal housing inspection program. For those students interested in starting a home inspection business, the course offers information to understand marketing, liability and insurance issues.</p> <p>For BIT students it is recommended that BIT 1800 be completed before taking this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	2650	Administering the MN State Building Code	2	<p>The role of the building official is a complex one. Key aspects of a building official's job involves: having a solid understanding of codes and standards, an understanding of how to properly administer these codes and standards, along with working with various federal, state, and local agencies in order to provide conditions for a safe built environment. This course will bring together the concepts that the student has collected throughout the BIT curriculum, and apply this knowledge in a comprehensive review of the role of the building official. This course will provide essential background and understanding of how to properly administer the Minnesota State Building Code. This course is recommended for current and future building officials, inspectors, and other interested parties.</p> <p>Prerequisite: BIT 1000, 1100, 1300 and 2020</p>
BIT	1050	Foundations of Construction Codes and Inspections	3	<p>This course provides an introduction to the field of building inspection and construction codes. Provides an introduction to the field of building inspection and construction codes. The student will learn about the history of codes, what codes and standards are and how they are developed, along with receiving an introduction to plan reading, field inspections, department administrations, plumbing, mechanical systems and information on the industry and types of positions that work in a building department. This course is intended to provide a student with a broad overview of the building inspection industry and construction codes.</p>
BIT	1150	Residential Plan Review and Field Inspections	4	<p>Emphasizes techniques for plan review and field inspections on single family dwellings, townhomes, and accessory structures associated with dwellings, in accordance with the current International Residential Code (IRC). Students will learn about egress components, basic fire and life safety, building construction techniques, building components and systems, and other requirements related to residential dwellings.</p> <p>Prerequisite: BIT 1050</p>
BIT	1250	Commercial Plan Review and Field Inspections	4	<p>Emphasizes techniques for plan review and field inspections on commercial, industrial, multi-story buildings, and multi-family structures in accordance with the International Building Code (IBC). Discussion topics shall include, but not be limited to, occupancy classification, allowable area, types of construction, fire resistive construction, fire protection requirements, building systems and exiting.</p> <p>Prerequisites: BIT 1050 and 1150</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BIT	1900	Legal and Administrative Aspects of Construction Codes	3	<p>Provides students with foundational concepts of modern administrative government, legal responsibilities in building inspection, inspector's authority, courtroom procedures, building inspection liability, the application of legal rules pertaining to public negligence, governmental liability and ethics. Current issues in the industry will be discussed and integrated into the course as appropriate. The course will provide students with an understanding of public administration as it relates to a code official.</p> <p>Prerequisites: BIT 1050 and BIT 1150</p>
BUS	1210	Managerial Communication	3	<p>This course provides students knowledge to become a successful manager through improving and practicing managerial communication skills, processes and strategies. Students will learn to assess their own communication style, adapt their communication style when needed and overcome barriers and miscommunications. Students will also apply improved verbal, nonverbal, listening, writing, presentation, team, conflict and negotiation skills in organizational situations. Technology, how it impacts the way we work and communicate and management's role will be covered. This course is for current or future managers or any student wishing to increase their business communication effectiveness. Emphasis will be placed on management communication techniques that empower employees to do their best work and succeed in business.</p> <p>Recommended: Completion of ENGL 1201 College Writing I and CIS 1101 Business Computer Systems I prior to this course.</p>
BUS	1220	Effective Supervision	3	<p>This course focuses on the skills necessary to be successful when supervising and collaborating with others. Students will apply and develop skills in management functions, decision making, time management, communications, conflict resolution, leadership, quality improvement, motivation and personnel development.</p> <p>BUS 1100 or BUS 1110 or business background recommended</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	1230	Leadership and Teamwork	3	This course provides students with an understanding of the nature of leadership and teams. This course is for anyone who is a leader or wants to be a leader and wants to develop teamwork skills. Emphasis will be on a practical skill-building approach to leadership and teamwork so students develop skills that can be applied outside of the classroom. This course will include the nature and importance of leadership, characteristics of leaders, leadership styles, developing teams, managing virtual teams, ethics and social responsibility, communication, conflict resolution, and culturally diverse aspects of leadership.
BUS	1300	Legal Environment of Business	3	Students will study the basic principles of law and the societal forces which influence the development of these principles. Topics include legal procedure, court structure, ethics, international law, constitutional law, administrative law, contracts, sales, torts, business entities, business regulation, and consumer protection. The focus of the course is on business entities, their employees and customers.
BUS	1310	Business Law	3	This course is an introduction to the legal framework within which business is transacted, not only by business and professional people but also by consumers. Topics include origin of law, ethics, international law, contracts, sales, bailments, negotiable instruments, secured transactions, bankruptcy, real and personal property, agency and business entities.
BUS	1400	Business Mathematics	3	This course provides the students with essential mathematical concepts and practical business applications of pricing, discounts, commission, simple and compound interest, installment buying, consumer credit, depreciation, taxes, simple business statistics, and other business finance situations. Problem-solving skills are developed. Computational math skills are needed.
BUS	1410	Introduction to Business Finance	3	This course is an introduction to the world of finance. Concepts covered include financial management, financial implications of different forms of business organization, understanding and analyzing financial statements and various ratios. Additional topics studied include security markets, interest rates, taxes, risk analysis, time value of money, and the basics of bonds and stocks valuation. Maximizing company value through capital budgeting and selection of appropriate capital structure also are considered. The subject of risk and return, how funds are acquired in the financial markets and how different investment criteria are used to evaluate potential investment opportunities are also examined. Recommended: An accounting course or relevant background.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	1420	Principles of Credit	2	This course includes a study of consumer and commercial credit. Topics include cash, trade, and retail credit; credit regulations; credit standards and decision making; credit organizations; collection policies and practices; and credit as a sales tool.
BUS	1430	Financial Statement Analysis	2	<p>This course provides students with an understanding of financial statements for decision-making about cash flow, capital project investments, and management of a business organization. The course provides a conceptual understanding of financial data reported in various financial statements and of ratio analysis that can be used as analytical tools to interpret and obtain an understanding of the business and financial health of corporations. In addition, students will carry out a comparison of two corporations involved in similar businesses.</p> <p>2 Recommended: An accounting course or some knowledge of accounting.</p>
BUS	1440	Personal Financial Planning	3	<p>This course is designed for personal financial planning. The topics in the course include goal setting, financial aspects of career planning, budgeting, credit cards, debt and money management strategies, types of savings, retirement plans, investments and tax strategies, insurance, factors that affect the home and car buying versus leasing, fundamentals of investments and various investment options. In addition, basics of estate planning for a lifetime of creating wealth will also be covered. BUS 1400 recommended.</p>
BUS	1450	Investments	3	<p>This course is a practical introduction to investments for the individual investor. The course focuses on stocks, bonds, mutual funds, REITs, annuities and other investment alternatives. Emphasis is placed on how to determine the value of stocks and bonds. The course will impart knowledge of practical value to anyone interested in becoming actively involved in managing personal investments. The main goals of the course are to provide understanding of the essential features of various investment instruments, their risk-reward relationships, for whom and under what circumstances the instrument is appropriate and how the market operates for buying and selling the various investment instruments.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	1610	Consumer Behavior	4	This course is an in-depth study of how and why people buy and gain an understanding of the factors influencing a purchase decision and how marketing research can enhance decision-making in this area. Topics include social structures and their effect on consumer purchase behavior, individual adoption and resistance behavior, and marketing efforts based on consumer research. Marketing research procedures, methods, and information sources are identified and evaluated. The ability to perform basic marketing research is emphasized.
BUS	1620	Advertising and Sales Promotion	3	This course is a study of the principles and practices of promotion for the business organization. Students will study the components and the interrelationships of the promotional mix: advertising, sales promotion, personal selling, direct marketing, and public relations. Topics include: an integrated marketing communications strategy, creative techniques of advertising, media strategies, and the evaluation of promotional plans. NOTE: Bus 1600 recommended
BUS	1630	Professional Sales and Management	4	This course provides an introduction to the principles and practices of professional selling and sales management. Topics will include the steps of the sale; customer service; principles, issues and problems associated with managing a sales force; and ethics in selling. Problem solving techniques, monitoring of sales performance and sales simulations are examined. Bus 1600 recommended
BUS	1640	Retail Management	4	This course focuses on the exciting and dynamic nature of the retail industry. Topics include: the changing customer demographics, needs, and shopping behaviors; the development of retail formats, strategies and location opportunities to satisfy these needs; and the emergence of new technologies that dramatically affect retail operations. Students are provided an intensive study of the retail buying, merchandising, and management functions of a retail store. Bus 1600 recommended.
BUS	1700	Introduction to International Business	3	This course is an overview of the international nature of business. The topics include concepts, models and theory of international trade and strategy; review of the economics and politics of international trade and investment; the functions and form of the global monetary systems; strategies and structure of international business, culture and how and why the world's countries differ. Globalization of the world economy and trade and the factors affecting globalization will be thoroughly discussed in this course. The student will develop a global perspective of business and be exposed to interdependency of world trade and the integration of the world economic system.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	2000	Creative Field Project	2	Students will do independent research on a project of their choice under the guidance of an instructor. This is a capstone course for students in a Business program.
BUS	2010	Internship Business	3	This is a capstone course for students in a business program including: Accounting, Business Computer Systems and Management, Marketing, Management or Retailing. It includes practical, on-the-job training in a business or organizational environment under executive supervision and related learning activities. Internships are arranged on the basis of the student's interests and career goals. Please contact the instructor for permission to register for this class.
BUS	1510	Operations Management	3	<p>This course is designed to provide the student with an understanding of the foundations of the operations function in both manufacturing and services. The course will analyze operations from both the strategic and operational perspectives and highlight the competitive advantages that operations can provide for the organization. The emphasis is on decision making (to include business ethics) in areas such as: facility requirements and utilization, control and coordination of resource inputs and outputs, types of transformation/conversion processes, and performance measurements. Diverse activities, such as determining the size and type of production process, purchasing the appropriate raw materials, planning and scheduling the flow of materials and the nature and content of inventories, assuring product quality, and deciding on the production hardware and how it gets used will be the primary content areas of this class.</p> <p>NOTE: Students are strongly encouraged to first take Introduction to Management BUS 1200.</p>
BUS	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	1810	Entrepreneurship	4	<p>In this course you will learn the process of launching a new business venture from an original or innovative idea. The focus will be on the stages of development of the new venture including research, planning, feasibility analysis, capitalization and management. Students will learn how to use resources to start and operate a small business.</p> <p>BUS 1200/2200: Principles of Management, BUS 1600/2600: Principles of Marketing and ACCT 2111: Financial Accounting are recommended to be taken before taking Entrepreneurship.</p>
BUS	1110	Human Relations & Professional Skills	3	<p>This course focuses on the skills necessary to be successful and effective in the workplace. In addition to effectively contributing to a team while working with a diverse population, topics include: understanding human behavior, personal qualities of success, emotional intelligence, communication, workplace etiquette, conflict resolution, self-esteem, and goal setting.</p>
BUS	1100	Introduction to Business	3	<p>This course is designed to provide a broad overview of the functions of the for-profit and non-profit business entity. Business and its environment, organization and management, ownership, finance, production, marketing, human resources, and control systems are reviewed. The course helps students understand the contribution of business to the American economy using current business publications, media, and web resources to focus on applications of current business technologies. Business ethics and teamwork are also examined. This course will enable the student to more intelligently pursue advanced business courses and to choose a business career.</p>
BUS	2600	Principles of Marketing	3	<p>This course provides a market-oriented perspective to business decision-making. Students will learn how marketers provide value in satisfying customer needs and wants, determine which target markets the organization can best serve, and decide upon appropriate products, services, and programs to serve these markets. Topics include branding and product development, pricing strategies, marketing research, promotion, supply chain management, and service marketing. Current trends and developments in marketing practices are analyzed and strategic marketing ideas are implemented within an ethical framework.</p> <p>Courses Recommended: BUS 1100 Introduction to Business and CIS 1101 Business Computer Systems I</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	2200	Principles of Management	3	This course is an introduction to the functions of management: planning, organizing, directing, and controlling. The course explores how each of the management functions are implemented to impact organizational efficiency and effectiveness. Local, national, and global environments are presented as strategic factors to be understood by contemporary managers. The importance of managing competitively and intelligently within a diverse environment is stressed. Situational cases are completed to reinforce decision-making in each of the function areas.
BUS	2100	Business Statistics	4	This course is designed primarily for the business major. This course will introduce you to business statistics, or the application of statistics in the workplace. In this course, you will learn how to apply statistical tools to analyze data, draw conclusions, and make predictions of the future. The course will begin with data distributions, followed by probability analysis, sampling, and finally hypothesis testing. This course is mathematically intensive, and much of what you learn here will deal with things you encounter every day. This course also makes use of spreadsheets, an important tool for working with and making sense of numerical data.
BUS	2620	Fundamentals of Promotion	3	This course is a study of the principles and practices of promotion for a business organization. Students will study the components and the interrelationships of the promotional mix: advertising, sales promotion, personal selling, direct marketing, and public relations. Topics include: an integrated marketing communications strategy, creative techniques of advertising, media strategies, and the evaluation of promotional plans. Students will complete the course with a comprehensive knowledge of and experience with how to develop an integrated promotional strategy.
BUS	2630	Fundamentals of Sales and Service	3	This course introduces the principles and practices of professional selling. Topics will include the steps of the sale, identifying buying motives and customer needs, customer service principles, sales strategies, ethics in selling, and cultivating repeat business through service. Problem solving techniques, monitoring of sales performance, and sales simulations are examined.
BUS	2610	Consumer Behavior	3	This course is an introduction to the world of consumer behavior. Consumer behavior borrows from several social sciences to explain behavior in the marketplace. In this course, students will explore how perceptions, learning, memory, personality, and attitudes influence consumption behavior, how consumption shifts during one's life cycle, and how strong cultural and subcultural influences are on consumers.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
BUS	2640	Fundamentals of Digital Marketing	3	<p>This course will focus on the introduction and insights to a breadth of core and emerging digital channels and disciplines, including search engine optimization, website analytics, search and display ads, email marketing, social media, and social listening/monitoring.</p> <p>Designed to get students to think like a digital marketing professional, Fundamentals of Digital Marketing will help students establish habits for keeping up to date on emerging digital technologies relevant to business and to marketing, tie the use of digital marketing activities to business objectives, and identify and design data sources that allow students to track performance for digital marketing activities.</p> <p>Students will complete the course with a comprehensive knowledge of and experience with how to develop an integrated digital marketing strategy.</p>
BUS	2650	Marketing Capstone	2	<p>This course serves as the capstone for the Marketing Specialist Associates of Applied Science Degree. Students will integrate the concepts, techniques, and knowledge within marketing into a strategic marketing plan for an existing company. The strategic plan will be submitted and presented at the end of the course.</p>
CHEM	1010	Introduction to Chemistry	4	<p>An introduction to the basic concepts of Chemistry along with mathematical application, which include the atomic theory, periodic trends, stoichiometric relationships, kinetic-molecular theory, molecular structure, heat transfer, and chemical properties as related to the gas and liquid and solid phases. Additionally, this course will explore the role that chemistry plays in our personal and professional lives. This course enables students to think critically about current environmental issues in science. The lab portion contains experiments that includes observation, data collection and analysis, and mathematical applications that support the concepts being studied in class. The course is designed for non-science majors or students who have not completed chemistry in high school in order to prepare them to take Chem 1061 or courses in various health programs.</p> <p>Prerequisite: Math 0900 or Math 0980 with a grade of 'C' or better.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CHEM	1061	Principles of Chemistry I	4	<p>This course is a study of the basic concepts of Chemistry, with an emphasis on atomic theory, stoichiometric relationships, kinetic-molecular theory, molecular structure, and chemical bonding as related to the gas and liquid and solid phases. The lab portion with experiments includes observation, data collection, and mathematical applications that support the concepts being studied in class. (3 hours lecture, 3 hours lab)</p> <p>Placement in this class will be determined by student college assessment score and/or successful completion of Math 1150 with a grade of C or better.</p>
CHEM	1062	Principles of Chemistry II	4	<p>A continuation of CHEM 1061, this course emphasizes chemical equilibrium, solution chemistry, acid-base chemistry, precipitation reactions, complex ion formation, oxidation-reduction, and electrochemical reactions. The laboratory portion includes experimental applications of the lecture topics: determination of cation and anion (qualitative) content of unknown mixture, kinetics, acid-base equilibria, solubility, thermodynamics, electrochemistry, and an introduction to nuclear chemistry. CHEM 1061 is required for this course. (3 hours lecture, 3 hours lab)</p>
CHEM	2061	Organic Chemistry I	5	<p>This course is a study of the covalent molecules associated with carbon, emphasizing the mechanism of the reactions and the stereochemistry of aliphatic, alicyclic, and olefinic molecules. Functional groups that will be studied include the saturated and unsaturated hydrocarbons, alcohols, ethers and halides. The laboratory portion of the course includes a thorough study of the basic techniques for the isolation and purification of molecules isolated from natural products and from reaction mixtures. (4 hours lecture, 4 hours lab)</p> <p>Prerequisite: Chem 1062</p>
CHEM	2062	Organic Chemistry II	5	<p>This course is a study of the mechanism of reactions of, and the structure of, all of the carbonyl compounds and their derivatives, and of the carbohydrates, amino acids, proteins, heterocyclics, other natural products sequence reactions, unknown identification and original literature preparations. Spectroscopic analysis will be utilized throughout these experiments. (4 hours lecture, 4 hours lab)</p> <p>Prerequisite: Chem 2061</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CHEM	2073	Introduction to Instrumental Methods and Analysis	4	<p>This course is intended to primarily provide students with an added advantage for employment while pursuing an education toward a career. The students would be taught the proper methods for solution and sample preparation, along with becoming familiar with state of the art instrumentation. They also would be exposed to safety and manufacturing practices that are important in chemical industry. This course aims at making a student versatile with laboratory techniques and would provide a student with an edge over other candidates in the job market for lab assistants' positions. (2 hours lecture, 6 hours lab) Prerequisite: Chem 1061, 1062, and 2061</p>
CHEM	1000	Chemistry and Society	4	<p>This is a basic introduction to chemistry in the everyday world, with emphasis on the role that chemistry plays in personal and professional lives. It is intended for anyone seeking to become a better informed citizen of our technological society. Basic chemical principles will be introduced and their impact on society will be discussed. The course enables students to use concepts of chemistry to think critically about current issues in science and technology. No background in Chemistry or other Natural Sciences is presumed; a strong background in math is not required. Heavy use of the internet for research and communication will be an important component of this course. This course is recommended for non-science majors looking to fulfill the science course with lab component. (3 hours lecture / 3 hours lab)</p>
CIS	1000	Computer and Keyboarding Essentials	3	<p>This is an introductory course to introduce students to the use of basic computer skills and to develop mastery of the computer keyboard. This course covers introductory information about computer hardware and software, working with drives, folders and files, and the use of the microcomputer as a productivity tool. Students will learn to type the alphabet, number, and symbol key by touch. Emphasis is on the mastery and the development of speed and accuracy sufficient to make the computer a communication tool. Simple tables, memos, business letters, and reports are covered. Please contact your instructor for the version of software that will be used.</p> <p>NOTE: No Credit will be given if you have previously completed CIS 1000 (Electronic Keyboarding).</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1101	Business Computer Systems I	3	<p>This course develops computer and digital literacy and emphasizes its importance in today's businesses and society. Through hands-on experience students will gain an understanding of computer concepts, capabilities and applications and be able to implement this knowledge in their professional and personal lives. Computer applications covered include word processing, spreadsheets, presentation graphics, databases, windows/operating system, e-mail use and management, folder and file organization and use of the Internet. Computer concepts covered include understanding computers and mobile devices, how a computer works, managing files, computer and mobile device hardware components, digital safety and security, application programs, input and output devices, digital storage options, ethical practices and Internet basics. Hands-on experience will be provided on computers in the Windows environment using the Microsoft Office Suite including Word, Excel, Access, and PowerPoint. Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.</p>
CIS	1102	Business Computer Systems II	3	<p>Emphasis is on an in-depth understanding of the Microsoft Office Suite beyond the fundamentals of CIS 1101. Students will develop their skills with exercise-oriented learning by completing advanced training working with spreadsheets, word processing, presentation graphics, and relational databases. Students will complete an integrated application project incorporating several software applications into one final document. Computer concepts covered include communication networks, operating systems, the internet, database management, data security, computer careers, and background to become a productive, knowledgeable computer consumer and professional. Hands-on experience suitable for professional purposes or personal use will be provided on computers in the Windows environment using the advanced features of the Microsoft Office Suite including Word, Excel, Access, and PowerPoint.</p> <p>If you believe you have computer experience that is equivalent to the prerequisites of this course, CIS 1101, please contact the instructor for permission to register for this class.</p> <p>Check with your instructor for the software edition that will be used.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1200	Word Processing	3	<p>This course introduces students to the word processing cycle and how word processing is used in the work place. This course is for anyone who needs to prepare their own business documents. Students will use the Microsoft Office Word application to create and edit business documents, enhance page layout, create tables, create reports, create columns, and create form letters and merge with a mailing list. Other topics covered include: styles, templates, mailing labels, drawing objects, graphics, and WordArt. After this course, the student would be prepared to take the Microsoft Office Certified Application Specialist Exam for Word.</p> <p>Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.</p>
CIS	1210	Desktop Publishing	3	<p>This course introduces students to digital page layout using Adobe InDesign, the new emerging standard in page layout software. This course is for anyone who has to prepare professional business publications. Students will learn how to set type and use digital images to produce effective printed business publications including newsletter, advertising flyers, business forms, brochures, manuals, posters, and catalogues. Students will learn how to create and modify pdf files for electronic distribution of publications. Knowledge of the keyboard and Word Processing software is recommended for this course. Software used: Current version of Adobe InDesign</p>
CIS	1220	Decision Making Excel	3	<p>This course uses Microsoft Excel as a problem solving tool in analyzing and designing solutions for common business and organizational problems and then using that information to guide decision-making. This course is for anyone who has to analyze, share, chart and manage information to make more informed decisions. Problems are taken from management, accounting and finance, manufacturing and production, sales and marketing and human resources. Beginning to advanced spreadsheet concepts covered include creating, editing, formatting, printing and saving worksheets, creating charts, filtering lists, creating pivot tables, inventing macros, importing data, creating data tables, evaluating and using functions, constructing formulas, integrating worksheet data with other programs and ethical Excel practices. After this course, the student would be prepared to take the Microsoft Office Specialist (MOS): Excel Exam. Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1230	Business Presentations: PowerPoint	3	<p>This course introduces students to business presentation concepts and applications using the most current PowerPoint software. This course is for anyone who has to or wants to prepare engaging and effective business presentations. Students will plan, organize, prepare and produce professional quality presentations to meet organizational and business needs. Features studied include customizing a presentation, design templates, slide layouts, custom slide animation and transitions, using multimedia, charts and diagrams, integration, and tools for producing multiple outputs including publishing to the web. This course will provide a thorough understanding of PowerPoint's most important tools and features.</p> <p>After this course, the student would be prepared to take the Microsoft Office Specialist Exam for PowerPoint.</p> <p>NOTE: Knowledge of the keyboard is recommended for this course.</p>
CIS	1300	Introduction to Internet	1	<p>This course develops a basic understanding of the Internet and the World Wide Web using a popular browser such as Internet Explorer. Students will search the web; download, save and print web pages; learn and use search tools to find information quickly; create a favorite or bookmark and organize their favorite web sites; learn about communication on the Internet using email, accessing newsgroups and chat rooms; learn how to email attachments and download files from their email; and discuss personal security on the Internet. Hands-on exercises will give students the opportunity to apply these concepts. This course will give students an introduction to the capabilities of the Internet.</p> <p>Knowledge of the keyboard is recommended for this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1310	The Whole Internet	3	<p>This course provides a comprehensive understanding of the Internet. This course is for anyone who wants to use the internet effectively, efficiently and safely, understand the uses of the Internet, create web pages and also increase their confidence and knowledge. Students will learn about the basic technology that supports the internet, effectively use e-mail and other types of communication, explore virtual communities and web tools, use search engines and directories to find information on the internet, evaluate the quality of web resources, locate software, explore e-commerce concepts, learn how to use the internet safely, manage common security threats and create web pages. Students will use e-mail, a class web site, and other web based tools to develop proficiency. The course explores current internet innovations. Previous exposure to the internet is not required.</p>
CIS	1400	Windows/Operating Systems	3	<p>This course introduces students to operating systems through hands on experience and covers the basic to advanced features of Windows. Topics will include safeguarding your personal computer, customizing your desktop, using online help, organizing and managing files, creating and customizing your shortcuts, implementing a backup strategy, optimizing disks, troubleshooting computer problems, evaluating system performance, installing and troubleshooting software and hardware, updating the Windows registry. Discussions will also cover other operating systems.</p> <p>Knowledge of the keyboard is recommended for this course.</p>
CIS	1510	Introduction to Computers and Basic Word Processing	1	<p>This course introduces students to the personal computer and the Microsoft Office Word application. Students will develop an understanding of how a computer works and the basic hardware and software needed for computer processing. Microsoft Office Word will be used to develop basic word processing skills. Students will create, format, print and save documents and learn how to find files already saved. Hands on exercises will give the opportunity to apply concepts.</p> <p>Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1520	Spreadsheets	1	<p>This course introduces students to the problem solving capabilities of Microsoft Office Excel spreadsheet software. Students will plan and format spreadsheets and analyze data. Topics covered include worksheet formatting; charting data; and using formulas and functions to perform calculations and analyze data. Hand on exercise will give the opportunity to apply these concepts. Knowledge of the keyboard is recommended for this course. Microsoft Office Excel will be used.</p> <p>Check with your instructor for the software edition that will be used.</p>
CIS	1530	Business Graphics	1	<p>This course is designed to introduce students to delivering a presentation using computer presentation graphics. This course will give students an introduction to the capabilities of Microsoft Office PowerPoint. Students will learn how to plan and organize an effective presentation. Hands-on exercises will give the opportunity to apply these concepts utilizing Microsoft PowerPoint.</p> <p>Knowledge of the keyboard is recommended for this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	2310	Introduction to E-Commerce	3	<p>This course introduces students to the key strategic business and technological elements of electronic commerce.</p> <p>Students will explore the theory, practice and technology of conducting business over the internet and the World Wide Web.</p> <p>This course is for students who want to put their business on the internet, work at companies that want to do business over the internet, want to know more about business and the internet or want to know more about emerging e-commerce technology.</p> <p>Students will focus on applying key concepts through hands-on real world e-commerce planning and web site development. Topics covered include identifying e-commerce opportunities, marketing and selling on the internet, building a web presence, designing a web site, improving efficiency and reducing costs through business-to-business activities, using social networking to connect with customers and suppliers, exploring mobile commerce opportunities, analyzing electronic commerce software, hardware and commerce service providers, investigating electronic payment systems, examining electronic commerce security, thinking globally, scrutinizing legal, ethical and tax issues and planning. Also includes identifying current issues in e-commerce and emerging technology. Experience with programming languages or creating web sites is not required.</p> <p>NOTE: Computer and internet knowledge recommended</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1240	Information Management: Access	3	<p>In this course students will learn how to plan, design, create, query, create forms and reports, export to and import data from and maintain a database. This course is for anyone who has to make more informed decisions by effectively tracking, reporting, and sharing information. Applications will be taken from a variety of business and organizational scenarios. Students will integrate databases with Excel and Word. Students will learn how databases interact with other applications (including the Internet) and can become the foundation for an e-commerce web site. Students will develop an understanding of how an effective database supports the business decision-making process.</p> <p>After taking this course, the student would be prepared to take the Microsoft Office Specialist Exam for Access.</p> <p>Completion of CIS 1101 or prior database experience is recommended for this course.</p>
CIS	1990	Topic:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
CIS	1500	Developing Computer Keyboarding Skills	1	<p>This course will focus on developing mastery of the electronic keyboard and the microcomputer. Specifically, as a result of this course, you will use proper keyboarding techniques to attain the speed and accuracy necessary to use the computer as an effective communication tool.</p>
CIS	1250	Photoshop Essentials for Business	3	<p>This is an introductory course in business computer graphics. This course is for anyone who has to prepare digital images for business publications for print or for the Web. Students will learn how to use Photoshop's tools to create and enhance digital images. Students will create images from composites as well as separate document objects into layers. Course content will include techniques to retouch photos, i.e. removal of red eye, softening blemishes and imperfections, and elimination of unwanted items from digital photographs. Students will learn how to prepare and save images in different formats for different purposes, such as for use on the Web, in print and in other computer programs.</p> <p>Recommended: Knowledge of the keyboard</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1320	Web Tools	2	<p>This class focuses on exploring, evaluating and learning how to use the latest tools and applications on the Internet. You will explore your interests and build a portfolio to demonstrate what you can do using innovative web based tools. Some of the tools and applications may include: Marketing and Business, Professional Networking, Virtual Environments, Bookmarking, Social Networks, Multimedia, Photos and Digital Images, Employment and Jobs, Collaboration, Video-Sharing Sites, Podcasts, Wikis, Blogs, Content Aggregation and Management, Organization, Games and Entertainment and more.</p> <p>This course is for anyone who wants to increase their internet skills and knowledge and understand current web tools.</p> <p>Some knowledge of the internet is required such as ability to use email and search engines. If you need more internet knowledge before taking this class, CIS 1310 The Whole Internet is recommended.</p> <p>The course may be modified as class needs dictate and to incorporate current events.</p>
CIS	1260	Business Communications and Technology	3	<p>This course provides students the knowledge to become successful communicators in a business environment through improving and practicing written, oral, face to face, and virtual technology based communication skills, processes, and strategies. This class will incorporate the effective use of Web-based communication, video conferencing, e-mail etiquette, presentation skills, presentation technologies, teleconferencing, and telephone usage. Students will also apply improved verbal, nonverbal, listening, writing, team, conflict, and negotiation skills in organizational situations. This course is for any student wishing to increase their business communication effectiveness in a global and technological business environment.</p> <p>Recommended: Completion of ENGL 1201 College Writing I and CIS 1101 Business Computer Systems I.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CIS	1700	Project Management Software Tools	3	This course provides students with an understanding of the technology, concepts and process that supports project management. This course is for anyone who wants to develop project management software application skills in order to be more effective and efficient. Emphasis will be on a practical skill-building approach to project management software, concepts and process so students will apply knowledge to new problems, think critically and creatively, work collaboratively in teams and develop skills that can be applied outside the classroom. This course will include using project management software to bring about the successful completion of specific project goals and objectives.
CIS	2010	CIS Internship	3	This is a capstone course for students in a Business Computer Systems & Management or Individualized Studies programs. It includes practical, on-the-job training in a business or organizational environment under executive supervision and related learning activities. Internships are arranged on the basis of the student's interests and career goals. Recommend student contact instructor before registering. Recommend: A minimum of 9 credits in CIS, ACCT, or BUS.
CMSV	2860	Building Construction Plan Reading	2	The basic course in reading of construction working drawings emphasizes symbols used in the production of architectural, structural, mechanical, and electrical drawings. Course includes interpretation of drawing details, sections, elevations, floor plans, etc. This course should be of value to students interested in drafting, estimating, and construction.
CMSV	2870	Construction Management	3	Students in this course examine estimating, purchasing, bidding, scheduling, coordinating, expediting, and supervising work and dealing with public agencies, the design professions, suppliers, and subcontractors as these activities relate to the operation of a building contracting company.
CMSV	2880	Construction Estimating	4	This course explores the basic techniques and guidelines of estimating. The student will develop skills to prepare cost estimates considering the important aspects of material takeoffs, labor, equipment, and time. Practical, step-by-step cost estimating procedures will be applied to an actual building project.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CMSV	2890	Building Organization and Technology	3	This course is an introduction to the varied technology that comprise buildings and an exploration into the sequential process of building construction. Theories of building types, functional organizations, and material applications are presented. This course also includes the identification of historic basis for, and comparison between, basic building materials and construction methods. The importance of building assembly sequences also is presented.
CMSV	2895	Construction Management Internship	3	Provides the student an opportunity to observe and participate in all aspects of construction management that are typically encountered in the construction workplace.
CMSV	2875	Mechanical and Electrical Systems	4	This course will prepare students to identify, analyze, and evaluate all aspects of building mechanical, electrical, and plumbing systems. The students will explore a variety of systems found typical in both residential and commercial buildings and will have the opportunity to gain detailed knowledge on how systems are designed, constructed, and perform. This course is designed for construction managers, project superintendants, code officials, and other construction related industry professionals.
CMSV	2885	Construction Estimating	4	This course explores the basic techniques and guidelines of estimating. The student will develop skills to prepare cost estimates considering the important aspects of material takeoffs, labor, equipment, and time. Practical, step-by-step cost estimating procedures will be applied to an actual building project.
CMSV	2100	Soils and Concrete Technology	3	This course familiarizes students with the history and fundamentals of concrete, admixtures, soils and aggregates. The student will understand the interactions of concrete, weather, and soil conditions; the proper placement of concrete; bearing capacity of soils; and the basic principles of concrete and soil inspection.
CMSV	2900	Construction Scheduling	3	This course explores the basic techniques and guidelines of the critical path method (CPM), and the precedence diagramming method (PDM) scheduling. The student will develop skills to prepare construction schedules by considering the important aspects labor, equipment, and time cost scheduling. Practical step-by-step scheduling techniques will be applied to an actual construction project.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CMSV	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
CMSV	1200	Construction Graphics	3	Study of graphic solutions to problems conditioned by traditional and emerging construction document standards. Students will produce construction graphics using computer-assisted processes. The principles of construction graphics are applied to the visualization, communication, and graphical analysis of problems.
CMSV	1000	Construction Professionalism Seminar	4	This course is designed to be an introduction to careers in the construction industry. It will be an exploration of the breadth and depth of construction opportunities and the diversity of the occupational career pathways open to students. The differences between residential, commercial, civil, industrial, and specialty construction will be explored as well as exposure to the different occupation opportunities as a tradesperson, project manager, staff management specialist, design professional and business owner. Industry standards and expectations will be part of the course, and at its completion students will have had the opportunity to complete course work to receive an OSHA 10 hour training certification.
CMSV	1300	Legal Aspects of Construction	3	Students will study the basic principles of law and its impacts on the business of construction contracting. Topics will include contracts, property law, mechanics liens, drafting a bid, ethics, employment issues, wage laws and hiring practices in both a union and a non-union work setting. The focus of the course is on construction contracting businesses, their employees and customers.
CMSV	2200	Construction Quality Assurance and Quality Control	4	<p>Students will be introduced to QA/QC and the concept of Construction Quality Management in the residential, commercial and civil construction industries. It will emphasize QA/QC in civil construction and focus on the types of materials, construction methods and quality control necessary for building road, bridges, underground utilities and other types of civil construction projects. Students will have the option to obtain a Minnesota Department of Transportation Concrete Field 1 certification as part of this course.</p> <p>Prerequisite: CMSV 2100 Concrete and Soil Technology</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CMSV	1500	Construction Technology I	5	This course is an introduction to the technical mastery of the constructing of buildings and structure. Course learning objectives will be covered in the context of a specific construction craft.
CMSV	1550	Construction Technology Field Experience	4	<p>This course is an introduction to the application of techniques necessary to construct buildings and structure. Course learning objectives will be covered in the context of a specific construction craft and will be completed during the construction of an actual industry project.</p> <p>It is strongly recommended that the following course(s) be taken prior to or concurrent with this course: CMSV1500 Construction Technology</p>
CMSV	1600	Construction Technology II	5	<p>This course is an intermediate review and application of techniques necessary to construct buildings and structure. Course learning objectives will be covered in the context of a specific construction craft.</p> <p>It is strongly recommended that the following course(s) be taken prior to or concurrent with this course: CMSV1550 Construction Technology Field Experience I</p>
CMSV	1650	Construction Technology Field Experience II	4	<p>This course is an intermediate introduction to the application of techniques necessary to construct buildings and structure. Course learning objectives will be covered in the context of a specific construction craft and will be completed during the construction of an actual industry project.</p> <p>It is strongly recommended that the following course(s) be taken prior to or concurrent with this course: CMSV1600 Construction Technology II</p>
CMSV	1700	Construction Technology III	5	<p>This course is an advanced review and application of techniques necessary to construct buildings and structure. Course learning objectives will be covered in the context of a specific construction craft.</p> <p>It is strongly recommended that the following course(s) be taken prior to or concurrent with this course: CMSV1650 Construction Technology Field Experience II</p>

