## Associate Degree Programs

## Associate in Arts (A. A.) Degree

The Associate in Arts (A.A.) is awarded for successful completion of 60 designated credits and is designed to constitute the first two years of a liberal arts bachelor degree program. The Associate in Arts degree is a liberal arts degree intended primarily for students who plan to transfer to another college or university to complete a bachelor's degree. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirements of the desired transfer institution. An A.A. degree includes the entire Minnesota Transfer Curriculum (MnTC), 40 semester credits of general education requirements. Pursuant to Minnesota state statute, the MnTC must transfer to any institution within the Minnesota State Colleges and Universities system or the University of Minnesota. Students are encourages to develop an educational plan with an advisor to ensure they are meeting degree requirements and planning for a successful transfer. The A.A. Degree requires a minimum of 60 semester credits.

In order to graduate, a student shall:

1. Complete 40 credits in the Minnesota Transfer Curriculum, satisfying the requirements for each of the 10 goal areas.
2. Earn a minimum of 15 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
3. Earn a cumulative grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
4. Grades of $A, B, C$, and $D$ are accepted in the MnTC; however a cumulative 2.0 grade point average is required to complete the entire 40 credit, 10 goal area MnTC.
5. Complete at least 4 credits for the Wellness requirement with at least one course from each of the following areas: Health (all courses) and Physical Education (all courses).
Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher. If the student intends to transfer, he/she is encouraged to work with a counselor or adviser to fulfill requirements for transfer to the other institution.
6. Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking longer than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

Completion of the MnTC and/or the completion of an associate degree fulfills the MnTC Goal Area 2 Critical Thinking requirement.

North Hennepin Community College offers the following A.A. degree programs:

- A.A. in Liberal Arts and Sciences
- A.A. with an emphasis in History

## Minnesota Transfer Curriculum

At North Hennepin Community College, the Minnesota Transfer Curriculum (MnTC) provides the general education distribution requirements for the Associate of Arts degree and provides the general education component for each of the career programs. The MnTC is designed to give students a college-level general education curriculum that focuses on the knowledge and skills necessary to be successful in modern society.
The Minnesota Transfer Curriculum (MnTC) is an agreement among Minnesota public institutions that aids in transfer among public colleges and universities in Minnesota. Upon full completion of the MnTC, a student will receive credit for all lower-division general education requirements ( 40 credits) upon admission. Partial completion of the MnTC will first be evaluated for completion of any of the 10 Goal Areas within the MnTC and then on a course-by-course basis. In all cases, courses recognized within particular Goal Area(s) by the previous institution will be accepted at North Hennepin Community College within the same Goal Area(s). Grades of A, B, C, or D are accepted in the MnTC; however, a cumulative 2.00 MnTC GPA is required for recognition of a student's completion of the entire Minnesota Transfer Curriculum with or without completing an associate degree.

## Goal Area 1: Communication

Goal: To develop writers and speakers who use the English language effectively and who read, write, speak and listen critically. As a base, all students should complete introductory communication requirements early in their collegiate studies. Writing competency is an ongoing process reinforced through writing-intensive courses and writing across the curriculum. Speaking and listening skills are reinforced through multiple opportunities for interpersonal communication, public speaking and discussion.

Students must complete a minimum of nine (9) credits by taking at least six (6) credits in writing and three (3) credits in communications. Courses that fulfill more than one goal area show the additional goal area in parentheses (\#) after course title.

## Goal Area 2: Critical Thinking

Goal: To develop thinkers who are able to unify factual, creative, rational and value-sensitive modes of thought. Critical thinking will be taught and used throughout the general education curriculum to develop students' awareness of their own thinking and problem-solving procedures. To integrate new skills into their customary ways of thinking, students must be actively engaged in practicing thinking skills and applying them to open-ended problems.
MnTC approved courses for Goal Area 2:
Completion of the MnTC and/or the completion of an associate's degree fulfills the Critical Thinking requirement.

## Goal Area 3: Natural Sciences

Goal: To improve students' understanding of natural science principles and of the methods of scientific inquiry, i.e., the ways in which scientists investigate natural science phenomena. As a basis for lifelong learning, students need to know the vocabulary of science and to realize that while a set of principles has been developed through the work of previous scientists, ongoing scientific inquiry and new knowledge will bring changes in some of the ways scientists view the world. By studying the problems that engage today's scientists, students learn to appreciate the importance of science in their lives and to understand the value of a scientific perspective. Students are encouraged to study both the biological and physical sciences.

MnTC approved courses for Goal Area 3:
Students must complete a minimum of seven (7) credits. The courses must come from at least two different departments and at least one must be a traditional lab course-designated by *. Courses that fulfill more than one goal area show the additional goal area in parentheses (\#) after course title.

## Goal Area 4: Mathematical/Logical Reasoning

Goal: To increase students 'knowledge about mathematical and logical modes of thinking. This will enable students to appreciate the breadth of applications of mathematics, evaluate arguments and detect fallacious reasoning. Students will learn to apply mathematics, logic and/or statistics to help them make decisions in their lives and careers. Minnesota's public higher education systems have agreed that developmental mathematics includes the first three years of a high school mathematics sequence through intermediate algebra.

MnTC approved courses for Goal Area 4:
Students must complete a minimum of one college level math or logic course.

Goal Area 5: History and the Social and Behavioral Sciences
Goal: To increase student's knowledge of how historians and social and behavioral scientists discover, describe and explain the behaviors and interactions among individuals, groups, institutions, events and ideas. Such knowledge will better equip students to understand themselves and the roles they play in addressing the issues facing humanity.

MnTC approved courses for Goal Area 5:
Students must complete a minimum of nine (9) credits in three of these courses. Courses that fulfill more than one goal area show the additional goal area in parentheses (\#) after course title.

Designated Themes: Students must take courses in each of Goal Areas 7, 8, 9, and 10: Human Diversity, Global Perspective, Ethical and Civic Responsibility and People and the Environment. Courses in goal areas 1-6 that are also listed in these four goal areas can be used to satisfy both areas. Courses that fulfill more than one goal area show the additional goal area in parentheses (\#) after course title.

## Goal Area 7: Human Diversity

Goal: To increase students' understanding of individual and group differences (e.g. race, gender, class) and their knowledge of the traditions and values of various groups in the United States. Students should be able to evaluate the United States' historical and contemporary responses to group differences.

## Goal Area 9: Ethical and Civic Responsibility

Goal: To develop students' capacity to identify, discuss and reflect upon the ethical dimensions of political, social and personal life and to understand the ways in which they can exercise responsible and productive citizenship. While there are diverse views of social justice or the common good in a pluralistic society, students should learn that responsible citizenship requires them to develop skills to understand their own and others' positions and be part of the free exchange of ideas and function as publicminded citizens.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50\% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

# Cert: American Sign Language 

## 2017-2018

The purpose of the American Sign Language (ASL) Certificate is to provide training for students who wish to learn basic American Sign Language and understand Deaf Culture. This certificate is appropriate for students who are planning to enter or are currently employed in all areas of customer relations. Students who complete this certificate will be in a position to use basic communication with colleagues or customers who are ASL users. This program will not prepare students to become interpreters.

Upon completion of this program, a student will be able to communicate with Deaf and Hard of hearing people on a basic level in American Sign Language, including the use of fingerspelling numbers, signs and grammar structures. Students who earn this certificate may choose to continue their studies in an Interpreting Program for ASL.

2.00 GPA required for MnTC courses
2.00 overall GPA for NHCC courses

## Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.
A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four-year period preceding their date of graduation.

## Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 4 credits for the Wellness requirement with at least one course from each of the following areas: Health (all courses) and Physical Education (all courses).
- Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher. Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

Note: Courses can satisfy more than one goal area, however, credits may only be counted once toward the 60 credit minimum.

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## AS: Biology Transfer Pathway

## 2017-2018

The AS Biology Transfer Pathway offers students an opportunity to earn course credits that directly transfer to a designated Biology bachelor's degree program at Minnesota State universities. The entire curriculum has been carefully designed to meet bachelor's degree program requirements for transfer students planning initial study at a Minnesota State college. Students planning to transfer to non-system universities are advised to consult with their intended transfer institution as early as possible to determine transferability of the courses in this curriculum.

This transfer pathway degree will transfer to the following designated baccalaureate degree majors:
At Bemidji State University: Biology - General Biology, BS Biology - Ecology, Biodiversity, and Evolutionary Biology, BS Biology - Environmental Science, BS

At Metropolitan State University: Biology, BA
At Minnesota State University, Mankato: Biology, BA Biology, BS
At Minnesota State University, Moorhead: Biology, BA Ecology, BA
At Southwest Minnesota State University: Biology Concentration, BA
At St. Cloud State University: Biology, BA
At Winona State University: Biology, BA

## Degree Requirements

2.00 overall GPA for NHCC courses

## Notes

Under some circumstances, students may substitute Biology 1001 for Biology 1101 if the appropriate chemistry and mathematics prerequisites are met prior to enrolling in Biology 1102. Students who have completed Biology 1001 and 1002 under the previous NHCC course numbering system may substitute these courses for Biology 1101/1102.

Students may take Math 1150 or HIGHER for this requirement. Students planning to transfer to a BA/BS program are advised to consult the mathematics requirements of the program and institution to which transfer is planned.
It is recommended that MATH 1210 is taken. Students planning to transfer to a BA/BS program are advised to consult the mathematics requirements of the program and institution to which transfer is planned.
*Credit total may increase if other mathematics courses are substituted.

## Biology Transfer Pathway's Competencies

## Scientific Method

Science is a process of trial and error by which we hope to improve our understanding of the natural world incrementally, by making predictions, testing them, and improving their accuracy. The Scientific Method includes the ability to propose testable hypotheses and carry out experiments to test them, and relies on standardized international systems of measurement.

## Data Interpretation and Statistical Analysis

Students should be able to analyze simple data sets using appropriate descriptive and inferential statistics.

## Navigating and Reading the Scientific Literature

Students should be able to use public literature databases to find appropriate published material, and should be able to read, understand, and evaluate the validity and importance of the scientific literature and to integrate new concepts into their existing knowledge frameworks.

## Scientific Communication

Students should be able to communicate their own and others data and analysis in oral and written format, using computers where necessary to visualize data or to create clear and compelling papers, posters, or presentations.

## Science and Society/Civic Engagement

Students should be able to analyze scientific studies in light of their ecological, social, economic, ethical, and cultural implications.

## Collaboration

Students should learn to communicate and work productively with others in designing, conducting, and evaluating projects, experiments, and other course related deliverables as an essential skill in science

## Interdisciplinary Nature of Science

Science depends upon knowledge, skills, and tools from other scientific and nonscientific disciplines. Students should develop their ability to utilize other disciplines as sources of context and skills to inform the learning and work they are engaged in.

## Microscopy

The microscope is a tool used extensively in biology for observation and investigation. Skill development in basic light microscopy and exposure to more advanced forms of microscopy and digital imaging is fundamental to further study in biology.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50\% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 763-493-0555 or through the Minnesota Relay Service at 1-800-627-3529.

## Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: Transfer Information

## Cert: Building Inspection Technology

## 2017-2018

This accelerated certificate program provides students the foundational knowledge to pursue a career in construction code enforcement or for existing professionals to upgrade their skills. The courses meet one night a week and the program can be completed in two semesters. Successful completion of the Building Inspection Technology Certificate gives students the required training and points to take the State of Minnesota's Certified Building Official-Limited exam.

## Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Understand the purpose and intent of construction codes.

Personal and Social Responsibility, including:

- Apply building codes and referenced standards to construction projects.

Integrative Learning, including:

- Perform inspections and plan reviews on both residential and commercial construction projects.
- Prepare for and take the Minnesota Building Official- Limited exam

## Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one-third of the total credits required for each certificate must be completed at North Hennepin Community College.

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Equal Opportunity Employer and Disability Access Information

North Hennepin Community College is a member of Minnesota State Colleges and Universities system and an equal opportunity employer and educator. This document is available in alternative formats to individuals with disabilities by calling 763-493-0555 or through the Minnesota Relay Service at 1-800-627-3529.

## Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Describe the major functional areas of American businesses and the global aspects and legal and ethical responsibility of businesses operating profitably in a changing world.
Integrative and Applied Learning, including:
- Develop a managerial strategic plan that includes critical elements of planning, organizing, leading, and controlling.
- Illustrate the marketing concept through the completion of a comprehensive marketing plan.

## Career Opportunities

Information on careers, including salary and employment outlook data, is available on the iseek and Bureau of Labor Statistics websites: www.iseek.org and www.bls.gov.

## Accreditation

North Hennepin Community College is accredited by the: Higher Learning Commission 30 N. LaSalle Street, Suite 2400 Chicago, IL 60602-2504 1-800-621-7440

## Transfer Information

If you are planning on transferring to another institution, follow the guidelines available on our transfer resources web page to help you plan the process: Transfer Information

## Degree Information

Certificates may be earned for successful completion of courses in a specialized program of study with a minimum grade point average of 2.00 (C). A certificate shall include 9 to 30 semester credits. At least one-third of the total credits required for each certificate must be completed at North Hennepin Community College.

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Apply mathematical, physical, and chemical concepts to routine laboratory procedures.
- Apply knowledge of laboratory instrumentation, proper preparation of samples, and the limitations of instrumental analysis.
- Demonstrate knowledge of laboratory instrumentation, proper preparation of samples, and the limitations of instrumental analysis.
Intellectual and Practical Skills:
- Apply critical thinking skills to chemical laboratory technology.
- Use interpersonal and communication skills appropriate to the chemical laboratory technology environment.
- Use quantitative and qualitative analyses accurately in laboratory procedures.

Personal and Social Responsibility:

- Demonstrate independent work in the laboratory.
- Demonstrate knowledge of current Good Lab Practices

Integrative Learning:

- Synthesis and advanced accomplishment across general and specialized studies(demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problems).
- Troubleshoot results of experiments.
- Interpret the results of experiments.

## AS: Chemistry

## 2017-2018

The Chemistry program allows students to take all of the required chemistry courses and many general education courses to allow them to transfer to a four year institution with a junior standing in the sciences. This program prepares graduates to work as a chemical lab assistant or to continue on to obtain the bachelor's degree in chemistry.

The Associate of Science in Chemistry is designed to articulate to:

- Saint Cloud State University B.S. Biochemistry degree

## Degree Requirements

## Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- Understand, make calculations regarding, and explain the properties of materials
- Analyze samples and predict, measure and characterize the products of chemical reactions.

Intellectual and practical skills, including:

- Do basic operations on computers, laboratory instrumentation and wet bench analysis techniques.
- Effectively communicate chemical knowledge both in writing and verbal presentations.
- Make observations, collect data, and perform mathematical calculations on experimental data

Personal and social responsibility and engagement, including:

- Work and study individually and as a member of a group, including respecting others and sharing labor to achieve objectives.
- Apply the understanding of science and chemistry to gain insight into sociopolitical issues such as energy, material resources and environmental quality and to assess and discuss public statements and policies relating to them. Integrative and applied learning, including:
- Write a quality lab report which summarizes results, analyses data, proposes reasons for error and states a conclusion. Upon completion of the program, student will prepared to transfer to a baccalaureate program.

## AS: Computer Science

## 2017-2018

The Associate in Science in Computer Science degree prepares students for continued study in a baccalaureate degree program in computer science or computer information systems, as well as for positions in information technology, computer programming, software development and technical documentation. Students will learn the fundamentals of computer programming and acquire expertise in design, coding and testing development methodology. This degree transfers to the University of Minnesota (Information Technology Infrastructure) and Metropolitan State University (Computer Science and Computer Information Systems majors).

The Associate of Science in Computer Science is designed to articulate to:

- Metropolitan State University B.A. in Computer Science
- Metropolitan State University B.A. in Computer Information Systems
- Metropolitan State University B.A. in Computer Information Technology
- Minnesota State University Moorhead B.S. in Project Management
- Kaplan University B.S. in Information Technology

## Notes

Any Math course numbered 1150 or higher is a prerequisite for many CSci courses.
The University of Minnesota College of Continuing Education (CCE) recommends these courses: Phys 1201, Phys 1202, and Phil 1050.

## Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World, including:

- Designing the interfaces between programs, and between programs and users.

Intellectual and Practical Skills, including:

- Employing methodical and technical processes in designing and programming software applications.
- Designing databases to access, manage and store data.

Personal and Social Responsibility and Engagement:

- Following best practices of software development.
- Designing and coding robust programs that conform to industry standards.

Integrative and Applied Learning:

- Applying computer technology to solve real world problems.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

2.00 Overall GPA for NHCC Courses

## Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.

A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four-year period preceding their date of graduation.

## Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.

Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

- significant and critical awareness of the contemporary world, from local to global

Focused by engagement with big questions, both contemporary and enduring
Intellectual and Practical Skills:

- analysis and examination of stylistic and literary elements of critically successful authors and student writing within multiple genres
- demonstration of critical and creative thinking through large and small group workshop-style discussion and textual analysis of writing
- strategic application of practical and applicable creative writing modes and approaches to effective revision
- knowledge of historically successful literary elements and the artists who have used them

Practiced extensively, across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance
Personal and Social Responsibility and Engagement:

- understanding of cultural variation in forms of contemporary and historical literature, as well as important ways in which the contextual framework of the literature reflects culture
- interacting with college, local, national, and/or global publications with an awareness of audience and social ramifications
- developed skills in time management, deadlines, and collaborative experiences

Anchored through active involvement with diverse communities and real-world challenges
Integrative and Applied Learning:

- participation in literary arts publication and public performance
- investigation of careers related to critical and creative writing and the literary arts
- demonstration of proficiency in at least one genre of creative writing

Demonstrated through the application of knowledge, skills, and responsibilities to new settings and complex problems Graduates will be prepared to transfer to, and succeed at, an upper-level academic institution.

