

**“My service learning really changed my personal goals. - Luke”**

I had a surprisingly good time doing my service learning. When I was first told that I would have to do community service for class, I thought it was going to be a hassle. After completing the required hours, I got a whole new view on service learning. It was a really good experience and it made me think of the people I was helping and the situations they were in. My service learning really changed my personal goals, because now I volunteer on my own time and I wasn't before. Troy Nellis made it really easy to get involved and I will continue my volunteering." - Luke