SUBJ	COU-NBR	Title	CRHR	Course Description
CMSV	1750	Construction Technology Field Experience III		<p>This course is an intermediate introduction to the application of techniques necessary to construct buildings and structure. Course learning objectives will be covered in the context of a specific construction craft and will be completed during the construction of an actual industry project.</p> <p>It is strongly recommended that the following course(s) be taken prior to or concurrent with this course: 4 CMSV1700 Construction Technology</p>
COMM	1010	Fundamentals of Public Speaking	3	<p>This course provides instruction and practical experience in the basics of public speaking. This course has a performance component: students are expected to create and deliver informative, persuasive and other types of speeches.</p>
COMM	1110	Principles of Interpersonal Communication	3	<p>This introductory course looks at communication in one-to-one relationships in friendships, families, the workplace, and elsewhere. Students will be challenged to discover and assess their own communication strengths and weaknesses as they define and discuss what it means to be a competent interpersonal communicator. Course content includes both theory and practice (skill development).</p>
COMM	1210	Small Group Communication	3	<p>This course examines communication in small groups. Students will participate in and analyze how small groups function, how leadership roles evolve, how decisions are made and how conflicts can be resolved. Students will work in small groups, complete group projects, and analyze group interaction.</p>
COMM	1990	Topics:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
COMM	1710	Oral Interpretation and Traditions	3	<p>Oral Interpretation and Traditions is an introductory course in the effective oral presentation of written material. Students will analyze and perform literature from a variety of sources that represent different cultures, co-cultures, and ethnicities. Students will also make connections between the cultural implications of oral tradition and performance.</p>
COMM	1510	Nonverbal Communication	3	<p>Nonverbal Communication is an essential component of all communication. This introductory course is intended to increase communication effectiveness in a variety of contexts, including interpersonal, intercultural, and workplace. Students will understand, assess, and practice their own nonverbal codes and cues as well as study others' nonverbal codes and cues.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
COMM	1310	Intercultural Communication	3	The influence of culture is an especially important and sensitive issue facing us today. A person's culture strongly influences his/her identity, beliefs, expectations, and communication style. This course explores communication across culture as defined by nationality, gender, and ethnicity while concentrating on effective use of communication in all of these areas.
COMM	1410	Human Communication Theory	3	This introductory course examines a selection of theories of human communication. The emphasis of the course will be to provide students with the ability to understand theorizing in general and then to apply this understanding to particular theories. Students will be challenged to explore different types, contexts, and aspects of human communication as they relate to their own lives. Course content will include theory relating to the communicator, the message, the relationships, the media and the culture.
COMM	1610	Introduction to Mass Communication	3	This introductory course is intended to develop critical and analytical skills for understanding mass media; for recognizing messages, making deliberate choices about them, and evaluating the effects of these messages in both an individual and societal context. Students will examine the history, evolution, and societal impact of a wide variety of media, including print, film, and social media and will develop skills to make informed, ethical evaluations of the mediated messages they receive.
COMM	1810	Introduction to Health Communication	3	This introductory course is intended to develop critical and analytical skills for understanding human communication in the health care industry. Students will discuss and apply various communication strategies in a variety of contexts, including patient care, between healthcare professionals, and with a larger public in the form of healthcare advocacy campaigns. The impact of cultural diversity and ethics in decision-making will be examined in the context of healthcare professions.
COMM	1910	Argumentation and Public Advocacy	3	This course is intended to develop critical and analytical skills for creating persuasive messages to audiences in formal, oppositional settings. Students will discuss and apply various communication strategies to evaluate the effectiveness of evidence, gain experience in a more formal debate setting, and evaluate and craft arguments ethically and responsibly. These assignments will prepare students for debate in a range of contexts, from interpersonal and small group settings to larger discussions of public and social policy in American culture. Prerequisite: COMM 1010

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
COMM	1550	Video Game Entertainment	3	This course will examine the development of the video game industry and research on social effects of video game play. Issues discussed include video game violence, effects of gender and cultural representation, visual messages in gaming, pro-social relationships, and emerging technologies in gaming.
COMM	2610	Introduction to Public Relations and Strategic Communication	3	This course examines the principles, evolution, practice, and ethics of strategic communication and public relations. Student will learn to analyze and critique different public relations and strategic communication campaigns across different contexts, cultures, and communities. Students will engage in the campaign creation process through research, message and narrative creation, and evaluation of strategic communication.
COMM	2900	Communications Capstone		The communication capstone course is intended for students who want to engage in a professional application of communication skills gained from their prior coursework. This could range from social media internships, public speaking events, communication campaign work, or other projects within the scope of communication studies. Students must take one COMM course and have instructor permission.
CRD	1000	Career Exploration and Planning	3	This course is designed to empower students with career decision-making skills that can be used their entire lifetime. Students will explore personal interests, values, skills, and personality styles as they apply to a career, changing careers, and academic degrees. A variety of career and personality inventories will be used to engage students in the decision making process. Current issues and trends in the workforce related to hiring and job opportunities will be evaluated. Students will explore the job search process and develop effective techniques in preparing a resume and cover letter. Students will also develop networking skills and interviewing techniques to prepare for the eventual job search and/or transfer to a four year college or university. Note: No credit will be given for this course if student has completed ADEV/BUS 1000.
CRD	1010	Job Searching Strategies	1	This course is designed to empower students with the skills and resources necessary to find a job. Current issues and trends in the workforce related to hiring and job opportunities will be evaluated. Students will explore the job search process and develop effective techniques in preparing a resume and cover letter. Students will also develop networking skills and interviewing techniques to prepare for the eventual job search. Note: No credit will be given for this course if student has completed ADEV/BUS 1010.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	1000	Computer Basics	3	The students will get hands-on experience with an operating environment (the current version of Microsoft Windows) and Windows-based applications which include spreadsheets, word processors and presentation packages. The course enables students to use computers to process information and communicate using e-mail and World Wide Web.
CSCI	1020	Beginning Web Page Programming	1	Students learn practical techniques and principles of Website authoring; create multimedia-enhanced commercial, entertainment or educational sites; and plan site maintenance, promotion and implementation of user feedback. Prerequisite: Some experience with Microsoft Windows
CSCI	1030	Programming for Internet	3	This course covers the practical aspects of a programming language used for development of advanced Internet applications which include: on-line animation and interactivity, feedback, and browser control enhancements. The actual language used (JavaScript, Perl, or Java) will be chosen by the instructor. The course also includes a brief introduction to advanced HTML and SCS, uploading the site to a Web server and promoting it. Prerequisite: CSci 1000 or 1010 or 1020 or CIS 1101 or 1102
CSCI	1120	Programming in C/C++	4	This course continues the study of the most popular computer languages. It covers the common procedural core of C and C++ languages: data types, expressions, operators, functions, pointers, and arrays. The course also includes elements of object-oriented programming: classes and objects. Prerequisite: CSci 1130 or CSci 1150 with a grade of "C" or better
CSCI	2010	Discrete Mathematical Structures	4	The course covers mathematical topics essential for work in computer science. Topics include: number bases, mathematical induction, sets, relations, functions, congruence, recursion, combinations and permutations, probability, graphs, trees, logic, Boolean algebra, and proof techniques. Computing related problems and examples are integrated throughout the course. Prerequisites: MATH 1150 College Algebra (Minimum grade: 1.67 GPA Equivalent) Or A score of 79 or higher on the College Level Math (0167) placement test Or An ACT math score of 26 or higher. Recommended: Any CSCI course numbered 1030 or above (Minimum grade: 1.67 GPA Equivalent)

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	2030	Database Modeling and Design	4	<p>This course covers relational databases from conceptual design to implementation. The course will include logical and physical design, normalization, as well as the definition of tables and indexes. The use of Structured Query Language (SQL) for data retrieval and manipulation will be emphasized. Prerequisite: CSci 1040 and CSci 1120 or CSci 1130 or CSci 1150 PLEASE NOTE: Students enrolled in CSCI 1040 can register for CSCI 2030 in anticipation of successful completion of CSCI 1040. Please contact Registration.</p>
CSCI	2050	Internship Computer Science	3	<p>The main objective of this course is to provide practical training and real work experience for the students. Often, it will include productive work contribution, and prospective employee evaluation for the employer. It can lead to increased college-industry interaction for the department and the college. Completion of this class will better prepare the student for multiple activities in a workplace. It should reflect positively on the students resume (employers view internship experiences positively.) Internship is an excellent opportunity for a student to affirm career interests. These opportunities can also provide the credentials needed for full-time positions. Internships and co-ops provide opportunities to network with professionals; strengthen confidence, maturity, and professionalism; establish professional references. Prerequisite: Enrollment in the computer science program, completion or concurrent enrollment in CSci 2002, a "B" average in all CSci courses</p>
CSCI	1150	Programming in C# for .NET	4	<p>This course provides an introduction to object-oriented programming using the C# programming language. The majority of the course will be on the semantics of the C# language, a major component of Microsoft .NET development environment. Topics include: Visual Studio .NET integrated development environment, selected value and reference types, control structures, operators and expressions, methods, classes, and inheritance. Completion of this class will prepare the student for advanced topics in C#. Prerequisite: Math 1150 with a grade of "C" or better</p>
CSCI	1990	Topics:		<p>The course introduces fundamental concepts of computer programming using a block programming language and a graphical development environment. A number of mathematical concepts used in office, game, mobile and scientific programming are introduced and illustrated with computer graphics. The students will advance their computational thinking abilities, as they develop algorithms and arrange data for solving problems.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	1180	Introduction to Linux Operating System	4	This course introduces Linux, a popular open-source operating system and a variety of Unix. Topics include installing and using Linux, the architecture of Linux, using the command-line shell, the file system, common utilities (including text editors), and the basics of shell scripting. Hands-on work with Linux is a central part of this class. Some experience in computer programming is recommended.
CSCI	1035	Introduction to Computer Programming with Games	4	This is an introductory computer programming course. The students will engage in hands-on implementation of games and simulations in a graphics-enhanced development environment. The students will learn how to transform game scenarios into algorithms and programs, create user interfaces, and incorporate multimedia. Basic computer skills are necessary for success in this class.
CSCI	1050	Computer Security Basics	3	This class examines the issues surrounding computer security in today's highly technological world. The course is designed to provide an overview of security problems: technical issues and the principles associated with databases, networks, administrative controls, privacy, operating systems and programming. The knowledge gained from this course will allow programmers, instructional designers, information technology specialists and managers to better understand a variety of issues surrounding secure computing. It is preferred that students have proficient computer skills.
CSCI	2400	Objective-C for Mobile Programming	4	The course teaches Objective-C programming utilizing Xcode tools package. The course explores fundamental OOP concepts. Other topics include pointers, memory management and Automatic Reference Counting. The basic Foundation Framework classes will also be introduced. After completing this course, the students will be able to write Objective-C programs suitable for mobile applications running on iPhones and iPads. Prerequisite: CSci 1120 or 1150 or 2001 with grade A

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	2500	Introduction to Mobile Programming in iOS	4	<p>The course teaches students how to write mobile applications for iOS-based devices, building on Objective-C fundamentals. The course will lead the students through the essential concepts, tools, and techniques for developing iOS applications.</p> <p>After completing this course, the students will have the knowledge and skills needed to create applications for iPhones and iPads.</p> <p>Prerequisite: CSci 2400 with minimum grade B</p>
CSCI	2100	Introduction to Android Application Development	4	<p>This course provides an introduction to developing Android applications, covering the core concepts, tools and techniques for designing, developing and releasing Android applications. By the end of the course, students will build an Android application and release it to the Google Play Store.</p> <p>Prerequisite: CSci 2001</p>
CSCI	1025	Responsive Web Design	1	<p>This course will prepare students to design web pages that will respond to the media or device on which they are viewed. This course will focus on HTML5, some JavaScript and CSS media queries.</p> <p>Prerequisites: A grade of C or better in CSci 1020</p>
CSCI	2011	Programming in Python	1	<p>The course will introduce the Python Programming language in terms familiar to students experienced with writing simple, yet complete, programs in other languages. Additionally, the course will focus on utilities and features considered strengths in Python. This includes interfaces to specialized libraries and databases.</p> <p>Prerequisites: CSCI 1120 or CSCI 1130 or CSCI 1150 or CSCI 2001 or CSCI 2400</p>
CSCI	1040	Fundamentals of Structured Query Language (SQL)	3	<p>The goal of this course is to teach students how to design, build and use databases utilizing Microsoft SQL Server. The students will also learn to enter and retrieve information. They will learn SQL commands and query creation, including complex multi-table joins, and display and analyze query results. Students will design their own databases and deploy them on Microsoft SQL Server.</p> <p>Possessing skills in performing common Windows tasks working with applications, or taking CSci 1000, is highly recommended.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	2060	Web Programming in ASP.NET	4	<p>ASP.NET is a technology for creating web-based programs and services. This course introduces ASP.NET on the foundation of the prerequisite courses that taught the fundamentals of .NET framework, C# programming language, SQL Server database, and the primary development environment Microsoft Visual Studio.</p> <p>The main goal of this course is to teach the basics of creating and deploying Web applications utilizing ASP.NET technology. Besides using the C# programming language, the students will learn the commonly used ASP.NET controls included in Microsoft Visual Studio. The course includes the techniques of reading the data from a SQL Server database into a Web application and displaying it on a web page, as well as modifying and amending the database content.</p> <p>Prerequisites: CSci 1150 and CSci 1040</p>
CSCI	1130	Introduction to Programming in Java (CS0)	4	<p>This course provides an introduction to the Java programming language and its foundational topics. In this course students will explore fundamental programming and computing concepts with a focus on problem solving, algorithm development and implementation. Topics included are: data types and memory concepts, arithmetic operators and mathematical expressions, conditional statements, repetition, arrays, methods and the basics of object-orientation.</p>
CSCI	2002	Data Structures and Algorithms (CS2)	4	<p>This course continues using abstract data types and the concepts presented in CSci 2001 and introduces stacks, queues, linked lists, and trees. This course also covers advanced programming topics of recursion, sorting methods, and complexity measures.</p> <p>This is an object-oriented programming course.</p>
CSCI	2001	Object Oriented Programming (CS1)	4	<p>Students will learn object-oriented programming while creating algorithms. The basic principles of software engineering are emphasized. By doing their own Java projects, students will develop problem-solving skills and gain experience in detecting and correcting software errors.</p> <p>Procedures, recursion, and iteration will be presented in the development of algorithms. Inheritance and polymorphism are studied. The use of abstraction will be emphasized throughout the course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
CSCI	2020	Computer Architecture	4	As an introduction to computer organization and structure, this course includes beginning machine and assembly language programming. Topics to be covered include logic gates and Boolean algebra, basic elements of computing devices, basic components of a computer, data representation and number systems, micro operations, microprogramming, and input-output programming.
DSCI	2001	Data Science I	4	This course introduces students to the rapidly growing field of Data Science. Students will learn the concepts and tools used to analyze data sets and make informed business and/or research decisions. Students will use various software, including databases, to gather, organize and visualize data for analysis.
DSCI	2002	Data Science II	4	Provide students further exposure to the growing field of Data Science. Building upon the topics in Data Science I, students will learn about machine learning techniques, ways to deal with networked systems and extremely large data sets, and methods for improving the performance of computerized statistical models.
DSCI	2009	Interdisciplinary Applications in Data Science	2	This course provides a flexible in-depth review of interdisciplinary applications in Data Science. The curriculum has students independently explore and apply methods of Data Science in a real-world context related to their career interests.
EAP	880	Listening and Speaking Skill Development	4	This course will focus on developing your academic listening and speaking skills in English. During this semester you will work on building the note-taking, presentation, and discussion skills you will need to study successfully at the college level. Prerequisite: Placement test scores
EAP	1280	Listening and Speaking for College Success	4	This class focuses on the development of note-taking skills through the presentation of college-success content material in the form of lectures and student presentations. You will research student success topics and make formal presentations to the class. The course also reviews tone, register, rhythm, stress, reduction and emphasis as critical elements in delivering a speech. Prerequisite: Placement test scores or grade of "C" or better in EAP 0830, 0860, 0880, 0980.
EAP	960	Academic Writing Skills Development	4	This course focuses on developing writing process skills and study of various rhetorical patterns. You will engage in concentrated practice to develop paragraphs through multiple drafts, working towards academic essays. You will also continue to strengthen your English language skills. Prerequisite: Placement test scores or grade of "C" or better in EAP 0860.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EAP	1260	College Writing Skills Development	4	In this course, you will develop academic essay writing and advanced English language skills. This course emphasizes writing as a process, as well as development of analytical reading and critical thinking skills. Prerequisite: Placement test scores or grade of "C" or better in EAP 0900, 0930, 0960 and 0980
EAP	860	English Language Skills Development	5	This course is for students who want to improve their formal English language skills in writing and grammar. Emphasis is on learning and using grammatical structures to strengthen and develop English literacy skills for college success. You will practice writing to build fluency and grammatically correct sentences. You will also engage in writing as a regular academic activity and learn strategies to continue your language development. Prerequisite: Placement test scores
EAP	980	Academic Listening and Speaking	4	This course concentrates on preparing students for the listening and speaking needed in the American college classroom. You will develop efficient note-taking skills for classroom lectures and skills for giving presentations. An examination of American English as spoken in college classrooms further develops proficiency necessary for successful college work. This course also reviews American English in terms of intonation, rhythm, stress, and emphasis. Prerequisite: Placement test scores or grade of "C" or better in EAP 0880
EAP	1080	English Pronunciation	2	This course is for people who desire to speak English more clearly and with greater effectiveness. We will concentrate on addressing your pronunciation concerns and accent needs. This class will give you strategies that will help you to communicate in various situations, including your workplace. Prerequisite: Placement Test Scores