## Notes

A cooperative agreement between North Hennepin Community College and Metropolitan State University exists for students earning the A.S. degree in Criminal Justice who intend to transfer to Metropolitan State to pursue their B.A. degree in Criminal Justice.

## Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, including:

- demonstrating knowledge of history, current issues, concepts, organization, philosophies and theories in the field of criminal justice.
- demonstrating an understanding of local ordinances, State Statutes and Federal Law, the purpose and function of police, courts, and corrections.
- demonstrating an understanding of the judicial review process, political, cultural and social forces which impact the police, courts, corrections, suspects, victims, and other parties involved in the criminal justice system.
Develop intellectual and practical skills, including:
- communicating appropriately and effectively in work situations.
- obtaining and refining the necessary skills in interpersonal communication, mathematics, basic crime statistics, as the skills are related to public contact and employment in the criminal justice system.
- utilizing the intellectual and practical skills necessary to represent a private or public agency in a professional manner
- developing the writing and public speaking skills necessary to communicate in small and large groups to prepare employment and further education.
Demonstrate personal and social responsibility, including:
- identifying career opportunities in criminal justice and the skills and attributes that employers are seeking and creating an understanding that employers often require continued higher education, citizenship, and service to others for initial placement and promotion.
- comparing and contrasting traditional, developing and future trends and ideas in criminal justice.
- developing a basic understanding of race, sex, color, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identification, and social class as related to criminal justice issues. This basic understanding should lead to tolerance, valuing differences, and leading to the acceptance of others.
Demonstrate integrative and applied learning, including:
- articulating the history and application of Criminal Justice with respect to Law Enforcement, as well as its relationship to the other social sciences.
- analyzing complex material, including constitutional law, State and Federal court rulings and having the ability to read and understand basic criminal justice related and court documents.
- applying concepts used in the Criminal Justice profession.

Upon completion of the program the student will prepared to transfer to a baccalaureate program.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## AS: Education

## 2017-2018

The Associate in Science in Education is a transfer oriented program providing a core of education courses and experiences. It prepares individuals to transfer into a four-year teacher education program. The curriculum provides specific training, general education, and experience working with children or youth in educational settings.

Traditional paths to teaching can include:

- Bachelor of Art or Bachelor of Science Degree with a major in Elementary Education (Teacher's licensure also required)
- Bachelor of Art or Bachelor of Science Degree with a major of choice and a minor in Secondary Education
- Masters Degree or Doctorate, typically required for teaching at the College level.

The Associate of Science in Education is designed to articulate to:

- Concordia University St. Paul in B.A. in Birth-Third Grade Elementary Teaching degree
- Concordia University St. Paul in B.A. in K-6 Elementary Teaching degree
- Concordia University St. Paul in B.A. in Child Development degree
- St. Scholastica in B.S. in Elementary Education K-6

This degree requires 30 hours of Field Experience related to education. Field Experience is embedded into the Education course assignments and is completed outside of class meeting times.

## Program Outcomes

- Demonstrate written, verbal, and interpersonal communication skills appropriate to various educational settings.
- Articulate strategies for creating classrooms which are responsive to diversity, cultural differences, and ethnic identity.
- Conduct literacy education research and apply the findings to strategies for the classroom.
- Describe how learning theories and philosophies impact instructional decisions.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50\% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## AA: Emphasis in Film

## 2017-2018

The Associate of Arts (A.A.) degree with an emphasis in film gives students an understanding of - and experience with -audio-visual communication. You will learn how film and video actually work to produce an effect on an audience and how these media principles can be applied in your life and career. Such skills are now in high demand by employers as more and more companies look for people who can communicate through audio-visual media. The A.A. with emphasis in Film provides a solid foundation in film theory should you decide to continue your film studies at a four-year institution.

The Associate of Arts with an Emphasis in Film is designed to articulate to:

- Metropolitan State University B.A. in Screenwriting degree

## Program Outcomes

Knowledge of human cultures and the physical and natural world, including:

- how film traditions and filmmaking developments in America have contributed to our culture - at times both inhibiting and developing our understanding of our own cultural diversity;
- how film traditions and developments in non-English-speaking countries have contributed to filmmaking and world culture;
- how the elements of film work together to produce an effect on an audience; how cinematography, design, editing, sound, theme, screenplay, performance, and directing combine to make those impacts; and,
- how a film's social context and its political and religious influence show that film is not only an entertainment, but also a powerful tool for communication of a point of view.
Intellectual and Practical Skills, including:
- using critical skills (interpretive, evaluative, and analytical) toward understanding a film's intent, evaluating its effect, and judging its quality, not only from a United States perspective, but from a World perspective;
- demonstrating an ability to employ the elements of film to effectively and artistically communicate a message;
- experiencing a wide variety of approaches to filmmaking.

Personal and Social Responsibility, including:

- the ability to work independently and collaboratively in a high-pressure creative environment;
- acting with sensitivity to cultural differences in films and filmmaking, both in what's portrayed as well as toward the people making them.
Integrative Learning, including:
- participating in the various aspects of filmmaking mentioned above;
- demonstrating a required level of proficiency in creating images and sounds that work together to produce the effect they intend on an audience;
- investigating careers in film and television.

Be prepared to transfer to a four year institution in this discipline:

- Currently articulates to Metropolitan State University's Screenwriting B.A. Program; pending with Film Studies at St. Cloud State University and Moorhead State University; and,
- Graduates will have completed all 10 Goal Areas of the Minnesota Transfer Curriculum requirements and have a foundation of knowledge in film to prepare them for transfer to a baccalaureate program in Film Studies or Screenwriting.

## Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.
A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four-year period preceding their date of graduation.
Required A.A. Degree Course Distribution:
- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 4 credits for the Wellness requirement with at least one course from each of the following areas: Health (all courses) and Physical Education (all courses).
- Complete 16 elective credits selected from all courses listed in the College's offerings, which are numbered 1000 or higher. Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## AS: Graphic Design

## 2017-2018

NHCC's Graphic Design program starts with a fine arts foundation that gives students hands-on experience with design concepts. Drawing, painting, color theory, photography, dimensional design (2D, 3D) and art history classes help students to begin thinking like designers, with or without a computer. Of course, as foundation skills are gained, graphic design courses then emphasize industry-standard digital tools and software (Apple computers, Adobe Creative Suite) to harness design thinking and developing technical skills for more advanced concepts and projects.

NHCC graphic design majors work across different media: print, packaging, and book publication; web design and web animation; video and social media; sometimes street art and temporary installations. We learn digital and technical tools, but also how the design industry operates. We learn the actual language of design, we learn about audiences and work cultures, we learn strategies for developing a professional network of contacts, we learn about accepting constructive criticism and acknowledging the importance of other opinions, we learn interpersonal communication strategies to prepare for real professional situations. We work with real clients in advanced classes on projects that have an impact in the "real world." Small class sizes and one-on-one time with accomplished faculty artists and designers allow students to form the skills and opportunities needed to pursue, and get, jobs with graphic design industry employers. In fact, starting in the spring of 2015 NHCC's Graphic Design Program began working with metro area employers for paid graphic design internships. Students with consistently strong performance in their degree coursework are able to compete for these opportunities.

NHCC alumni have gone on to own their own graphic design studios and have worked for a long list of employers such as The Minnesota Twins, Nickelodeon, 3M, the Smithsonian Institution, Target, Best Buy, Colle+McVoy, and Minnesota Public Radio, to name just a few. NHCC's annual collection of student art and writing, Under Construction, is designed by students and has earned 30 national awards for content and design since 1968. It offers a rare chance to be a published writer and/or artist as part of a community college experience. See Under Construction as an e-publication at http://nhcc.edu/publications.

The NHCC Associate of Science in Graphic Design degree is for students who are interested in: Working as graphic designers, web/interactive designers, art directors, production artists, illustrators or in related jobs at design studios, advertising agencies, marketing and public relations companies, corporate art departments, magazines, websites and newspapers

- Working as self-employed (freelance) graphic designers, web/interactive designers, or illustrators
- Continuing study in a baccalaureate or professional degree program for graphic design, web/interactive design, or illustration.
- The degree is friendly towards continuing studies in graphic design at a 4-year college/university.
- NHCC has a graphic design articulation agreement with Concordia University in downtown St. Paul, also with Minnesota State University, Moorhead, Minnesota. Articulation agreements allow all credits from a two year degree to count as progress towards the 4 -year degree with the partnering College or University.
- Talk with an academic advisor (http://nhcc.edu/student-resources/academic-advising) about possibilities for continuing study, and about determining the best sequence of fine arts core courses to take before moving into graphic design courses.

Make your dreams take shape, literally, with Graphic Design at NHCC!

## Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.
A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four-year period preceding their date of graduation.
Required A.A. Degree Course Distribution:
- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.
Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Cert: Internet Programming

## 2017-2018

The Internet Programming Certificate concentrates on the methodological and technical aspects of software design and programming. The students will acquire expertise in software design, coding and testing in addition to essential knowledge of development methodology. To assure their success in the work place, students will learn how design and then program robust, interactive programs conforming to industry standards. The students will get sufficient knowledge to enter the job market related to Web development.

## AS: Law Enforcement

## 2017-2018

North Hennepin's Associate in Science degree program in Law Enforcement provides students with a broad analysis of the relationship between law and society as well as a thorough examination of the interrelationships, functions and operations of the different components of the criminal justice system. It is designed to provide preparation for a variety of entry-level positions in state, county and municipal law enforcement agencies. Students in this associate degree program are required to complete the "Professional Licensing Core" courses at the Law Enforcement Education Center (763-657-3700) to earn the degree. To qualify for admission to the Law Enforcement program, applicants must first meet certain criteria. Please consult a counselor or advisor in NHCC Counseling and Advising Center for more information.

The Associate of Science in Law Enforcement is designed to articulate to:

- Concordia University at St. Paul B.A. in Criminal Justice degree
- Metropolitan State University B.S. in Law Enforcement degree

## Degree Requirements

To qualify for admission into the Law Enforcement Education Center at Hennepin Technical College, all program prerequisites must be completed with a grade of C or better and a combined GPA of 2.50 or higher.
2.00 overall GPA for NHCC courses

## Notes

Applicants to the theory-based courses of the "Professional Licensing Program" must complete the nine prerequisite courses, or their equivalent, with at least a "C" grade ( 2.00 on a 4.00 scale) in each course and a cumulative GPA of 2.5 .

US citizenship is not required for admission to the "Professional Licensing Program;" however, applicants must be US citizens before being hired by a law enforcement agency.

Applicants may not be convicted of a crime that would prohibit them from being admitted to the law enforcement program under the rules of the Minnesota Board of Peace Officer Standards and Training (POST).

## Program Outcomes

Develop a foundation of essential knowledge about the cultural, social, and natural worlds, including:

- an understanding of the history, organization and functions of the criminal justice system including legal issues, the purpose and function of police, courts, and corrections.
- an understanding of political, cultural and social class forces which impact the police, suspects, victims, and other parties involved in law enforcement.
Develop intellectual and practical skills, including:
- communicating effectively in work situations.
- obtaining and refining the necessary skills in interpersonal communication, mathematics, basic crime statistics, and report writing, as these skills relate to public contact and criminal activity.
- utilizing the intellectual and practical skills necessary to represent a public agency in a professional manner during routine public contacts, high stress situations, and arrests.
Demonstrate personal and social responsibility, including:
- identifying career opportunities in public law enforcement and private security agencies and the attributes that employers are seeking and creating an understanding that employers often require continued higher education, citizenship, and service to others for initial placement and promotion.
- developing a basic understanding of race, sex, color, religion, age, national origin, disability, marital status, status with regard to public assistance, sexual orientation, gender identification, and social class as related to criminal justice issues. This basic understanding should lead to tolerance, valuing differences, and leading to the acceptance of others.
Demonstrate integrative and applied learning, including:
- articulating the history and application of Criminal Justice with respect to Law Enforcement, as well as its relationship to the other social sciences.
- understanding concepts used in the Law Enforcement profession and how they will be applied in the field.
- understanding techniques and strategies used in crime investigation, patrol operations, and daily police work.

Upon completion of the program, be prepared to transfer to a baccalaureate program.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least $50 \%$ of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

# AAS: Medical Laboratory Technology 

## 2017-2018

The North Hennepin Community College Associate of Applied Science Medical Laboratory Technology (MLT) Program is designed to prepare students for a career in the medical laboratory. Medical Laboratory Technology is a rewarding, dynamic, and in-demand career with many opportunities for growth. By performing testing on blood and body fluids using highly specialized skills and complex instrumentation, MLTs provide information that is vital to both diagnosing and treating disease. In fact, over 70\% of all health care decisions are made based on laboratory results.

Through NHCC's MLT program, students will gain both knowledge and hands-on experience, making them highly desirable employees. Coursework includes theory in phlebotomy, urinalysis, clinical chemistry, hematology, immunology, microbiology, and immunohematology. Practical experience will be gained in student laboratories at NHCC and through a 19-week clinical experience during the program's final semester. Upon completion of the program, students will be eligible to sit for the American Society of Clinical Pathology Board of Certification Exam.

All on-campus MLT courses are offered in both day and evening formats. However, in the final semester students are required to participate in clinical rotations, which are only offered during the day Monday-Friday. Admission into the MLT Program requires a separate application and entrance exam. The selection process is competitive, and the college may not be able to accept all applicants that meet the minimum standards. MLT application deadline is March 1st for the fall semester start.

The Associate of Applied Science in Medical Laboratory Technology is designed to articulate to:

- Saint Cloud State University B.S. in Medical Laboratory Science degree

## Degree Requirements

### 2.00 overall GPA for NHCC courses

Note: This program requires a 2.0 minimum grade for courses used by its requirements unless otherwise specified.

## Program Outcomes

Knowledge of Human Cultures and the Physical and Natural World:

- Develop entry-level medical laboratory technology skills in a clinical setting to prepare them for the workplace.

Intellectual and Practical Skills:

- Develop and demonstrate professionalism and concern for the customer.
- Develop competence in the theoretical knowledge and technical skills necessary for proficient performance of clinical laboratory procedures.
- Utilize effective interpersonal communication skills with customers and coworkers.
- Utilize effective written communication skills appropriate for the professional setting.
- Develop competence in the theoretical knowledge necessary to prepare for the national certification examination of the profession.
Personal and Social Responsibility and Engagement:
- Value participation in continuous professional development.
- Develop awareness of the role and responsibilities of the medical laboratory technician as a member of the health care team.
Integrative and Applied Learning:
- Apply critical thinking skills to correlating laboratory findings and common disease processes.
- Apply critical thinking skills to learning new techniques and procedures.

Upon successful completion of the program, the student will be eligible to sit for the national certification examination.
Upon successful completion of the program, students may be eligible to transfer to the B.S. in Medical Laboratory Science program at St. Cloud State University.

## Degree Information

The Associate in Applied Science (A.A.S.) degree is intended for those students who plan to use the competence gained through their degree for immediate employment or enhancing current career skills. The A.A.S. degree includes a minimum of 20 semester credits in general education selected from at least three of the ten goal areas of the Minnesota Transfer Curriculum (MnTC). The MnTC courses within the A.A.S. programs transfer to any Minnesota State College or University. Many of the A.A.S. degree programs have articulation agreements with four-year institutions for transfer of the program. A student shall:

- Earn a minimum of 60-71 semester credits as required in the program with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College.
- Earn 20 credits in at least 3 MnTC goal areas

Completion of an A.A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

# Cert: Microsoft Office Essentials 

## 2017-2018

This certificate provides essential computer skills needed in industry today. Students will use Microsoft Office products as well as other computer software applications that can be applied in business situations. Courses can be taken online. A course completed while earning a certificate can be applied to the A.A.S. or A.S. in Business Computer Systems and Management degrees and also some courses will be applied towards more advanced certificates. The courses from this program are delivered in the classroom and/or online. This certificate qualifies for the Work Investment Act.

## AS: Nursing (MANE)

## 2017-2018

The North Hennepin Community College Associate Degree Nursing Program is designed to educate students who are prepared to begin professional nursing careers as competent, caring members of today's healthcare team. The NHCC program is a partner in the Minnesota Alliance for Nursing Education (MANE). Coursework includes nursing theory focusing on holistic assessment, therapeutic nursing interventions including communication, levels of prevention, critical thinking, collaboration and leadership/management concepts. Clinical application occurs in a variety of settings including: acute, subacute and long-term care facilities, community clinics, schools and home health settings. Safe, caring, competent nursing care across the lifespan and along the wellness continuum is fostered.

All students admitted will be dually enrolled in North Hennepin Community College and Metropolitan State University. Upon the completion of five semesters, graduates are awarded an Associate in Science degree in Nursing and are eligible to apply to take the NCLEX-RN ® exam and meet the Minnesota State Board of Nursing requirements for licensure. NHCC nursing graduates can seamlessly continue for an additional three semesters with an upper division full-partner school in the Minnesota Alliance for Nursing Education (MANE) to complete their Bachelor of Science in Nursing.

Admission into the nursing program requires a separate special application and entrance exam. The selection process is highly competitive. The college may not be able to accept all applicants that meet the minimum standards. The application deadlines are February 1st for fall semester and June 1st for spring semester.

The Associate of Science in Nursing is designed to align with the Metropolitan State University B.S.N. in Nursing degree.

2.75 Minimum GPA for Application Prerequisites and Program Prerequisites
2.00 overall GPA for NHCC courses

Note: This program requires a 2.0 minimum grade for courses used by its requirements unless otherwise specified.