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EAP	830	Reading Skills Development	4	In this course you will work on strengthening your reading and study strategies, developing your reading vocabulary, and improving your test-taking strategies. You will have the opportunity in this class to develop your reading speed and comprehension of a variety of written materials. This course will help prepare you for the academic skills you will need to succeed in college.
EAP	930	Academic Reading and Study Skills	4	<p>This course provides advanced level readers with intensive practice and extensive reading tasks in various writing genres. You will develop and improve reading proficiency, speed, and comprehension, and the ability to make inferences from text. You will also develop advanced vocabulary building strategies using college content reading materials. Active study strategies are among the skills practiced as you progress toward skillful, independent reading. Prerequisite: Placement test scores or grade of "C" or better in EAP 0830</p> <p>Students who place into EAP 0930 are required to enroll in this course during their first term at NHCC.</p>
EAP	1230	College Reading and Studying Skills	4	<p>This course focuses on the college textbook reading, language and study skills you will need in your content-area courses. You will study content-course readings and complete tests and assignments typical of those you will complete in college courses.</p> <p>Placement test scores or grade of C or better in EAP 0860, EAP 0880 and EAP 0930</p>
EAP	900	College Vocabulary Development	2	<p>In this course you will become familiar with the most frequently used words in academic texts. You will strengthen the vocabulary you need for college-level writing, reading, listening, and speaking by studying word families from the Academic Word List.</p> <p>Prerequisites: Placement test scores or grade of "C" or better in EAP 0830 and EAP 0860.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EAP	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
EAP	1060	Advanced Grammar	2	<p>This is an advanced ESOL grammar course designed to increase students' grammar and editing proficiency. The course will build students' ability to recognize and employ more sophisticated language necessary for success in academic and professional writing.</p> <p>Prerequisites: Placement test scores in EAP 930, 960 and 980 or grade of 'C' or better in EAP 830, 860 and 880.</p>
ECON	1060	Principles of Macroeconomics	3	This course covers mainstream theories, the economy's recent performance, national income and output levels, money and the banking system, inflation and unemployment, fiscal and monetary policies, economic growth, and international trade.
ECON	1070	Principles of Microeconomics	3	This course covers theories of consumer and producer behavior as well as market structure, the role of government in the economy, distribution of income, externalities, and taxes.
ECON	1990	Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ECON	1050	Economics of Crime	3	This course covers economics theories of crime and justice. Crime topics include: illegal drug markets, violent crime, nonviolent crime, and international crime. Economic theories and concepts such as rationality, efficiency, supply, and demand are used. The course includes international and historical comparisons of enforcement techniques from both an economic efficiency framework and an ethical perspective.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EDUC	1210	Introduction to Education	3	<p>This course will familiarize students with the historical, philosophical, and social foundations of education. The course will be of particular interest to those students who are exploring teaching as a career or to those who currently work in classroom settings. The class is designed to provide glimpses into a variety of aspects of teaching, to promote discussion, and to encourage self-exploration. The major course topics will guide students in exploring the influences of history and society on teaching, learning, and schooling and how these influences impact what is done in classrooms today. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time.</p>
EDUC	1350	Foundations in Teaching Literacy	3	<p>This course focuses on the literacy needs and development of today's children. The course provides background on how literacy develops and places emphasis on the stages of literacy development. It presents both the theories and strategies that are needed in order to fully understand emerging readers and writers and how learners can be empowered in today's classrooms to function competently as literate adults in the twenty-first century. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time.</p> <p>Formerly Titled: Language and Learning</p>
EDUC	1300	Technology in Education	3	<p>This course is a hands-on instructional technology course designed for future teachers. Learn how to produce quality videos, podcasts, webinars, and other multimedia presentations. Use Google classroom, Zoom, and other virtual classroom apps for instruction. Expand your knowledge about digital accessibility for the American Disabilities Act (ADA) compliance.</p>
EDUC	1400	Introduction to Special Education	3	<p>Students will be introduced to the field of special education. This course addresses specialized instruction designed to meet the needs of exceptional students. Course content will include an overview of legal mandates, varied evidence-based instructional practices including writing individualized education plans (IEP), collaborative approaches used by child study teams, and cultural implications to consider in the field of special education. Ten hours of field experience are required.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EDUC	1280	Multicultural Education	3	This course is designed to help current and future educators acquire the knowledge and skills needed to become effective practitioners in culturally, racially, and linguistically, and gender diverse classrooms and schools. Students will engage in activities and actions that develop teacher identity and criticality. They will demonstrate instructional approaches that build community and inspire and engage diverse learners. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service-learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time.
EDUC	1200	Introduction to Education	4	This course will familiarize students with the historical, philosophical, and social foundations of education. The course will be of particular interest to those students who are exploring teaching as a career or to those who currently work in classroom settings. The class is designed to provide glimpses into a variety of aspects of teaching, to promote discussion and reflection. The major course topics will guide students in exploring the influences of history and society on teaching and learning. Students will also learn a variety of creative instructional student engagement strategies. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service-learning hours, volunteer hours, etc.) in the K-12 setting during the current semester and outside of class meeting time.
EEVS	1130	Rocky Mountain Field Study	4	This course is designed for people interested in learning about basic principles of astronomy, geology, and meteorology in an applied setting. This course is offered as a component of our Outdoor Education Program, usually during summer session. Classes meet on campus for several weeks followed by 7-10 days in the Rocky Mountains and surrounding areas. Topics include: rock and mineral identification, geologic history of the area, geologic time, plate tectonics, topographic maps, surficial processes, physical processes of weather and astronomical features.
EEVS	1100	Physical Geology	4	A course examining the earth's formation, composition, structure and natural systems. Learners will practice making observations, forming scientific questions and posing hypotheses as they explore the earth's internal and external processes and how they shape the surface of the earth. Topics include: geologic time, plate tectonics, rock and mineral identification, introduction to topographic and geologic maps, surficial processes, climate change and environmental concerns. Course is open to all students. (3 hours lecture, 3 hours lab) 4 Credits.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EEVS	1140	Historical Geology	4	A temporal survey of the development of Earth as we know it today, and the evolution of life as deciphered from the sedimentary rock and fossil record. By using the process of science to examine how the Earth and life have changed through the geologic past we can begin to get a glimpse into the effect which humans may have on it now and in the future. Topics include: principles of geology, sedimentary rocks, fossil identification and classification, plate tectonics, sea level change, geologic time, topographic and geologic maps, evolution of life, climate change, hominid development and mass extinctions.
EEVS	1150	Boundary Waters Field Geology	4	This lecture, lab & field-based course is designed for people interested in learning about basic principles of astronomy, geology, and meteorology in an applied setting. This course will be offered as a component of our Outdoor Education Program, usually during summer session. Topics include: rock and mineral identification, geologic history of the area, geologic time, plate tectonics, topographic maps, surficial processes, physical processes of weather and astronomical features. Students will participate in an 8-9 day mandatory field trip to BWCA-Quetico Wilderness Area.
EEVS	1160	Global Environmental Field Geology	4	An introduction to environmental geology with emphasis on the impact that globalization has on the environments and on geologic resources of various regions of the world, including the United States. Students will examine the geologic development of a particular region and how various cultures and societies approach environmental and geologic resource management problems. Students will explore their own community for the presence of globalization and they will travel to the country or region of study to meet with environmental experts and to observe first-hand the issues covered in this course.
EEVS	1170	Minnesota Field Geological Series: Glacial Geology	2	Come explore the glacial geologic history of Minnesota! We will also examine its influence on some of the state's economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, formation, climate change and destruction of continental ice sheets, sedimentary processes, recognition of erosional and depositional glacial landforms, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EEVS	1180	Minnesota Field Geology Series: Caves, Karst and Ancient Seaways	2	Come explore Minnesota's caves and ancient ocean floors! This course will examine the hydrogeologic processes involved in cave formation and the development of karst topography. In addition, we will evaluate the evidence of ancient oceans in Minnesota using the sedimentary and fossil record. Additional topics include: plate tectonics, geologic time, hydrologic cycle, rock, mineral and fossil identification, weathering and erosion, sealevel change, marine sedimentary processes. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. □
EEVS	1190	Minnesota Field Geology Series: Minnesota Rivers	2	Come explore the geologic history of Minnesota's rivers. We will examine the development of the Mississippi, Minnesota, Red, and St. Croix, and Whitewater Rivers and the influence of their development and present geomorphology on some of the state's economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, weathering and erosion, drainage patterns, flooding, fluvial landform recognition, meandering, wetlands, topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Four-day field trip around Minnesota is mandatory.
EEVS	1201	Oceanography Lab	1	This course is designed to complement GEOL 1200, Oceanography. The 3 hour lab sessions will include group and individual projects that supplement concepts and topics from oceanography lecture. Learners will collect their own data and use oceanographic data from ocean science databases. Lab topics that will be covered include plate tectonics, marine sediments, temperature and salinity, water masses and ocean circulation, mapping the seafloor, marine ecosystems, coastal erosion, climate change, primary productivity, el niño and biogeochemical cycling.
EEVS	1210	Minnesota Field Geology Series: Volcanic, Plutonic and Metamorphic Geology	2	Come explore the oldest rocks in Minnesota! This course will examine the earliest geologic history of Minnesota, which includes greenstone belts, iron ore deposits, and flood and pillow basalts. Topics include: geologic time, plate tectonics, rock cycle, rock classification and identification. Mid-continental rift, intrusive and extrusive igneous processes and products, metamorphism and mineral resources, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EEVS	2000	Introduction to Environmental Science	3	This course focuses on the interdisciplinary nature of environmental science by including the biological, geological, and physical-chemical of the discipline. It provides a case-study based examination of the intersection of science, policy, economics, society, culture and diversity as they relate to today's environmental problems. Students will use the process of science to understand global environments and the human impacts on them by the application of primary literature, graphical skills and lab-like data analyses.
EEVS	1200	Oceanography	3	This course is an interdisciplinary survey of the biological, chemical, physical and geologic processes at work in the world's oceans. Learners will practice making observations, forming scientific questions and posing hypotheses as they explore the interplay between these processes and the implications of these interactions for life on Earth, the Earth's climate and marine environments. Topics may include waves, tides, seafloor sediments, marine biology, seawater chemistry, plate tectonics, ocean currents, El Niño, productivity and dead zones, sea level change, coastal processes and effects of man's influence on oceans.
EEVS	1990	Earth and Environmental Science: Special Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ENGL	1940	Technical Writing	3	This course further develops writing skills as applied to technical subjects for a specialized or lay audience. Credit does not apply to the 40 MnTC (Minnesota Transfer Curriculum) credits required in the A.A. (Associate of Arts).
ENGL	1960	Writing Workshop	1	This course is designed for people interested in more intensive work with creative writing projects. The emphasis could range from poetry to story or nonfiction writing.
ENGL	2270	Modern American Literature	3	This course will introduce students to selected American writers of the twentieth and/or twenty-first centuries and their works. The course may be organized either by historic periods or topically.
ENGL	2350	Women and Literature	3	This course explores women as characters in and writers of literature, including fiction, non-fiction, drama and poetry. The course may also address issues of historical context, gender, class and race as a way of understanding women in literature.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2360	Global Literary Perspectives	3	Students will interpret world literature and film (either in translation or originally written in English) that present culturally diverse voices and viewpoints. Special attention will be given to colonial and postcolonial literatures that reflect the immigrant communities of Twin Cities college campuses, such as Egyptian, Finnish, Ethiopian, Hmong, Icelandic, Iranian, Korean, Liberian, Mexican, Norwegian, Russian, Somali, Swedish, and Vietnamese.
ENGL	2370	African American Literature	3	This course introduces the student to the writings of African-Americans from the colonial period to the present and explores the contributions of these writers to American culture, letters, and life. The course may be organized either by historic periods or topically.
ENGL	2380	American Indian Literature	3	This course introduces the students to North American Native American Literature. Readings may include fiction, non-fiction, poetry, songs, mythology, and film from traditional and contemporary authors. Special attention may be given to Native American authors with Minnesota connections, such as Louise Erdrich, David Treuer, and Susan Power.
ENGL	2450	Survey of American Literature I	3	This course will provide students with a chronological overview of American literature, including major writers, literary developments (e.g. sentimentalism, gothic fiction, romanticism, transcendentalism) and key historical and social contexts, from the pre-colonial period to 1860.
ENGL	2460	Survey of American Literature II	3	This course will provide students with a chronological overview of American literature, including major writers, literary movements (e.g. local color, realism, naturalism, modernism, and post-modernism) and social and historical contexts, from 1860 to the present.
ENGL	2550	Survey of British Literature I	3	This course covers the literature of Great Britain with its historical background from its beginnings to 1785. Chaucer, Shakespeare, Milton, Donne, and Swift, among others, are studied in this course.
ENGL	2560	Survey of British Literature II	3	This course covers the literature of Great Britain with its historical background from 1785 through the 20th century. The literature of the Romantic, Victorian, and Modern periods are studied in this course.
ENGL	2580	Shakespeare's Plays	3	This course studies some of the major plays of William Shakespeare (which may include histories, comedies, tragedies, and romances), analyzing the plays from the standpoint of literary interpretation, focusing on poetic style and literary techniques.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2900	Fantasy Literature	3	This course will introduce students to fantasy as a literary genre. It will expose students to various types of fantasy stories (such as high fantasy, sword and sorcery, urban fantasy, and/or fantasy horror). It will also address how fantasy literature can reflect or comment on issues in the real world, including how various forms of bigotry can be challenged or normalized by fantasy texts.
ENGL	2950	Mystery and Detective Fiction	3	This course will introduce students to mystery and detective fiction as a literary genre and as popular literature, examining the conventions of suspense writing, possibly including hook, twist, red herring, back story, sub-plot, procedural, clues, and the ethical concerns of investigative methods and civic life. Discussion of various sub-genre styles will engage students in critical thinking applied to historical era, culturally diverse contexts, and gender roles in mystery writing.
ENGL	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ENGL	900	Preparation for College Writing I	3	This composition course introduces the process and strategies of writing clear, focused paragraphs. Students learn and practice the basic skills of standard American written English, including grammar, punctuation, and sentence structure. Prerequisite: College required assessment for placement
ENGL	950	Preparation for College Writing II	4	This composition course is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. Prerequisite: College required assessment for placement
ENGL	2340	Nature in Literature	3	This course surveys literature that examines the relation between human beings and the natural world. The primary consideration of this course is how a literary idea of nature has been affected and effected by variations in culture, namely, changes in politics, economics, and technology that in diverse historical contexts have created conflicts between ecological and human interests. Ultimately, this study leads to considering how the "green language" created by the writers under study has contributed to an eco-critical ethic that allows examination of current ecological sensibilities and the language that represents them.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	1201	College Writing I	4	This class provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included.
ENGL	1202	College Writing II	2	This class focuses on the research process, textual analysis of primary and secondary sources, rhetorical strategies for argument and persuasion, and successful integration of sources into a longer academic paper utilizing MLA (or other, as appropriate) documentation format. The class may be disciplinary, interdisciplinary, or topical in content, as noted on the class registration site.
ENGL	1900	Introduction to Creative Writing	3	This class is designed for students who want to try creative writing, perhaps for the first time, and learn more about the creative process. No previous creative writing experience is necessary. Coursework will include reading, writing, and discussion of both student and professional work in at least three of the following genres: fiction, poetry, creative nonfiction (or memoir), and drama. The focus of the class, students' creative work, will be presented and critiqued in a workshop environment.
ENGL	1950	Graphic Novels	3	This course will introduce students to the diverse body of literature known as "graphic novels." While emphasis will be placed on works that are specifically considered graphic novels, it may also include the study of other comics-strips and books that have significantly contributed to the development of the form. Students can expect to be exposed not only to a wide range of graphic novel types, such as autobiography, journalism, history, humor, dramatic fiction, manga, and superheroes, but also to a deeper understanding of the methods of telling stories that are unique to comics.
ENGL	1250	Magazine Workshop	2	This workshop offers students the opportunity to gain practical editorial experience by working on the college literary/arts magazine. As members of the editorial staff, students will solicit, select, and edit stories, essays and poems for publication. May be repeated for credit.
ENGL	2010	Writing Creative Non-Fiction and Memoir	3	This course offers beginning instruction in the art of writing creative non-fiction, which includes the personal essay, literary journalism, and other hybrid forms, as well as memoir writing. Students will read and analyze the work of professional writers, explore a variety of techniques for discovering material and topics, and experience workshop peer review of their work.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2500	Playwriting	3	Students will be introduced to the fundamentals of writing theatrical plays. They will be expected to work on several creative projects throughout the semester and to participate in workshops in which they will discuss and critique one another's work. Students may also be asked to complete other writing exercises and to analyze a selection of plays to gain a better understanding of the art of playwriting.
ENGL	2030	Writing Poetry	3	Beginning instruction in the art of poetry. Exploring techniques for generating material, engaging in writing exercises both in and out of class, and discussing examples of contemporary poetry are important aspects of this class. Students will draft a collection of poems and critique others' work in a writing workshop environment.
ENGL	1260	Newspaper Writing	2	Students will meet at least one hour each week in a laboratory format to edit and publish the student newspaper. Working in collaboration with student contributors and considering local, national and global issues, students will decide what is appropriate and relevant content for the campus newspaper.
ENGL	2020	Writing Stories	3	This course offers beginning instruction in the art of writing fiction. Exploring techniques for generating material, engaging in writing exercises, and critically examining contemporary short fiction are important aspects of this course. Students will develop a portfolio of their writing and will critique others' work in a writing workshop environment.
ENGL	2960	Creative Writing Capstone Project	1	This course is intended for students who are in the Creative Writing AFA program and within a semester of completion. This capstone experience will focus on the writing and revision of a demonstrative portfolio of writing within a single genre, multiple genres, or blended genres (poetry, fiction, scriptwriting, and/or creative nonfiction). Students will work individually with faculty to develop and polish their writing for publication submission and movement toward further study and/or career options. Prerequisite: Engl 1900 Introduction to Creative Writing
ENGL	2320	Writing: From Structure to Style	3	This course focuses on the structure of language as well how its rules and applications affect written communication and authorial choices in professional and academic settings. The course further intends to create confidence in written and oral expression, to support students in business, graphic arts, paralegal, and other programs.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2330	Hmong American Literature	3	Hmong American Literature explores the works of Hmong writers as represented in the novel, nonfiction, short stories, poetry, drama/film, and Paj Ntaub (stories recorded in tapestry). To a more limited extent, characterizations of Hmong in works by non-Hmong authors may be considered, as well as relevant works by Laotian American and Asian American writers.
ENGL	1140	Professional Writing	3	This course offers students the opportunity to improve their writing skills and adapt them for professional communication. Students will focus on assessing purpose, audience, credibility, style, clarity/correctness, and format to determine appropriate approaches to a range of written and electronic communication, including memos, letters, employment documents, and proposals/reports.
ENGL	2300	Children's Literature	3	In this course, students will have the pleasure of reading, discussing and evaluating children's literature ranging from the picture book to the young adult novel. Students will explore the history of children's literature, critical responses to it and its specific role for children and adults. Students will examine works from the genre that might include picture books, chapter books, folktales, fantasy, realistic fiction, historical fiction, poetry and nonfiction with an emphasis on how the genre and its themes have evolved over time, paying particular attention to how those themes address the role of children in society. This course will appeal to students, parents and educators.
ENGL	990	Gateway Composition	2	This composition course is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 alone provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited college-level essay. Prerequisite: College required assessment for placement OR prior successful completion of English 0900
ENGL	1200	Gateway College Writing	4	This class provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2400	Utopian/Dystopian Literature	3	This course introduces students to the literature of utopias and dystopias, literary works about imaginary places, whose intention is to explore alternative models of political, cultural, and societal structures. Utopian/dystopian literatures seek to challenge existing ideas about governments, social communities, and constructions of human identity, but they also offer new, sometimes radical and transformative ideas regarding the reformation of existing human societies.
ENGL	2150	Introduction to Literary Studies	3	This course is designed to introduce students to a variety of literatures and to means to credibly examine that literature. It thus includes literary terms, critical approaches and their application to literature.
ENGL	2540	Introduction to Literary Studies: Reading Poetry	3	This course is a study of poetry: the reading and analysis of poetic works from a variety of time periods and cultures. Important figures, poetic traditions and movements, formal techniques, and other methods of evoking mood and meaning will be explored through discussion and in both written and oral projects throughout the semester.
ENGL	2570	Introduction to Literary Studies: Reading Plays	3	This course is a survey of drama as literature; plays will be read as literary texts, not as the grounds for specific performances or performance practices. Through their engagements with the dramatic literature in this course, students will be introduced to a diversity of dramatic styles and themes. Attention will also be devoted to the social and cultural contexts in which the plays were written and in which they are read. Course materials may be organized either historically or topically.
ENGL	2590	Introduction to Literary Studies: American Short Story	3	The short story is a form that was created and refined by American writers of the 19th and 20th centuries. Students will study American short story writers, their stories, and their views of American life.
ENGL	2410	US Latinx and Latin American Literature	3	This course will introduce students to the genres, traditions, and themes that characterize Latinx literatures. Emphasis will be placed on the distinctions and similarities that have shaped the experiences and the cultural imagination among different Latinx communities in the U.S. and throughout Latin America. Genres include, but are not limited to, poetry, fiction, nonfiction, and film.
ENGL	1800	Introduction to Journalism	3	This course provides an introduction to writing in standard journalism modes, which may include news, features, editorials, sports, reviews, and blogs. Contemporary practices, issues, and ethics of the profession are also covered.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGL	2390	Work in American Literature	3	This course examines American texts by and about workers and those concerned with workers. It focuses on how these texts portray work and the ways that work structures personal and social life, as well as on how these texts address and are formed by historical and political events that shape working conditions. The course may be organized historically or topically.
ENGL	2250	Japanese Literature	3	This course introduces students to Japanese literature in translation. The reading may be organized either by historic periods or topically. The selected texts may come from various time periods. The reading may include oral traditions, mythology, spiritual texts, historical documents, poetry, song lyrics, theatrical plays, novels, short stories, or manga. This course may address issues of historical context, gender, class, and race as a way of understanding Japanese literature.
ENGR	1000	Introduction to Engineering and Design	3	This course is designed for people interested in learning about the engineering profession. It provides an overview of the engineering disciplines. A project-based approach will be used to give experience in skills, tools, and problem-solving methods associated with completing engineering design solutions.
ENGR	1200	Engineering Graphics	3	This course is designed for people interested in mechanical, civil and aerospace engineering and the Bachelor of Construction Management degree. The student will learn to make AUTOCAD drawings in a Windows environment. The topics that will be covered include: drawing, editing, pan, zoom, view, laying, plotting, dimensioning, blocks, inquiry, purge, DXF, ZIP, UNZIP, XREF, and work in three dimensions. NOTE: Students who do not have access outside of class to computer hardware capable of running AutoCAD can access the program in the computer lab outside of class time.
ENGR	2501	Circuit Analysis I	4	This course is designed for people interested in electrical, civil and mechanical engineering, computer science and the Bachelor of Information Networking degree. The topics to be covered include: Kirchhoff's Laws, mesh analysis, nodal analysis, source transformations, superposition, Thevenin's and Norton's Theorems, operational amplifiers, first order response of RL and RC circuits, natural and step response of RLC circuits, sinusoidal steady-state analysis and power calculations and balanced three phase circuits. This is the first course in a two course sequence. (4 hours lecture) Prerequisite: Physics 1601 and Math 1222
ENGR	2502	Circuit Analysis II	4	No course outline found 6/4/19 - MR

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGR	2511	Circuit Analysis I Laboratory	1	This course is a laboratory which complements the lecture course Engr 2501. The topics to be covered include: resistance, voltage, current, Kirchhoff's laws, voltage divider, bridge circuits, power transfer, operational amplifiers, natural and step responses, and integrating amplifiers. (2 hours lab) Prerequisite: Engr 2501 or concurrent enrollment
ENGR	2512	Circuit Analysis II Laboratory	1	No outline found 6/4/19 - MR
ENGR	2301	Statics	3	This course examines systems held in static equilibrium. Topics include vector algebra, equivalent systems of forces, equilibrium of particles and rigid bodies, moments, center of mass, centroids, analysis of structural and machine elements, distributed loads, friction.
ENGR	2302	Mechanics of Materials	3	This course is an introduction to the linear stress-strain behavior of engineering materials. Topics will include stresses due to uniaxial loading, bending and torsion; stress transformations, beam deflections, indeterminate structures, column buckling, stress analysis of structural and machine elements.
ENGR	2303	Dynamics	3	Dynamics is the study of motion and the effect of forces on bodies in motion. This course will cover the kinematics and kinetics of particles, of systems of particles, and of rigid bodies in the plane; application of work-energy and impulse-momentum methods; introduction to mechanical vibrations.
ENGR	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
ENGR	2201	Introduction to Digital Logic	2	This is an introduction to digital logic design. Topics include Boolean algebra fundamentals; Karnaugh mapping; elements of digital building blocks such as gates, flip-flops, shift registers, memories, etc.; analysis and design of combinational-logic circuit and sequential-logic circuits.
ENGR	2410	Circuit Analysis	4	This course explores direct-current and alternating circuits. Topics include Kirchhoff's Laws; mesh and nodal analysis; Thevenin's and Norton's Theorems; RL, RC, and RLC circuits; sinusoidal steady state analysis of AC circuits; operational amplifiers. A laboratory component is included.
ENGR	2340	Thermodynamics	3	This course will cover basic laws of thermodynamics; energy transfer processes; conservation of mass and energy; entropy balance; thermal properties of materials; equations of state; reversible and irreversible processes and cycles. Also includes applications to engineering systems.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
ENGX	1201	English Express II	8	<p>This course is a combination of ENGL 0950 and ENGL 1201. ENGL 0950 is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. ENGL 1201 provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included. Prerequisite: College required assessment for placement or successful completion of English 0900. Recommendation: Word processing proficiency and good computer skills.</p>
ENGX	950	English Express I	7	<p>This course is a combination of ENGL 0900 and ENGL 0950. ENGL 0900 introduces the process and strategies of writing clear, focused paragraphs. Students learn and practice the basic skills of standard American written English, including grammar, punctuation, and sentence structure. ENGL 0950 is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. Prerequisite: Assessment score placement in ENGL 0900. Recommendation: Word processing proficiency and good computer skills.</p>
EXSC	1140	Recreational Games	1	<p>The purpose of this course is to enable students to develop knowledge and skills in recreational activities and maintain or improve health-related fitness. Students will be introduced to various activities and games of a recreational nature.</p>
EXSC	1151	Golf I	1	<p>A beginners class in fundamental skills of golf, full swing, pitching, chipping and putting, this course includes rules, terminology and strategy. Classes meet on campus and at the driving range/golf course. Students are expected to furnish golf clubs and golf balls. Additional fee charged for use of golf course.</p> <p>NOTE: Students must provide their own golf clubs and golf balls.</p>
EXSC	1200	Bowling	1	<p>This course includes instruction and practice in skills of bowling through drills and play. Rules, terminology, and scoring are included. Classes meet at bowling lanes. Additional fee charged for use of bowling lanes.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1230	Basketball	1	This course provides instruction and practice in skills of basketball through drills and game play. Rules, terminology, and strategy are included.
EXSC	1400	Women's Self Defense	1	This course consists of the introduction of basic physical and psychological skills to help the student act in crisis and pre-crisis situations to avoid or stop physical assault, harassment, dangerous situations, and encounters. Physical skills, basic recognition skills, avoidance skills, and basic personal safety are covered in this course. Classroom sessions provide information on personal safety, child safety, sexual harassment, domestic abuse, sexual violence, and violence against women.
EXSC	1510	Coaching and Management	2	This course develops skills in areas of coaching and management of sports. Topics include theories of coaching, competency levels, teaching techniques, training, equipment purchasing and inventory, facility management, public relations, fundraising, and legal issues relating to sport. Students will gain the knowledge necessary to coach and/or manage sports at the high school, collegiate and/or recreational levels.
EXSC	1810	Step Aerobics	1	This course provides instruction and practice in a physical fitness program which involves a series of vigorous stepping movements. Music is utilized with a combination of a stepping apparatus and an extensive upper body workout to raise the heart rate to within the exercise heart rate zone. This course may be repeated for credit. Good general health is recommended.
EXSC	1041	Volleyball	1	This course is designed to teach the beginning volleyball student the basic skills and fundamentals of the game. Through consistent participation and effort, the student will learn the rules of the game, have a basic understanding of the game, and be able to play the game at a beginning or intermediate level. Methods of communication and strategies are included.
EXSC	1042	Advanced Volleyball	1	This course is designed for students who have experience playing volleyball. Through consistent participation and effort, students will build upon their knowledge of the skills and strategies of the game of volleyball. A closer look at the strategies of the game will take place, allowing teams to match opponents strengths and expose their weaknesses. Game situational drills and game play will be implemented to learn and develop advanced player positioning and rotations, and advanced offenses and defenses of the game. Prerequisite: PE 1041 or Instructor Permission