## Admission Information

The nursing program has limited enrollment and nursing classes start in the fall semester and the spring semester of each year. The nursing course sequence for the Standard and Mobility Option begin each fall and spring semester with separate deadlines for each cohort. Students are encouraged to plan ahead because there is a separate application process required for admission to the Nursing Program. The application process is competitive. Therefore, meeting the minimum requirements does NOT assure that a student will be competitive with other applicants.
Students accepted to the nursing program will be required to participate in nursing clinical experiences, receive certification in CPR for the healthcare provider, maintain current immunizations records and criminal background checks. Upon acceptance to the nursing program a student would receive more information on these requirements. Please do NOT complete these requirements prior to attending the nursing program orientation, which takes place after acceptance into the nursing program. Note: Minnesota law requires that any person who provides services that involve direct contact with patients and residents at a health facility licensed by the Minnesota Department of Health must have a background study conducted by the state. Any individual who is disqualified from having direct patient contact as a result of the background study, and whose disqualification is not set aside by the Commission of Health, will not be permitted to participate in a clinical placement in a Minnesota licensed health care facility. Failure to participate in a clinical placement required by the academic program could result in ineligibility to qualify for a degree in this program.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 75 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Each nursing course must be completed with a C or better for progression to the next nursing course
- Earn a minimum of 15 semester credits at NHCC.
- Have four years to complete the graduation requirements in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.

## Service Learning

In addition to the General Education courses and the Nursing Curriculum courses, nursing students are required to participate in 30 hours of service learning by the end of the nursing program. Some or all hours may be completed during semester breaks however no service learning hours can be earned until after the first day of class in a NURS course.

## Sequences and Prerequisites

Courses are planned to build upon previous course work. Therefore, the following sequence of courses is required; however, it is recommended that a student pursue the general education and supporting science courses first. # AS: Nursing, Advanced Standing (MANE) 

## 2017-2018

The North Hennepin Community College Associate Degree Nursing Program is designed to educate students who are prepared to begin professional nursing careers as competent, caring members of today's healthcare team. The NHCC program is a partner in the Minnesota Alliance for Nursing Education (MANE). Coursework includes nursing theory focusing on holistic assessment, therapeutic nursing interventions including communication, levels of prevention, critical thinking, collaboration and leadership/management concepts. Clinical application occurs in a variety of settings including: acute, subacute and long-term care facilities, community clinics, schools and home health settings. Safe, caring, competent nursing care across the lifespan and along the wellness continuum is fostered.

All students admitted will be dually enrolled in North Hennepin Community College and Metropolitan State University. Upon the completion of five semesters, graduates are awarded an Associate in Science degree in Nursing and are eligible to apply to take the NCLEX-RN ® exam and meet the Minnesota State Board of Nursing requirements for licensure. NHCC nursing graduates can seamlessly continue for an additional three semesters with an upper division full-partner school in the Minnesota Alliance for Nursing Education (MANE) to complete their Bachelor of Science in Nursing. The Advanced Standing Track is offered to qualified licensed practical nurses (LPNs). Students who enter in the spring of 2015 or later are granted 5 credits of advanced standing and will participate in a transition course to assist in the change of role to professional nurse.

Admission into the nursing program requires a separate special application and entrance exam. The selection process is highly competitive. The college may not be able to accept all applicants that meet the minimum standards. The application deadlines are February 1st for fall semester and June 1st for spring semester.

The Associate of Science in Nursing is designed to align with the Metropolitan State University B.S.N. in Nursing degree.

## Admission Information

The nursing program has limited enrollment and nursing classes start in the fall semester and the spring semester of each year. The nursing course sequence for the Standard and Mobility Option begin each fall and spring semester with separate deadlines for each cohort. Students are encouraged to plan ahead because there is a separate application process required for admission to the Nursing Program. The application process is competitive. Therefore, meeting the minimum requirements does NOT assure that a student will be competitive with other applicants.
Students accepted to the nursing program will be required to participate in nursing clinical experiences, receive certification in CPR for the healthcare provider, maintain current immunizations records and criminal background checks. Upon acceptance to the nursing program a student would receive more information on these requirements. Please do NOT complete these requirements prior to attending the nursing program orientation, which takes place after acceptance into the nursing program. Note: Minnesota law requires that any person who provides services that involve direct contact with patients and residents at a health facility licensed by the Minnesota Department of Health must have a background study conducted by the state. Any individual who is disqualified from having direct patient contact as a result of the background study, and whose disqualification is not set aside by the Commission of Health, will not be permitted to participate in a clinical placement in a Minnesota licensed health care facility. Failure to participate in a clinical placement required by the academic program could result in ineligibility to qualify for a degree in this program.

## Cert: Paralegal

## 2017-2018

This program prepares students to assist lawyers and administrators of law-related occupations in providing efficient legal services to the public. The program of study includes law-related courses and legal specialty courses.

Students who already possess a(n) Associate in Science, Associate in Art, Bachelor's, or higher degree may apply for a paralegal certificate upon successful completion of the paralegal courses only.

The paralegal courses are offered primarily in the evening. Courses prepare students for entry into a paralegal career and provide presently employed paralegals an opportunity to enhance their legal knowledge and skills. The Paralegal program does not train graduates to provide legal services directly to the public. Any person who attempts to provide legal services directly to the public, but is not licensed to practice law, engages in the illegal and unauthorized practice of law. The Paralegal program is approved by the American Bar Association.

Students must take at least ten semester credits or the equivalend of legal specialty courses through traditional classroom instruction as required by the American Bar Association

Students wishing to enroll in the Paralegal Program, must complete an Admission Request. Students must make an appointment to meet with and advisor to present the Admission Request for processing. For more information or to schedule an appointment, please contact Counseling and Advising Office.

## Degree Information

The Associate of Science (A.S.) degree is intended for students whose primary goal is to complete the credentials for a specific career and/or prepare for transfer to complete a bachelor's degree at a college or university with whom North Hennepin Community College has an articulation agreement. The A.S. degree provides a balance of general education courses and the required scientific, professional or technical courses in the degree program.
A student shall:

- Earn a minimum of 60 semester credits as required in the program, with a grade point average of 2.00 (C) or above in courses taken at North Hennepin Community College. Specific programs may have additional requirements or a higher minimum grade point average.
- Earn a minimum of 15 semester credits at North Hennepin Community College. A student must complete at least 50\% of career specific courses at North Hennepin Community College.
- Earn 30 credits in at least 6 Minnesota Transfer Curriculum (MnTC) goal areas.
- Earn 30 professional/technical credits.
- Have four years to complete the graduation requirements as published in the catalog in effect at the time of their initial enrollment. Students taking more than four years to complete their graduation requirements may follow any catalog published during the four-year period preceding their graduation.
Completion of an A.S. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

## Degree Requirements

## Degree Information

The Associate of Arts (A.A.) is awarded for successful completion of 60 credits and is designed to constitute the first two years of a liberal arts bachelor degree program. An A.A. degree includes the entire 40 credit Minnesota Transfer Curriculum (MnTC) as the general education requirement. Students may also choose to concentrate in a particular field of study in preparation for a planned major or professional emphasis at a four-year college by following the pre-major requirement of the desired transfer institution in addition to the MnTC and A.A. requirements.
A student shall:

- Earn a minimum of 60 semester credits.
- Earn a grade point average of 2.00 (C) or higher in courses taken at North Hennepin Community College.
- Earn a minimum of 20 semester credits of the 60 semester credits required for the A.A. Degree at NHCC.
- Complete the general education distribution requirement listed in the Minnesota Transfer Curriculum. The student shall select general education (MnTC) courses numbered 1000 or above to complete a minimum of 40 credits.
- Have four years in which to complete their work under the terms of the catalog in effect at the time of their first enrollment.
- Students taking more than four years to complete their graduation requirements may follow any catalog in effect during the four-year period preceding their date of graduation.

## Required A.A. Degree Course Distribution:

- Complete 40 credits in the Minnesota Transfer Curriculum satisfying the requirements for each of the 10 goal areas.
- Complete at least 2 credits for the Wellness requirement from either Health (all courses) or Physical Education (all courses).

If the student intends to transfer, he/she is encouraged to work with an advisor to fulfill requirements for transfer to the other institution.
Completion of an A.A. degree fulfills the Goal Area 2 requirement of the Minnesota Transfer Curriculum (MnTC).

## Developmental Courses

Some students may need preparatory course(s) in Math and/or English. Courses numbered below 1000 will not apply toward a degree.

# Cert: Web Graphic Design and Programming and e-Commerce 

## 2017-2018

The Web Graphic Design and Programming and e-Commerce certificate is a broad-based introduction to designing and scripting small business marketing and commercial websites. Students learn the basic principles behind effective design and web programming, including uploading content to the Internet and the basics of e-commerce.

This certificate is for students who have programming skills and would like to gain creative design and e-Commerce skill, or for students who have creative graphic design/art skill and would like to gain skills in programming and e-Commerce, or for students who have business/e-Commerce skills and would like to gain skills in computer programming and creative design. Some courses are offered online.

This certificate is also a great entry point to begin an A.S. degree in Graphic Design, Computer Science, or Business Computer Systems and Management.

This course will assist the student in understanding corporation and personal (Schedule C) tax requirements. It will also show students what they must do to prepare and maintain tax information for the year end business income tax statements.Prerequisite: Acct 2111
ACCT 2300 Accounting Capstone 4 n/a

This final capstone course in the accounting sequence is designed to extend and integrate your understanding of theoretical and practical issues in accounting, including the analytical and decision making processes for business enterprises. Further development of theoretical and practical issues from prerequisite courses and reinforcement of communication skills (writing, discussion, and presentation) are central elements of this course. This course will provide the student with the ability to enter the job market or transfer to a four year school with a good understanding of the accounting functions of a small business. Prerequisites: ACCT 2111, ACCT 2112 and CIS 1220 (or with instructor approval)
ADEV 0940 Building A College Vocabulary 1 n/a

This course offers students an opportunity to learn the major strategies used by adults in developing an academic and professional vocabulary and to develop an individual learning plan for applying those strategies. Students take a pre-test to determine their learning needs, learn a minimum of 200 new words, and take a post-test at the end of the course to document skill improvement. May be repeated for credit. Does not apply toward a degree.

ADEV 0950 Accelerated College Reading and Learning Strategies I 3 n/a
This course is an accelerated version of ADEV 0951 and must be taken with ADEV 0952 to allow a student to move through the developmental reading sequence in one semester. This course prepares students for success in future college coursework. This course emphasizes learning strategies to improve comprehension of a variety of complex texts. This course requires students to examine their existing learning strategies and introduces students to learning practices, processes, techniques and/or strategies necessary for college success.Credit does not apply to a degree. Placement in this class is determined by student's score on the reading assessment test.
ADEV College Reading and Learning Strategies I 0951 n/a

This course prepares students for success in future college coursework. This course emphasizes learning strategies to improve comprehension and understanding of how various texts are organized. This course requires students to examine their existing learning strategies and introduces students to learning practices, processes, techniques and/or strategies necessary for college success, such as prereading, underlining and annotating, and/or developing study aids. Credit does not apply to a degree. Placement in this class is determined by student's score on the reading assessment test.Students who place into ADEV 0951 are required to enroll in the full reading sequence (ADEV 0951 and ADEV 0952) during the first two terms at NHCC. Students who place into ADEV 0951 are required to enroll in this course during their first term at NHCC.

0952 College Reading and Learning Strategies II 3 n/a
The academic focus of this course is the introduction of critical literacy skills. Students enrolled in this course are offered extended practice with various literary and informational texts. Students will be expected to produce written products that demonstrate their comprehension of these texts. Students who successfully complete this course will have acquired learning strategies for comprehending and studying a variety of college-level materials. Credit does not apply to a degree. Placement in this class will be determined by student's reading assessment score and/or successful completion of ADev 0951.Prerequisite: For Nursing program students, ADEV 0951 with a grade of B better OR equivalent reading assessment test score. For non-nursing program students, ADEV 0951 with a grade of C or better OR equivalent reading assessment test score.

ADEV College Learning 0962 n/a
This course is the second in a sequence of courses designed to assist students in creating a strong foundation for future college course work. The course emphasizes learning strategies to improve comprehension by addressing such skills as reading motivation, establishing a purpose for reading, active reading processes, vocabulary development, and ways students can regulate their own learning.

ADEV College Learning 0963 n/a
This course is the third in a sequence of courses designed to assist students in creating a strong foundation for future college course work. The course emphasizes learning strategies to improve comprehension by addressing such skills as reading motivation, establishing a purpose for reading, active reading processes, vocabulary development, and ways students can regulate their own learning.

This course is the fourth and final a sequence of courses designed to assist students in creating a strong foundation for future college course work. The course emphasizes learning strategies to improve comprehension by addressing such skills as reading motivation, establishing a purpose for reading, active reading processes, vocabulary development, and ways students can regulate their own learning.

ADEV 1950 Reading Texts Critically 3 n/a
This course will focus on developing critical literacy and critical thinking strategies necessary for dealing efficiently and effectively with different kinds of college reading assignments. A major focus of the class will be on developing strategies such as pre-reading, marking and annotating, identifying patterns of organization and vocabulary enhancement. Critical literacy and critical thinking will be applied to a variety of assignments.Prerequisite: ADev 0952 with a grade of $C$ or better or equivalent reading assessment test score. For Nursing program students, ADEV 0952 with a grade of B better OR equivalent reading assessment test score.

ADEV 1990 Academic Development Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

This course examines the nature of culture by studying the forms of conventional behavior (language, ideology, social organization, and technology) and their material manifestations. It also seeks to explain the variation in cultures of representative ethnic groups and societies of present and recent past in terms of ecological adaptation and cultural evolution.

ANTH 1020 Intro to Anthropology: Physical Anthropology, Archaeology \& Prehistory 3 03,10
This course studies the relationship of prehistoric physical and cultural origins and development of humankind to the establishment of the first civilizations of the Old and New worlds. It examines the archaeological evidence for the theory of bio-cultural evolution, which helps to explain both the prehistoric developments and much of the cultural variation that is in the world today. The course does include a lab-like experience.

ANTH 1130 The Archaeology of Ancient Europe
305,10
Anthropology is concerned with the many ways that humans have adapted to their physical and social environments, including the systems of meaning and social organization that they use, as well as the historical development of those adaptions. There are a number of subfields within Anthropology in America: (Archaeology, Physical Anthropology, Linguistics, and applied Anthropology), and this course focuses on the remote past of Europe before the advent of writing (history), as revealed through archaeological research. We will focus primarily on Termperate Europe (north of the Alps), but to do so we will repeatedly run into the sophisticated cultures of the Mediterranean Basin. Evidence will be considered starting with the first people in Europe, through millennia of hunting and gathering, and then then the broad changes that occurred with the advent of agriculture and metal use, and the increasing societal complexity, ending with the coming of the Romans who brought civilization to their northern neighbors.

This course involves the study and comparison of religious institutions from a wide variety of cultures. We will consider the wonderful array of beliefs and practices of humanity. We will consider religion, magic, and witchcraft, and how these cultural constructions shed light on the societies in which they were created. Through seminar-style discussions of a variety of essays on religion and some videos, students will engage with the material on a deeper level than they normally would in a lecture format. Throughout the course, students will learn about the development of a wide variety of religious group identities, and their changing meanings across a wide range of cultures, and periods of history. They will learn about the dynamics of social stratification that religious groups experience today. Students will study the diversity of religion, and the racism and bigotry that often plagues peoples ideas and behavior towards other religious groups. This material will bring to light the institutional exclusion and discrimination that certain groups have endured. Through the consideration and discussion of numerous religious groups of America and beyond, students will learn the role(s) that these groups have played in our culture, and contributions they have made. Through presenting their two research projects to the class, students will exercise communication skills that involve great tact in discussing religious practices in a neutral and objective manner. We will practice those skills every class, in our seminar discussions of the reading. These discussions will get directly at the disparate explanatory systems offered by world religions, compare them, and critique the various views. In these ways, students will be using the method and data that anthropologists employ in the investigation of religion.

ARBC 1030 Arab Cultures 06,08
This course discusses the history and culture of the Arab world, examining various aspects of this rich and venerable civilization, the importance attached to education, the achievements of Arab science and also the internal conflicts, wide-spread poverty, and the role of women. This course is also an introduction to how the religion of Islam created a far-flung Arab Muslim world that embraces lands reaching from the shores of the Atlantic to the Indian Ocean, and examines how social institutions and culture are intertwined with politics and economics. This course is taught in English; no previous knowledge of Arabic language is required.

Designed for the student with little or no previous experience with a second language, this course gives students the opportunity to learn basic communication needs in Arabic. The four language skills of reading, listening, writing, and speaking will be implemented and practiced. The class begins with learning the Alphabet and progresses into learning reading elementary level Arabic, writing simple sentences, speaking basic and introductory idioms. Listening drills and exercises are employed in the class. Students will also learn basic grammar and its applicability, especially in writing. The course also introduces students to the culture of the Arabic-speaking people. Some aspects of Arab heritage, traditions, and customs will be highlighted and explained.
$\begin{array}{lll}\text { ARBC } & 1102 \text { Beginning Arabic II } & 408\end{array}$
This course is the second of two-course series to fulfill the needs of our students as well as our community. It is designed for non-native beginners to learn formal Arabic also known as Modern Standard Arabic. Prerequisite: Arbc 1101

ARBC 2201 Intermediate Arabic I 408
This course continues the development of the multiple language skills introduced in the beginning sequence. The student is introduced to the literature and culture of Arabic speaking nations. Prerequisite: Arbc 1102 or equivalent

1040 Introduction to Art 3 06,08
This course introduces the basic concepts of the visual arts, the organization of art forms, and the historical development of architecture, painting, and sculpture with an emphasis on contemporary art. A general world view of art is presented through lecture and discussion. Students will investigate the creative aspects of the visual arts through in-class examples and a field trip to a Twin Cities museum.

ART 1100 Creative Suite: Art, Design and the Web 2 n/a
An introduction to creating art, designing for print and the web using Adobe Creative Suite. Students will learn how to use Photoshop, Illustrator, InDesign, and Dreamweaver to produce creative design solutions for artwork, graphic design and web design. This course is for anyone with an interest in learning more about art, graphic design, web design and the Adobe Creative Suite.

## ART 1101 Photography I <br> 3

This is an introduction to the fundamentals of black and white photography. Both technical and creative skills are developed in the use of the camera, exposing and developing film, enlarging and finishing the black and white photograph. Class critiques help articulate individual visual growth while artist presentations and field trips to galleries and museums help acquaint students with significant photographers. Students use film-based cameras with adjustable shutter speed and f-stop. A limited number of cameras are available for rental.

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| ART | 1102 | Photography II | 3 | 06 |

This course is for students with a basic background in camera operations and darkroom procedures. There is a greater emphasis on the photograph as a fine print, the student's personal growth and perceptions in the medium. Class time will include discussions, slide shows and guest lectures. Students must have a film-based camera with adjustable shutter speed and f-stop. Course may be repeated for credit. Prerequisite: Art 1101
ART Digital Photography 316006

A logical sequence to Art 1101 or 1140, this class emphasizes the computer as a digital darkroom to create photographic images through the traditional camera or a digital camera. ): Course content includes an overview of basic photographic techniques and a rigorous examination of Adobe Photoshop through assignments and personal exploration, class critiques and artist presentations, to help student understanding of photographic art. Students must have their own digital or analog camera.

## ART 1170 Advanced Photography <br> 3 <br> 06

This course blends traditional and digital photography introducing a variety of both film based and digital technology to support creative and personal visual investigation.Prerequisites: Art 1101 and/or Art 1160

## ART <br> 1270 <br> Digital Video Production <br> 3 <br> 06

This course introduces basic video production concepts and techniques with an emphasis on using the elements of motion and sound as creative artistic tools. Students will critically analyze video in terms of genre, context, meaning, visual language and form and then produce and edit their own short projects that explore creative and experimental applications of the medium rather than the traditional mass communication form. Students are encouraged to use their own computer for editing if possible. Basic knowledge of the computer is helpful.

ART 1301 Two Dimensional Design I 306
This course introduces a visual vocabulary and tools essential for all flat design and space, and investigates basic principles related to composition, pattern making, illusory space, and self expression. Various techniques and materials are explored including paint, pencil, pen, brush, and pastels. This course also introduces students to artists and design elements from a variety of cultures. Strongly recommend taking Drawing I before this course.
$\begin{array}{lll}\text { ART Two Dimensional Design II } 1302 & 3\end{array}$
This course expands the study of flat design with emphasis on solving design problems. Students will be engaged in the more complicated tasks of integrating contrasting elements such as nonobjective and objective shapes, naturalism and idealism, shape and mass. Personal expression, design development and visual thinking as well as specialized techniques and materials are included. Design from different cultures and different artists will be discussed.Prerequisite: Art 1301

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| ART | 1310 | Three Dimensional Design | 3 | 06 |

As an introduction to the basic language of three-dimensional design, this course includes constructive, additive, subtractive and substitution techniques using traditional and contemporary media. Various methods of presentation are explored ranging from small freestanding works to site-specific models and proposals.
$\begin{array}{lll}\text { ART Introduction to Sculpture } & 320 & 36\end{array}$
This course is a specialized study on an individual basis in wood, metals, plaster, clay, stone or mixed media. The student will work with the sculptural possibilities of these materials and refine their ability to work in one particular medium.

ART 1340 Fundamentals of Color 306
The course teaches fundamental color theory by introducing the physical, perceptual, and artistic aspects of color. The dimensions of color are explored through theory and practice using paint and colored papers. Students also are introduced to the theories of the physiology and the psychology of color reception, cultural taste and preferences as they relate to color choices, and the color usage of well known artists, of art movements, and of different world cultures. Strongly recommend taking Drawing I before this course.

## ART 1361 Ceramics <br> 306

Ceramics is an introductory studio course that presents students with a fundamental understanding of the hand building and wheel throwing processes in clay. This course will focus on a creative and imaginative approach to solving visual problems in clay. Ceramics will introduce all methods of forming clay including pinch, throwing, coil and slab building.

ART Ceramics II 36206
Ceramics II is an advanced studio course that presents students with an in-depth understanding of the hand building and wheel throwing processes in clay. This course emphasizes student's development of a personal creative style taking an imaginative approach to solving visual problems in clay. Ceramics II will introduce all methods of forming clay combining pinch, throwing, coil and slab building with comprehensive glazing techniques.Prerequisite: Art 1361

ART 1401 Drawing I 3 06

This course introduces basic drawing concepts such as line, value, gesture, proportion, composition, and space; and techniques using traditional and contemporary drawing media. A variety of subjects from still life, architectural forms, nature and the human figure are used as inspiration for the student's drawings. Students will also be introduced to the art of important artists who have used drawing successfully in their work.

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| ART | 1402 | Drawing II | 3 | 06 |

This course continues the study of drawing concepts using various media to explore color, the human figure, and representational as well as non-representational subject matter. Personal expression is emphasized. Students will examine the art of important artists who have used drawing successfully in their work. Prerequisite: Art 1401

ART 1701
Fabrication 1 - Bench Jewelry
1 n/a
This class introduces the basic equipment used in jewelry fabrication, such as hand tools, torches, flex shafts, polishers, rolling mills. Students will learn how to lay out, drill, pierce, file, form, solder, and polish metal. Students will fabricate jewelry pieces such as rings, earrings and bezel pendants. No experience required

1702 Fabrication 2-Bench Jewelry 1 n/a
Continuing and extending the skills attained in Fabrication I, this class introduces advanced fabrication techniques used in jewelry fabrication, such as soldering, pierced overlays and intricate patterning skills. Prerequisite: ART 1701

1703 Fabrication 3-Bench Jewelry 1 n/a
Continuing and extending the skills attained in Fabrication II, this class builds on advanced fabrication techniques used in jewelry fabrication. Prerequisite: ART 1702

1704 Casting - Bench Jewlery 1 n/a
This class introduces a variety of casting methods with an emphasis on lost wax casting. Students will learn to sprue and invest wax models, calculate metal requirements, control the burnout cycle and cast projects.

ART Repair 1-Bench Jewlery 1705 n/a
This class covers the most common jewelry repairs. Students will learn ring sizing, chain repair, prong repair, and clasp repair.

ART Repair 2-Bench Jewelry 1706 n/a
Building on the skills acquired in Repair 1, students will be introduced to more advanced repair problems, such as adding settings, repairing prongs, rebuilding tips, installing spring inserts, replacing a half shank and cleaning up castings. Prerequisite: ART 1705

ART 1707 Settings 1 - Bench Jewelry 1 n/a
This class introduces the basic setting concepts of bezel and prong settings, the most common settings used in jewelry. Students will learn to prepare and use pushers, punches, and hammers. Prerequisite: ART 1701

ART $1708 \quad$ Settings 2 - Bench Jewelry
$1 \mathrm{n} / \mathrm{a}$
Building on the skills acquired in Repair 1, students will be introduced to more advanced repair problems, such as adding settings, repairing prongs, rebuilding tips, installing spring inserts, replacing a half shank and cleaning up castings. Prerequisite: ART 1707

1709 Polishing and Finishing-Bench Jewelry 1 n/a
Students will learn the critical skills of professionally finishing a jewelry project and will be introduced to the theory and practice behind artistic and beautiful finishes on jewelry, using a variety of buffing and polishing tools such as wheels, buffs, brushes, abrasives and compounds. Prerequisite: ART 1701

ART 1710 Trade Practices - Bench Jewelry 1 n/a
This course will introduce students to effective business and resource practices for jewelers, the legalities to know when working in the industry, and industry organizations in which to participate in order to stay current. Students will learn about recycling scrap gold, testing gold, taking in jobs, tool maintenance, health precautions, trade organizations, industry events, insurance, resources, laws, copyrights, trademarks.

ART 1770 Quilt Arts 306
This class explores the visual and expressive possibilities of quilting as a fine art. Students will solve design problems using fabric. Traditional and non-traditional quilting techniques will be used to enhance personal expression and to create innovative visual communications.

ART 1810 Studio Art Workshop 06
The 1-credit Studio Art Workshop is a basic studio course that presents to art and non-art students the fundamentals required to complete projects in a particular art medium or art application process. The class covers fundamental technical use as well as incorporating personal aesthetics into ones output in the medium. NOTE: The particular medium covered in a given semester will be noted on the semester class schedule but will not show up in the student transcript. Students desiring to transfer this course may need to obtain a copy of the course syllabus to show the particular medium emphasized in a given semester. This course is repeatable for credit.

ART 1820 Studio Art Workshop 206
The 2-credit Studio Art Workshop is a studio course that presents to art and non-art students the fundamentals required to complete projects in a particular art medium or art application process. The class covers fundamental technical use as well as incorporating personal aesthetics into ones output in the medium. In addition, this class helps students see the creative process as a method of developing a concept and solving related problems. Aesthetic Critique and artistic reflection is a component of this class. NOTE: the particular medium used will be noted on the semester schedule but will not show up in the student transcript. Students desiring to transfer this course may need to obtain a copy of the course syllabus to show the particular medium emphasized in a given semester.This course is repeatable for credit.

| ART | 1970 | Graphic Design Internship Experience | 2 | $\mathrm{n} / \mathrm{a}$ |

Facilitating an internship experience between a student and an engaged employer.
1980 Internship 0 n/a

This course will provide the flexibility of offering a discipline specific internship opportunity. It is designed to ready the student for transition from the classroom to the work place, emphasizing practical skill development and additional development of the students organizational, communication and critical analysis skills. The course may be repeated for credit.Permissions from instructor is required.
$\begin{array}{llll}\text { ART } 1990 & \text { Art and Design Special Topics } & \text { 1-4 } & \mathrm{n} / \mathrm{a}\end{array}$
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

ART 2180 Art History: Pre-History to the Age of Cathedrals 3 06,08
This course examines painting, sculpture and architecture of cultures from prehistory to the end of the 15th Century. While the emphasis is on developments in Western art, the course includes overviews of the arts of Asia, Africa and the Americas. Museum visits support the lectures and text.

ART 2190 Art History: Renaissance to 21st Century Art 3 06,08
This course examines painting, sculpture and architecture of cultures from the 16th century to the present, as well as new media of the modern era. While the emphasis is on developments in Europe and the United States, the course will include overviews of the arts of Asia, Africa and the Americas. Museum visits support the lectures and text.

ART 2300 Architectural History
206,08
This course is a survey of the history of Western architecture from pre-history to the present day. The student will gain knowledge and understandings of the characteristics of the architecture of Western cultures, the ideas and intentions which motivated builders, as well as terminology related to architectural design and construction.

ART Illustration 2540 n/a
This course introduces students to various illustration techniques used in graphic design studios. Students will be encouraged to develop illustrative skills that can be applied to design. Through creative problem solving and research, students will learn to develop and refine an image.Prerequisite: Art 1401

| Subject | Course No. | Title | Credits | Goal Area |

| ART | 2550 | Typography | 3 | $\mathrm{n} / \mathrm{a}$ |

This course explores basic concepts of typography including: history, anatomy and mechanics, copyfitting, legibility, syntax, and communication within the context of process-oriented, problem-solving projects. Students will learn the effective use, importance and impact of typography in graphic design. This is an advanced course in the techniques of typography for graphic design. Students work on projects that involve complex visual ideas and are encouraged to develop a personal style in their visual communication. Pre-requisite: ART 1301
ART Web Design/Graphics I 351 n/a

Web design for the graphic designer I. This course explores web design concepts from a graphic designers perspective on how to adapt print design and illustration to web design using Photoshop«, Dreamweaver«, and Fireworks«. Experience with digital photography and image editing (PhotoShop) is suggested.

## ART 2562 Web Design/Graphics II 3 n/a

This is the second course in a series of web design courses for graphic designers. This course explores advanced web design concepts from a graphic designers perspective. Students will adapt graphic design and illustration to web design using current web design and animation software/technologies. Students will explore web user interface (UI) design, web animation techniques, integration of video and sound, and the use of type design in web applications. Students will explore prototyping a web design and working with a developer/programmer. The course also includes an introduction to multimedia design for the web. Prerequisite: ART 2561

ART 2601 Graphic Design I 3 n/a
This course is a study of Graphic Design theory and applications. Students explore the creative process in the development of visual communication and its relationship to creating graphic design ideas. The visual language of design is explored as students design a variety of projects through application of computer graphics and use of software. Prerequisites: Art 1301, Art 1340 and Art 2901. Please note: Students can be concurrently enrolled in ART 2901 and ART 2601.

ART Graphic Design II 2602 n/a
This is an advanced studio course in graphic design. The content and scope of the projects will help students to understand the nature of graphic design projects as well as the research and content knowledge necessary to achieve professional design solutions. Students will assemble a portfolio necessary for success in the field of professional design.

ART Painting I 361106
This course is an introduction to the basic skills and techniques of painting. The study of paint and materials, the use of color in painting and the development of ideas are important elements in this class. Exploration of realism, abstraction and contemporary painting are all important aspects of Painting I. Prerequisite: Art 1401 Recommended: Art 1340

| Subject | Course No. | Title | Credits | Goal Area |
| :---: | :---: | :---: | :---: | :---: |
| ART | 2612 | Painting II | 3 | 06 |

Using advanced painting techniques, this course emphasizes student's development of a personal style. Prerequisite: Art 2611

ART 2640 Watercolor
306
This course is an introduction to the basic skills and techniques of watercolor painting. The special characteristics of watercolor application will be explored to create both traditional and abstract results.

ART Jewelry Workshop 06
This workshop is a basic introduction to rudimentary jewelry-making techniques which includes fabrication of metals through hand piercing, sawing, forging, soldering, riveting and forming raw materials such as silver, copper, brass and found objects. May be repeated for credit.

ART $2750 \quad$ Ceramics Workshop
06
Ceramics Workshop is a basic studio course for art and non-art students which provides a fundamental understanding of the hand building and wheel throwing processes in clay. Ceramics Workshop will introduce all methods of forming clay including pinch, throwing, coil and slab building. This course is repeatable for credit.
$\begin{array}{lll}\text { ART } 2781 ~ Q u i l t m a k i n g ~ W o r k s h o p ~ I ~ & 1 & 06\end{array}$
This is a basic workshop introducing the processes and technical skills of quilting along with an introduction to artistic principles such as color, texture, line, form, and composition. Students are also introduced to information about the history of quilting and the cultural connections quilting holds within our society.

ART Quiltmaking Workshop II 106
This is an advanced workshop which further develops the processes and technical skills of quilting along with artistic principles such as color, texture, line, form, and composition. This course may be repeated for credit.

ART 2800
Painting Workshop
106
This is a basic course in painting. The emphasis of this course is on painting procedures, color use and composition, but students also will explore the connection of art to historical context. Subject matter, visual elements and principles, and technique will be explored.

| ART | 2810 | Publication Design | 2 | $\mathrm{n} / \mathrm{a}$ |

This course introduces the history and techniques of publication design and production and advances the student's skills in publication layout and page design. Concepts in magazine and book page layout are studied through lectures and studio projects. Printing technology is explored from design to production. Through experimentation and group discussions, students will learn how to refine their design concepts into a professional format. Prerequisites: ART 1301 (2-D Design I) andART 1340 (Fundamentals of Color) and ART/GDES 2901 or currently enrolled in ART/GDES 2901

ART Drawing Workshop 1800
This workshop is an introduction to basic concepts in drawing and visual perception using traditional drawing materials and techniques.

ART 2860 Photography Workshop 06
This basic course is an intensive, personal exploration of various photo-related topics for those who wish a sampler. Topics for separate workshops are color photography, digital photography, nature and landscape photography, among others.

## ART 2900 Studio Arts Capstone Practicum 06

This course is intended for students who have completed a significant portion of coursework in the Studio Arts AFA program and are within a semester of completion. It is a capstone experience in which students will refine their skills in portfolio building, artistic presentation in the professional arts world, resume building, critique skills, exhibition preparation, and use of web resources for artists' representation. Students will work closely with faculty to integrate concepts learned throughout their program into a final portfolio of work in preparation for continued study or work. Prerequisites: Art 1301, Art 1310, Art 1340, and Art 1401

ART Desktop Design I 3901 n/a
This course introduces students to the use and function of graphic design software programs. Through professional design projects students will learn to effectively use the essential techniques, tools, and principles of each program. Students will apply problem solving techniques to design projects that simulate real-world design challenges faced in today's design studios.

ART Desktop Design II 2902 n/a
This course is a continuation of Desktop Design I. The advanced capabilities of the Macintosh computer are explored as well as the use of QuarkXPress, a popular page layout program. Adobe Photoshop(color photo manipulation software) and Adobe Illustrator (drawing and design program) are also studied. Students are introduced to the concepts of design and production workflow.

This course teaches the basics for communication with Deaf and Hard-of-Hearing individuals. The course includes receptive and expressive finger-spelling, signing, conversational behaviors, and various aspects of Deaf Culture.