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1010	Physical Fitness	2	This course is designed to provide cardiovascular and strength enhancement through participation in an aerobic super circuit program. Selected strength training and cardiovascular equipment will be utilized as well as personalized heart rate zones and monitoring. A pre-assessment of ones current level of fitness will aid in the ability to set goals, and a post-assessment will determine improvement/s, as well as areas needing continued emphasis. Healthy lifestyle information will also be presented in order to make fitness and wellness a lifelong goal. This course can be repeated for credit.
EXSC	1050	Weight Training	1	This course will introduce students to strength training for the development of lifelong physical fitness. Students will develop the basic principles of designing and participating in a safe and effective resistance training program.
EXSC	1070	Soccer	1	This course includes instruction and practice in skills of soccer through drills and game play. Rules, terminology, and strategy also are studied.
EXSC	1440	Karate	1	This course will enable the student to obtain a basic knowledge or appreciation of self-defense and the martial arts, specifically the Soo Bahk Do style of martial arts. Students will learn to execute basic self-defense techniques, increase their flexibility, and improve their mental focus. Soo Bahk Do has been taught on campus since 1978 and was one of the "pioneer" arts introduced in Minnesota in the 1960's. Upon completion of the curriculum, the student will be eligible to test for rank recognized by the United State Soo Bahk Do Federation at an additional fee and can continue their training at a local studio. All skill levels welcomed. This course will also utilize kicking pads and re-breakable boards for some of the kicking and punching techniques.
EXSC	1500	Foundations of Exercise Science	3	This course is an introduction to the professional practice and disciplinary dimensions of exercise science. Students will examine concepts including professionalism, ethics, certification and licensure, employment opportunities and scientific foundations of the various sub-disciplines within the exercise science field.
EXSC	1720	Introduction to Camping	2	This course is designed to prepare the student enrolled in the Outdoor Education Program for an extended outdoor trip. Special attention will be paid to water purification, hypothermia, wilderness etiquette, and the principles of minimal impact camping. The course culminates with a camping trip in the wilderness.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1710	Wilderness Camping	3	This course is designed to prepare students for an extended outdoor trip. Special attention will be paid to assessing environmental and route conditions, proper gear systems, food/ration planning, water purification, exercising in varying climates, Leave No Trace ethics, and leadership skills. The course culminates with a camping trip in the wilderness.
EXSC	1740	Hiking	1	This course is an introduction to the outdoor leisure sport of hiking. Students will have the opportunity to explore a number of different parks and experience recreational hiking, either in groups or solo. Instruction includes hiking basics, first aid on the trail, trail navigation, and preparation for a days hiking experience.
EXSC	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
EXSC	1250	Wellness for Life	3	This course is designed to investigate the implications of exercise, diet, nutrition, stress, and physical activity in the total health, wellness, and fitness of the individual.
EXSC	1750	Yoga	1	The focus of yoga will be on the physical dimension. We will stress exercise, movements, and poses which will enhance overall mobility, flexibility, balance, and muscle training. Yoga will train used, underused, and opposing muscles which may improve one's physical quality of life. Yoga instruction will introduce the mental aspect as well. We will begin to develop, practice, and train the relationship between mind and body in order to improve the body's mental and physical communication. This course can be repeated for credit.
EXSC	2490	Kinesiology	4	Course Content includes study of human movement and the muscular system. Skeletal and major muscular systems will be studied in detail in order to better understand how human movement is produced. Students will anatomically analyze movements and be introduced to the concepts of biomechanics. (3 hours lecture, 3 hours lab) Prerequisites: EXSC 2010 - Essentials of Exercise Science (Minimum grade: 1.67 GPA Equivalent)
EXSC	1240	Rock Climbing	1	Rock Climbing is a beginning-level class. It is designed to introduce the basics of indoor top-rope climbing to students. Students will learn knot tying, belaying, climbing commands, and gear management. Students will also learn the skills necessary in order to maximize their climbing performance by learning balance, footwork and body position. Emphasis will be placed on making climbing a safe and enjoyable activity. (Additional fee for this course)

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1210	Badminton	1	Badminton is a beginning level course designed for those who have little to no experience playing. This course will include the instruction and the practice of fundamental skills through drills and game play. Rules, terminology, and strategy are included.
EXSC	1270	Studio Cycle	1	Studio Cycle is a beginning level class. It is designed to introduce the basics of indoor group cycling as well as cycle science, equipment, and heart rate training. Music is utilized with a combination of a spin bike and an extensive lower body and cardiovascular workout. Students should be in good general health to enroll in this class. This course can be repeated for credit.
EXSC	1760	Introduction to Kayaking and Canoeing	1	This course is designed for the beginner in both kayaking and canoeing. Students will learn how to get in and out of the kayak, wet entry, basic paddling strokes, and safety on the water for flat water kayaking. The canoeing portion covers safety, and proper steering paddling techniques. The course also includes a half day canoe trip and a half day kayak lake tour for skill application.
EXSC	1310	Disc Golf	1	Disc Golf is designed for both the beginning player and those that are more advanced. The course will cover the concepts of game play, the history of the game, rules of the game, ethics, basic strategies, as well as course locations and components.
EXSC	1840	Zumba	1	Zumba is a Latin inspired, dance-fitness class that incorporates Latin and international music and dance movements, creating a dynamic, exciting, and effective fitness system. The class combines fast and slow rhythms that tone and sculpt the body using an aerobic/fitness approach to achieve a unique blended balance of cardio and muscle-toning benefits. This course is repeatable for credit.
EXSC	1630	Wilderness Navigation	1	This course provides skill, instruction, and experience related to the use of map and compass for off-trail wilderness navigation and problem solving. Navigation techniques will be taught and advanced through practical application. This course concludes with a weekend trip.
EXSC	1640	Outdoor Activity Sampler	1	This course provides skill, instruction, and experience related to numerous outdoor activities. Activities may include any or all of the following: canoeing, kayaking, orienteering, rock climbing, adventure ropes course, hiking, camping, natures edibles, and/or outdoor cooking. Students are exposed to a variety of skills so they have the opportunity to pursue interests beyond this course and throughout their lives. This course concludes with a weekend trip.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1610	Winter Skills	1	This course introduces the skills, techniques, equipment, and ethics of winter wilderness-oriented skills, such as winter camping, snow shoeing, and cross country skiing. This course provides a variety of exposure to skills so that students may pursue interests beyond this course. This course concludes with a weekend trip.
EXSC	1850	Yoga Core	1	The yoga core class focuses on core stability and strength. Yoga postures that emphasize core strength will be focused on. The use of medicine balls, stability balls and bosu balls will be used to isolate the basic muscles of the core/torso/back.
EXSC	1060	Advanced Weight Training	2	Advanced Weight Training is a course designed to further the students knowledge, techniques, and comprehension of advanced principles of weight training. Application of these techniques and principles to promote and maintain fitness for is the primary goal for this course. This course can be repeated for credit. Prerequisites: EXSC 1050 or Instructor Approval
EXSC	1860	Total Body Strengthening	1	This class is a total body strengthening workout. It challenges all of your major muscle groups by using handheld weights. You will perform exercises that target all of your major muscle groups: squats, presses, lifts and curls. This course is in a group exercise format where music is used to motivate and push you to a high level of intensity. High intensity interval training will be used which increases body fat utilization for energy.
EXSC	1020	Adult Fitness		This course is designed to explore the five main components of fitness, what it takes to set and work towards an achievable, personal fitness goal/s, and will utilize various fitness and wellness applications and the internet to record fitness endeavors/workouts.
EXSC	1000	Physical Fitness	1	This course is designed to provide cardiovascular and strength enhancement through participation in an aerobic super circuit program. Selected strength training and cardiovascular equipment will be utilized. A pre-assessment of one's current level of fitness will aid in the ability to set goals, and a post-assessment will determine improvement/s, as well as areas needing continued emphasis. Healthy lifestyle information will also be presented in order to make fitness and wellness a lifelong goal. This course can be repeated for credit. Note: MANDATORY 2 hour orientation is required on the first day of class.
EXSC	2390	Current Research Trends in Exercise Science	3	This course is designed for formulating, designing, and implementing meaningful research into timely and practical educational issues within the exercise science field. The study of a particular topic(s) of special importance, relevance, and currency to those going into the exercise science field will be the main theme. Course content may vary with each offering.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	2200	Applications of Training	2	<p>This course will allow students to devise, apply, analyze, and practice different training strategies based on empirical research that are designed to improve health, wellness, and performance, and to modify lifestyle behaviors. Students will apply specific training methods to individuals based on the results of initial fitness testing and interview while adhering to current training guidelines, principles of training, and current accepted Exercise Science training theories. (1 hour lecture, 2 hours lab)</p> <p>Prerequisite: EXSC 2100 with a grade of "C" or better</p>
EXSC	2010	Essentials of Exercise Science	3	<p>This course provides an in-depth look into topics such as the acute and chronic physiological and psychological responses to exercise, exercise anatomy, exercise metabolism, and how the nervous, skeletal, muscular and endocrine systems respond during exercise. (3 hours lecture)</p> <p>Prerequisite: Placement into Engl 1201</p> <p>It is strongly recommended that students in the Personal Training Certificate program take EXSC 2010 and EXSC 2100 at the same time in order to sit for the NASM-CPT exam.</p>
EXSC	2110	Advanced Fitness Assessment & Exercise Prescription	3	<p>This course is designed to expose students to practical application scenarios in which they will conduct risk factor screenings, fitness assessments, and exercise programming (including appropriate progressions, instructions and spotting techniques). The purpose of this course is to facilitate the application of theoretical concepts previously learned; therefore, offering a bridge between theory and practice.</p> <p>Students will also have the opportunity to design, implement, and modify exercise programs for real and/or theoretical clients under direct supervision.</p>
EXSC	2100	Concepts of Training	3	<p>This course will allow students to research, explore, discuss, and compare different training strategies based on empirical research that are designed to improve health, wellness, and performance, and to modify lifestyle behaviors. Students will comprehend how and when to apply each training method upon distinguishing individual needs and wants of different persons while adhering to current training guidelines, principles of training, and current accepted Exercise Science training theories.</p> <p>In order to sit for the NASM-CPT exam, it is strongly recommended that students register for both 2010 and 2100 at the same time.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	2270	Essentials of Sport & Exercise Nutrition	3	<p>This course presents the scientific basis for sports nutrition building upon basic nutritional concepts. Students will review, describe, and interpret the macronutrient needs and recommendations for athletic performance (this would include pre-, during, and post-exercise fueling), energy expenditure during resistance and cardiovascular exercise, the diet during training, the timing and composition of the pre-, during, and post- competition fueling, the use of nutritional supplements, and the special needs of various athletic groups. The course provides practical and scientifically based information for those entering the exercise science field as well as the competitive athlete and people of all ages wishing to incorporate nutrition into an active lifestyle.</p> <p>Prerequisite: HLTH 1070 with a recommended grade of "C" or better</p>
EXSC	2750	Wellness Coaching & Health Promotion	3	<p>This course examines theoretical frameworks of evidence-based health interventions and current practices relevant to health/wellness coaching. Students will explore coaching competencies, professional ethics, and diversity all in preparation for a national certification exam in health/wellness coaching. Students will also examine the role of the wellness coach within the corporate wellness field and their ability to facilitate change among employees and corporations.</p> <p>Prerequisites: EXSC 2010 and EXSC 2100 with a grade of "C" or better</p> <p>It is strongly recommended that students have already sat for and passed their CPT exam prior to sitting for the ACE Health Coach exam.</p>
EXSC	2300	Concepts of Group Fitness Instruction	3	<p>This course is designed to provide theoretical knowledge and practical skills in group fitness instruction, as well as preparation for a national certification exam in group fitness instruction. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the instructor?participant relationship, the principles of motivation to encourage adherence in the group fitness setting, effective instructor to participant communication techniques, methods for enhancing group leadership, and the group fitness instructor?s (GFI?s) professional role.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1880	Fundamentals of Boxing	1	<p>This course focuses on boxing skill and techniques. Students will be introduced to punching, boxer's stance, footwork, balance and stance in movement, training, safety practices, and the health and physical benefits associated with boxing. The class will utilize heavy bags, speed bags, as well as other sport-specific equipment. Methodology, strategy, and self-defense applications will also be included. Excessive force, violence, or aggression are not required or expected and will not be tolerated. All skill levels welcome.</p>
EXSC	1470	Bicycling	1	<p>This course is designed to examine outdoor bicycling for both leisure and exercise. It will introduce students to basic bicycling skills, maintenance, and safety. An emphasis will be placed on increasing cardiovascular endurance as well as bicycling as a lifetime activity.</p> <p>NOTE: Students will be expected to participate in bicycling (outdoor) each week, and will be required to log daily rides through the Polar Beat smart phone app. Access to a bicycle, helmet, and heart rate monitor are required for this course.</p>
EXSC	1410	Jogging/Running	1	<p>This course is designed to examine jogging/running as a means of improving cardiovascular fitness and promoting it as a lifelong activity. The American College of Sports Medicines (ACSM) physical activity guidelines will provide a framework for class requirements as well as aid in developing fitness goals that emphasize cardiovascular health.</p> <p>NOTE: Students will be expected to participate in running/jogging every week, and should be able to physically handle the nature of the activity</p>
EXSC	1460	Fitness Walking	2	<p>This course is designed to examine walking as a means of improving fitness and promoting it as a lifelong activity. The American College of Sports Medicines (ACSM) physical activity guidelines will provide a framework for class requirements as well as aid in developing fitness goals that emphasize cardiovascular health.</p> <p>NOTE: Students will be expected to participate in fitness walking, and will be required to log daily walks through the Polar Beat smart phone app/website.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
EXSC	1530	Tactical Strength and Conditioning	2	This course is designed specifically for the tactical athlete (military, law enforcement, fire and rescue, protective services, first responders, and other emergency services). The tactical strength and conditioning course is designed to increase the performance, readiness, and longevity of tactical athletes while decreasing the likelihood of fitness and job related injuries by utilizing proven training methods and team training.
EXSC	1890	Intermediate Boxing	1	This course builds upon existing boxing skills and techniques. Students will further advance and develop their striking and defensive skills, advanced footwork, balance, body awareness, safety practices, and overall efficiency in boxing. The class will utilize heavy bags, reflex bags, as well as other sport-specific equipment. Students will also review boxing techniques and strategies utilized by former and modern day athletes/coaches. Methodology, strategy, and self-defense applications will continue to be included. Excessive force, violence, or aggression are not required, expected, or allowed and will not be tolerated.
EXSC	1900	Worldwide Fitness and Wellness Trends	1	This course is designed to explore the constantly evolving field of Exercise Science. In the rise and fall of fitness trends, students must be equipped with basic scientific understanding in exercise theories to discern between trends, fads, safe, and harmful methods for physical training. This course seeks to empower students with the knowledge in exercise science and wellness to improve their lives and of those around them.
EXSC	2600	Wellness Coaching and Behavior Change	2	The course will provide students with key tools for promoting behavior change and creating a foundation for a healthy lifestyle. Concepts essential to understanding the psychological and behavioral aspects of wellbeing will be explored. Applications are made to future exercise science professionals in aiding oneself and others in the movement towards wellness. Students will learn strategies, such as motivational interviewing, decisional balance, operant conditioning, and appreciative inquiry, in order to aide oneself and clients through the stages of change and healthier habits.
EXSC	2700	Wellness Coaching Theory and Practice	3	This course examines health and wellness coaching techniques with an emphasis on the practical application of evidence-based interventions, current practices, and skills used to promote healthy lifestyle changes. Students will gain the knowledge and skills needed to assess a client's lifestyle behaviors and then support them through behavior change. This course is designed to prepare students for national certification in health and wellness coaching.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
FYE	1020	First Year Experience	2	This course provides both first-time and returning students with academic and social interactions in order to make a successful transition to college. Through lecture, discussions, group activities, active learning exercises, and guest speakers, students are introduced to a variety of topics critical to academic success. The course empowers students to be actively engaged in their learning by understanding the culture of college and creating a learning plan that incorporates the use of study skills that will foster success in all of their course work.
FYE	1990	Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
FYE	1021	Effective Student Learning	1	During this four-week course, you will learn strategies and skills to use online tools, ways to engage with your instructor, how to balance your personal and academic responsibilities, and give yourself short-term rewards to maintain long-term motivation to fulfill your academic goals.
GCST	1320	Community Organizing I	3	<p>The focus of this course will be developing leadership skills through community organizing and empowering students to make lasting changes at the college, in their own communities and the world.</p> <p>Students will examine past and present social movements with a special focus on organizing in communities of color.</p> <p>This course will also explore the contemporary meanings of community in the United States. Students will learn to identify the leader within by examining the relationship between community and citizenship. This course will also focus on issues of diversity and sustainable communities with the practical application of active leadership techniques and creative organizing on our campus.</p> <p>This could include aspects of the annual Earth Week Program such as Marketing, PR, Event Planning, Budgeting, Community Partnerships, Cross Campus and Cross cultural collaborations, and curriculum integration.</p>
GCST	1990	Interdisciplinary Studies Topic		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

SUBJ	COU-NBR	Title	CRHR	Course Description
GCST	1501	Introduction to Gender and Women's Studies	3	This course introduces students to the foundations of Gender and Women Studies by examining the diversity of women's experiences throughout history and across cultures, races, ethnic groups and religions. From a social science/humanities perspective, we will explore how factors such as gender, gender identity and sexuality have been shaped by Western society.
GCST	1978	American Indian Cultural Expression	3	<p>This American Indian Cultural Expression course will expose students to the broad range of fine arts within the American Indian community. This course will engage students to understand the connections between past events and their influence in American Indian art forms through critical analysis and aesthetic evaluation.</p> <p>Through exploring how art has impacted these living cultures how these vibrant cultures have survived oppression and genocide, and continue to thrive students will gain understanding of Indigenous Peoples strong connection with the fine arts. Students will also learn to articulate the meaning of different Indigenous nations creative expression and interpretive processes, which have been handed down for generations. Students will also explore the art of activism and resistance to colonialism as well as the connections between American Indian artists and the land.</p>
GCST	2410	US Latinx and Latin American Literature	3	This course will introduce students to the genres, traditions, and themes that characterize Latinx literatures. Emphasis will be placed on the distinctions and similarities that have shaped the experiences and the cultural imagination among different Latinx communities in the U.S. and throughout Latin America. Genres include, but are not limited to, poetry, fiction, nonfiction, and film.
GCST	1964	African American Civil Rights Immersion Experience	4	This course will focus on the African American culture and the Civil Rights Movement through four themes: fragmentation, exclusion, resistance, and community. Particular attention will be given to the diversity of African diasporas within the United States. The African American Civil Rights Immersion Experience is designed to provide an up-close immersive experience of some of the events, places, people and systems throughout the United States that have helped shape and define contemporary African American theories. This course will be framed within the civil rights movement, including its social organization, customs and traditions, religion, and its arts and literature. The course challenges students to utilize and address issues such as political power, economic systems, racism, and activism. This course includes in-class participation and an off campus expedition to historical civil rights sites in the United States.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
GCST	1503	Analyzing Gender Identities	3	This course offers students the opportunity to examine masculinity from a feminist perspective. We will consider masculinity in terms of political, historical, and social influences. How do boys become men in the United States? We will address issues such as male aggression and violence, homophobia and male roles in western society (father, brother, husband, son, etc.)
GCST	1502	Human Trafficking	3	This course will explore human trafficking within the context of social justice, human rights, and feminist perspectives. We will analyze the behavior of traffickers and the ways this crime affects our global economy. We will examine criminal justice, vulnerabilities of victims and types of trafficking and how communities are responding to this activity. Students will gain an overall understanding of modern-day slavery and the issues we face regarding this crime.
GCST	1504	Feminism and Capitalism	3	This course examines different aspects of capitalism through the lens of feminism. We will investigate the ways different groups of people have been allowed to participate in capitalist societies and why. Our discussions will include the politics of gender inequality, the history of women in capitalist governments and many other topics.
GCST	1505	Women and War	3	This course investigates the experiences of women in war. We will discuss the ways women have been used in politics and societies. We will examine many topics including the treatment of women during the holocaust of World War II, sexuality as a weapon of war and women in combat.
GCST	2250	Japanese Literature	3	This course introduces students to Japanese literature in translation. The reading may be organized either by historic periods or topically. The selected texts may come from various time periods. The reading may include oral traditions, mythology, spiritual texts, historical documents, poetry, song lyrics, theatrical plays, novels, short stories, or manga. This course may address issues of historical context, gender, class, and race as a way of understanding Japanese literature.
GCST	1700	Foundations of Racial Justice	3	What is the social construction of race? When did it start? What is racism? What is racial justice? This course introduces students to the core concepts of Racial Justice by examining the social construction of race and systems of oppression. Systems examined may include, but is not limited to education, healthcare, housing, etc. From a justice and advocacy perspective, we will explore how the social construction of race has led to oppression of various identity groups and how individuals and groups in society can strive to be anti-racists.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
GCST	1301	Introduction to Ethnic Studies	3	This introductory course in Ethnic Studies will examine race and ethnicity in the United States. We will analyze racism and whiteness. We will question the ways that our concepts of different races have been influenced by family, the media, and education. Focus will be on the ways our ideas and beliefs about ethnicity have been shaped by issues such as slavery, colonization, occupation, migration, and immigration.
GCST	2000	Theories of Race and Ethnicity	3	This course introduces students to the complexity of race and ethnicity as both conceptual terms and lived experiences. We will look at multiple definitions of race and ethnicity that have been developed over time, and we will also explore how race intersects with other forms of identity (cultural affiliation, gender, class, and sexuality). This course places a particular emphasis on power, structures, and ideas of cultural superiority, inequality, and racism, as well as how these ideas continue to marginalize significant portions of the population. Students will learn about the connections between race, ethnicity, labor, and power structures, such as colonial, economic, state bureaucracy, and legal systems. Students will learn about the unique contributions and social and cultural developments of ethnic groups in the United States. The course will also introduce students to key academic frameworks and critical race theories.
GCST	1350	Immigration and Society	3	This course focuses on immigration and its relations to the society with a U.S. focus. We will learn about human migration and immigrant adaptation. We will discuss the history and the current state of immigration in the United States. We will analyze how immigration is connected to politics, the economy, and the other dimensions of society, including race and ethnicity. This course will not substitute for the PLEG 1610 (Immigration Law elective in the Paralegal A.S./Certificate.)
GCST	1380	Personal Story Telling	2	This course exposes students to the genre of personal storytelling. It is designed to help students tell their own stories for personal empowerment. It will introduce students to key academic storytelling frameworks and storytelling methodologies. The course uses the self as the source material, creating and developing stories based on personal memories, culture and family background in order to tell effective personal stories. In addition, students will have the opportunity to engage in self-exploration and self-reflection through the development and telling of their own cultural and personal stories, and through listening to others.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
GCST	1507	Mass Incarceration	3	This course examines the practices of incarceration in the United States from a feminist perspective. We will discuss the history, the politics, the economics and the ethics of incarceration. We will also review the ways the U.S. is different from other countries when it comes to imprisonment.
GCST	1970	Environmental Justice and Nature Immersion Experience	4	This course, a collaborative partnership with YMCA Camp Northern Lights, will focus on environmental justice and equity, access, and inclusion in nature and outdoor spaces movements in Minnesota, the US, and beyond. Students will explore these communities? efforts to protect and preserve our natural spaces for current and future generations, while also breaking down barriers to ensure equitable access, participation, and inclusion of all cultural and ethnic groups. The course will have a particular focus on contemporary environmental justice issues, such as water quality, proposed pipelines through Minnesota tribal lands, food insecurity, and access for BIPOC and other marginalized groups to nature and outdoor spaces. This course is designed to provide a hands-on immersive experience that will expose students to the events, places, peoples, systems and organizations throughout Minnesota that have helped shape current environmental justice policies, action, and activism, as well as connections with national and international environmental justice organizations, such as Wild Path Farm, the Sierra Club, Honor the Earth, the Sierra Leone Foundation for a New Democracy, Friends of the Boundary Waters, MN350, and the Three Rivers Park District. The course challenges participants to assess and critique issues such as political power, racism, colonization and segregation, activism, access to resources, and our relationship with this land through diverse cultural lenses. Students will be encouraged to explore these issues through their own cultural heritage, while being exposed to the beliefs, traditions, and value systems of others. This course includes 8 weeks of in-class participation and an off-campus expedition to YMCA Camp Northern Lights, a wilderness camp in Northern Minnesota, where students will be immersed in nature for 5 days.
GCST	1509	Global Feminism	3	This course will introduce students to issues related to feminism around the world. We will analyze gender inequality cross-culturally. We will also examine efforts to accomplish social justice for women and girls worldwide.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
GEOG	1010	Physical Geography	3	<p>This course will provide an introduction to the physical processes that are at work at all times on the surface of the earth. This course provides an introduction to the processes that influence the lithosphere, atmosphere, hydrosphere and biosphere. Topics covered include earthquakes, volcanoes, tornadoes, blizzards, winds, precipitation, the Hydrological Cycle, vegetation and soil. This course includes a basic understanding of how these systems interact and how the physical landscape interacts with the human landscape. Included in this will be discussions about environmental concerns such as acid precipitation, ozone depletion, soil degradation, desertification and rainforest destruction. This course includes lab-like coursework/exams that will enhance a student's ability to make observations, form questions, pose hypotheses, make predictions and critically evaluate scientific data and results.</p>
GEOG	1040	Human Geography	3	<p>Human Geography is concerned with how human interactions shape material and cultural landscapes. It broadly examines the great diversity of human organization and experience in different countries through a variety of perspectives. Essential to this examination is a comparative review of the contemporary geographies of race, language, political ideologies (including religion), public policy, ecology, economic activity, natural resources, settlements, and demographics.</p>
GEOG	1100	World Geography	3	<p>World Geography is concerned with how domestic and international capital shapes the physical and cultural landscapes of different regions and countries. It broadly examines the great diversity of human economic activities that have given rise to global cultures of agriculture, natural resource production, manufacturing, transportation, development (including education, welfare, and healthcare), shopping and services, and tourism. Essential to this examination is a comparative review of the contemporary geographies of globalization, finance, immigration, poverty and displacement, or any aspect of nature or human behavior that gives an insightful understanding of each region or country in a world made for money.</p>
GEOG	1990	Topic:	3	<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>

HCCC	1100	Health Care Core Complete Curriculum	4	This course includes all of the following courses: HCCC 1010-Awareness and Sensitivity to Client Needs, HCCC 1020-Behaviors for Success in Healthcare Settings, HCCC 1030-Managing Information in Healthcare Settings, HCCC 1040-Survey of Ethics in Healthcare Settings, HCCC 1050-Legal Issues in Healthcare, HCCC 1060-Respecting Client and Staff Diversity and HCCC 1070-Healthcare Safety and Standard Precautions. Together, the modules provide foundational concepts to prepare students to start on an educational pathway and an understanding of healthcare.
HIST	1110	History of Western Civilization Pre 1550	3	"Western" civilization refers to the cultures and traditions today most associated with Europe and the United States, but which emerged in modern-day Iraq and spread both east and west. In this course, we will examine a variety of civilizations that developed and were influenced by cultures centered on the Mediterranean, such as the ancient Hittites, the Roman Empire, and the Islamic world. We will consider the ways these diverse civilizations interacted with their neighbors, ruled their territory, and understood the world they lived in.
HIST	1120	History of Western Civilization 1550 to Present	3	"Western" civilization refers to the cultures and traditions today most associated with Europe and the United States, but which emerged in what is now Iraq and spread both east and west. In this course, we will look at how "West" became associated with Europe and the United States as "West" was continually redefined as Europeans encountered others (both peacefully and violently) around the globe. We will examine the emergence of core cultural traditions associated with the "West," such as nationalism, democracy, capitalism, and racism.
HIST	1200	History of United States Through 1877	3	This course focuses on the major cultural, social, and political issues in United States history from the revolutionary period through Reconstruction. We look at the ideas that led to the revolution, how the thirteen colonies assembled themselves into a republic, the consequences of slave culture to the course of American history, and the promises and failures of Reconstruction. The student will come to understand the multiple and inter-related forces relevant to the early years of the republic.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HIST	1210	History of the United States Since 1877	3	This course focuses on the major social and cultural issues in United States history from the late nineteenth century Gilded Age through the end of the twentieth century. We look at the influence of the industrial revolution, the impact of increasing levels of European and Asian immigration, the rise of organized labor, the Great Depression, the Cold War, the impact of United States foreign policy, and countercultural movements. The student will gain insight into the aspects that are most crucial for a solid understanding of the nation's history.
HIST	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
HIST	1270	Race in America	3	This course investigates the role played by race in the shaping of United States history. We examine the concept of race and the historical relationships in America between those of African, Asian, European, and Native descents. We will examine Reconstruction, the Civil Rights Movement and current racial issues. The goal is to broaden student understanding of United States history by a focused study of its multi-faceted racial relationships throughout the centuries.
HIST	1010	World History: Origins to 1300	3	This course examines world history from human origins to end of the 13th century CE. By looking at history from a global and comparative lens, students will develop both a complex understanding of the variety of cultural, political, social, economic, and religious systems that prevailed in different world regions at different times and an appreciation of the universal elements of human societies and the patterns of development and change. We will look at world history from early human migrations, through the development of agriculture and pastoralism, to the construction of states and empires in Afro-Eurasia, the Americas, and the Trans-Pacific. We will consider the changing nature of political authority, social organization, systems of production and exchange, and religious beliefs and practices. Students will gain a deeper appreciation of the ongoing formation of historical knowledge and direct experience with the interpretation of primary historical sources.