ASL 1102 American Sign Language II
408
This course is a continuation of ASL 1101. The student's signing and finger-spelling will be increased to improve their signing skills.Prerequisite: ASL 1101

ASL Deaf Culture 1300 3 07
This class provides students with an understanding of the History and Culture of Deaf People. Students will learn about Deaf and Hard of hearing people in the Deaf Community in all areas of the United States and how the culture has progressed since the 1800's.

ASL $1400 \quad$ Fingerspelling and Numbers
3 n/a
Fingerspelling and Numbers course provides students the fundamentals to learn basic letters, words, and numbers in American Sign Language. This course will prepare students to communicate with Deaf and Hard of Hearing people on a basic level. Practice time in class will allow students to easily increase their speed signing.

ASL Special Topics 1990 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

ASL 2201 Intermediate American Sign Language I 408
This course gives students an opportunity to practice their signing skills while increasing their knowledge of various vocabularies, using appropriate body language and facial expression. The course also will prepare students to read signers and will introduce more complex ASL structures. Prerequisite: ASL 1102

ASL 2202 Intermediate American Sign Language II 4
This course gives students an opportunity to increase their listening and signing skills in depth. Students will meet Deaf people in a field trip setting to expose them to the Deaf world. Students may do observations with Deaf and Hard-of-Hearing people approximately three times.Prerequisite: ASL 2201

| BIOL | 1000 | Life Science | 4 | 03 |

The course introduces the breadth of biology from the principles of chemistry to ecology. The production and utilization of biological energy is explored at the cellular and organism level. The principles of inheritance and cellular reproduction are explored at the molecular, cellular level and organism levels. The unity and diversity of life and life processes is emphasized. The laboratory focuses on the techniques required to discover biological principles.
Activities are hands-on.(3 hours lecture, 3 hours lab).

BIOL 1001 Biology I
4
03
This course focuses on the concepts of biological chemistry, cell structure and function, cellular metabolism, molecular genetics and heredity reproduction and development. The course is intended for allied health majors and others not requiring a majors-level introductory biology. High school algebra and chemistry are recommended. (3 hours lecture, 3 hours lab).

BIOL 1030 Boundary Waters Canoe Area Field Biology 4 03,10
This is a lecture, lab, and field based course in which students will study the biological communities and ecology of the mixed coniferous/deciduous forests, lakes, and wetland ecosystems of the BWCA region. The course culminates with an eight to nine day long field trip to the area. This course is open to all students.

BIOL 1040 Rocky Mountain Field Biology 4 n/a
This course considers field characteristics and ecological relationships of Rocky Mountain flora and fauna. It includes principles of plant and animal anatomy, identification, practical (edible, poisonous wild plants and animals) and economic considerations. Students participate in a nine-day field trip in the Rocky Mountains of Colorado. This course is open to all students. This course will likely and be part of a two or three course package/program and have co-requisite courses.

BIOL 1101 Principles of Biology I
4 03
This is the first course in a two-semester biology sequence. This course introduces students to the concepts of cell structure and function, cellular metabolism, heredity and genetics. This course is intended for students for biological and physical science majors or those planning to enter a professional program. (3 hours lecture, 3 hours lab)Prerequisite: CHEM 1061 or Concurrent Registration with CHEM 1061

BIOL 1102 Principles of Biology II
4
03
This course is the second in the two semester sequence of introductory biology. Topics include principles of evolution, ecology, biodiversity and an introduction to living systems. Utilization of preserved animal specimens is a required part of this course. One semester of college chemistry is recommended. (3 hours lecture, 3 hours lab) Prerequisite: BIOL 1101; or BIOL 1001 with instructor permission and concurrent enrollment in CHEM 1061

This introductory level course provides students with a one semester overview of the structure and function of the human body. The course is open to all students: however, it does not fulfill the human anatomy and physiology requirement for those who are planning to pursue a career in the health sciences. This course fulfills the lab-like experience requirements for MnTC Goal Area 3.

BIOL $1130 \quad$ Human Biology with a Lab 4 03

This introductory level course provides students with a one semester overview of the structure and function of the human body. The course is open to all students: however, it does not fulfill the human anatomy and physiology requirement for those who are planning to pursue a career in the health sciences. This course has a laboratory experience and fulfills the requirements for MnTC Goal Area 3. (3 hours lecture, 2 hours lab)

BIOL 1140 Introduction to Human Genetics and Origins 4 03

This course in an introduction to human genetics and origins including evolution and ancestry. Students are introduced to cell biology, inheritance, epigenetics, DNA, chromosomes, mutations, population genetics, genetics of health and behavior, genomics and genetic technologies. Students will use the process of scientific inquiry to analyze personal genetic data from direct-to-consumer DNA testing in a guided independent project. Testing with a direct-to-consumer (DTC) testing company will be done at the start of the course, or students may opt-out and use available genomes. Students who have previously tested with a DTC company should consult with the instructor. This course is suitable for both biology majors and non-majors. (3 hours lecture, 3 hours lab)

BIOL 1160 Global Environment Field Biology 4 03,10
This course will introduce students to the ecology and environmental issues of various locations abroad, and present them within the context of the social, cultural and political conditions of that country or region. Students will examine how various cultures and societies approach ecological and environmental problems. The impact of globalization on these issues will be a major focus of the course. Students will travel to the country or region of study to examine first-hand the issues covered in the course.

BIOL 1200 Current Environmental Issues 403030
Using an interdisciplinary approach, this course examines various aspects of natural and human-made ecosystems, human's intervention, and the subsequent impact on society and nature. It emphasizes current problems, values, and projection for the future. The lab involves internet exercises, videos, group discussion, individual and group projects, field trips and other outdoor activities. (3 hours lecture, 4 hours lab)

BIOL 1230 Medical Terminology I-Basics 1 n/a
This course is designed to introduce students to the Greek and Latin derivatives used to form medical terminology. Students will learn how to build and analyze medical terms. Emphasis will be placed on proper spelling, definition, usage, and pronunciation of medical terms. Other topics include: prefixes, suffixes, combining forms, introduction to basic biology, and introduction to body systems.

Subject Course No. Title
Credits Goal Area
BIOL 1231 Medical Terminology II-Application
$1 \mathrm{n} / \mathrm{a}$
This course is a continuation of Biol 1230 Medical Terminology I - Basic. The focus is on applying proper medical terminology in reading medical reports, case histories and using the medical dictionary. Prerequisite: Biol 1230

BIOL Careers in Biology 1300 n/a
Career choice is based upon your personal values, needs and goals. Through outside speakers, networking and workshops, we will explore the diversity of biology-related careers and industries to match your values and needs. We will learn how to make academic plans that involve course selection and experiences that allow us to achieve our goals. Prerequisite: Biol 1000, 1001 or concurrent enrollment

BIOL Biology of Women 1350303
This course is designed to allow students to explore the biological aspects of being female throughout her life cycle from sex cell formation through menopause and aging. Students will also gain an historical perspective of women over the ages including women in science, will be introduced to the nature of science and the scientific method, study the biology of gender differences, gain a multicultural perspective of women's health issues as well as a comprehensive study of female and male reproductive biology. Topics that will be covered include sex cell formation, genetic inheritance, gene expression, sex determination, pregnancy and birth as well as other health issues such pre-menstrual syndrome, birth control, sexually transmitted diseases, and cancer. This course includes a lab-like experience. The course is open to both male and female students.

BIOL $1360 \quad$ Biology of Women with a Lab 4 03

This course is designed to allow students to explore the biological aspects of being female throughout her life cycle from sex cell formation through menopause and aging. Students will also gain an historical perspective of women over the ages including women in science, will be introduced to the nature of science and the scientific method, study the biology of gender differences, gain a multicultural perspective of women's health issues as well as a comprehensive study of female and male reproductive biology. The course is open to both male and female students. (3 hours lecture/2 hours lab)NOTE: This course has a lab component that incorporates active learning in a lab setting to support classroom material.
$\begin{array}{llll}\text { BIOL } 1600 & 1 & 10\end{array}$
Explore the natural history of Minnesota! A series of courses on topics as diverse as wetlands, wild flowers, edible plants, predatory birds, prairie ecology, and winter biology are offered throughout the year. These one-credit courses are taught on an introductory level. Each course may be taken for one credit.

BIOL 1610 Field Ecology
1 03,10
This course is a team-taught, field-based introduction to the flora, fauna and biological communities of the woodland, lake, and wetland ecosystems of northern Minnesota and Wisconsin. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. A three-day trip to a university biological field station provides the venue for this hands-on course which is open to all students.

| BIOL | 1650 | Human Biology Series | 1 | 03 |

This course provides students with an Intensive overview of sophisticated, timely topics in biology related to the human condition. This course is intended for general audiences. The overview will include development of scientific background for understanding the topic historical perspective, significance of the issue in both a societal and a scientific context, and exploration of the scientific processes related to the topic. These courses include a variety of topics of interest to any student. Topics have included: Bioethics, Biology of Alcoholism, Biology of HIV, Biology of Viruses, Emerging Diseases, and other current topics pertaining to human biology. This course fulfills the lab-like experience requirement for MnTC Goal area 3. Check web site for each semester's topics. This course is open to all students.

BIOL 1990 Biology Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

BIOL 2020 Animal Biology 403
This course provides a framework for understanding the phylogenetic relationships among the major groups (phyla) of animals. Knowledge of the ecology, morphology, and evolutionary history of the phyla informs the student's understanding of how diverse groups of animals have solved the common problems of existence (e.g., feeding, movement, respiration, and reproduction) and how their solutions have given rise to increasing levels of structural complexity. The laboratory is an integral part of the course; activities are hands-on and require dissection of preserved animals.(3 hours lecture, 4 hours lab) Pre-requisite: Biology 1001/1101 and Biology 1002/1102 with a grade of $C$ or better, or consent of the professor.

BIOL 2030 Plant Biology
4 03

This course is an introduction to plant biology, and is intended for students majoring in biology and related fields. The course includes a survey of the major taxonomic groups of plants, fundamentals of plant anatomy, physiology, reproduction and development, evolution, and systematics. (3 hours lecture, 3 hours lab) Prerequisite: Biol 1001/1101 and Biol 1002/1102 with a grade of C or better, or consent of the professor.

BIOL 2100 Microbiology 403
This course is a study of bacteria, viruses, fungi and protozoa, infection, immunity, human diseases and microbiology of food and water. Laboratory exercises stress detection, isolation and control of microorganisms. (3 hours lecture, 3 hours lab) Prerequisite: Biol 1001 or 1101 with grade of C or better

This course is the first course of a two-course sequence. The course offers students a comprehensive study of the structure and function of the human body in a classroom and laboratory setting. Topics include anatomical terminology, homeostasis, cell structure and function, histology, as well as the anatomy and physiology of the following organ systems; integumentary, skeletal, articular, muscular, nervous, special senses and endocrine. Utilization of preserved specimens in the laboratory is a required part of the course. (3 hours lecture, 3 hours lab) Strongly recommend college level reading abilities, a working knowledge of elementary algebra and a medical terminology course. Prerequisite: Biol 1001 or 1101 with grade of C or better. Recommendations for student success in this class include: a prior course in medical terminology, college level reading and basic algebra skills

## BIOL 2112 Human Anatomy and Physiology II

4 03

This course is the second course of a two-course sequence. This course offers students a comprehensive study of the structure and function of the human body in a classroom and laboratory setting. Topics include the anatomy and physiology of the following organ systems: circulatory, non-specific and specific defenses, respiratory, digestive, urinary, reproductive and early development. Strongly recommend college level reading abilities, a working knowledge of elementary algebra and a medical terminology course. Utilization of preserved specimens in the laboratory is a required part of the course. (3 hours lecture, 3 hours lab) Prerequisite: Biol 2111 with a grade of $C$ or better.

BIOL 2360 Genetics
4
03
We will examine the organization, storage, maintenance, transfer, and expression of genetic information. Molecular data and Mendelian principles will be applied to understand genetics at the molecular, cellular, organismal, and population levels. Skills of professional biologists will be practiced, such as reading primary literature, designing/carrying out experiments, and evaluating qualitative and quantitative data. Prerequisite: BIOL 1101 or BIOL 1001, and MATH 1150, with a C or better in each. Recommended: completion or coenrollment in BIOL 1102.

BIOL 2610 General Ecology
4 03

We will examine the interrelationships of organisms and their environments, emphasizing the historic development of fundamental principles at the levels of individuals, population, community, and ecosystem through examination of theoretical and empirical findings. Skills of professional biologists will be practiced, such as reading primary literature, designing/carrying out experiments, and evaluating qualitative and quantitative data. Prerequisite: Prerequisite: BIOL 1102, and placement above MATH 1150 or successful completion of MATH 1150 or higher, with a C or better.

BIT 1050 Foundations of Construction Codes and Inspections 3 n/a
This course provides an introduction to the field of building inspection and construction codes. Provides an introduction to the field of building inspection and construction codes. The student will learn about the history of codes, what codes and standards are and how they are developed, along with receiving an introduction to plan reading, field inspections, department administrations, plumbing, mechanical systems and information on the industry and types of positions that work in a building department. This course is intended to provide a student with a broad overview of the building inspection industry and construction codes.

| Subject | Course No. | Title | Credits | Goal Area |
| :---: | :--- | :---: | :---: | :---: |
| BIT | 1100 | Field Inspection | 2 | n/a |

This course provides a basic understanding of how to conduct field inspections under the IRC. Students will learn about building components and systems and how building code requirements are applied to these systems during construction. This course is intended for a student working toward a career in the construction industry as an inspector or as a project manager. For BIT students it is recommended that BIT 1000 be completed before this course.

BIT 1150 Residential Plan Review and Field Inspections 4 n/a
Emphasizes techniques for plan review and field inspections on single family dwellings, townhomes, and accessory structures associated with dwellings, in accordance with the current International Residential Code (IRC). Students will learn about egress components, basic fire and life safety, building construction techniques, building components and systems, and other requirements related to residential dwellings.Prerequisite: BIT 1050

BIT 1210 Advanced Field Inspection 2 n/a
This course is designed to give the experienced construction inspector an understanding of the more detailed requirements of the International Building Code. Topics covered will include standards referenced in the International Building Code, which are considered an extension of the code. Emphasis will be on commercial, industrial, and multi-story buildings. For BIT students it is recommended that BIT 1100 be completed before taking this course.

BIT 1250 Commercial Plan Review and Field Inspections 4 n/a Emphasizes techniques for plan review and field inspections on commercial, industrial, multi-story buildings, and multi-family structures in accordance with the International Building Code (IBC). Discussion topics shall include, but not be limited to, occupancy classification, allowable area, types of construction, fire resistive construction, fire protection requirements, building systems and exiting.Prerequisites: BIT 1050 and 1150

BIT 1300 Plan Review Non-Structural 2 n/a
This course is designed to give the experienced construction inspector an understanding of the more detailed requirements of the International Building Code. Topics covered will include standards referenced in the International Building Code, which are considered an extension of the code. Emphasis will be on commercial, industrial, and multi-story buildings. For BIT students it is recommended that BIT 1100 be completed before taking this course.
$\begin{array}{lllll}\text { BIT } & 1305 & \text { Advanced Plan Review: Non-Structural } 2 & \mathrm{n} / \mathrm{a}\end{array}$
This course emphasizes techniques for plan review on commercial, industrial and multi-family structures in accordance with the Minnesota State Building Code. Discussion topics shall include, but not be limited to, occupancy classification, allowable area, types of construction, fire resistive construction, fire protection requirements, exiting and accessibility. For BIT students it is recommended that BIT 1000 and BIT 1300 be completed before taking this course.

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :---: | :---: | :---: |
| BIT | 1310 | Plan Review Structural | 2 | $\mathrm{n} / \mathrm{a}$ |

This course will introduce the techniques of conducting the structural plan review of a building design with special emphasis on wood frame construction, wood beams, joists, rafters, studs, columns and shear-resisting elements. Students will learn how to apply relevant equations to computer load, shear and other relevant structural forces. Ability to deal with equational material is essential, therefore prior math skills are recommended. For BIT students CMSV 2860 or equivalent knowledge is recommended before taking this course.
BIT 1410 Mechanical Inspection 4 n/a

This course acquaints the student with the methods and techniques using the Minnesota Mechanical Code in plan review and field inspection of mechanical systems that including heating, ventilation, air conditioning and refrigeration. The course is intended for anyone looking for a BIT degree/certificate, students pursuing a Construction Management degree, or those entering the mechanical inspection field. Ability to deal with equational material is essential, therefore prior math skills are recommended. For BIT students BIT 1000, Math 0901 and CMSV 2860 or equivalent knowledge are recommended before taking this course.

BIT Electrical Inspection 1420 n/a
This course acquaints the student with a working knowledge of plan review and field inspection relative to the international electrical code and the sate code. Students will have the opportunity to study electrical design and perform electrical computations. Prior math skills are recommended. For BIT students it is recommended that CMSV 2860 or equivalent knowledge be completed before taking this course.
$\begin{array}{llll}\text { BIT } 1600 & \text { Energy Conservation in Building Construction } & 2 & \mathrm{n} / \mathrm{a}\end{array}$
This course presents the principles involved in the design of energy efficient buildings and familiarizes the student with the Minnesota Energy Code and its application to different types of buildings.

BIT Plumbing Code 1700 n/a
The objective of this course is to familiarize the student with the Minnesota Plumbing Code, including code provisions, plan review, and field inspection. This course also provides a comprehensive overview of common plumbing materials and practices. For BIT students it is recommended that BIT 1000 be completed before taking this course.

BIT Housing Field Inspection Fundamentals 1800 n/a
This course provides both new and experienced housing inspectors with historical and current techniques and materials used in the construction of the structural, electrical and mechanical components within existing residential structures. The course focuses on common construction and installation techniques and equipment, while giving special emphasis to the visible indicators of system deterioration and failure and hazardous and/or nonprofessional installations.

This course provides students with information about housing construction elements that extend beyond basic structural, electrical and mechanical systems. The primary emphasis is to look at non-technical issues, including legal and constitutional requirements for enforcement as well as personal liability concerns. How to become an effective communicator and how to evaluate the supplemental housing elements are important components of the course. In addition, the course considers the leadership and management skills required for directing a comprehensive municipal housing inspection program. For those students interested in starting a home inspection business, the course offers information to understand marketing, liability and insurance issues. For BIT students it is recommended that BIT 1800 be completed before taking this course.

BIT Multi Housing 1810 n/a
This course provides a basic understanding of fire stopping, general fire codes, and state codes which apply to rental and/or multi-housing. Students will learn about plumbing and mechanical elements, management/owners role in property maintenance, and tenant/landlord issues of multi-housing. Right of entry issues and rental licensing programs will be covered. For BIT students it is recommended that BIT 1000 be completed before taking this course.

BIT Legal and Administrative Aspects of Construction Codes 1900 n/a
Provides students with foundational concepts of modern administrative government, legal responsibilities in building inspection, inspector's authority, courtroom procedures, building inspection liability, the application of legal rules pertaining to public negligence, governmental liability and ethics. Current issues in the industry will be discussed and integrated into the course as appropriate. The course will provide students with an understanding of public administration as it relates to a code official. Prerequisites: BIT 1050 and BIT 1150

BIT 2000 Public Administration for the Code Official 3 n/a
The course covers establishment and maintenance of a building inspection department and its relationship with other community departments. Typical problems of functions, duties, intra- and inter-department relations, personnel, budget, legislative, public relations, and records-keeping are discussed.

BIT Legal Aspects of Building Inspection 2020 2
The class will consist of an overview of modern administrative government, legal responsibilities in building inspection, inspector's authority, courtroom procedures, building inspection liability, the application of legal rules pertaining to public negligence, governmental liability and ethics. This class is intended for governmental officials, building inspectors, elected officials, contractors and real estate professionals. For BIT students it is recommended that BIT 1000 be completed before taking this course.

BIT 2300 Advanced Plan Review Structural 2 n/a
This course acquaints the inspector with engineering principles and provides some understanding of their application in the design and plan review areas. The course covers design of wood trusses; steel and wood beams; and columns and reinforced concrete systems.Prerequisite: BIT 1310

| Subject | Course No. Title | Credits |

| BIT | 2400 | Land Use Zoning Area |

This course has been designed to give the student an understanding of land-use and zoning regulations. These regulations include variances, conditional-uses, grading and preliminary plats. Students will learn what a municipal ordinance is and the, state regulations for county and municipal governments to enforce them. Also included are the DNR regulations pertaining to shoreline and flood plane elevations.

BIT 2500 Fire Suppression Systems 2 n/a
This course will provide a review of the National Fire Prevention Guidelines along with a review of fire suppression blueprint. Field inspection and design of fire suppression systems also is covered.

BIT 2600 Building Inspection Internship 2 n/a
Supervised work experience in a municipal building inspection department provides a variety of experiences for people new to the field.Prerequisite: Consent of instructor

BIT 2650 Administering the MN State Building Code 2 n/a
The role of the building official is a complex one. Key aspects of a building official's job involves: having a solid understanding of codes and standards, an understanding of how to properly administer these codes and standards, along with working with various federal, state, and local agencies in order to provide conditions for a safe built environment. This course will bring together the concepts that the student has collected throughout the BIT curriculum, and apply this knowledge in a comprehensive review of the role of the building official. This course will provide essential background and understanding of how to properly administer the Minnesota State Building Code. This course is recommended for current and future building officials, inspectors, and other interested parties. Prerequisite: BIT 1000, 1100, 1300 and 2020

BUS 1100 Introduction to Business 3 n/a
This course is designed to provide a broad overview of the functions of the for-profit and non-profit business entity. Business and its environment, organization and management, ownership, finance, production, marketing, human resources, and control systems are reviewed. The course helps students understand the contribution of business to the American economy using current business publications, media, and web resources to focus on applications of current business technologies. Business ethics and teamwork are also examined. This course will enable the student to more intelligently pursue advanced business courses and to choose a business career.
$\begin{array}{llll}\text { BUS } 1110 & \text { Human Relations \& Professional Skills } & \text { n/a }\end{array}$
This course focuses on the skills necessary to be successful and effective in the workplace. In addition to effectively contributing to a team while working with a diverse population, topics include: understanding human behavior, personal qualities of success, emotional intelligence, communication, workplace etiquette, conflict resolution, selfesteem, and goal setting.

| Subject | Course No. | Title | Credits | Goal Area |

| BUS | 1210 | Managerial Communication | 3 | $\mathrm{n} / \mathrm{a}$ |

This course provides students knowledge to become a successful manager through improving and practicing managerial communication skills, processes and strategies. Students will learn to assess their own communication style, adapt their communication style when needed and overcome barriers and miscommunications. Students will also apply improved verbal, nonverbal, listening, writing, presentation, team, conflict and negotiation skills in organizational situations. Technology, how it impacts the way we work and communicate and management's role will be covered. This course is for current or future managers or any student wishing to increase their business communication effectiveness. Emphasis will be placed on management communication techniques that empower employees to do their best work and succeed in business. Recommended: Completion of ENGL 1201 College Writing I and CIS 1101 Business Computer Systems I prior to this course.

BUS Effective Supervision 1220 n/a
This course focuses on the skills necessary to be successful when supervising and collaborating with others. Students will apply and develop skills in management functions, decision making, time management, communications, conflict resolution, leadership, quality improvement, motivation and personnel development.BUS 1100 or BUS 1110 or business background recommended

BUS Leadership and Teamwork 3230 n/a
This course provides students with an understanding of the nature of leadership and teams. This course is for anyone who is a leader or wants to be a leader and wants to develop teamwork skills. Emphasis will be on a practical skillbuilding approach to leadership and teamwork so students develop skills that can be applied outside of the classroom. This course will include the nature and importance of leadership, characteristics of leaders, leadership styles, developing teams, managing virtual teams, ethics and social responsibility, communication, conflict resolution, and culturally diverse aspects of leadership.

BUS Legal Environment of Business 1300 n/a
Students will study the basic principles of law and the societal forces which influence the development of these principles. Topics include legal procedure, court structure, ethics, international law, constitutional law, administrative law, contracts, sales, torts, business entities, business regulation, and consumer protection. The focus of the course is on business entities, their employees and customers.

BUS Business Law 1310 n/a
This course is an introduction to the legal framework within which business is transacted, not only by business and professional people but also by consumers. Topics include origin of law, ethics, international law, contracts, sales, bailments, negotiable instruments, secured transactions, bankruptcy, real and personal property, agency and business entities.

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| BUS | 1400 | Business Mathematics | 3 | $\mathrm{n} / \mathrm{a}$ |

This course provides the students with essential mathematical concepts and practical business applications of pricing, discounts, commission, simple and compound interest, installment buying, consumer credit, depreciation, taxes, simple business statistics, and other business finance situations. Problem-solving skills are developed. Computational math skills are needed.

BUS 1410 Introduction to Business Finance 3 n/a
This course is an introduction to the world of finance. Concepts covered include financial management, financial implications of different forms of business organization, understanding and analyzing financial statements and various ratios. Additional topics studied include security markets, interest rates, taxes, risk analysis, time value of money, and the basics of bonds and stocks valuation. Maximizing company value through capital budgeting and selection of appropriate capital structure also are considered. The subject of risk and return, how funds are acquired in the financial markets and how different investment criteria are used to evaluate potential investment opportunities are also examined. Recommended: An accounting course or relevant background.

BUS 1420 Principles of Credit 2 n/a
This course includes a study of consumer and commercial credit. Topics include cash, trade, and retail credit; credit regulations; credit standards and decision making; credit organizations; collection policies and practices; and credit as a sales tool.

BUS 1430 Financial Statement Analysis 2 n/a
This course provides students with an understanding of financial statements for decision-making about cash flow, capital project investments, and management of a business organization. The course provides a conceptual understanding of financial data reported in various financial statements and of ratio analysis that can be used as analytical tools to interpret and obtain an understanding of the business and financial health of corporations. In addition, students will carry out a comparison of two corporations involved in similar businesses. Recommended: An accounting course or some knowledge of accounting.

BUS 1440 Personal Financial Planning 3 n/a
This course is designed for personal financial planning. The topics in the course include goal setting, financial aspects of career planning, budgeting, credit cards, debt and money management strategies, types of savings, retirement plans, investments and tax strategies, insurance, factors that affect the home and car buying versus leasing, fundamentals of investments and various investment options. In addition, basics of estate planning for a lifetime of creating wealth will also be covered. BUS 1400 recommended.
BUS Investments 1450 n/a

This course is a practical introduction to investments for the individual investor. The course focuses on stocks, bonds, mutual funds, REITs, annuities and other investment alternatives. Emphasis is placed on how to determine the value of stocks and bonds. The course will impart knowledge of practical value to anyone interested in becoming actively involved in managing personal investments. The main goals of the course are to provide understanding of the essential features of various investment instruments, their risk-reward relationships, for whom and under what circumstances the instrument is appropriate and how the market operates for buying and selling the various investment instruments.

## BUS 1510 Operations Management <br> $3 \mathrm{n} / \mathrm{a}$

This course is designed to provide the student with an understanding of the foundations of the operations function in both manufacturing and services. The course will analyze operations from both the strategic and operational perspectives and highlight the competitive advantages that operations can provide for the organization. The emphasis is on decision making (to include business ethics) in areas such as: facility requirements and utilization, control and coordination of resource inputs and outputs, types of transformation/conversion processes, and performance measurements. Diverse activities, such as determining the size and type of production process, purchasing the appropriate raw materials, planning and scheduling the flow of materials and the nature and content of inventories, assuring product quality, and deciding on the production hardware and how it gets used will be the primary content areas of this class. NOTE: Students are strongly encouraged to first take Introduction to Management BUS 1200.

BUS 1610 Consumer Behavior

This course is an in-depth study of how and why people buy and gain an understanding of the factors influencing a purchase decision and how marketing research can enhance decision-making in this area. Topics include social structures and their effect on consumer purchase behavior, individual adoption and resistance behavior, and marketing efforts based on consumer research. Marketing research procedures, methods, and information sources are identified and evaluated. The ability to perform basic marketing research is emphasized.NOTE: Bus 1600 recommended

BUS 1620 Advertising and Sales Promotion 3 n/a
This course is a study of the principles and practices of promotion for the business organization. Students will study the components and the interrelationships of the promotional mix: advertising, sales promotion, personal selling, direct marketing, and public relations. Topics include: an integrated marketing communications strategy, creative techniques of advertising, media strategies, and the evaluation of promotional plans.NOTE: Bus 1600 recommended

BUS 1630 Professional Sales and Management 4 n/a
This course provides an introduction to the principles and practices of professional selling and sales management. Topics will include the steps of the sale; customer service; principles, issues and problems associated with managing a sales force; and ethics in selling. Problem solving techniques, monitoring of sales performance and sales simulations are examined. Bus 1600 recommended

| BUS | 1640 | Retail Management | 4 | $\mathrm{n} / \mathrm{a}$ |

This course focuses on the exciting and dynamic nature of the retail industry. Topics include: the changing customer demographics, needs, and shopping behaviors; the development of retail formats, strategies and location opportunities to satisfy these needs; and the emergence of new technologies that dramatically affect retail operations. Students are provided an intensive study of the retail buying, merchandising, and management functions of a retail store. Bus 1600 recommended.

BUS 1700 Introduction to International Business $3 \mathrm{n} / \mathrm{a}$
This course is an overview of the international nature of business. The topics include concepts, models and theory of international trade and strategy; review of the economics and politics of international trade and investment; the functions and form of the global monetary systems; strategies and structure of international business, culture and how and why the world's countries differ. Globalization of the world economy and trade and the factors affecting globalization will be thoroughly discussed in this course. The student will develop a global perspective of business and be exposed to interdependency of world trade and the integration of the world economic system.

BUS Entrepreneurship 1810 n/a
In this course you will learn the process of launching a new business venture from an original or innovative idea. The focus will be on the stages of development of the new venture including research, planning, feasibility analysis, capitalization and management. Students will learn how to use resources to start and operate a small business. BUS 1200: Principles of Management, BUS 1600: Principles of Marketing and ACCT 2111: Financial Accounting are recommended to be taken before taking Entrepreneurship.

BUS 2000 Creative Field Project 2 n/a
Students will do independent research on a project of their choice under the guidance of an instructor. This is a capstone course for students in a Business program.

BUS 2010 Internship Business 3 n/a
This is a capstone course for students in a business program including: Accounting, Business Computer Systems and Management, Marketing, Management or Retailing. It includes practical, on-the-job training in a business or organizational environment under executive supervision and related learning activities. Internships are arranged on the basis of the student's interests and career goals. Please contact the instructor for permission to register for this class.

| BUS | 2100 | Business Statistics | 4 | $\mathrm{n} / \mathrm{a}$ |

This course is designed primarily for the business major. This course will introduce you to business statistics, or the application of statistics in the workplace. In this course, you will learn how to apply statistical tools to analyze data, draw conclusions, and make predictions of the future. The course will begin with data distributions, followed by probability analysis, sampling, and finally hypothesis testing. This course is mathematically intensive, and much of what you learn here will deal with things you encounter every day. This course also makes use of spreadsheets, an important tool for working with and making sense of numerical data.

BUS 2200 Principles of Management 3 n/a
This course is an introduction to the functions of management: planning, organizing, directing, and controlling. The course explores how each of the management functions are implemented to impact organizational efficiency and effectiveness. Local, national, and global environments are presented as strategic factors to be understood by contemporary managers. The importance of managing competitively and intelligently within a diverse environment is stressed. Situational cases are completed to reinforce decision-making in each of the function areas.

BUS 2600 Principles of Marketing 3 n/a
This course provides a market-oriented perspective to business decision-making. Students will learn how marketers provide value in satisfying customer needs and wants, determine which target markets the organization can best serve, and decide upon appropriate products, services, and programs to serve these markets. Topics include branding and product development, pricing strategies, marketing research, promotion, supply chain management, and service marketing. Current trends and developments in marketing practices are analyzed and strategic marketing ideas are implemented within an ethical framework. CHEM $1000 \quad$ Chemistry and Society
4 03,10
This is a basic introduction to chemistry in the everyday world, with emphasis on the role that chemistry plays in personal and professional lives. It is intended for anyone seeking to become a better informed citizen of our technological society. Basic chemical principles will be introduced and their impact on society will be discussed. The course enables students to use concepts of chemistry to think critically about current issues in science and technology. No background in Chemistry or other Natural Sciences is presumed; a strong background in math is not required. Heavy use of the internet for research and communication will be an important component of this course.

This course is recommended for non-science majors looking to fulfill the science course with lab component. (3 hours lecture / 3 hours lab)

POLS 2130 Constitutional Law 305
This course will acquaint students with the content of the United States Constitution and its amendments; its interpretations within political, social, and historical contexts; and will examine the reasoning process in major judicial decisions.Prerequisite: Soc 1710 or PolS 1100
$\begin{array}{llll}\text { CHEM } 1010 \text { Introduction to Chemistry } & 4 & 4,10\end{array}$
An introduction to the basic concepts of Chemistry along with mathematical application, which include the atomic theory, periodic trends, stoichiometric relationships, kinetic-molecular theory, molecular structure, heat transfer, and chemical properties as related to the gas and liquid and solid phases. Additionally, this course will explore the role that chemistry plays in our personal and professional lives. This course enables students to think critically about current environmental issues in science. The lab portion contains experiments that includes observation, data collection and analysis, and mathematical applications that support the concepts being studied in class. The course is designed for non-science majors or students who have not completed chemistry in high school in order to prepare them to take Chem 1061 or courses in various health programs. Prerequisite: Math 0900 or Math 0980 with a grade of 'C' or better.

In this course, students will explore the basics of chemistry and physics by examining such concepts as understanding and measuring matter; atoms, elements, compounds and mixtures; physical and chemical properties of matter; states of matter; chemistry fundamentals, the periodic table; bonding and types of compounds; mixtures and solutions; chemical reactions; properties and sources of energy; heat; electricity, circuits, and power; properties of sound \& light; the behavior of sound \& light; forces and motion; work and simple machines. This course is intended for students who wish to complete a science course with a lab. It is not a prerequisite for any science or health programs. This course may not be used as a substitute for a chemistry course or a physics course. Math 0901 (Intro to Algebra) or basic math skills are highly recommended.

CHEM 1061 Principles of Chemistry I 403
This course is a study of the basic concepts of Chemistry, with an emphasis on atomic theory, stoichiometric relationships, kinetic-molecular theory, molecular structure, and chemical bonding as related to the gas and liquid and solid phases. The lab portion with experiments includes observation, data collection, and mathematical applications that support the concepts being studied in class. (3 hours lecture, 3 hours lab) Placement in this class will be determined by student college assessment score and/or successful completion of Math 1150 with a grade of $C$ or better.