SUBJ	COU-NBR	Title	CRHR	Course Description
HIST	1020	World History: 1300 to Present	3	<p>This course examines world history from the 14th century CE to the present. By looking at history from a global and comparative lens, students will develop both a complex understanding of the variety of cultural, political, social, economic, and religious systems that prevailed in different world regions at different times and an appreciation of the universal elements of human societies and the patterns of development and change. We will look at the construction of new empires of land, labor, and commerce, and the revolutions of the Modern era. We will consider the changing nature of political authority, social organization, systems of production and exchange, and religious beliefs and practices. Students will gain a deeper appreciation of the ongoing formation of historical knowledge and direct experience with the interpretation of primary historical sources.</p>
HIST	2900	Applied History	3	<p>This course is a writing-intensive research methods course that incorporates a service-learning component. Students will learn how to use and interpret various historical sources, such as archival material, oral history, photographs and video. Students will also learn how to use and interpret secondary source materials. The goal of the course is for the students to produce a publishable-quality research paper on a topic related to local history, with an emphasis on the relationship between local history and larger historical developments at the state, national, and/or global level. Prerequisite: Any 1000 level history class; English 1201-1202 Sequence</p>
HIST	2500	World Regional History	3	<p>Each semester this course is devoted to the history of a specific world region, and the region will change from semester to semester. The goal is to provide the student with the opportunity for an in-depth study of specific societies and specific cultures from around the world. The course may be repeated for credit under a different subtitle as the subject matter changes.</p>
HIST	2700	History and Popular Culture	3	<p>This course uses popular culture entertainment to introduce historical research methods and examine questions of ethical use of history. We will look at how history is portrayed and presented in diverse forms of popular culture entertainment, such as film, novels, comics, etc. We will also look at how popular culture reflects the social and cultural values of the audience it entertains. As we examine the ways history is leveraged as a source of entertainment, each student will develop their own views on what is considered ethical use of history, and what is considered abuse of history. Students need to complete a 1000-level history course prior to enrolling in this course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HIST	1030	Colonial History of the Americas	3	This course examines the human migratory phase that led to the initial peopling of the Americas beginning ca. 35,000 BCE; it explores the first colonial period that began ca. 7500 BCE with the rise of domesticated agriculture and the consequent establishment of major civilizations in South America, Meso-America, and North America; and it covers the second colonial period initiated by the arrival of the Spanish in 1492 and that began drawing to a conclusion in the late eighteenth century. Study of the second colonial period includes the colonization of North America, Central America, The Caribbean, and South America by six European empires: the Spanish, Portuguese, French, Dutch, Russian, and English.
HIST	1230	U.S. Labor History	3	This course covers the major changes in the nature of work, the workforce, and the institutions involved in the labor history of the United States, and it addresses the social, economic, and political aspects of labor history in both a U.S. and a global context. This course is intended as a general elective or required for Construction Technology AS or A.A.S. degree.
HLTH	1050	Stress Management	3	Stress is one of the most commonly referred to, but least understood, of all health problems. This class is designed to examine the differences between stress and personal challenges with an emphasis on the importance of the role of perception in distinguishing between the two. This course will also examine the many common sources of stress for most people and practice strategies for managing these stressors. The students will also discover how to control their stress instead of letting their stress control them.
HLTH	1030	Personal and Community Health	3	Personal and Community Health addresses itself to the needs and issues of the individual as related to current health matters in today's society. Our life style and modern society both contribute and detract from the holistic health concept. This class will assist the student in developing a plan for achieving and maintaining his/her personal health.
HLTH	1060	Drugs and Health	3	This course examines how drugs will relate with and affect holistic health, with a focus on the physiological, sociological and psychological effects these drugs may have on an individual and their relationships. The emphasis of this course is on the basic tools and information needed to understand and interact with individuals who may have problems with chemicals. It is designed to provide current information regarding the various drugs in society today.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HLTH	1070	Nutrition	3	This course is designed to introduce the student to the fundamental truths of nutrition principles, health promotion and disease prevention throughout life. Topics include, in part, the study of carbohydrates, fats, protein, vitamins, and minerals and their function and role in healthy living. It will provide introductory nutritional information for career paths in nursing and other similar fields of study.
HLTH	1080	Consumer Health	3	This course examines current consumer health issues in society. Class content will include the examination of health care products, the food and drug industry, and our ability to create a safe living environment. This course will also include plans of action that we, as a society, can take to become better health consumers.
HLTH	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
HLTH	1100	Responding to Emergencies: First Aid	3	This course is designed to provide students with basic First Aid. Students will learn basic knowledge of body functions, skills, and techniques to correctly and appropriately manage emergency care. At the close of the semester, a successful student will receive the current certification for community CPR, AED, and First Aid.
HLTH	1250	Wellness for Life	3	This course is designed to investigate the implications of exercise, diet, nutrition, stress, and physical activity in the total health, wellness, and fitness of the individual.
HLTH	1900	Healthy Sexuality	3	Healthy Sexuality will examine how the dimensions of wellness--physical, intellectual, emotional, social, spiritual, environmental and occupational--influence our sexual health. It is also the intention of this class to show how healthy expressions of sexuality can improve one's overall wellness.
HLTH	1600	Emergency Medical Responder	3	The course provides training in emergency medical care for persons who are apt to be responding to accidents. The course emphasizes the development of skills in patient assessment and emergency medical procedures. The goal is to prepare you for work in the emergency medical arena as a first responder. The course will provide you with the information needed to make competent decisions regarding medical and trauma patients.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HLTH	1040	Current Health Issues and Human Behavior	3	Current Health Issues and Human Behavior is a course which will examine how biological, psychological, and social factors work together to explain health and illness. This course will focus on current health models, such as the biopsychosocial model, that help explain why some people become ill and others do not. This class has an integrative health approach in treating the whole person who may have disease and illness caused by genetic factors and/or environmental factors. Another very important aspect of this course will be to interpret and discuss the various theories of change in human behavior and how they relate to health. After participating and completing coursework, students should understand the (positive and negative) contributing roles that psychological and social factors have on biological processes in the body.
HLTH	2060	Concepts of Addiction	3	This course discusses chemical use, misuse, abuse, and dependence. The focus of this class is the role of biopsychosocial factors in the development and progression of addiction. The content of this class will also include information regarding intervention, assessment, and treatment.
HLTH	2030	Global Health	3	This course examines the historical context of global health and emerging global health priorities, including infectious diseases, poverty, health inequity, health care systems and major global initiatives for disease prevention and health promotion.
HLTH	2070	Socio-Cultural Aspects of Nutrition	3	Students in this course will explore nutrition in the context of culture ? looking at common dishes, special occasion foods, and cultural foods with therapeutic uses. Students will examine how cultural values, health beliefs, economic status, and learned food practices shape the development of meal patterns, eating customs, and the nutritional status of ethnic, religious, and regional groups. Students will also be given the opportunity to prepare and taste cultural foods, like amaranth, epozote, plantains, miso, and mung beans from the various regions studied.
HLTH	1010	Health Terminology	3	This is a course for all health professionals to become familiar with, and knowledgeable in, the workings of the human body. They will learn correct terms and terminology as it applies to each human body system.
HLTH	2020	Introduction to Health	3	This course will introduce students to various public and community health services, the history of community and public health and the role and functions of health programs and their relationships between holistic health aspects. This course will explore the knowledge, skills and competencies of health educators in various community settings, occupations and careers.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HLTH	2040	Foundations and Theory in Health	3	Foundations and theory in Health is a course which will examine how biological, psychological, and social factors work together to explain health and illness. This course will focus on current health behavior theories and models which are used to change human behavior and how they relate to health.
HLTH	2080	Environmental Health	3	The purpose of this class is to inform the student about the key areas of environmental health and instill awareness about the crucial role of the environment in the health of the planet and all living organisms. It is designed to promote awareness of the environmental influences on health.
HLTH	2090	Life Cycle Nutrition	3	This course will examine the nutritional needs and recommendations at each major phase of the life cycle from pregnancy to older adults. Students will also explore factors that affect nutritional status in learning to assess appropriate educational materials, dietary interventions, and community nutrition programs.
HLTH	1000	Introduction to Mindfulness	2	Students will develop an understanding of the current research on Mindfulness and Meditation practices. The focus of this class will be to train students to enter a calm and centered state of awareness through working with the body, breath and mind.
HONR	1000	Honors Seminar	1	The Honors Seminar is an in-depth exploration of a specific topic using various avenues or techniques of inquiry. The topics will cover a wide variety of issues based on faculty expertise and interest. Students must be members of the Honors Program, members of Phi Theta Kappa, have a minimum cumulative GPA of 3.5, or have instructor permission.
HONR	2000	Undergraduate Research - Literature Review		Students will be engaged in the investigation of the state of a specific scholarly question under the guidance of a faculty member. Research projects will focus on using discipline-appropriate resources and literature to understand the origins and development of a particular scholarly topic within the context of the relevant discipline(s), significant approaches to the topic, and current avenues that are being used to develop the topic. This course may be repeated for credit.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HONR	2020	Undergraduate Research - Original Research		Students will be engaged in an original research project under the guidance of the faculty member. Research projects will: have clearly communicated purposes and objectives, have well-defined discipline-appropriate methods, be ambitious in scope, have a reasonable chance of completion within the agreed-upon timeframe, require use of discipline-appropriate scholarly literature, require use of advanced concepts, build upon current scholarly understanding, and result in work suitable for conference presentation or publication. This course may be repeated for credit.
HONR	2030	Undergraduate Research - Creative Work		Students will be engaged in the production of an original creative work under the guidance of the faculty member. The creative work will: use discipline-appropriate methods, be ambitious in scope, have a reasonable chance of completion within the agreed-upon timeframe, and require use of advanced concepts and technique. The result should be of a quality suitable for presentation, production, or publication. This course may be repeated for credit.
HONR	2010	Undergraduate Research - Research Assistant		Students will assist in an ongoing scholarly research project under the guidance of a faculty member. Students will learn data-collection and/or analysis using discipline-appropriate methods that contribute to the objectives of the research project. This course may be repeated for credit.
HONR	2900	Honors Capstone	1	<p>The Honors Capstone course provides a culminating experience of a student's academic life. Students develop and implement a project that integrates their undergraduate experiences while helping them to prepare for their intended career paths. Students will work with two (Honors and High Honors) or three (Highest Honors) faculty to develop an integrative project that incorporates two (Honors and High Honors) or three subjects (Highest Honors) the student has studied over the course of their college career. Projects must demonstrate student competency in each of the four NHCC Essential Learning Outcomes (ELOs) as well as student ability to establish short- and long-term goals.</p> <p>Approval of the Honors Program and instructor permission.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HSER	1200	Multicultural Awareness in Human Services	3	<p>This class examines attitudes and enhances knowledge and skills that are necessary to work effectively with culturally diverse populations in the human services field. Students will explore their own and other's cultural identities, values, attitudes, and behaviors. Adjusting services to the multicultural needs of individuals who are served will be emphasized.</p> <p>Recommended completion of, or concurrent enrollment in EAP 1260: College Writing Skills Development plus EAP 1230: College Reading and Study Skills or above with a grade of C or better</p>
HSER	1100	Introduction to Human Services	3	<p>This course introduces students to the field of Human Services. Course describes history, worker roles, and current career trends in the field. Students are required to participate in hands-on experience through service learning.</p> <p>Recommended completion of, or concurrent enrollment in EAP 1260: College Writing Skills Development plus EAP 1230: College Reading and Study Skills or above with a grade of C or better.</p>
HSER	1300	Crisis Assessment and Intervention	3	<p>Presents basic concepts of crisis assessment, intervention, and referral. The application of strategies and techniques with a discussion of intervention, assessment, and referral models is included. An overview of interventions for specific crisis will be reviewed. An assessment model for making appropriate referrals is presented.</p>
HSER	1400	Basic Counseling Skills	3	<p>Introduces basic counseling and interviewing skills. Students will learn and apply skills that range from basic attending and listening skills to chart documentation and treatment planning.</p>
HSER	1600	Loss and Grief	2	<p>Review dynamics of loss and grief across the lifespan and how grief impacts families and children. Students will learn to identify, assess, and intervene in grief situations while exploring gender differences.</p> <p>The course will incorporate journal assignments and experiential activities designed in the healing of each persons grief journey.</p>
HSER	1500	Group Processes	3	<p>Focuses on the development of communication skills and self-awareness important in the roles of group membership and leadership. Provides an understanding of the evolution and function of therapeutic groups. Emphasizes the development of knowledge and skills.</p> <p>Prerequisites: HSER 1100, HSER 1200 and HSER 1400</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
HSER	1700	Family Functions and Interactions	3	The course offers an introduction to family systems theory, normal and problematic family systems and family functioning concepts. The impact and effects of family on individual development is also explored. Students will examine family violence including the impact of chemical dependency, social and the psychological roots of violence.
HSER	1900	Current Human Services Topics	3	This course examines current topics and issues specific to the field of Human Services. Students will take an active role in the research and presentation of topics in the course.
HSER	1800	Mental Disorders Through the Life Span	3	The course introduces an overview of the range of mental disorders throughout the lifespan including those impacting children and the elderly. Students will learn to identify signs and symptoms of each disorder in addition to learning basic skills and therapeutic treatments that effectively help individuals who have mental disorders. Recommendation of completion of or concurrent enrollment in PSYC 1160.
HSER	2100	Human Services Seminar	1	The course provides an opportunity for human services students to create and implement projects for the development of personal knowledge and skill using a seminar approach. Students should be aware that a Minnesota Department of Human Services background study and fingerprinting is required. Co-requisite required: HSER 2101 Human Services Internship.
HSER	2101	Human Services Internship	6	This course is a capstone off campus experiential-learning component for the Human Services program. Students will spend 240 hours at a human services internship site to have the opportunity to gain experience, enhance their knowledge and further develop skills learned in the program. Students should be aware that a Minnesota Department of Human Services background study and fingerprinting is required. Prerequisites: HSER 1100, HSER 1400, and HSER 1500

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	1010	Survey of Mathematics	3	<p>Designed for the liberal arts student, this course explores the diversity of math and is focused on developing quantitative skill and reasoning ability. Topics are chosen by the instructor and may include but are not limited to: logic, problem solving, and data analysis, mathematics of social choice, geometry, financial mathematics, infinity, topology, and probability.</p> <p>Prerequisites: College math placement level or successful completion of Math 0900 or 0902 or 0980 or 1031 or 1130 or 1140 with grade of "C" or better.</p> <p>Please Note: If you have taken a 1000 level Math Course (or higher) from another institution, and have submitted your official transcript, please contact the Records and Registration Department in order to register for this course.</p>
MATH	1031	Math for Elementary Education I	3	<p>This is the first of a two-course sequence designed for prospective elementary education majors. Students will develop a deep understanding of elementary mathematics and the ability to effectively communicate mathematical ideas. The course focuses on heuristics for mathematical problem solving in the contexts of place value and number systems; operations with whole numbers, integers, fractions, and decimals; and rates, ratios, proportions, and percentages.</p>
MATH	1032	Math for Elementary Education II	3	<p>This is the second of a two-course sequence designed for prospective elementary education majors. Students will develop a deep understanding of elementary mathematics and the ability to effectively communicate mathematical ideas. The course focuses on heuristics for mathematical problem solving and reasoning in the contexts of geometry, measurement, probability, and statistics. Prerequisites: Successful completion of Math 1031 with grade of "C" or better.</p>
MATH	1130	Elementary Statistics	3	<p>This is an introductory course in descriptive statistics, probability, random variables, and inferential statistics. Topics include exploratory data analysis, measures of central tendency and variation, linear regression, binomial and normal distributions, the central limit theorem, confidence intervals and hypothesis testing for one population and two populations. Additional topics may include basic probability, conditional probability, Bayes' Theorem, analysis of variance, and chi-squared tests.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	1140	Finite Mathematics	3	<p>This course is designed primarily for the non-science major. Several business and financial applications are covered. These applications may include systems of equations, linear programming (maximizing profit, minimizing cost), the interdependence of different sectors in an economy, and interest rates as they pertain to credit cards, short-term loans, and mortgages. Although some computer applications may be included, no prior experience is necessary. Additional topics may include: introductory statistics and probability, combinatorics (the number of ways of arranging objects), game theory, coding, and Markov chains (multi-step games/decisions).</p> <p>Prerequisite: Placement into Math 902 or successful completion of Math 0900 or 0901 or 0980 or 1010 or 1031 or 1130 with grade of "C" or better.</p> <p>Please Note: If you have taken a 1000 level Math Course (or higher) from another institution, and have submitted your official transcript, please contact the Records and Registration Department in order to register for this course.</p>
MATH	1150	College Algebra	3	<p>This college-level course continues the study of algebra conducted in the developmental algebra courses. Topics include polynomial, rational, inverse, exponential, and logarithmic functions and their applications. Additional topics include systems of non-linear equations, systems of linear equations, and matrices.</p> <p>Prerequisites: College math placement level or successful completion of Math 0970 or 0980 with grade of "C" or better</p>
MATH	1200	Calculus Survey	3	<p>This course in differential and integral calculus is designed for those students who require only one semester of calculus. The emphasis is on methods and applications of calculus rather than on theory, with the applications primarily from business. Students who wish to take more than one semester of calculus should enroll in Math 1221.</p> <p>Prerequisites: College math placement level or successful completion of Math 1150 or Math 1180 with grade of "C" or better</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	1221	Calculus I	5	<p>This course is a thorough treatment of differentiation and an introduction to integration. Topics include the definition of derivative, limits and continuity, differentiation, applications of the derivative, definite and indefinite integrals, the Fundamental Theorem of Calculus, techniques of integration, and applications of integration.</p> <p>Prerequisites: College math placement level or successful completion of Math 1170 or Math 1180 with grade of "C" or better</p>
MATH	1222	Calculus II	5	<p>This course continues the study of the definite and indefinite integrals and leads to a study of improper integrals and infinite series. Topics include advanced techniques of anti-differentiation, numerical integration techniques and error bounding, applications of the integral, improper integrals, an introduction to differential equations, infinite series, parametric equations, and polar coordinates.</p> <p>Prerequisites: Successful completion of Math 1221 with grade of "C" or better</p>
MATH	2220	Calculus III	5	<p>Topics in this course include solid analytic geometry, vectors in space, scalar and vector products, vector functions and derivatives/integrals, multi-variable functions, partial derivatives, alternative coordinate systems, and double and triple integrals. The geometry of space curves, line and surface integrals, curl and gradient divergence, and Stokes' theorem are also included. Emphasis will be on learning relevant mathematical methods.</p> <p>Prerequisites: Successful completion of Math 1222 with a grade of "C" or better</p>
MATH	2300	Linear Algebra	4	<p>This course includes vectors and vector spaces, matrices, matrix algebra, linear systems of equations, determinants, linear transformations, eigenvalues and eigenvectors. Students will also be expected to construct proofs relating to linear dependence and/or independence, the span of a set of vectors, and whether a set of vectors satisfies the vector space axioms.</p>
MATH	2400	Differential Equations	4	<p>The content of this course covers first and second ordinary differential equations with applications, higher order linear equations, constant coefficients, differential operators, variation of parameters, power series methods, Laplace transforms, and solving systems of differential equations. The student will also be introduced to numerical methods for solving differential equations.</p>
MATH	1990	Topic:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	2000	Discrete Mathematical Structures	4	<p>The course covers mathematical topics essential for work in computer science. Topics include: number bases, mathematical induction, sets, relations, functions, congruence, recursion, combinations and permutations, probability, graphs, trees, logic, Boolean algebra, and proof techniques. Computing related problems and examples are integrated throughout the course.</p> <p>Prerequisites: MATH 1150 College Algebra (Minimum grade: 1.67 GPA Equivalent) Or A score of 79 or higher on the College Level Math (0167) placement test Or An ACT math score of 26 or higher</p>
MATH	980	Pre College Algebra	5	<p>This course is a thorough treatment of the algebra necessary for success in college-level math classes. Topics covered include linear equations, quadratic equations, functions, graphing, rational expressions, polynomials, inequalities, radicals, complex numbers, and systems of equations. Additional topics may include exponential and logarithmic functions and their graphs. This course emphasizes applications of all topics and the acquisition of by-hand skill. Credit does not apply to a degree. A student who earns an A or B in this class can petition for permission to use it as a prerequisite for Math 1180.</p>
MATH	999	Topic:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
MATH	1170	Pre-Calculus	4	<p>This is a comprehensive course in trigonometry and extended topics in algebra. Topics include trigonometric functions and their graphs, inverse trigonometric functions and their graphs, trigonometric identities and equations, applications of trigonometry, conic sections, the binomial theorem, and sequences and series. Additional topics may include mathematical induction, combinations and permutations, and systems of nonlinear equations.</p> <p>Prerequisites: College math placement level or successful completion of Math 1150 with grade of "C" or better</p>
MATH	1180	College Algebra and Pre-Calculus	5	<p>This course is a very accelerated combination of Math 1150 and 1170 in one semester. It is recommended for strong students or can be used also as a refresher course for students who have successfully completed those two courses in the past. Topics include polynomial, rational, exponential, logarithmic, trigonometric, inverse trigonometric functions, vectors, conic sections, and sequences and series. Additional topics may include polar coordinates or parametric equations.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	970	Bridge to College Algebra	2	This course is designed for students who have successfully completed Math 900 and wish to prepare for Math 1150. Topics covered include linear equations and inequalities, integer and rational exponents, polynomial algebra, polynomial factoring, rational expression algebra, complex numbers, and quadratic equations. This course emphasizes the acquisition of by-hand skill. Credit does not apply to a degree.
MATH	801	Math Foundations	1	This course prepares students for Math 0900, Mathematical Literacy. Students will improve their number sense and skills with whole numbers, integers, fractions, mixed numbers, and decimals including calculations without calculators. Other topics will include place-value and order, rounding and estimation, and order of operations, all with a focus on integers, fractions, mixed numbers, and decimals, one-step application problems, and an introduction to percent. Additional course content includes math specific study skills and math success strategies. Credit does not apply to a degree and is not eligible for Financial Aid.
MATH	1210	Applied Statistics	4	This course provides students with practical statistical tools for analyzing a variety of data. Students will learn how to choose which statistical test to implement, how to apply computer software to conduct tests, and how to interpret the statistical results. Topics include discussion of frequency distributions, measures of central tendency and variation, exploratory data analysis, probability, hypothesis testing and inferences about proportions and means (one and two populations), analysis of variance, correlation, linear regression, and nonparametric statistics. Prerequisites: College math placement above Math 1150 or successful completion of Math 1150 or higher with grade of "C" or better.
MATH	900	Mathematical Literacy	5	<p>In this course, students will develop the necessary mathematical reasoning skills to succeed in a wide variety of college-level courses, including Math 1010, 1031, 1130, 1140 and other courses outside the math department. Students will solve realistic, interesting problems incorporating numeracy, proportional reasoning, algebraic reasoning, and functions. Students will be expected to use mathematical terminology appropriately in written communication.</p> <p>Additional coursework may be required for students pursuing a STEM degree.</p> <p>Prerequisites: Placement test or successful completion of Math 0800 or Math 0801</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MATH	2011	Probability and Statistics	4	This is a calculus-based first course in the study of probability and statistics. Topics include descriptive statistics, general probability theory, random variables, sampling distributions, estimation, and hypothesis testing. Additional topics may include two-sample inference, linear regression, analysis of categorical data, analysis of variance, and quality and reliability.
MLT	1000	Clinical Laboratory Basics	1	This course will introduce the student to the general role of the healthcare provider as well as the specific role of the Medical Laboratory Technician. Students will learn about and practice infection control and safety, medical terminology, healthcare ethics, venipuncture technique, specimen processing, and quality assurance. The course will run the first half of the fall semester and will meet once a week for 2 hours.
MLT	1100	Clinical Urinalysis/Body Fluids	2	This course will include lab skills such as pipetting, microscopy and centrifugation; review of the anatomy and physiology of the kidney, role of the kidney in disease; physical, chemical and microscopic properties of urine; and clinical correlation of lab results. Other body fluids and seminal fluid analysis will be reviewed in the lecture portion and laboratory portion. Prerequisite: Admission to the MLT program Strongly Recommended: BIOL 1001 and BIOL 1120
MLT	1200	Clinical Laboratory Instrumentation	1	This course will introduce the student to the basic operation and associated functions related to selected laboratory instruments and equipment. Students will learn and practice pipetting, laboratory mathematics, microscopy, dilutions, and quality control. The course will run the second half of the fall semester and will meet once a week for 2 hours.
MLT	2050	Clinical Hematology	4	The course will include development, normal and abnormal characteristics of the cellular elements of the blood; the basic techniques and instrumentation utilized in the hematology laboratory; the theory and techniques of coagulation studies; and the clinical correlation of all procedures. This course will include development, normal and abnormal characteristics of the cellular elements of blood; the basic techniques and instrumentation utilized in the hematology laboratory; the theory and techniques of coagulation studies; and the clinical correlation of all procedures. Prerequisite: Admission to the MLT Program MLT 1000, 1100 and 1200