CHEM 1062 Principles of Chemistry II 403
A continuation of CHEM 1061, this course emphasizes chemical equilibrium, solution chemistry, acid-base chemistry, precipitation reactions, complex ion formation, oxidation-reduction, and electrochemical reactions. The laboratory portion includes experimental applications of the lecture topics: determination of cation and anion (qualitative) content of unknown mixture, kinetics, acid-base equilibria, solubility, thermodynamics, and electrochemistry. (3 hours lecture, 3 hours lab)Prerequisite: Chem 1061

CHEM 1990 Chemistry Special Topics 1-4 $\quad$ n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.
CHEM 2061 Organic Chemistry I 5 n/a

This course is a study of the covalent molecules associated with carbon, emphasizing the mechanism of the reactions and the stereochemistry of aliphatic, alicyclic, and olefinic molecules. Functional groups that will be studied include the saturated and unsaturated hydrocarbons, alcohols, ethers and halides. The laboratory portion of the course includes a thorough study of the basic techniques for the isolation and purification of molecules isolated from natural products and from reaction mixtures. (4 hours lecture, 4 hours lab) Prerequisite: Chem 1062

Subject Course No. Title
CHEM 2062 Organic Chemistry II
Credits Goal Area
n/a
This course is a study of the mechanism of reactions of, and the structure of, all of the carbonyl compounds and their derivatives, and of the carbohydrates, amino acids, proteins, heterocyclics, other natural products sequence reactions, unknown identification and original literature preparations. Spectroscopic analysis will be utilized throughout these experiments. (4 hours lecture, 4 hours lab)Prerequisite: Chem 2061

CHEM 2073 Introduction to Instrumental Methods and Analysis 4 n/a
This course is intended to primarily provide students with an added advantage for employment while pursing an education toward a career. The students would be taught the proper methods for solution and sample preparation, along with becoming familiar with state of the art instrumentation. They also would be exposed to safety and manufacturing practices that are important in chemical industry. This course aims at making a student versatile with laboratory techniques and would provide a student with an edge over other candidates in the job market for lab assistants' positions. (2 hours lecture, 6 hours lab) Prerequisite: Chem 1061, 1062, and 2061

CIS 1000 Computer and Keyboarding Essentials 3 n/a
This is an introductory course to introduce students to the use of basic computer skills and to develop mastery of the computer keyboard. This course covers introductory information about computer hardware and software, working with drives, folders and files, and the use of the microcomputer as a productivity tool. Students will learn to type the alphabet, number, and symbol key by touch. Emphasis is on the mastery and the development of speed and accuracy sufficient to make the computer a communication tool. Simple tables, memos, business letters, and reports are covered. Please contact your instructor for the version of software that will be used. NOTE: No Credit will be given if you have previously completed CIS 1000 (Electronic Keyboarding).

CIS 1101 Business Computer Systems I 3 n/a
This course develops computer and digital literacy and emphasizes its importance in today's businesses and society. Through hands-on experience students will gain an understanding of computer concepts, capabilities and applications and be able to implement this knowledge in their professional and personal lives. Computer applications covered include word processing, spreadsheets, presentation graphics, databases, windows/operating system, e-mail use and management, folder and file organization and use of the Internet. Computer concepts covered include understanding computers and mobile devices, how a computer works, managing files, computer and mobile device hardware components, digital safety and security, application programs, input and output devices, digital storage options, ethical practices and Internet basics. Hands-on experience will be provided on computers in the Windows environment using the Microsoft Office Suite including Word, Excel, Access, and PowerPoint. Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.
CIS 1102 Business Computer Systems II 3 n/a

Emphasis is on an in-depth understanding of the Microsoft Office Suite beyond the fundamentals of CIS 1101. Students will develop their skills with exercise-oriented learning by completing advanced training working with spreadsheets, word processing, presentation graphics, and relational databases. Students will complete an integrated application project incorporating several software applications into one final document. Computer concepts covered include communication networks, operating systems, the internet, database management, data security, computer careers, and background to become a productive, knowledgeable computer consumer and professional. Hands-on experience suitable for professional purposes or personal use will be provided on computers in the Windows environment using the advanced features of the Microsoft Office Suite including Word, Excel, Access, and PowerPoint.If you believe you have computer experience that is equivalent to the prerequisites of this course, CIS 1101, please contact the instructor for permission to register for this class.Check with your instructor for the software edition that will be used.

CIS Word Processing 1200 n/a
This course introduces students to the word processing cycle and how word processing is used in the work place. This course is for anyone who needs to prepare their own business documents. Students will use the Microsoft Office Word application to create and edit business documents, enhance page layout, create tables, create reports, create columns, and create form letters and merge with a mailing list. Other topics covered include: styles, templates, mailing labels, drawing objects, graphics, and WordArt. After this course, the student would be prepared to take the Microsoft Office Certified Application Specialist Exam for Word.Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.

CIS 1210 Desktop Publishing
$3 n / a$
This course introduces students to digital page layout using Adobe InDesign, the new emerging standard in page layout software. This course is for anyone who has to prepare professional business publications. Students will learn how to set type and use digital images to produce effective printed business publications including newsletter, advertising flyers, business forms, brochures, manuals, posters, and catalogues. Students will learn how to create and modify pdf files for electronic distribution of publications. Knowledge of the keyboard and Word Processing software is recommended for this course. Software used: Current version of Adobe InDesign
$\begin{array}{llll}\text { CIS } 1220 & \text { Decision Making Excel } & 3 \quad \mathrm{n} / \mathrm{a}\end{array}$
This course uses Microsoft Excel as a problem solving tool in analyzing and designing solutions for common business and organizational problems and then using that information to guide decision-making. This course is for anyone who has to analyze, share, chart and manage information to make more informed decisions. Problems are taken from management, accounting and finance, manufacturing and production, sales and marketing and human resources. Beginning to advanced spreadsheet concepts covered include creating, editing, formatting, printing and saving worksheets, creating charts, filtering lists, creating pivot tables, inventing macros, importing data, creating data tables, evaluating and using functions, constructing formulas, integrating worksheet data with other programs and ethical Excel practices. After this course, the student would be prepared to take the Microsoft Office Specialist (MOS): Excel Exam. Knowledge of the keyboard is recommended for this course. Check with your instructor for the software edition that will be used.

| CIS 1230 | Business Presentations: PowerPoint | $3 \quad n / a$ |
| :--- | :--- | :--- |

This course introduces students to business presentation concepts and applications using the most current PowerPoint software. This course is for anyone who has to or wants to prepare engaging and effective business presentations. Students will plan, organize, prepare and produce professional quality presentations to meet organizational and business needs. Features studied include customizing a presentation, design templates, slide layouts, custom slide animation and transitions, using multimedia, charts and diagrams, integration, and tools for producing multiple outputs including publishing to the web. This course will provide a thorough understanding of PowerPoint's most important tools and features.After this course, the student would be prepared to take the Microsoft Office Specialist Exam for PowerPoint.NOTE: Knowledge of the keyboard is recommended for this course.

CIS 1240 Information Management: Access 3 n/a
In this course students will learn how to plan, design, create, query, create forms and reports, export to and import data from and maintain a database. This course is for anyone who has to make more informed decisions by effectively tracking, reporting, and sharing information. Applications will be taken from a variety of business and organizational scenarios. Students will integrate databases with Excel and Word. Students will learn how databases interact with other applications (including the Internet) and can become the foundation for an e-commerce web site. Students will develop an understanding of how an effective database supports the business decision-making process. After taking this course, the student would be prepared to take the Microsoft Office Specialist Exam for Access. Completion of CIS 1101 or prior database experience is recommended for this course.
$\begin{array}{llll}\text { CIS } & 1250 & \text { Photoshop Essentials for Business } & 3\end{array}$
This is an introductory course in business computer graphics. This course is for anyone who has to prepare digital images for business publications for print or for the Web. Students will learn how to use Photoshop's tools to create and enhance digital images. Students will create images from composites as well as separate document objects into layers. Course content will include techniques to retouch photos, i.e. removal of red eye, softening blemishes and imperfections, and elimination of unwanted items from digital photographs. Students will learn how to prepare and save images in different formats for different purposes, such as for use on the Web, in print and in other computer programs.Recommended: Knowledge of the keyboard
$\begin{array}{llll}\text { CIS } & 1260 & \text { Business Communications and Technology } & 3\end{array}$
This course provides students the knowledge to become successful communicators in a business environment through improving and practicing written, oral, face to face, and virtual technology based communication skills, processes, and strategies. This class will incorporate the effective use of Web-based communication, video conferencing, e-mail etiquette, presentation skills, presentation technologies, teleconferencing, and telephone usage. Students will also apply improved verbal, nonverbal, listening, writing, team, conflict, and negotiation skills in organizational situations. This course is for any student wishing to increase their business communication effectiveness in a global and technological business environment.Recommended: Completion of ENGL 1201 College Writing I and CIS 1101 Business Computer Systems I.
CIS Introduction to Internet 1300 n/a

This course develops a basic understanding of the Internet and the World Wide Web using a popular browser such as Internet Explorer. Students will search the web; download, save and print web pages; learn and use search tools to find information quickly; create a favorite or bookmark and organize their favorite web sites; learn about communication on the Internet using email, accessing newsgroups and chat rooms; learn how to email attachments and download files from their email; and discuss personal security on the Internet. Hands-on exercises will give students the opportunity to apply these concepts. This course will give students an introduction to the capabilities of the Internet.Knowledge of the keyboard is recommended for this course.

CIS 1310 The Whole Internet
3 n/a
This course provides a comprehensive understanding of the Internet. This course is for anyone who wants to use the internet effectively, efficiently and safely, understand the uses of the Internet, create web pages and also increase their confidence and knowledge. Students will learn about the basic technology that supports the internet, effectively use e-mail and other types of communication, explore virtual communities and web tools, use search engines and directories to find information on the internet, evaluate the quality of web resources, locate software, explore e-commerce concepts, learn how to use the internet safely, manage common security threats and create web pages. Students will use e-mail, a class web site, and other web based tools to develop proficiency. The course explores current internet innovations. Previous exposure to the internet is not required.

CIS Web Tools 1320 2
This class focuses on exploring, evaluating and learning how to use the latest tools and applications on the Internet. You will explore your interests and build a portfolio to demonstrate what you can do using innovative web based tools.Some of the tools and applications may include:Marketing and Business, Professional Networking, Virtual Environments, Bookmarking, Social Networks, Multimedia, Photos and Digital Images, Employment and Jobs, Collaboration, Video-Sharing Sites, Podcasts, Wikis, Blogs, Content Aggregation and Management, Organization, Games and Entertainment and more.This course is for anyone who wants to increase their internet skills and knowledge and understand current web tools.Some knowledge of the internet is required such as ability to use email and search engines. If you need more internet knowledge before taking this class, CIS 1310 The Whole Internet is recommended.The course may be modified as class needs dictate and to incorporate current events.
CIS Windows/Operating Systems 1400 n/a

This course introduces students to operating systems through hands on experience and covers the basic to advanced features of Windows. Topics will include safeguarding your personal computer, customizing your desktop, using online help, organizing and managing files, creating and customizing your shortcuts, implementing a backup strategy, optimizing disks, troubleshooting computer problems, evaluating system performance, installing and troubleshooting software and hardware, updating the Windows registry. Discussions will also cover other operating systems.Knowledge of the keyboard is recommended for this course.
$\begin{array}{llll}\text { CIS } 1500 & \text { Developing Computer Keyboarding Skills } & 1 \quad n / a\end{array}$
This course will focus on developing mastery of the electronic keyboard and the microcomputer. Specifically, as a result of this course, you will use proper keyboarding techniques to attain the speed and accuracy necessary to use the computer as an effective communication tool.

CIS 2010 CIS Internship 3 n/a

This is a capstone course for students in a Business Computer Systems \& Management or Individualized Studies programs. It includes practical, on-the-job training in a business or organizational environment under executive supervision and related learning activities. Internships are arranged on the basis of the student's interests and career goals. Recommend student contact instructor before registering. Recommend: A minimum of 9 credits in CIS, ACCT, or BUS.
CIS 2310 Introduction to E-Commerce 3 n/a

This course introduces students to the key strategic business and technological elements of electronic commerce. Students will explore the theory, practice and technology of conducting business over the internet and the World Wide Web.This course is for students who want to put their business on the internet, work at companies that want to do business over the internet, want to know more about business and the internet or want to know more about emerging e-commerce technology. Students will focus on applying key concepts through hands-on real world e-commerce planning and web site development. Topics covered include identifying e-commerce opportunities, marketing and selling on the internet, building a web presence, designing a web site, improving efficiency and reducing costs through business-to-business activities, using social networking to connect with customers and suppliers, exploring mobile commerce opportunities, analyzing electronic commerce software, hardware and commerce service providers, investigating electronic payment systems, examining electronic commerce security, thinking globally, scrutinizing legal, ethical and tax issues and planning. Also includes identifying current issues in e-commerce and emerging technology. Experience with programming languages or creating web sites is not required.NOTE: Computer and internet knowledge recommended

CMSV 1000 Construction Professionalism Seminar 4 n/a
This course is designed to be an introduction to careers in the construction industry. It will be an exploration of the breadth and depth of construction opportunities and the diversity of the occupational career pathways open to students. The differences between residential, commercial, civil, industrial, and specialty construction will be explored as well as exposure to the different occupation opportunities as a tradesperson, project manager, staff management specialist, design professional and business owner. Industry standards and expectations will be part of the course, and at its completion students will have had the opportunity to complete course work to receive an OSHA 10 hour training certification.

CMSV 1200 Construction Graphics 3 n/a
Study of graphic solutions to problems conditioned by traditional and emerging construction document standards. Students will produce construction graphics using computer-assisted processes. The principles of construction graphics are applied to the visualization, communication, and graphical analysis of problems.
CMSV Legal Aspects of Construction 1300 n/a

Students will study the basic principles of law and its impacts on the business of construction contracting. Topics will include contracts, property law, mechanics liens, drafting a bid, ethics, employment issues, wage laws and hiring practices in both a union and a non-union work setting. The focus of the course is on construction contracting businesses, their employees and customers.

CMSV 1500 Construction Technology I 5 n/a
This course is an introduction to the technical mastery of the constructing of buildings and structure. Course learning objectives will be covered in the context of a specific construction craft.

This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

CMSV 2100 Soils and Concrete Technology 3 n/a
This course familiarizes students with the history and fundamentals of concrete, admixtures, soils and aggregates. The student will understand the interactions of concrete, weather, and soil conditions; the proper placement of concrete; bearing capacity of soils; and the basic principles of concrete and soil inspection.

Subject Course No. Title
CMSV 2200 Construction Quality Assurance and Quality Control
Credits Goal Area
4 n/a
Students will be introduced to QA/QC and the concept of Construction Quality Management in the residential, commercial and civil construction industries. It will emphasize QA/QC in civil construction and focus on the types of materials, construction methods and quality control necessary for building road, bridges, underground utilities and other types of civil construction projects. Students will have the option to obtain a Minnesota Department of Transportation Concrete Field 1 certification as part of this course. Prerequisite: CMSV 2100 Concrete and Soil Technology

CMSV 2860 Building Construction Plan Reading 2 n/a
The basic course in reading of construction working drawings emphasizes symbols used in the production of architectural, structural, mechanical, and electrical drawings. Course includes interpretation of drawing details, sections, elevations, floor plans, etc. This course should be of value to students interested in drafting, estimating, and construction.

CMSV 2870 Construction Management 3 n/a
Students in this course examine estimating, purchasing, bidding, scheduling, coordinating, expediting, and supervising work and dealing with public agencies, the design professions, suppliers, and subcontractors as these activities relate to the operation of a building contracting company.
CMSV 2875 Mechanical and Electrical Systems 4 n/a

This course will prepare students to identify, analyze, and evaluate all aspects of building mechanical, electrical, and plumbing systems. The students will explore a variety of systems found typical in both residential and commercial buildings and will have the opportunity to gain detailed knowledge on how systems are designed, constructed, and perform. This course is designed for construction managers, project superintendants, code officials, and other construction related industry professionals.

CMSV 2880 Construction Estimating 4 n/a
This course explores the basic techniques and guidelines of estimating. The student will develop skills to prepare cost estimates considering the important aspects of material takeoffs, labor, equipment, and time. Practical, step-bystep cost estimating procedures will be applied to an actual building project.

CMSV 2885 Construction Estimating 4 n/a
This course explores the basic techniques and guidelines of estimating. The student will develop skills to prepare cost estimates considering the important aspects of material takeoffs, labor, equipment, and time. Practical, step-bystep cost estimating procedures will be applied to an actual building project.

| :--- | :--- | :--- | :---: | :---: |
| CMSV | 2890 | Building Organization and Technology | 3 | $\mathrm{n} / \mathrm{a}$ |

This course is an introduction to the varied technology that comprise buildings and an exploration into the sequential process of building construction. Theories of building types, functional organizations, and material applications are presented. This course also includes the identification of historic basis for, and comparison between, basic building materials and construction methods. The importance of building assembly sequences also is presented.

CMSV 2895
Construction Management Internship
3 n/a
Provides the student an opportunity to observe and participate in all aspects of construction management that are typically encountered in the construction workplace.

CMSV 2900 Construction Scheduling 3 n/a
This course explores the basic techniques and guidelines of the critical path method (CPM), and the precedence diagramming method (PDM) scheduling. The student will develop skills to prepare construction schedules by considering the important aspects labor, equipment, and time cost scheduling. Practical step-by-step scheduling techniques will be applied to an actual construction project.

COMM 1010 Fundamentals of Public Speaking 301
This course provides instruction and practical experience in the basics of public speaking. This course has a performance component: students are expected to create and deliver informative, persuasive and other types of speeches.
$\begin{array}{llll}\text { COMM } 1110 & \text { Principles of Interpersonal Communication } & 3 \text { 01,07 }\end{array}$
This introductory course looks at communication in one-to-one relationships in friendships, families, the workplace, and elsewhere. Students will be challenged to discover and assess their own communication strengths and weaknesses as they define and discuss what it means to be a competent interpersonal communicator. Course content includes both theory and practice (skill development).