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MLT	2080	Clinical Microbiology	4	This course covers the isolation, identification, and significance of clinically associate bacteria, mycobacteria, fungi, and parasites. Prerequisite: Admission to the MLT Program and Biol 1001 or Biol 1101
MLT	2100	Clinical Chemistry	4	This course introduces the basic principles, procedures, and correlations of the clinical chemistry laboratory. The theory of basic laboratory instrumentation and procedures will be discussed and practiced. Prerequisite: Admission to the MLT Program; MLT 1000 and 1200 and Chem 1062.
MLT	2150	Clinical Immunohematology	3	This course will include principles of immunohematology and transfusion service procedures, including blood typing, antibody screening, compatibility testing, antibody identification, problem resolution, hemolytic disease of the newborn, and transfusion therapy. (two hours lecture, three hours lab) Prerequisite: Admission to the MLT Program; MLT 1250 and MLT 2050.
MLT	2310	Applied Phlebotomy	1	The course provides the student with experience in phlebotomy skills. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses
MLT	2320	Applied Hematology	2	This course is designed to give the student clinical experience in the area of hematology and body fluids. Prerequisite: Admission to the MLT Program. Completion of MLT Didactic Courses
MLT	2340	Applied Urinalysis	1	This course is designed to give the student clinical experience in the area of urinalysis. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses
MLT	2350	Applied Microbiology	2	The course is designed to give the student clinical experience in the area of microbiology. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MLT	2360	Applied Immunohematology	2	This course is the application of immunohematology policies and procedures in the clinical transfusion service setting. Students will perform pretransfusion compatibility testing in accordance with the American Association of Blood Bank Standards. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses
MLT	2380	Applied Chemistry	2	The course provides the student with experience in the clinical chemistry laboratory as well as study in the theory and principles involved. Prerequisite: Completion of MLT Didactic Courses
MLT	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
MLT	1250	Clinical Immunology	2	This course introduces students to the basic elements of the immune system and provides for application of the principles of immunology to immunologic techniques utilized in the clinical laboratory. Prerequisite: Admission to the MLT Program; MLT 1000 Clinical Laboratory Basics
MLT	2330	Applied Coagulation	1	This course is designed to give the student clinical experience in the area of coagulation. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic courses
MUSC	1130	Concert Choir	1	This course includes the study and performance of choral repertoire. Through active learning students will participate in collaborative artistic study culminating in choral performance of works from a variety of cultures and historical periods. The day section of choir meets twice per week and the night section of choir meets once per week. May be repeated for credit.
MUSC	1150	Chamber Singers	1	This course is a select auditioned group of singers which will perform a wide spectrum of choral repertoire from Madrigals to Vocal Jazz. Auditions will be held early fall semester for the yearly commitment. May be repeated for credit. Strongly recommended to take Concert Choir concurrently

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1200	Fundamentals of Music	3	This general course in music fundamentals includes basic theory, sight singing, piano keyboard, creative activity, and student demonstration. Through the understanding and application of the elements of music, students will be able to distinguish cultural styles and genres.
MUSC	1300	Music in World Cultures	3	This course teaches music primarily from non-Eurocentric cultures which may include but is not limited to Indian, Indonesian, Chinese, Japanese, Middle Eastern, African, Native American, and African American. Through their studies of the diversity of world music, students will develop a broader understanding and appreciation of other cultures.
MUSC	1350	History of Rock and Roll	3	This course may include but is not limited to early American music, jazz, American musical theater, pop, rock, and rap. The history of popular music in Western Culture will be presented. Students will learn to identify the music styles contained under the broad umbrella of Rock 'n Roll. Students will also learn about the historical, social, cultural and political influences on popular music.
MUSC	1600	Class Voice	2	This course is devoted to basic vocal techniques and skills. Students will learn different styles of song from various cultures and historical periods and will learn to evaluate the fundamentals of the creative process as expressed through vocal performance. This course is open to non-music majors.
MUSC	1610	Applied Music: Voice	1	This course is private voice instruction with lessons of one-half hour per week. Students will expand upon basic vocal technique and skills and will extend their technical ability and style interpretation skill through vocal repertoire from various cultures and historical periods. Students will extend their ability to interpret and create artistic expression through song. This course may be repeated for credit. Special "Music Fees" apply. MUSC 1600 Class Voice strongly recommended before taking this course."
MUSC	1810	Applied Music: Piano	1	This course is private piano instruction with lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon basic piano technique and skills and will extend their technical ability and style interpretation skill through piano repertoire from various cultures and historical periods. Students will extend their ability to interpret and create artistic expression through piano literature and performance. This course may be repeated for credit. Special "Music Fees" apply.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
MUSC	1170	Instrumental Jazz Ensemble	1	<p>This course is an instrumental performance ensemble that plays a variety of jazz literature. Enrollment is open to all students who are able to read written musical notation for their instrument. Ensemble is open to all students. Students should provide their own instrument. This group meets once per week.</p> <p>May be repeated for credit.</p> <p>NOTE: Student should be able to minimally play instrument at a High School level</p>
MUSC	1830	Applied Music: Strings	1	<p>This course is private instruction on a stringed instrument (violin, viola, cello, bass) lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon basic technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.</p> <p>This course may be repeated for credit. Special "Music Fees" apply.</p>
MUSC	1860	Applied Music: Brass	1	<p>This course is private instruction on a brass instrument (e.g., trumpet, trombone, French horn, baritone, tuba) lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.</p> <p>This course may be repeated for credit. Special "Music Fees" apply.</p>
MUSC	1801	Class Piano I	2	This course offers basic piano instruction and technique for the student with no previous training in piano. Students will learn basic piano techniques and skills and be introduced to different playing styles. Students will be introduced to music and history of different cultures as related to the piano.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1510	Applied Music: Guitar	1	<p>This course is open to all students and consists of private guitar instruction lessons of 1/2 hour per week (during fall and spring semesters). Students, beginners through advanced, can, in consultation instructor, pick areas of focus depending on their tastes and needs. These may include: guitar technique (i.e. chords, scales finger-picking) theory, reading, ear-training, analysis, improvisation, repertoire development and interpretation. This course may be repeated for credit. Special Music Fees apply.</p> <p>Student must provide their own guitar (preferably acoustic) in good playing condition.</p>
MUSC	1802	Class Piano II	2	<p>The purpose of the course is to build upon skills and musicianship begun in Class Piano I, allowing the student to continue gaining a better understanding of playing the piano and a greater appreciation of music in general. Both technique and musicianship will be addressed. Scales and/or exercises and music theory will be part of every class lesson. To be successful in this class, the student should have completed MUSC 1801 Class Piano I or be at the equivalent skill level.</p>
MUSC	2010	Advanced Applied Music Lessons	2	<p>This course is private instruction for advanced students on their instrument (voice, piano, guitar, brass, woodwinds, strings, percussion) with lessons of one hour per week. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on their instrument. Students' advanced technical expertise will be incorporated into artistic expression and interpretation of repertoire that challenges their technique and demands artistic finesse and critical analysis. Student must provide their own instrument.</p> <p>This course may be repeated for credit. Special "Music Fees" apply.</p> <p>Admission to this course is by permission only. PLEASE CONTACT THE INSTRUCTOR FOR PERMISSION TO REGISTER.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1850	Applied Music: Percussion	1	<p>This course is private instruction on percussion instruments (e.g., drums, xylophone, marimba, or tympani) lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.</p> <p>This course may be repeated for credit. Special "Music Fees" apply.</p>
MUSC	1870	Applied Music: Woodwinds	1	<p>This course is private instruction on a woodwind instrument (saxophone, flute, clarinet, oboe or bassoon) lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.</p> <p>This course may be repeated for credit. Special "Music Fees" apply.</p>
MUSC	1180	Small Group Performance Ensemble	1	<p>This course is a small ensemble performance opportunity. An ensemble work may be made up of strings, percussion, winds, guitars, voice, or any instrumental grouping that may be possible depending on need and interest. Depending on their primary instrument, a student will be placed in a section of this course that corresponds to their instrument. The ensemble will play a variety of composed and/or improvised literature.</p> <p>Primarily for AFA music students, the course is open to all who have the ability to read musical notation and perform competently. However, permission for placement into the course is required.</p> <p>Music faculty must be consulted for placement in the appropriate section. Weekly rehearsals and end-of-semester performance is required. Additional rehearsals may be required.</p> <p>May be repeated for credit.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1501	Class Guitar I	2	<p>This course is open to all students. It is designed for beginners or for guitar students wishing to fill in gaps in their knowledge from previous musical experience. It covers basic guitar techniques and musicianship skills used in a variety of different styles of music. Students will also study different types of written musical notation. It also introduces improvisation and song writing.</p> <p>Student must provide their own guitar (preferably acoustic) in good playing condition.</p>
MUSC	1502	Class Guitar II	2	<p>This course is for the advanced beginning guitar student who has completed MUSC 1501, Class Guitar I, guitar students wanting to fill in gaps in their knowledge from previous musical experience, or wanting to continue their guitar studies in a classroom environment. To be successful in this class, the student should have completed MUSC 1501 Guitar Class I or be at the appropriate skill level.</p> <p>It covers guitar techniques and musicianship skills used in a variety of different styles of music. Students will also study different types of written musical notation, as well as improvisation and song writing.</p> <p>Student must provide their own guitar (preferably acoustic) in good playing condition.</p>
MUSC	2170	History of Music I: Medieval Through Classical Eras	3	<p>This course is a historical survey primarily of music rooted in the European tradition. The timeframe of study will focus on eras referred to as the Medieval, Renaissance and Baroque periods with some references to the roots of western music in ancient cultures. Music will be studied from the viewpoints of musical styles, genres, performance practices, as well as cultural and historical contexts of those eras.</p>
MUSC	1241	Music Theory I	3	<p>This course is the first of a four semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory I and Music Theory II are: notation, intervals, rhythm, scale patterns, melodic forms, harmonic conventions, four-part chorale structure, formal structure (binary, ternary). While this course is open to all, to be successful in this course, entering students must have a solid knowledge of note names, scale patterns and note rhythms such as that learned in MUSC 1200 Fundamentals of Music. This course is required for AFA music majors.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1251	Ear Training and Sight Singing I	2	This course is the first of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. While this course is open to all, to be successful in this course, entering students must have a solid knowledge of note names, scale patterns and note rhythms such as that learned in MUSC 1200 Fundamentals of Music. This course is required for AFA music majors.
MUSC	1252	Ear Training and Sight Singing II	2	This course is the second of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. This course is required for AFA music majors.
MUSC	2251	Ear Training and Sight Singing III	2	This course is the third of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. This course is required for AFA music majors.
MUSC	2252	Ear Training and Sight Singing IV	2	This course is the final of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. This course is required for AFA music majors.
MUSC	1242	Music Theory II	3	A continuation of Music Theory I, this course is the second of a four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory I and Music Theory II are: notation, intervals, rhythm, scale patterns, melodic forms, harmonic conventions, four-part chorale structure, formal structure (binary, ternary). This course is required for AFA music majors.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	2241	Music Theory III	3	A continuation of Music Theory I & II, this course is the third of a four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory III and Music Theory IV are: Sixth, ninth, eleventh, thirteenth chords and their variants; counterpoint (two-voice), formal structures (fugue, sonata allegro, rondo, variation); pre-20th century tonality and 20th century atonality; music composition not based in tonal sound. This course is required for AFA music majors.
MUSC	2242	Music Theory IV	3	A continuation of Music Theory III, this course is the final in four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory III and Music Theory IV are: Sixth, ninth, eleventh, thirteenth chords and their variants; counterpoint (two-voice), formal structures (fugue, sonata allegro, rondo, variation); pre-20th century tonality and 20th century atonality; music composition not based in tonal sound. This course is required for AFA music majors.
MUSC	2180	History of Music II: Romantic Era to the 21st Century	3	This course is a historical survey primarily of music rooted in the European traditions. The timeframe of study will focus on eras referred to as the Romantic and late Romantic periods through the 20th century. Music will be studied from the viewpoints of musical styles, genres, performance practices, as well as cultural and historical contexts of those eras.
MUSC	1160	Large Instrumental Ensemble	1	This course is an instrumental performance ensemble that plays a variety of musical literature. Enrollment is open to all students who are able to minimally play their instrument at a High School level. The ensemble is open to all students who meet this criterion. Students should provide their own instrument. Percussionists should provide their own sticks/mallets. This group meets once/week. May be repeated for credit. NOTE: Student should be able to minimally play instrument at a High School level NOTE: Student should be able to minimally play their instrument at a High School level

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	1131	Community College Choir	0	This course includes the study and performance of choral repertoire. Through active learning students will participate in collaborative artistic study culminating in choral performance of works from a variety of cultures and historical periods. The day section of choir meets twice per week and the night section of choir meets once per week.
MUSC	1171	Community Jazz Ensemble		This course is an instrumental performance ensemble that plays a variety of jazz literature. Enrollment is open to all students who are able to read written musical notation for their instrument. Ensemble is open to all students. Students should provide their own instrument. This group meets once per week.
MUSC	1161	Community Band	0	This course is an instrumental performance ensemble that plays a variety of musical literature. Enrollment is open to all students who are able to minimally play their instrument at a High School level. The ensemble is open to all students who meet this criterion. Students should provide their own instrument. Percussionists should provide their own sticks/mallets. This group meets once/week.
MUSC	1190	Garage Band	2	Ensemble course devoted to various musical styles found in contemporary rock and hip-hop (punk/blues/metal/rap/etc). Open to all majors, Garage Band (as in, start a band that plays blues/rock/metal/punk type music). Students can play any instrument, but bass/drums/electric guitar would be the focus. Coach to play cover songs and develop basic songwriting skills. Already established bands welcome to register.
MUSC	1220	Music Appreciation	3	This general cultural course is designed to develop an understanding and enjoyment of music. It includes a study of music in western civilization. In addition some world music topics will be addressed. Emphasis is upon class listening supplemented by historical background. Live concert attendance may be required.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
MUSC	2970	Music Tour	1	<p>This course consists of a series of concert or music experiences in the Twin Cities area or another cultural center, e.g. New York, Washington, D.C., to experience a variety of musical performances, lectures, demonstrations, and facilities. Students will study and experience the components that go into live music performances. In addition to live performances, students may tour architecture, museums and galleries to better analyze and understand the background against which the musical performances take place. Special fees may be applied. This course may be repeated for credit.</p> <p>Students will need to provide their own transportation to area concerts, museums or other venues.</p>
MUSC	1370	Video Game Music	3	<p>This course will examine the evolution of music in video games, beginning with the earliest use of sound in games such as PAC Man and Space Invaders and progressing to the more complex soundtracks of modern day titles such as Halo & The Legend of Zelda. Students will follow the artistic & technological advances of this unique media form, gaining a greater understanding of how music helps shape the overall gaming experience.</p>
NSCI	1010	Science of Disaster Workshop I	1	<p>These courses examine the scientific mechanisms and basis of hazards that are of local, regional, national and global concern for public health, safety and environmental impact. Scientific background of distributions, risks, and case histories for each major hazard will be presented. Topics are divided as follows: 1010 Disasters related to the Lithosphere (rigid portion of earth's surface); 1020 Disasters related to the Hydrosphere (water) and Atmosphere (air); 1030 Disasters related to the Biosphere (realm where life exists), including those societally-induced. This course includes a lab-like experience. Take-home final exam and/or paper/projects required.</p>
NSCI	1020	Science of Disaster Workshop II	1	<p>These courses examine the scientific mechanisms and basis of hazards that are of local, regional, national and global concern for public health, safety and environmental impact. Scientific background of distributions, risks, and case histories for each major hazard will be presented. Topics are divided as follows: 1010 Disasters related to the Lithosphere (rigid portion of earth's surface); 1020 Disasters related to the Hydrosphere (water) and Atmosphere (air); 1030 Disasters related to the Biosphere (realm where life exists), including those societally-induced. This course includes a lab-like experience. Take-home final exam and/or paper/projects required.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NSCI	1030	Science of Disaster Workshop III	1	<p>These courses examine the scientific mechanisms and basis of hazards that are of local, regional, national and global concern for public health, safety and environmental impact. Scientific background of distributions, risks, and case histories for each major hazard will be presented. Topics are divided as follows: 1010 Disasters related to the Lithosphere (rigid portion of earth's surface); 1020 Disasters related to the Hydrosphere (water) and Atmosphere (air); 1030 Disasters related to the Biosphere (realm where life exists), including those societally-induced. This course includes a lab-like experience. Take-home final exam and/or paper/projects required.</p>
NSCI	1110	Minnesota's Natural History	4	<p>This course is a team-taught, field-based introduction to the flora, fauna, ecology, and geologic development of Minnesota. A series of in-class sessions will prepare students for recognition and identification of plants, animals, habitats, and geologic features and for the integration of these biotic and abiotic components of ecosystems. This course will include an examination of natural resource issues and policies in the context of Minnesota's politics and economy. Two weekend field trips are mandatory. These field trips will begin on Friday afternoon and end on Sunday afternoon or early evening. This course fulfills lab requirement for Goal Area 3. (3 hours lecture, 3 hours lab)</p>
NSCI	1990	Topics:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
NSCI	1070	Concepts of the Stars and Universe	3	<p>This course provides an introduction to astronomy with an emphasis on stars and galaxies. Topics include understanding the Sun as a star; revealing the messages hidden in starlight; stellar birth, maturation, and death; black holes, white dwarfs, pulsars, quasars, and supernova explosions; the Milky Way and other galaxies; the origin and the fate of the universe. Current topics and discoveries from stellar astronomy and cosmology are also discussed. This course includes a lab-like experience. (3 hours lecture; meets MnTC Goal Area 3 requirements)</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NSCI	1050	Astronomy	4	<p>This course takes a "big picture" look at the universe as a whole. Topics include history of astronomy, origin and features of the planets and the Solar System, the lives and deaths of stars, cosmology and the fate of the universe. It also covers recent discoveries and current topics in astronomy. The laboratory component provides a variety of methods to more fully investigate the process of astronomy. The course meets requirements as a natural sciences lab course under Goal Area 3 of the Minnesota Transfer Curriculum. (3 hours lecture/week, 2 hours lab/week)</p>
NSCI	1060	The Solar System	3	<p>This course provides an introduction to astronomy with emphasis on our Solar System. Topics include the origin, structure, and history of the Solar System; the properties of light; the function and use of telescopes, understanding the processes that have shaped the planets, their moons and ring systems; comets, asteroids and other space debris. Recent discoveries and current topics from the exploration of the Solar System are also discussed. This course includes a lab-like experience. (3 hours lecture; satisfies MnTC Goal Area 3)</p>
NSCI	1061	Solar System Lab	1	<p>An optional course laboratory course designed to complement The Solar System lecture class. It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, internet exercises, videos and observational sessions may be used within the course. (2 hrs/week)</p> <p>Prerequisite: Prior or concurrent enrollment in Phys/NSci 1060 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1060, you must obtain instructor permission and complete appropriate paperwork for prerequisite override.</p>
NSCI	1071	Stars and the Universe Lab	1	<p>An optional course laboratory course designed to complement the Concepts of Stars and the Universe lecture class, It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, Internet exercises, videotapes and observational sessions may be used within the course. (2 hrs/week)</p> <p>Prerequisite: Prior or concurrent enrollment in Phys/NSci 1070 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1070, you must obtain instructor permission and complete appropriate paperwork for prerequisite override.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NSCI	1000	Conceptual Physics	4	This course is a combined lecture and laboratory course designed for people who want to learn about the fundamental laws and principles that form the basis of the working of the physical universe. This course helps the student understand and appreciate how and why a wide range of common and everyday physical phenomena occur. Topics include: laws of motion, work, energy, momentum, fluids, heat, vibration, wave motion, electricity, magnetism, and light. Some algebra is used in the presentation, so a mathematical preparation equivalent to Math 0902 is recommended. (3 hours lecture, 2 hours lab)
NSCI	1120	Meteorology	4	This course is designed for people who desire to learn about the weather. This course helps the student learn to observe and interpret the sky, to read weather maps, and to understand the sequence of meteorological phenomena. The topics to be covered include: air temperature, humidity, condensation, clouds, air pressure, wind, atmospheric circulation, weather forecasting, computer modeling, thunderstorms, tornadoes and hurricanes. (3 hours lecture, 2 hours lab)
NSCI	1100	Physical Geology	4	A course examining the earth's formation, composition, structure and natural systems. Using the process of science, learners will explore the earth's internal and external processes and how they shape the surface of the earth. Topics include: geologic time, plate tectonics, rock and mineral identification, introduction to topographic and geologic maps, surficial processes, climate change and environmental concerns. Course is open to all students. (3 hours lecture, 3 hours lab) 4 Credits.
NSCI	1201	Oceanography Lab	1	This course is designed to complement GEOL 1150, Oceanography. The 3 hour lab sessions will include group and individual projects that supplement concepts and topics from oceanography lecture. Learners will collect their own data and use oceanographic data from ocean science databases. Lab topics that will be covered include plate tectonics, marine sediments, temperature and salinity, water masses and ocean circulation, mapping the seafloor, marine ecosystems, coastal erosion, climate change, primary productivity, el niño and biogeochemical cycling. Course is open to All Students (3 hours lab) 1 credit

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NSCI	1170	Minnesota Field Geology Series: Glacial Geology	2	Come explore the glacial geologic history of Minnesota! We will also examine its influence on some of the state's economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, formation, climate change and destruction of continental ice sheets, sedimentary processes, recognition of erosional and depositional glacial landforms, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits
NSCI	1210	Minnesota Field Geology Series: Volcanic, Plutonic and Metamorphic Geology	2	Come explore the oldest rocks in Minnesota! This course will examine the earliest geologic history of Minnesota, which includes greenstone belts, iron ore deposits, and flood and pillow basalts. Topics include: geologic time, plate tectonics, rock cycle, rock classification and identification, Mid-continental rift, intrusive and extrusive igneous processes and products, metamorphism and mineral resources, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. □
NSCI	1190	Minnesota Field Geology Series: Fluvial Geology	2	Come explore the geologic history of Minnesota's rivers. We will examine the development of the Mississippi, Minnesota, Red, and St. Croix, and Whitewater Rivers and the influence of their development and present geomorphology on some of the state's economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, weathering and erosion, drainage patterns, flooding, fluvial landform recognition, meandering, wetlands, topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Four-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NSCI	1180	Minnesota Field Geology Series: Caves, Karst and Ancient Seaways	2	Come explore Minnesota's caves and ancient ocean floors! This course will examine the hydrogeologic processes involved in cave formation and the development of karst topography. In addition, we will evaluate the evidence of ancient oceans in Minnesota using the sedimentary and fossil record. Additional topics include: plate tectonics, geologic time, hydrologic cycle, rock, mineral and fossil identification, weathering and erosion, sealevel change, marine sedimentary processes. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. □
NSCI	1200	Oceanography	3	This course is an interdisciplinary survey of the biological, chemical, physical and geologic processes at work in the world's oceans. Using the process of science learners will examine the interplay between these processes and the implications of these interactions for life on Earth, the Earth's climate and marine environments. Topics may include waves, tides, seafloor sediments, marine biology, seawater chemistry, plate tectonics, ocean currents, El Niño, productivity and dead zones, sea level change, coastal processes and effects of man's influence on oceans. Course is open to all students. 3 Credits (3 hours lecture)
NSCI	1140	Historical Geology	4	A temporal survey of the development of Earth as we know it today, and the evolution of life as deciphered from the sedimentary rock and fossil record. By using the process of science to examine how the Earth and life have changed through the geologic past we can begin to get a glimpse into the effect which humans may have on it now and in the future. Topics include: principles of geology, sedimentary rocks, fossil identification and classification, plate tectonics, sea level change, geologic time, topographic and geologic maps, evolution of life, climate change, hominid development and mass extinctions. Course is open to all students. (3 hours lecture, 3 hours lab) 4 credits□
NURS	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

SUBJ	COU-NBR	Title	CRHR	Course Description
NURS	2720	Transition to the Role of the Professional Nurse	4	<p>This course is designed to expand the knowledge and skills of the LPN as they transition to the professional role within nursing. Emphasis is placed on health promotion through the lifespan and incorporates theories related to evidence-based practice, quality and safety, communication, collaboration, clinical decision-making/reasoning, informatics, assessment, caring, and health- illness continuum.</p> <p>Prerequisites: Admission to the Nursing Program: LPN-Mobility Option, BIOL 2100, BIOL 2111, PSYC 1250, and COMM 1110. Co-requisite: NURS 2750 Strongly Recommended to be taken prior to or concurrently: BIOL 2112 concurrently</p>
NURS	2750	Nutrition and the Role of the Professional Nurse	2	<p>This course introduces the student to the role of the nurse in promoting and supporting nutritional health. Emphasis is on the role nutrition plays in health promotion/prevention of illness, recovery from acute illness and/or management of chronic illness. Students learn to access evidence to support healthy nutritional choices that reduce risk factors for disease and/or illness across the lifespan. Students explore how culture, ethnicity, socio-economic status, nutritional trends and controversies, and integrative therapies influence the nutritional health of the client.</p> <p>Prerequisites: Admission to Nursing program, BIOL 2100, BIOL 2111, PSYC 1250, and COMM 1110 Co-requisites: NURS 2700 or NURS 2720 Strongly Recommended to be taken prior to or concurrently: BIOL 2112</p>
NURS	2800	Chronic and Palliative Care	7	<p>This course focuses on the nursing care of clients experiencing chronic illness and/or end of life. Emphasis is placed on understanding the lived experience of clients and families. Ethical issues related to advocacy, self-determination, and autonomy are explored. Evidence-based practice is used to support appropriate focused assessments and management of care of clients experiencing concurrent illnesses/co-morbidities.</p> <p>Prerequisites: BIOL 2112, NURS 2700 or 2720, and NURS 2750 Co-requisites: NURS 2850 and 2820 Strongly Recommended to be taken prior to or concurrently: SOC 1110</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NURS	2820	Pharmacology and the Role of the Professional Nurse	3	<p>This course introduces theoretical concepts that enable students to provide safe and effective care related to pharmaceuticals and natural products to diverse clients across the lifespan. A framework is presented for approaching the study of pharmacotherapeutics including pharmaceutical research and regulation, quality and safety, major drug classifications, and clinical management.</p> <p>Prerequisites: Admission to the Nursing Program, BIOL 2112, NURS 2700 or 2720, and NURS 2750 Co-requisites: NURS 2800 and 2850 Strongly Recommended to be taken prior to or concurrently: SOC 1110</p>
NURS	2850	Applied Pathophysiology for Nursing I	2	<p>This course introduces a holistic perspective of pathophysiological processes and the disruption in normal body function. Emphasis will be on objective and subjective manifestations of common chronic health problems resulting from environmental, genetic, and stress-related maladaptations to provide a foundation for nursing care. This course complements selected topics addressed in Chronicity and End of Life to provide a comprehensive understanding of disease processes.</p> <p>Prerequisites: Admission to the Nursing Program, BIOL 2112, NURS 2700 or 2720, and NURS 2750 Co-requisites: NURS 2800 and 2820 Strongly Recommended to be taken prior to or concurrently: SOC 1110</p>
NURS	2900	Acute and Complex Care	7	<p>This course focuses on the nursing care of clients experiencing acute disruptions of health and/or end of life issues. Emphasis is placed on understanding and application of theory and skills required to provide nursing care to clients with complex and/or unstable conditions. Evidence-based practice is used to support appropriate focused assessments, and effective, efficient nursing interventions. Knowledge of life span, developmental factors, cultural variables and legal aspects of care guide the ethical decision making in delivery of care.</p> <p>Prerequisites: Completion of NURS 2800, 2820, 2850; SOC 1110 Co-requisites: NURS 2920 and 2950 Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or 1220</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NURS	2920	Applied Pathophysiology for Nursing II	2	<p>This course will facilitate ongoing critical thinking and analysis of pathophysiological concepts. Emphasis will be on interpretation and prioritization of data resulting from environmental, genetic, and stress-related maladaptations. This course complements the selected topics addressed in Acute & Complex Care to provide a comprehensive understanding of disease processes.</p> <p>Prerequisites: NURS 2800, NURS 2820, NURS 2850; SOC 1110 Co-requisites: NURS 2900 and NURS 2950 Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or PHIL 1220</p>
NURS	2950	Nursing Leadership I	3	<p>This course focuses on prioritization, delegation, and supervision of nursing care of clients across the lifespan. Healthcare policy, finance, and regulatory environment issues are analyzed. Emphasis is on planning, collaborating and coordinating care for individuals and groups across the care continuum.</p> <p>Prerequisites: NURS 2800, NURS 2820, NURS 2850 and SOC 1110 Co-requisites: NURS 2900 and NURS 2920 Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or PHIL 1220</p>
NURS	1001	Nursing Assistant/Home Health Aide	4	<p>The Nursing Assistant/Home Health Aide Certificate course prepares the student to provide physical nursing care to individuals in long term care facilities, hospitals, board and care homes. Attendance in classroom, lab and clinical are mandatory per MN Department of Health regulations. Students completing this course are ready to take the Pearson VUE Nursing Assistant Competency Test. After passing this test students can be placed on the Minnesota Department of Health Nursing Assistant Registry</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
NURS	2010	Nursing Summer Clinical Internship	1	<p>This elective clinical internship course provides learning opportunities to apply nursing theory to nursing practice. The focus will be on gaining depth of understanding of the role of the registered nurse as well as strengthening nursing skills in the clinical setting. Students will be precepted by nurses in the clinical practice setting and by nursing faculty.</p> <p>Prerequisite: Successful completion of 3rd and 4th semester nursing courses: NURS 2700 or 2720, NURS 2750, NURS 2800, NURS 2820, NURS 2850 with a grade of C or better in each course.</p>
NURS	2700	Health Promotion and the Role of the Professional Nurse	9	<p>This course introduces the student to the role of the professional nurse. The emphasis on health promotion across the lifespan includes learning about self-health, as well as holistic client health practices. Students learn to access and apply research evidence to guide safe preventative care. The student will incorporate communication and growth and development theory in a caring and culturally sensitive manner. The student will work as an ethical member of multi-disciplinary teams giving and receiving feedback about performance and use reflective thinking about their practice. Within the context of the nursing process, populations studied will include children, adults, older adults and the family experiencing a normal pregnancy.</p> <p>Prerequisites: Admission to Nursing program, BIOL 2100, BIOL 2111, PSYC 1250 and COMM 1110 Co-requisite: NURS 2750</p> <p>Strongly Recommended to be taken prior to or concurrently: BIOL 2112</p>
PHIL	1010	Introduction to Philosophy	3	<p>This course will introduce students to philosophical inquiry and major problems philosophers think about (including the nature of existence and the difficulty of saying whether any knowledge is certain). Students will be encouraged to question their basic beliefs and recognize their philosophical assumptions. No definite conclusions will be reached.</p>
PHIL	1020	Ethics	3	<p>This course will introduce students to both the methods and issues connected with thinking about morality and ethical systems. Moral skepticism will also be examined. The aim of this class is to allow students to be more aware of their own ethical modes of thinking and the diversity of ways morality enters into human lives.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHIL	1050	Introduction to Logic	3	Investigation of the principles of deductive and inductive reasoning. The course includes Aristotelian logic, propositional and symbolic logic, validity, invalidity, and proofs. Since this course can be taken to fulfill the Mathematical-Logical Reasoning general education requirement, students should expect a Math-like course, with exercises, and exams.
PHIL	1060	Philosophy of Religion	3	This course will examine some of the basic questions in the field of philosophy of religion: Does God exist? Can God's existence or nonexistence be rationally proven? Can people be religious in light of the discoveries of science? What does it mean to be religious or nonreligious? Students will be encouraged to draw from their own experience and beliefs to critically think about the issues in this class.
PHIL	1110	Informal Reasoning for Problem Solving	3	This course studies methods of problem solving, utilizing principles that distinguish good reasoning from poor reasoning. Students will evaluate claims and arguments in natural language, applying the concepts of validity, truth, induction, deduction, and relevance. Students will develop clear thinking, and recognize, criticize and avoid common fallacies. Conceptual analysis will be applied to areas of practical reasoning, to human values, to develop science and media literacy, and to further student self-awareness.
PHIL	1200	Environmental Philosophy	3	Environmental Philosophy is concerned with developing rational and moral theories of dealing with our environmental concerns and discussing ways of putting them into practice. Using a variety of specific philosophical perspectives, we will examine the effects of population growth, ecosystem destruction, species extinction, pollution, climate change, resource extraction, agriculture, etc. on humans and the environment. We will develop ways of understanding relationships between humans and the environment and ways of acting on our responsibilities to the natural world and its inhabitants.
PHIL	1030	Eastern Religions	3	A study of Eastern religions (Hinduism, Buddhism, Confucianism, and Taoism). The emphasis of the course is to develop knowledge of these belief systems and how they deal with philosophical and spiritual questions.
PHIL	1040	Western Religions	3	This course is a study of Western religions including Judaism, Christianity and Islam. The emphasis of this course is to develop knowledge of these belief systems and how they deal with philosophical and spiritual questions.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHIL	1210	Global Justice, Peace and Conflict	3	This course acquaints the student with the major philosophical and ethical dilemmas arising from conflicts within and between societies, with an effort to promote critical awareness and communication around peace and global justice. From a range of philosophical perspectives, students will consider global conflicts, such as those arising from war, nationalism, immigration, environmental crises, discrimination, terrorism, and global poverty. Students will seek to understand such concepts as justice, tolerance, self-determination, equality, fairness, and governance, in an effort to draw conclusions about causes of and solutions to global crises. Students will consider personal and societal strategies for conflict resolution and nonviolent change.
PHIL	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
PHIL	1070	Political Philosophy	3	In this course we will examine issues in political philosophy through discussion of a range of primary western and non-western historical texts from ancient, medieval, and modern political writers. In the process of this examination of the historical development of political philosophy, a variety of topics will be explored such as: diverse theories of human nature and their implications for the role of government, the dynamics of power, the ideals of duty, justice, liberty and equality, and justifications for private property, profit, and civil disobedience.
PHIL	1220	Health Care Ethics	3	This course looks at the underlying assumptions that affect beliefs, practices, and policies in contemporary health care. Emphasis will be placed on understanding of the ethical principles and theories related to health care. A wide variety of health care issues and the challenges they present will be studied. Critical thinking skills will be emphasized in determining the best course of action for making ethical decisions in the health care field.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHIL	1080	Comparative World Religions	3	<p>This course is designed to expose students to the fascinating world religions that have evolved throughout human history. It will look at what factors draw human beings to establish religious institutions and communities, and what inspires individuals to adopt a spiritual identity and life practice, (or to veer away from them). It will examine significant influences and commonalities in indigenous and native religions around the world, then focus on the history and development of widely-practiced religions, such as Hinduism, Buddhism, and Islam. Central stories, religious texts, and ethical systems within these religions will be studied. Less-practiced religions and variations in practice and belief within specific religions will also be considered. Particular attention will be brought to how various religious beliefs and practices are expressed. Important objectives of this course are increasing awareness of diverse faith systems, globally as well as locally, to gain further understanding of their world views and examine how these impact their followers? reactions to contemporary political and societal issues.</p>
PHIL	1120	Ethics in Organizations	3	<p>Foundational theories of moral evaluation and organizational principles will first be introduced. The course will encourage assessment, analysis, and argument regarding the substantial ethical issues facing modern-day institutions. These organizations may include the fields of education, corporations and non-profits, health care, politics, marketing, the media, and others. The obligations of their members and administrators to those impacted, (students, customers, patients?), as well as social responsibility to the community will be questioned. A citizens? rights focus will be utilized to explore questions of justice and equality within these organizations. Additional organizational issues, such as mission, messaging, organizational culture, and the impact of cultural diversity will be considered. The challenges of personal integrity and opportunities of leadership will also be closely examined, utilizing ancient philosophical literature from Aristotle to modern day thinkers. Using classic philosophical methods to question the practices and policies of contemporary organizations, we will place a strong emphasis on ethical analysis.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHIL	1230	Food Ethics	3	<p>This course takes an in-depth look at food, which is both very familiar and necessary for our existence. We already think about food in terms of what we like, what we can afford, and how much of it we should consume. But here we will make an ethical examination of all things related to food, exploring what we are eating, where it comes from, how we grow and process it, and how it is distributed and regulated. Several areas of consideration concern the environment, from growing methods, animal ?production?, and waste processing to the impact of this activity on natural habitats and native lands. And we will look at the commercial aspect of food production, such as the creation of genetically modified food, and how food is transported, manu-factured, packaged, priced, and marketed. We?ll analyze the role of govern-ment in areas such as policy-making, food regulation, and consumer safety. In all of these areas, we?ll address the important ethical questions: Are we creating harm by our acts of food production and the demands of our eating habits? Do we have a duty to assure that marginalized populations and those suffering from food insecurity have fair access to and ability to procure safe, healthful, real food? Should our government be accountable for providing food education to its citizens? And what of our personal accountability as consumers of food ? are there any moral imperatives we should follow? As each of us, both culturally and individually have a relationship with food, these are matters of significance. Can we show that it is more noble to choose organic produce? Does a vegetarian diet address the ethical concerns around eating animals to a proper extent? And what is the value of being truly aware of the impacts of food production, both locally and globally? Discussion topics could also branch out in the direction of the media?s impact on perceived body image, the phenomenon of food obsession, the growing world-wide obesity problem, etc?. This course will be focused on the critical evaluation of these issues to determine where moral issues present themselves and to work through how we might address those in our role as responsible citizens. We can consider how local groups address food insecurity in our community by community gardens, food banks, and community meals. We will be mindful of the diverse perspectives on food various world cultures hold in their lives. Considering the social, environmental, cultural, and ethical impacts of our food choices will help us understand how they may express our moral values.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHYS	1000	Conceptual Physics	4	<p>This course is a combined lecture and laboratory course designed for people who want to learn about the fundamental laws and principles that form the basis of the working of the physical universe. This course helps the student understand and appreciate how and why a wide range of common and everyday physical phenomena occur. Topics include: laws of motion, work, energy, momentum, fluids, heat, vibration, wave motion, electricity, magnetism, and light. Some algebra is used in the presentation, so a mathematical preparation equivalent to Math 0902 is recommended. (3 hours lecture, 2 hours lab)</p>
PHYS	1120	Meteorology	4	<p>This course is designed for people who desire to learn about the weather. This course helps the student learn to observe and interpret the sky, to read weather maps, and to understand the sequence of meteorological phenomena. The topics to be covered include: air temperature, humidity, condensation, clouds, air pressure, wind, atmospheric circulation, weather forecasting, computer modeling, thunderstorms, tornadoes and hurricanes. (3 hours lecture, 2 hours lab)</p>
PHYS	1140	Energy Aspects of Our Physical Environment	3	<p>This course is designed for people who desire to learn about the various sources of energy and the problems associated with its production and consumption on the local, state, national, and international levels. Topics to be covered include: energy principles, fossil fuels, electric energy, acid precipitation, energy conservation, infringements on the global atmosphere, the principles of sustainability, and the orderly transition from our current energy mix to a new mix utilizing nuclear, solar, wind, geothermal, and new emerging technologies. This course includes a lab-like experience. (3 hours lecture)</p>
PHYS	1201	Principles of Physics I	5	<p>This course is the first of an algebra-based two-semester introductory physics sequence. Topics to be covered include: motion in one and two dimensions, Newton's laws of motion, energy, momentum, rotational motion, static equilibrium, oscillations, gravitation, fluids. Concepts of right-triangle trigonometry will be introduced as needed. (4 hours lecture, 2 hours lab).</p> <p>Prerequisite: Successful completion of either MATH 1150 or MATH 1180 with a C or better OR eligibility for either MATH 1170 or MATH 1221 through College math placement score.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHYS	1202	Principles of Physics II	5	<p>This course is the second of a two-semester introductory physics course for students with a mathematics preparation of algebra and some trigonometry. Topics to be covered include: wave motion, electricity, magnetism, electromagnetic waves, and light. (4 hours lecture, 2 hours lab) Prerequisite: Physics 1201 or consent of instructor</p>
PHYS	1220	Allied Health Physics	2	<p>This course provides the allied health or paramedical student with a concentrated treatment the basic physics principles of ultrasound which would be needed for follow on courses in the Allied Health field. Completion of one college level science course and college algebra is strongly recommended.</p>
PHYS	1990	Topics:		<p>In this class, we will introduce topics in astronomy and apply physical laws to them. Topics include orbits, planets, light, relativity, stars, black holes, galaxies, and cosmology. For example, once black holes are introduced, you will be able to relate their mass to their Schwarzschild radii and how the of time changes near them. Once fusion is introduced, you'll be able to determine the energy given off by different fusion reactions and relate them to the luminosities of stars. For orbits, we will use computer simulations to study the effect of different arrangements and conditions. A previous class in physics or astronomy is strongly recommended.</p> <p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
PHYS	1601	General Physics I	5	<p>This is the first course of a two-semester sequence for any student needing a physics course that includes applications of calculus. Topics include kinematics, dynamics, conservation of energy and momentum, rotational motion, static equilibrium, gravitation, periodic motion and thermal physics. Optional topics are fluids and thermodynamics. The course meets requirements for students majoring in engineering, mathematics, computer science or any of the physical sciences. (4 hours lecture, 2 hours laboratory) Prerequisite: Math 1221 or consent of instructor.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHYS	1602	General Physics II	5	<p>This course is a continuation of PHYS 1601. Topics include electricity, magnetism, DC and AC circuits, wave motion, electromagnetic waves, and optics. Optional topics include modern physics. The course meets requirements for students majoring in engineering, mathematics, computer science or any of the physical sciences. (4 hours lecture, 2 hours laboratory). Prerequisites: PHYS 1601; MATH 1222 or consent of instructor</p>
PHYS	1030	Introduction to Physical Sciences	4	<p>In this course, students will explore the basics of chemistry and physics by examining such concepts as understanding and measuring matter; atoms, elements, compounds and mixtures; physical and chemical properties of matter; states of matter; chemistry fundamentals, the periodic table; bonding and types of compounds; mixtures and solutions; chemical reactions; properties and sources of energy; heat; electricity, circuits, and power; properties of sound & light; the behavior of sound & light; forces and motion; work and simple machines.</p> <p>This course is intended for students who wish to complete a science course with a lab. It is not a prerequisite for any science or health programs. This course may not be used as a substitute for a chemistry course or a physics course. (3 hours lecture, 3 hours lab)</p> <p>Math 0901 (Intro to Algebra) or basic math skills are highly recommended.</p>
PHYS	1070	Concepts of the Stars and Universe	3	<p>This course provides an introduction to astronomy with an emphasis on stars and galaxies. Topics include understanding the Sun as a star; revealing the messages hidden in starlight; stellar birth, maturation, and death; black holes, white dwarfs, pulsars, quasars, and supernova explosions; the Milky Way and other galaxies; the origin and the fate of the universe. Current topics and discoveries from stellar astronomy and cosmology are also discussed. This course includes a lab-like experience. (3 hours lecture; meets MnTC Goal Area 3 requirements)</p>
PHYS	1050	Astronomy	4	<p>This course takes a "big picture" look at the universe as a whole. Topics include history of astronomy, origin and features of the planets and the Solar System, the lives and deaths of stars, cosmology and the fate of the universe. It also covers recent discoveries and current topics in astronomy. The laboratory component provides a variety of methods to more fully investigate the process of astronomy. The course meets requirements as a natural sciences lab course under Goal Area 3 of the Minnesota Transfer Curriculum. (3 hours lecture/week, 2 hours lab/week)</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHYS	1060	The Solar System	3	This course provides an introduction to astronomy with emphasis on our Solar System. Topics include the origin, structure, and history of the Solar System; the properties of light; the function and use of telescopes, understanding the processes that have shaped the planets, their moons and ring systems; comets, asteroids and other space debris. Recent discoveries and current topics from the exploration of the Solar System are also discussed. This course includes a lab-like experience. (3 hours lecture; satisfies MnTC Goal Area 3)
PHYS	1061	Solar System Lab	1	An optional course laboratory course designed to complement The Solar System lecture class. It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, internet exercises, videos and observational sessions may be used within the course. (2 hrs/week) Prerequisite: Prior or concurrent enrollment in Phys/NSci 1060 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1060, you must obtain instructor permission and complete appropriate paperwork for pre-requisite override.
PHYS	1071	Stars and the Universe lab	1	An optional course laboratory course designed to complement the Concepts of Stars and the Universe lecture class, It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, Internet exercises, videotapes and observational sessions may be used within the course. (2 hrs/week) Prerequisite: Prior or concurrent enrollment in Phys/NSci 1070 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1070, you must obtain instructor permission and complete appropriate paperwork for pre-requisite override.
PHYS	1231	Principles of Physics I	4	An algebra-based course for students needing a fuller introduction to physics than would be found in a general education/survey course. Topics include straight-line and circular motion, Newtons Laws, torque & static equilibrium, conservation of energy, fluids, thermal physics & thermodynamics, periodic motion. Optional topics are free energy. Applications will be drawn from several areas, including (but not limited to) those appropriate to the biological/medical/health career fields. Concepts of right-triangle trigonometry will be introduced as needed.(3 hours lecture, 2 hours lab). Prerequisite: Completion of either MATH 1150 or MATH 1180 with a C or better OR eligibility for either MATH 1170 or MATH 1221 through College math placement score OR consent of the instructor.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PHYS	1232	Principles of Physics II	4	<p>An algebra-based course for students needing a fuller introduction to physics than would be found in a general education/survey course. Topics include: wave motion, sound, optics, electricity, DC circuits, magnetism, interactions between radiation & matter. Optional topics are feedback processes. Applications will be drawn from several areas, including (but not limited to) those appropriate to the biological/medical/health career fields.</p> <p>This course may be taken before or after PHYS 1201. Concepts of motion, energy, and right-triangle trigonometry will be introduced as needed. (4 hours lecture, 2 hours lab). Prerequisite: Completion of either MATH 1150 or MATH 1180 with a C or better OR eligibility for either MATH 1170 or MATH 1221 through College math placement score OR consent of the instructor.</p>
PLA	1020	Prior Learning Portfolio Development	1	<p>This course will assist students in assessing what they have learned, whether some of that learning may be appropriate for assessment of college credit, and how to go about earning that credit. This course will allow students to begin the development of a portfolio for assessment of credit by a faculty member.</p>
PLA	1010	Individualized Studies Development	2	<p>This course will assist students in developing their individualized studies degree plan while focusing on the central question of "what does it mean to be an educated person". Upon completion of the course, students will have a completed Degree Plan. This course is by permission only and can only be registered upon after acceptance into the Individualized Studies Program.</p>
PLA	1025	Prior Learning Assessment (PLA) Preparation Workshop	0	<p>This workshop will help develop a plan of action to determine if Credit for Prior Learning is an option for the degree-seeking student.</p> <p>After completing this workshop, the student will know if they have the necessary components and knowledge to move forward to earn credit alternatively.</p>
PLEG	1111	Introduction to Law and Paralegal Studies	3	<p>This course introduces students to the paralegal profession, including the nature of paralegal work, job requirements and opportunities. Students will study the Minnesota Rules of Professional Conduct and the ethical standards applicable to paralegals. The students will learn about the American legal system, including sources of law, court systems and procedures. The students will study the relationship between state and federal laws and procedure and alternative dispute resolution. Students will also study the substantive areas of torts and criminal law.</p> <p>PSEO students may not register for this course until they have completed all general education courses required for the Paralegal A.S. degree.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PLEG	2211	Legal Research and Writing I	3	This course presents a study of methods of legal research related primarily to case law, which include the use of digests, encyclopedias, reporter systems, and practice manuals. The students will gain an understanding of law libraries and will be introduced to computer assisted legal research. Students will learn analytical writing skills for use in preparation of legal memoranda. Use of Blue Book citation methods will be emphasized. Prerequisite: Engl 1201 or Engl 1200 and PLeg 1111
PLEG	2212	Legal Research and Writing II	3	This course is a continuation of Legal Research & Writing 1. This course focuses on primary sources other than case law such as constitutional law, statutory law, administrative law, and court rules. The student will also study secondary sources. This course provides the student with additional experience in the advancement of analytical writing skills for use in the preparation of legal memoranda. Blue Book citations relative to sources studied will be emphasized. The student will also gain additional experience with computer assisted legal research. Prerequisite: PLeg 2211
PLEG	2510	Contracts and Business Organizations	3	This course presents a study of contracts, sales of goods, products liability, secured transactions, creditor rights, consumer protection and bankruptcy. The students also study basic principles of employment law. This course also presents a study of business entities, including sole proprietorships, partnerships, corporations, limited liability companies, and other business entities. Students will learn the fundamental principles of law applicable to each entity type and how to prepare documents necessary to the organization and operation of each. In addition, this course examines the ethical considerations relating to business law practice. Prerequisite: PLeg 1111
PLEG	2710	Wills, Trusts and Estate Administration	3	This course presents a study of estate administration, including the preparation and use of wills and trusts as estate planning tools. Students will study powers of attorney and the use of health care directives for disability planning. The students will learn the fundamental principles of probate law and how to prepare documents used in probate procedures. Students will also learn about the impact of estate taxes on estate planning. In addition, this course examines the ethical considerations relating to estate planning, wills and trusts. Prerequisite: PLeg 1111

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PLEG	2810	Employment Search for Paralegals	1	This course presents a study of the skills and tools needed for locating paralegal employment opportunities. Students will study employment opportunities in both legal and non-legal settings. Students will study attitudes and work habits for a more successful career. Students will learn to prepare a professional resume and conduct an interview. Prerequisite: PLeg 1111
PLEG	2620	Property	3	This course presents a study of personal and real property. Students study landlord and tenant law, real estate conveyancing, real estate financing, foreclosure and mechanic's liens. Students will learn to prepare a purchase agreement, deeds and other closing documents, and the documents used in mortgage foreclosure and mechanic's lien foreclosure. The general concepts of legal descriptions, title examination, and closing procedures also are covered. In addition, this course examines the ethical considerations related to a property law practice. Prerequisite: PLeg 1111
PLEG	1990	Topic:	3	This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
PLEG	1210	Computer Applications in the Legal Profession	2	This course presents a study of the computer software commonly used in legal organizations, including programs in word processing, spreadsheets, database management systems, timekeeping and billing, case management and docket control, litigation support, presentation graphics, and electronic mail. Students will also study legal ethics as applied to the use of computer technology in the law office. CIS 1000 or knowledge of keyboard recommended. Prerequisite: PLeg 1111

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PLEG	2310	Criminal Law and Procedure	3	<p>This course presents a study of the substantive and procedural aspects of criminal law and the role of the paralegal working in the area of criminal defense or criminal prosecution. Students will study the general principles of criminal liability, analysis of particular crimes, parties to crimes, and the substantive defense to crimes. Constitutional safeguards and procedures from arrest through trial, sentencing, punishment, and appeal are also studied. This course also examines the ethical considerations relating to criminal law and procedure.</p> <p>Prerequisite: PLEG 1111 Please Note: All Paralegal program and course prerequisites are enforced. This course may not be used as a substitute for SOC 1710 in any NHCC programs which include SOC 1710 as a required course.</p>
PLEG	1411	Litigation I	3	<p>This course is the first part of a two-part Litigation course. This course presents a study of the processes and procedures undertaken in litigation and the role of the paralegal in a litigation practice. Students will study the requirements and applications of the Rules of Civil Procedure and the general rules of practice in District Court. Students will also study the various methods of alternative dispute resolution and their application to a litigation practice. Students will learn to prepare the documents essential to a litigation practice, such as complaints, discovery requests and discovery responses. This course also examines the ethical considerations relating to litigation.</p> <p>Prerequisite: PLEG 1111</p>
PLEG	1412	Litigation II	3	<p>This course is the second part of a two part Litigation course. This course presents a study of the processes and procedures undertaken in litigation and the role of the paralegal in a litigation practice. Students will study the requirements and applications of the Rules of Civil Procedure and the general rules of practice in District Court. Students will also study the various methods of alternative dispute resolution and their application to a litigation practice. Students will draft litigation documents and learn the role of the paralegal before, during and after trial. This course includes a study of the rules of evidence, and tips for preserving and protecting evidence in civil and criminal trials. Students will learn methods of investigation and fact gathering. In addition, this course also examines the ethical considerations related to evidence and the trial process.</p> <p>Prerequisite: PLEG 1411</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PLEG	2930	Legal Studies Seminar and Internship	3	<p>The course is designed to ready the student for transition from the classroom to the work place, emphasizing practical skill development and additional development of the student's organizational, communication and critical analysis skills. This is also a course designed to measure the student's learning and mastery of the program's goals and objectives.</p> <p>The course is designed with in-class and out of class internship experiences. Through in-class discussions and exercises, the student develops the basic skills necessary for the paralegal work setting. The student gains actual work experience under the supervision of an attorney or experienced paralegal in day-to-day, on-site office work completed at an internship site. The student must complete 150 hours of work at the internship site, which may be a private or public law office, corporate or government legal department, or other appropriate law-related setting or complete the alternative legal practicum coursework.</p> <p>Prerequisites: PLeg 2211</p>
PLEG	1330	Family Law	3	<p>This course presents a study of the processes and procedures undertaken in a family law practice. Students will study the procedures applicable to marriage dissolution and learn to prepare the legal documents associated with such procedures. Students will also study other substantive family law topics such as marriage and premarital agreements, child custody and support, domestic abuse, and adoption. In addition, this course examines the ethical considerations relating to a family law practice. Prerequisite: PLeg 1111</p>
PLEG	1510	Intellectual Property	2	<p>This course presents a study of the major areas of intellectual property law in the United States: trademarks, copyrights, patents and trade secrets. Students will study relevant statutes and case law, as well as the key policy considerations in the subject area. This course also examines the ethical issues relating to intellectual property law. Prerequisite: PLeg 1111</p>
PLEG	1430	Alternative Dispute Resolution	1	<p>This course introduces students to the understanding of conflict and provides a working knowledge of the major forms of adjudicative and non-adjudicative alternative dispute resolution processes. Students will apply the theory and practice of alternative dispute resolution to their personal as well as their professional lives. Prerequisite: PLeg 1111.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PLEG	2430	Torts & Personal Injury Law	3	This course covers the procedural and substantive law of torts and personal injury, including negligence, insurance, strict liability, products liability, and intentional torts. Students will prepare documents used in both a plaintiff and defense personal injury practice.
PLEG	1610	Immigration Law	3	Immigration Law aims to: (1) Introduce students to U.S. immigration law as an important and dynamic body of administrative policies and regulations with broad social, economic, and political impact; (2) Present an overview of substantive immigration law and its processes and procedures for those seeking to enter and remain in the United States as nonimmigrants and immigrants, including employment and family-based processes, waivers, humanitarian relief such as DACA, U visas for victims of crime, and asylum, defenses to deportation, and U.S. citizenship; and (3) Address the role, responsibilities, and ethics of paralegals within the field, with a focus on the practical skills needed to be successful, including client interviewing, case management and communication, factual and legal research, and case preparation (including writing cover and support letters, drafting forms, and collecting supporting evidence).
POLS	1100	American Government and Politics	3	This course is a general introduction to American politics with emphasis on the Constitution, citizen participation, elections, and the role of the major governmental institutions - Congress, presidency and judiciary - in the formulation of public policy in the United States.
POLS	1140	State and Local Politics	3	This course studies the operation and structure of state governments including executive, legislative, judicial functions as well as elections and policy formation, with an emphasis on Minnesota.
POLS	1600	Comparative Politics	3	This course examines and compares the organization and politics of modern governments around the world. Countries studied exemplify larger course themes of political institutions, political culture, elections, public policy, democratization, economic development, and comparative methodology.
POLS	1700	World Politics	3	This course is a general introduction to international relations with emphasis on great power politics, international organizations, security studies, international political economy, and global environmental politics.
POLS	2130	Constitutional Law	3	This course will acquaint students with the content of the United States Constitution and its amendments; its interpretations within political, social, and historical contexts; and will examine the reasoning process in major judicial decisions. Prerequisite: Soc 1710 or PolS 1100

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
POLS	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
PSYC	1150	General Psychology	3	This course provides an overview of topics in psychology. Topics may include history of psychology, research methods, physiological psychology, sensation and perception, consciousness, learning, memory, motivation and emotion, personality, stress and coping, abnormal behavior, therapy, and social psychology. Students are strongly encouraged to check with an advisor to determine if this is the appropriate course for their degree/program. You must meet prerequisites or obtain instructor permission to take this course.
PSYC	1170	Psychology of Gender	3	Psychology of Gender includes the theory and research relating to sexuality, gender roles and sexual orientation.
PSYC	1210	Child Development	3	This course focuses on psychological, intellectual, and physical development from the prenatal period through adolescence. Topics include general theoretical approaches and research methods in studying child and adolescent development, birth and the newborn child, and development in the following areas: prenatal, physical, perceptual, cognitive, intellectual, language, personality, social and atypical. Completion of General Psychology is helpful prior to taking this course.
PSYC	2320	Psychological Disorders	3	This course is an introduction to the origin, classification, and treatment of psychological disorders. Topics include historical and research issues, adjustment reactions to stress, neuroses, personality disorders, psychoses, types of psychotherapy, legal and ethical issues. Formerly Titled: Abnormal Psychology Prerequisite: Psyc 1150 or Psyc 1160 or consent of instructor
PSYC	2330	Personality Psychology	3	This course provides a review of the major theories of personality which typically include the psychodynamic, behavioral, cognitive, humanistic and trait approaches. Prerequisite: Psyc 1150 or Psyc 1160 or consent of instructor

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PSYC	1165	Psychology of Adjustment	3	<p>This course is an in-depth look at the processes of normal human adjustment and their application in the student's life adjustment. A component of the course is diversity and dealing with diversity, specifically the development and changing group identities in the U. S.; an examination of the individual and institutional processes of unequal power between groups; an examination of the students' attitudes, behavior and beliefs about diversity, stereotyping, prejudice, bias and racism and bigotry; and experience in developing the necessary communication skills for living and working in a diverse society. Other topics may include goal setting and change processes, self-awareness and identity, physical and psychological health, stress and coping, interpersonal relationships and communication, emotions and motivation, social interactions, psychological growth and development, meaning and values, and decision making.</p>
PSYC	2340	Human Sexuality	3	<p>An overview of past and current research on human sexuality. The course will address: the human sexual response; models and sources of arousal; cultural influences on human sexual behavior and sexual diversity; emotional aspects of sexuality and sexual dysfunction; sexual communication, intimacy, dependency and jealousy; sexual exploration and courting behavior across the life span; atypical behavior, commercialized sex, and sexual coercion. Prerequisite: Psyc 1150</p>
PSYC	1990	Topics:		<p>This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.</p>
PSYC	2350	Multicultural Psychology	3	<p>This course is an introduction to diversity and multiculturalism within psychology. Students will have a broad understanding of extant research on diversity from a wide variety of perspectives including international perspectives. Topics covered include: culture and identity, group behavior, stereotyping and prejudice, cross-cultural research, and international research.</p> <p>COMM 1310 is highly recommended before taking this course.</p> <p>Prerequisite: Psyc 1150 or Psyc 1160 or consent of instructor</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PSYC	1160	Introduction to Psychology	4	<p>This course provides an in-depth introduction to psychology. Topics may include history of psychology; research methods; physiological psychology; sensation and perception; consciousness; learning; memory; cognition; motivation; emotion; personality; stress, health and coping; abnormal behavior, therapy; social psychology; human development; sexuality; and gender. Students are strongly encouraged to check with an advisor to determine if this is the appropriate course for their degree/program. You must meet prerequisites or obtain instructor permission to take this course.</p>
PSYC	1250	Life Span Developmental Psychology	4	<p>Life Span Developmental Psychology examines continuity and change across the life span. The course examines the biological, cognitive, and social development of humans from conception through death. Topics will explore maturation, human growth experiences, transitions, and the various stages of psychological and physical development as key components influencing human behaviors. You must meet prerequisites or obtain instructor permission to take this course.</p>
PSYC	2110	Principles of Social Psychology	3	<p>This course analyzes how individual's thoughts, feelings and actions are influenced by others. Topics include perception, attraction, altruism, aggression, attitudes, leadership, conformity and obedience, stereotyping and prejudice, persuasion and propaganda and the self-concept.</p> <p>Prerequisite: Soc 1110 or Psyc 1160 or Permission from Instructor</p>
PSYC	2000	Statistics for the Behavioral Sciences	4	<p>Students use basic mathematical and computerized procedures to analyze data in the behavioral sciences. Students use statistical software (e.g., SPSS, R, PSPP) to conduct descriptive and inferential data analyses. Students choose and apply statistical procedures to help to answer psychological and behavioral scientific research questions. Students read, interpret, and write APA-style Results sections for behavioral science research.</p>
PSYC	1220	Psychology of Aging	3	<p>As a psychological journey through the stages of adulthood, this course covers the biological, psychological, and socio-emotional changes from early adulthood to the time of dying and death. Topics include, but are not limited to: theories of adult development, research methods, identity, relationships, cognitive and biological changes associated with aging, grief and loss, and death and dying. Student participation in research, service learning, and/or campus activities is expected in this class.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
PSYC	2360	Psychology, Race, and Law	3	<p>This course will examine the interaction between psychology, the legal system and race. Topics we will explore include but are not limited to include eyewitness memory, the insanity defense, involuntary civil commitment, forensic evaluation in cases of child sexual abuse, false confessions, profiling, and child custody determinations. The class addresses various controversies in the law, including jury selection, jury decision-making, police interrogations and confessions, use of lie-detector tests, eyewitness testimony, repressed and recovered memories, and the role of psychologists as expert witnesses. We will survey real-world examples of what may be current at the time. These real-world examples will describe scenarios and cases that illustrate or explain an important legal concept or psychological principle covered in the chapter or section being discussed in class. This course provides a strong foundation of understanding for individuals interested in Forensic Psychology, Criminal Justice and Law.</p>
SOC	1110	Introduction to Sociology	3	<p>This course is a study of social and cultural aspects of human behavior. Topics include society and culture, roles and norms, groups and organizations, deviance, inequality, social and cultural change, and research methods.</p>
SOC	1130	Social Problems/Deviance	3	<p>This course examines issues and concerns in the modern world such as population, global warming, the environment, natural resources, terrorism, poverty, racism, sexism, mental illness, drug abuse, crime, sexual assault, prostitution and suicide. Social policies designed to deal with those issues are also considered.</p> <p>Prerequisite: Soc 1110</p>
SOC	1210	Introduction to Social Work	3	<p>This course reviews the field of social work, with a generalist practice focus emphasizing interventions at the individual, environmental and societal level. Topics include the development of social work, human diversity, social problems, social work values, roles, skills and settings.</p> <p>Note: This course is a service learning class that combines classroom instruction and service in the community, giving students the opportunity to practice academic, real-world, work, life and interpersonal skills. Students are required to have their own transportation. Service learning opportunities range in scope from 10-40 hours of service in the community which in some cases may be an additional time commitment to completion of the course.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
SOC	1710	Introduction to Criminal Justice	3	<p>This course covers the history, organization, and function of the criminal justice system in the United States. Topics include foundations of crime and justice, victimization, crime statistics and the extent of crime, police issues, court systems, corrections, and future trends.</p> <p>Note: Sociology 1110 recommended prior to taking this course.</p>
SOC	1720	Police and Community	3	<p>This course addresses the affective-oriented aspects of contemporary law enforcement. Topics include crime prevention, police community relations, ethical decision-making, cultural diversity, bias-motivated crimes, domestic abuse, problem solving, volunteerism, and interpersonal communications.</p> <p>Note: SOC 1110, Introduction to Sociology, recommended before taking this class.</p>
SOC	1730	Juvenile Justice	3	<p>This course analyzes the juvenile justice system and its historical and philosophical development, including theories of social causes and effects of delinquency. Students will learn strategies for working with juveniles and for preventing and investigating delinquency. The course provides a working knowledge of Minnesota statutes pertaining to juveniles through the study of case law, report writing, skills exercises, and simulation.</p>
SOC	1750	Families in Crisis	3	<p>This course analyzes the dimensions and dynamics of family dysfunctions. Topics may include, domestic abuse, child abuse and protection, vulnerable adults, peace officer response to crime victims, Americans with Disabilities Act as it relates to peace officers, mental health, poverty, homelessness, and the substance abuse as related to family issues.</p> <p>Prerequisite: Soc 1110</p>
SOC	2110	Principles of Social Psychology	3	<p>This course analyzes how individual's thoughts, feelings and actions are influenced by others. Topics include perception, attraction, altruism, aggression, attitudes, leadership, conformity and obedience, persuasion and propaganda and the self-concept.</p> <p>Prerequisite: Soc 1110</p>
SOC	2210	Social Inequality	3	<p>This course considers the social history, current conditions, and future prospects of minority groups in the United States. Topics include racism, sexism, prejudice, discrimination, affirmative action, and other related issues and social policies.</p> <p>Prerequisite: Soc 1110</p>
SOC	2730	Introduction to Corrections	3	<p>This course examines corrections as a major component of the criminal justice system in the United States. Topics may include programs, practices and critical issues.</p> <p>Prerequisite: Soc 1710 or Consent of Instructor</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
SOC	2740	Criminal Behavior	3	This course introduces students to crime and criminal behavior from a sociological perspective. Topics include: major sociological theories of criminal behavior, research on crime and social control issues, victimization, violent and property crime, white-collar, political, public order and organized crime. Prerequisite: Soc 1110
SOC	1990	Sociology Special Topics		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
SOC	2220	Police and Human Behavior	3	Police and Human Behavior provides a practical overview of the interaction between police and the communities they serve. Topic areas include victimization, stalking, predatory offenders, drugs, hate/bias motivated crimes, domestic abuse, people with disabilities, hostages, suicide, crisis management, police officer mental health, Patriot Act, RICO, gangs, and other topics.
SOC	2750	Community Corrections	3	This course studies the purposes and goals of community-based corrections and explores alternatives to incarceration in centralized penal institutions. Addresses issues related to diversion programs, the management of offenders in community settings and re-entry programs. Examines the role of community corrections and restorative justice practices within the broader correctional system. Offers students insights into the daily experiences of those working in the field of community corrections.
SPAN	1030	Spanish and Latin American Culture	3	This course is an introduction to the civilization and culture of Spain and Spanish America, with particular emphasis on comparative cultures, modern trends, the ancient Indian civilizations and African-Spanish-American influences. The course is taught in English; no previous knowledge of Spanish is required.
SPAN	1390	Field Study Spanish/Latin American Civilization		This course will take students to Spain, Mexico, or other Spanish-speaking countries to experience contemporary life in a Spanish-speaking country, while observing the influences of the past. Credit level depends on the length and intensity of individual study on a topic agreed upon in advance by the student and instructor.
SPAN	1990	Topics:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
SPAN	1050	Spanish for Health Care Workers	3	This course is designed for students in medical and health care areas who want to develop fundamental skills in conversational Spanish as related to their daily activities. The course activities are divided into two major sections: First, basic language skills that are taught using the textbook, An Introduction to Spanish for Health Care Workers; Second, the creation and practice of dialogs related to specific nursing tasks (e.g., assessing medical history, assessing health risks, teaching breast self exams, making appointments, etc.). This course is not a Spanish language class per se, but it is designed to teach health care students how to do specific tasks in Spanish. As such, there is no specific Spanish prerequisite to be enrolled in this course. All non-native speakers of Spanish at any level are encouraged to enroll in this course. Students who are interested in acquiring Spanish language in general are invited to enroll in traditional Spanish courses.□
SPAN	1101	Beginning Spanish I	5	Designed for the student with little or no previous experience with languages, this course stresses correct pronunciation, aural comprehension, basic structure, and a practical reading knowledge of Spanish.
SPAN	1102	Beginning Spanish II	5	Continuing the activities and skill development from Span 1101, this course will emphasize basic proficiency reinforcing the student's knowledge and awareness of appropriate language use in a variety of situations. Prerequisite: Span 1101 or equivalent recommended
SPAN	2201	Intermediate Spanish I	5	This course continues the development of the multiple language skills introduced in the beginning sequence. The student is introduced to the literature and culture of Spain and Spanish America. Prerequisite: Span 1102 or equivalent recommended
SPAN	2202	Intermediate Spanish II	5	This course continues the development of multiple language skills with the opportunity to improve reading, writing, speaking and listening comprehension, with emphasis on developing skills in conversation and in expanding vocabulary. The student will also have a more extensive exposure to the literature and culture through readings and films. Prerequisite: Span 2201 or equivalent recommended
SSAC	925	Summer Scholars Academy Math	0	In this 16-hour mini-course you will learn, refresh and practice skills required to be a successful college student
SSAC	900	Summer Scholars Academy FYE	0	Skills, support and exploration for success in college.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
TFT	1200	Theatre in the Twin Cities	3	Students attend performances of plays in order to understand the elements of theatrical and dramatic production. Students develop criteria for the evaluation of productions as they explore the complexities of theatre and its reflection of society. They also examine their own biases and value systems and how they affect their evaluation processes regarding artistic, societal, and personal points of view.
TFT	1210	Introduction to Theatre	3	Students become involved in a play's production while they explore the roots of the theater as a reflection of culture and community. Students investigate major theatrical historical periods and personalities, work on self-selected crews, analyze dramatic literature for meaning and production considerations, and may create and perform their own scenarios as a means of understanding the transformation of theater from page to stage.
TFT	1260	Introduction to Television	3	This course is an introduction to television's history, development, emerging technologies, influence, and future. It explores digital convergence as well as programming, distribution, regulation, and audience, constantly emphasizing the effect of money on this pervasive medium. Both television shows and movies about television will help illuminate the course content.
TFT	1290	Design for Theatre	3	This course is an examination of how theatre design (set, costume, properties, and lighting) are used to support the production of a play. The elements of design- line, texture, color, and form- are explored as they have been and are currently used by designers and directors for theatrical productions. Students analyze dramatic literature and create design projects.
TFT	1500	Acting I	3	This course uses lectures, discussions, and interactive exercises to learn, demonstrate, and evaluate the principles of improvisation including basic stage awareness, non-verbal communication, self-awareness, and team work. Students will work in ensemble to understand, evaluate, and use the concepts of objective, intention, and motivation. Written analyses as well as presentations may be used to demonstrate understanding of these skills and concepts.
TFT	1510	Movement and Voice	3	Students will learn and incorporate a movement vocabulary and relaxed vocal projection through a series of group projects throughout the semester. Emphasis is placed on utilization of learned techniques to create character, heightened response to others on stage and to enhance stage presence.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
TFT	1520	Acting II: Building Characters	3	Students select plays and their characters to research, analyze, evaluate, write about, and present or demonstrate character analysis, posture, movement, non-verbal communication, vocal variety, projection, and personal experience and awareness. Students are encouraged to take TFT 1500 (Acting 1: Improvisations and Foundations) before taking this class.
TFT	1600	Theatre Practicum: Performance		In this class, students choose a particular area of practicum study such as acting, directing, assisting a director, working on a technical crew assignment, or another major responsibility. Students research, analyze and participate in some aspect of a North Hennepin production. This course may be repeated for credit. Prerequisite: Consent of instructor
TFT	1990	Topic:		This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
TFT	1250	Introduction to Film	3	This course is an introduction to the history and techniques of entertaining and communicating ideas through motion pictures. The course consists of viewing, analyzing, discussing and writing about films as a means of understanding visual communication and developing greater visual literacy.
TFT	2950	Theatre Appreciation Field Trip		This class gives students an opportunity to attend theatre productions and explore back-stage theatre operations. Students will learn the components of dramatic production and establish a basis for evaluation of a production. May be repeated for credit.
TFT	1540	Acting for the Camera	3	Students will have the opportunity to perform in front of the camera and see themselves as the camera records them, revealing their strengths and challenges. Acting techniques specific to working in film and television will be covered along with methods for auditioning, script analysis, character development, communication and style. How to handle camera and editing equipment is also included.
TFT	1320	World Cinema	3	World Cinema is a class in which students look at films from around the world. They explore various non-English-speaking countries' contributions to filmmaking and world culture that have been made by these countries' films. They look at two films from each country studied: one that exemplifies the historical/cultural concept that is associated with that country's films and one contemporary film from that country. The course consists of viewing, analyzing, discussing and writing about films from other cultures films as a means of understanding the impact of these works on our own as well as other cultures.

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
TFT	1710	Oral Interpretation and Traditions	3	Oral Interpretation and Traditions is an introductory course in the effective oral presentation of written material. Students will analyze and perform literature from a variety of sources that represent different cultures and ethnicities. Students will also make connections between the cultural implications of oral tradition and performance.
TFT	1280	Introduction to Screenwriting	3	This course is an introduction to screenwriting, dealing with the basics of drama, story, character, structure, dialogue, and meaning. It explores these elements with writing exercises that develop skills in plotting, exposition, suspense, and action. It focuses on visual storytelling, helping students to discover observable actions and images that can convey ideas effectively, while constantly emphasizing how well-developed characters' needs and wants drive the structure and conflict of an engaging story. It is intended to acquaint students with the craft of screenwriting; to be a beginning course in the field that will help prepare students for further work.
TFT	1350	The American Musical Theatre	3	American Musical Theatre is designed to enlighten the learner about the basics of musical theatre production and its genesis as a uniquely American art form. Also, the course will take a close look at the context in which these musicals were created and how they challenged society at that time. In addition, the course will examine the writing of the book, lyrics and music of many shows in an attempt to better analyze and evaluate the content.
TFT	1270	Digital Video Production	3	This course introduces basic video production concepts and techniques with an emphasis on using the elements of motion and sound as creative artistic tools. Students will critically analyze video in terms of genre, context, meaning, visual language and form and then produce and edit their own short projects that explore creative and experimental applications of the medium rather than the traditional mass communication form. Students are encouraged to use their own computer for editing if possible. Basic knowledge of the computer is helpful.
TFT	1610	Theatre Practicum: Technical		In this class, students choose a particular area of practicum study such as directing, assisting a director, working on a technical crew assignment, or another major responsibility. Students research, analyze and participate in some aspect of a North Hennepin production. This course may be repeated for credit. Consent of Instructor required. Prerequisite: Consent of instructor

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
TFT	2010	Fundamentals of Directing	3	<p>Fundamentals of Directing is open to any student who is interested in learning the basic skills necessary to become adept at directing. The student will learn about the wide variety of responsibilities a director assumes, as well as the range of knowledge every director needs to possess in order to communicate a story effectively on stage or screen. The course will cover the function of the director, script analysis, groundplan and blocking, working with the actor, creating a unified whole, and working collaboratively with a production team. In addition, the course will cover some of the similarities and differences between directing for the stage, film, and television. For students in careers outside the performing arts, this course offers opportunities to gain a deeper appreciation of the process of directing, increase personal self-confidence, and improve communication skills in a team setting.</p> <p>Pre-requisites: TFT 1500 or TFT 1540 or TFT 1210 or TFT 1250 or instructor permission.</p>
TFT	2500	Playwriting	3	<p>Students will be introduced to the fundamentals of writing theatrical plays. They will be expected to work on several creative projects throughout the semester and to participate in workshops in which they will discuss and critique one another's work. Students may also be asked to complete other writing exercises and to analyze a selection of plays to gain a better understanding of the art of play wrighting.</p> <p>Prerequisites: Engl 1900</p>
TFT	1310	American Cinema	3	<p>American Cinema is a class in which students look at American films that have played a role in American film history from its beginnings to the present. They explore America's filmmaking history and its contributions to American culture, specifically considering the many diverse communities portrayed in these films as well as filmmakers from these often minority communities. These selections include films by or about African Americans, Asian Americans, Latino Americans, Native Americans, GLBT Americans, and the contributions of American Women throughout film history. The course consists of viewing, analyzing, discussing and writing about American films as a means of understanding the impact of these works on our diverse American culture.</p>

North Hennepin Community College Courses 2022-2023

SUBJ	COU-NBR	Title	CRHR	Course Description
TFT	1531	Stage Combat I	3	<p>Stage Combat I is an introductory course in the Stage Combat Program, and will focus on unarmed (hand to hand fighting) and armed (found objects, knives, etc.) stage combat. The program conforms to the guidelines put forth by the Society of American Fight Directors (SAFD). Telling a story effectively through the use of disciplined and safe stage combat will be stressed, as well as instruction in the history, type and use of various weapons. Students in the performing arts will gain self-confidence in their ability to fulfill the needs of any script calling for stage or screen violence. Students not in the performing arts will gain a firsthand appreciation of the skills necessary to make stage and screen violence look real.</p>
TFT	1532	Stage Combat II	3	<p>Stage Combat II is the follow-up course to Stage Combat I in the Stage Combat Program. The primary focus of this course will be on performance. The skills learned in Stage Combat I will be reviewed and refined, then applied to the performance of choreographed staged fights within the context of a scene. Students will assign emotional value to the physical circumstances of the scene and act out the intentions of the character. This program conforms to the guidelines put forth by the Society of American Fight Directors (SAFD), which contains 90 hours of required instruction. Students in the performing arts will gain self-confidence in their ability to fulfill the needs of any script calling for stage or screen violence. Students not in the performing arts will gain a firsthand appreciation of the skills necessary to make stage and screen violence look real.</p>
TFT	2110	The NHCC Filmmaking Project: Capstone Class	3	<p>The North Star Film Project: Capstone Class (TFT 2110) is an academic class in which film degree candidates shoot the short films they wrote in the Introduction to Screenwriting class. Students meet at least one hour per week in a laboratory format and produce their short films, learning to plan, rewrite, cast, shoot, edit, and mix their films into finished products, ready for viewing. Students in this class may have already participated in the North Star Film Project: Student Activity Class (TFT 1110). Students in the Student Activity Class (TFT 1110) function as actors and crew for those in the Capstone Class.</p> <p>Students in the AA Film Emphasis degree program should have done the following before taking this class:</p> <ul style="list-style-type: none"> - a completed short film script from the Introduction to Screenwriting class (TFT 1280); - completed the Digital Video class (TFT1270); and. - completed the Fundamentals of Directing class, (TFT 2010).

North Hennepin Community College Courses 2022-2023

TFT	1110	The NHCC Filmmaking Project: Student Activity Class	1	The North Star Film Project (TFT 1110) is a student activity class in which students will meet at least one hour per week in a laboratory format to produce short films from scripts written in the NHCC Introduction to Screenwriting each spring. Participating students learn about planning, rewriting, shooting, editing, and mixing a film into a finished product, ready for viewing. Students in this class may repeat it for credit, and may also participate in the Capstone version of the class for 3 credits once they have completed the prerequisites for that version of the class (TFT 2110).
TFT	1450	Stagecraft	3	This course introduces the student to the elements of theatrical design and it's implementation for a stage production. The student will gain practical experience and a working knowledge of set construction techniques, and lighting and sound equipment and their use. Safety standards will be emphasized, as well as competencies in utilizing various power and hand tools. Students will work on construction and operating crews in support of college theatre productions.
TFT	2150	Play Analysis	3	This course will introduce the student to a variety of plays that will be read and analyzed for content, meaning, structure, genre and historical context. Focus will include looking at the script as a blueprint for theatrical production from several different points of view, as well as analyzing the text utilizing various techniques and methodologies.
TFT	2550	Acting II	3	Continued exploration of the intuitive and imaginative techniques from Acting I with added scene work by American and European playwrights. Work begins with but moves away from simple evaluated scenes and includes specific vocal and physical character choices and script analysis. Advanced partnering skills and inside referent works are explored. Exercises are used to create an imaginative relationship to your partner with flexibility and precision. Students will hone ability to assess properties of effective acting using objective criteria in critique sessions. Class also includes lessons on professional etiquette, the business of acting and ensemble building.