This course examines communication in small groups. Students will participate in and analyze how small groups function, how leadership roles evolve, how decisions are made and how conflicts can be resolved. Students will work in small groups, complete group projects, and analyze group interaction.

The influence of culture is an especially important and sensitive issue facing us today. A person's culture strongly influences his/her identity, beliefs, expectations, and communication style. This course explores communication across culture as defined by nationality, gender, and ethnicity while concentrating on effective use of communication in all of these areas.

This introductory course examines a selection of theories of human communication. The emphasis of the course will be to provide students with the ability to understand theorizing in general and then to apply this understanding to particular theories. Students will be challenged to explore different types, contexts, and aspects of human communication as they relate to their own lives. Course content will include theory relating to the communicator, the message, the relationships, the media and theculture.

COMM 1510 Nonverbal Communication 3 01,08
Nonverbal Communication is an essential component of all communication. This introductory course is intended to increase communication effectiveness in a variety of contexts, including interpersonal, intercultural, and workplace.
Students will understand, assess, and practice their own nonverbal codes and cues as well as study others' nonverbal codes and cues.
$\begin{array}{llll}\text { COMM } & 1610 \text { Introduction to Mass Communication } & 31,09\end{array}$
This introductory course is intended to develop critical and analytical skills for understanding mass media; for recognizing messages, making deliberate choices about them, and evaluating the effects of these messages in both an individual and societal context. Students will examine the history, evolution, and societal impact of a wide variety of media, including print, film, and social media and will develop skills to make informed, ethical evaluations of the mediated messages they receive.

Oral Interpretation and Traditions
301,08
Oral Interpretation and Traditions is an introductory course in the effective oral presentation of written material. Students will analyze and perform literature from a variety of sources that represent different cultures and ethnicities. Students will also make connections between the cultural implications of oral tradition and performance.

This introductory course is intended to develop critical and analytical skills for understanding human communication in the health care industry. Students will discuss and apply various communication strategies in a variety of contexts, including patient care, between healthcare professionals, and with a larger public in the form of healthcare advocacy campaigns. The impact of cultural diversity and ethics in decision-making will be examined in the context of healthcare professions.

This course is intended to develop critical and analytical skills for creating persuasive messages to audiences in formal, oppositional settings. Students will discuss and apply various communication strategies to evaluate the effectiveness of evidence, gain experience in a more formal debate setting, and evaluate and craft arguments ethically and responsibly. These assignments will prepare students for debate in a range of contexts, from interpersonal and small group settings to larger discussions of public and social policy in American culture. Prerequisite: COMM 1010

CRD $1000 \quad$ Career Exploration and Planning
$3 \mathrm{n} / \mathrm{a}$
This course is designed to empower students with career decision-making skills that can be used their entire lifetime. Students will explore personal interests, values, skills, and personality styles as they apply to a career, changing careers, and academic degrees. A variety of career and personality inventories will be used to engage students in the decision making process. Current issues and trends in the workforce related to hiring and job opportunities will be evaluated. Students will explore the job search process and develop effective techniques in preparing a resume and cover letter. Students will also develop networking skills and interviewing techniques to prepare for the eventual job search and/or transfer to a four year college or university. Note: No credit will be given for this course if student has completed ADEV/BUS 1000.

CRD 1010 Job Searching Strategies
$1 \mathrm{n} / \mathrm{a}$
This course is designed to empower students with the skills and resources necessary to find a job. Current issues and trends in the workforce related to hiring and job opportunities will be evaluated. Students will explore the job search process and develop effective techniques in preparing a resume and cover letter. Students will also develop networking skills and interviewing techniques to prepare for the eventual job search. Note: No credit will be given for this course if student has completed ADEV/BUS 1010.
$\begin{array}{llll}\text { CSCI Computer Basics } 1000 & 3 & \mathrm{n} / \mathrm{a}\end{array}$
The students will get hands-on experience with an operating environment (the current version of Microsoft Windows) and Windows-based applications which include spreadsheets, word processors and presentation packages. The course enables students to use computers to process information and communicate using e-mail and World Wide Web.
$\begin{array}{llll}\text { CSCI Beginning Web Page Programming } 1020 & 1 \quad n / a\end{array}$
Students learn practical techniques and principles of Website authoring; create multimedia-enhanced commercial, entertainment or educational sites; and plan site maintenance, promotion and implementation of user feedback. Prerequisite: Some experience with Microsoft Windows

CSCI Responsive Web Design 1025 n/a
This course will prepare students to design web pages that will respond to the media or device on which they are viewed. This course will focus on HTML5, some JavaScript and CSS media queries. Prerequisites: A grade of C or better in CSci 1020

This course covers the practical aspects of a programming language used for development of advanced Internet applications which include: on-line animation and interactivity, feedback, and browser control enhancements. The actual language used (JavaScript, Perl, or Java) will be chosen by the instructor. The course also includes a brief introduction to advanced HTML and SCS, uploading the site to a Web server and promoting it.Prerequisite: CSci 1000 or 1010 or 1020 or CIS 1101 or 1102
$\begin{array}{llll}\text { CSCI Introduction to Computer Programming with Games } 1035 & 4 \quad n / a\end{array}$
This is an introductory computer programming course. The students will engage in hands-on implementation of games and simulations in a graphics-enhanced development environment. The students will learn how to transform game scenarios into algorithms and programs, create user interfaces, and incorporate multimedia. Basic computer skills are necessary for success in this class.
$\begin{array}{llll}\mathrm{CSCI} & 1040 \text { Fundamentals of Structured Query Language (SQL) } 3 \mathrm{n} / \mathrm{a}\end{array}$
The goal of this course is to teach students how to design, build and use databases utilizing Microsoft SQL Server. The students will also learn to enter and retrieve information. They will learn SQL commands and query creation, including complex multi-table joins, and display and analyze query results. Students will design their own databases and deploy them on Microsoft SQL Server.Possessing skills in performing common Windows tasks working with applications, or taking CSci 1000, is highly recommended.

CSCI 1050 Computer Security Basics 3 n/a
This class examines the issues surrounding computer security in today's highly technological world. The course is designed to provide an overview of security problems: technical issues and the principles associated with databases, networks, administrative controls, privacy, operating systems and programming. The knowledge gained from this course will allow programmers, instructional designers, information technology specialists and managers to better understand a variety of issues surrounding secure computing. It is preferred that students have proficient computer skills.
$\begin{array}{llll}\text { CSCI } 1120 & \text { Programming in } \mathrm{C} / \mathrm{C}++ & 4 & \mathrm{n} / \mathrm{a}\end{array}$
This course continues the study of the most popular computer languages. It covers the common procedural core of $C$ and C++ languages: data types, expressions, operators, functions, pointers, and arrays. The course also includes elements of object-oriented programming: classes and objects. Prerequisite: CSci 1130 or CSci 1150 with a grade of $C$ or better

CSCI 1130 Introduction to Programming in Java
4 n/a
This course provides an introduction to object-oriented programming using the Java programming language. Topics include data types, operators, operands, expressions, conditional statements, repetition, arrays, methods, parameter passing, and returning values. The course will cover applets, graphics and events handling. Students will be also introduced to classes, objects, and inheritance. Prerequisite: Math 1150 or higher with a grade of C or better.

Subject Course No. Title

This course provides an introduction to object-oriented programming using the $\mathrm{C} \#$ programming language. The majority of the course will be on the semantics of the C\# language, a major component of Microsoft .NET development environment. Topics include: Visual Studio .NET integrated development environment, selected value and reference types, control structures, operators and expressions, methods, classes, and inheritance. Completion of this class will prepare the student for advanced topics in C\#. Prerequisite: Math 1150 with a grade of C or better

CSCI 1180 Introduction to Linux Operating System 4 n/a
This course introduces Linux, a popular open-source operating system and a variety of Unix. Topics include installing and using Linux, the architecture of Linux, using the command-line shell, the file system, common utilities (including text editors), and the basics of shell scripting. Hands-on work with Linux is a central part of this class. Some experience in computer programming is recommended.
$\begin{array}{llll}\text { CSCI } 1990 \text { Computer Science Special Topics } & \text { 1-4 }\end{array}$
The course introduces fundamental concepts of computer programming using a block programming language and a graphical development environment. A number of mathematical concepts used in office, game, mobile and scientific programming are introduced and illustrated with computer graphics. The students will advance their computational thinking abilities, as they develop algorithms and arrange data for solving problems.

CSCI 2001 Structure of Computer Programming I 4 n/a
Students will learn object-oriented programming using Java. In this course, students are exposed to the concepts, fundamental syntax, and the thought processes behind object-oriented programming. The basic principles of software engineering are emphasized. By doing their own Java projects, students will develop problem-solving skills and gain experience in detecting and correcting software errors.Prerequisite: CSci 1120 or CSci 1130 or CSci 1150

CSCI 2002 Structure of Computer Programming II 4 n/a
This course continues using abstract data types and the concepts presented in CSci 2001 and introduces stacks, queues, linked lists, and trees. This course also covers advanced programming topics of recursion, sorting methods, and complexity measures. The object-oriented language Java will be used. Prerequisite: CSci 2001

CSCI Discrete Mathematical Structures 2010 n/a
This course includes topics of the mathematical methods of computer science: logic, combinatorics, recursion, complexity analysis, graph theory, Boolean algebra, and mathematical induction. Prerequisite: Math 1221

The course will introduce the Python Programming language in terms familiar to students experienced with writing simple, yet complete, programs in other languages. Additionally, the course will focus on utilities and features considered strengths in Python. This includes interfaces to specialized libraries and databases. Prerequisites: CSCI 1120 or CSCI 1130 or CSCI 1150 or CSCI 2001 or CSCI 2400

CSCI 2020 Machine Architecture and Organization 4 n/a
As an introduction to computer organization and structure, this course includes beginning machine and assembly language programming. Topics to be covered include logic gates and Boolean algebra, basic elements of computing devices, basic components of a computer, data representation and number systems, micro operations, microprogramming, and input-output programming. Prerequisite: CSci 1030 or CSci 1090 or CSci 1120 or CSci 1130 or CSci 1150 or CSci 1190
CSCI Database Modeling and Design 2030 n/a

This course covers relational databases from conceptual design to implementation. The course will include logical and physical design, normalization, as well as the definition of tables and indexes. The use of Structured Query Language (SQL) for data retrieval and manipulation will be emphasized. Prerequisite: CSci 1040 and CSci 1120 or CSci 1130 or CSci 1150PLEASE NOTE: Students enrolled in CSCI 1040 can register for CSCI 2030 in anticipation of successful completion of CSCI 1040. Please contact Registration.

CSCI 2050 Internship Computer Science
3 n/a
The main objective of this course is to provide practical training and real work experience for the students. Often, it will include productive work contribution, and prospective employee evaluation for the employer. It can lead to increased college-industry interaction for the department and the college. Completion of this class will better prepare the student for multiple activities in a workplace. It should reflect positively on the students resume (employers view internship experiences positively.) Internship is an excellent opportunity for a student to affirm career interests. These opportunities can also provide the credentials needed for full-time positions. Internships and co-ops provide opportunities to network with professionals; strengthen confidence, maturity, and professionalism; establish professional references. Prerequisite: Enrollment in the computer science program, completion or concurrent enrollment in CSci 2002, a B average in all CSci courses

CSCI Web Programming in ASP.NET 2060 n/a
ASP.NET is a technology for creating web-based programs and services. This course introduces ASP.NET on the foundation of the prerequisite courses that taught the fundamentals of .NET framework, C\# programming language, SQL Server database, and the primary development environment Microsoft Visual Studio.The main goal of this course is to teach the basics of creating and deploying Web applications utilizing ASP.NET technology Besides using the C\# programming language, the students will learn the commonly used ASP.NET controls included in Microsoft Visual Studio. The course includes the techniques of reading the data from a SQL Server database into a Web application and displaying it on a web page, as well as modifying and amending the database content. Prerequisites: CSci 1150 and CSci 1040PLEASE NOTE: Students enrolled in CSCI 1040 can register for CSCI 2030 in anticipation of successful completion of CSCI 1040. Please contact Registration

This course provides an introduction to developing Android applications, covering the core concepts, tools and techniques for designing, developing and releasing Android applications. By the end of the course, students will build an Android application and release it to the Google Play Store. Prerequisite: CSci 2001

CSCI 2400 Objective-C for Mobile Programming 4 n/a
The course teaches Objective-C programming utilizing Xcode tools package. The course explores fundamental OOP concepts. Other topics include pointers, memory management and Automatic Reference Counting. The basic Foundation Framework classes will also be introduced. After completing this course, the students will be able to write Objective-C programs suitable for mobile applications running on iPhones and iPads. Prerequisite: CSci 1120 or 1150 or 2001 with grade A

CSCI 2500 Introduction to Mobile Programming in iOS 4 n/a
The course teaches students how to write mobile applications for iOS-based devices, building on Objective-C fundamentals. The course will lead the students through the essential concepts, tools, and techniques for developing iOS applications. After completing this course, the students will have the knowledge and skills needed to create applications for iPhones and iPads. Prerequisite: CSci 2400 with minimum grade B
CZZZ 1234 CTD Course 101 n/a

A course giving step by step instructions on how to set up ISRS.

EAP 0830 Reading Skills Development $4 \quad \mathrm{n} / \mathrm{a}$
In this course you will work on strengthening your reading and study strategies, developing your reading vocabulary, and improving your test-taking strategies. You will have the opportunity in this class to develop your reading speed and comprehension of a variety of written materials. This course will help prepare you for the academic skills you will need to succeed in college.

EAP 0860 English Language Skills Development $5 \mathrm{n} / \mathrm{a}$
This course is for students who want to improve their formal English language skills in writing and grammar. Emphasis is on learning and using grammatical structures to strengthen and develop English literacy skills for college success. You will practice writing to build fluency and grammatically correct sentences. You will also engage in writing as a regular academic activity and learn strategies to continue your language development. Prerequisite: Placement test scores

EAP $0880 \quad$ Listening and Speaking Skill Development
4 n/a
This course will focus on developing your academic listening and speaking skills in English. During this semester you will work on building the note-taking, presentation, and discussion skills you will need to study successfully at the college level.Prerequisite: Placement test scores

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| EAP | 0900 | College Vocabulary Development | 2 | $\mathrm{n} / \mathrm{a}$ |

In this course you will become familiar with the most frequently used words in academic texts. You will strengthen the vocabulary you need for college-level writing, reading, listening, and speaking by studying word families from the Academic Word List. Prerequisites: Placement test scores or grade of C or better in EAP 0830 and EAP 0860.

EAP 0930 Academic Reading and Study Skills 4 n/a
This course provides advanced level readers with intensive practice and extensive reading tasks in various writing genres. You will develop and improve reading proficiency, speed, and comprehension, and the ability to make inferences from text. You will also develop advanced vocabulary building strategies using college content reading materials. Active study strategies are among the skills practiced as you progress toward skillful, independent reading. Prerequisite: Placement test scores or grade of C or better in EAP 0830Students who place into EAP 0930 are required to enroll in this course during their first term at NHCC.

EAP 0960 Academic Writing Skills Development 4 n/a
This course focuses on developing writing process skills and study of various rhetorical patterns. You will engage in concentrated practice to develop paragraphs through multiple drafts, working towards academic essays. You will also continue to strengthen your English language skills.Prerequisite: Placement test scores or grade of C or better in EAP 0860.

EAP 0980 Academic Listening and Speaking 4 n/a
This course concentrates on preparing students for the listening and speaking needed in the American college classroom. You will develop efficient note-taking skills for classroom lectures and skills for giving presentations. An examination of American English as spoken in college classrooms further develops proficiency necessary for successful college work. This course also reviews American English in terms of intonation, rhythm, stress, and emphasis. Prerequisite: Placement test scores or grade of C or better in EAP 0880

EAP 1060 Advanced Grammar 2 n/a
This is an advanced ESOL grammar course designed to increase students $\mathcal{~}_{\urcorner}$grammar and editing proficiency. The course will build students ${ }^{\eta}$ ability to recognize and employ more sophisticated language necessary for success in academic and professional writing. Prerequisites: Placement test scores in EAP 930, 960 and 980 or grade of ${ }_{7} C_{7}$ or better in EAP 830, 860 and 880.

EAP 1080 English Pronunciation 2 n/a
This course is for people who desire to speak English more clearly and with greater effectiveness. We will concentrate on addressing your pronunciation concerns and accent needs. This class will give you strategies that will help you to communicate in various situations, including your workplace.Prerequisite: Placement Test Scores

Subject Course No. Title
Credits Goal Area
EAP 1230
College Reading and Studying Skills
4 n/a
This course focuses on the college textbook reading, language and study skills you will need in your content-area courses. You will study content-course readings and complete tests and assignments typical of those you will complete in college courses.Placement test scores or grade of C or better in EAP 0830, EAP 0860, EAP 0880 and EAP 0930

EAP 1260 College Writing Skills Development 4 n/a
In this course, you will develop academic essay writing and advanced English language skills. This course emphasizes writing as a process, as well as development of analytical reading and critical thinking skills.Prerequisite:
Placement test scores or grade of C or better in EAP 0900, 0930, 0960 and 0980

EAP 1280 Listening and Speaking for College Success 4 n/a
This class focuses on the development of note-taking skills through the presentation of college-success content material in the form of lectures and student presentations. You will research student success topics and make formal presentations to the class. The course also reviews tone, register, rhythm, stress, reduction and emphasis as critical elements in delivering a speech.Prerequisite: Placement test scores or grade of C or better in EAP 0830, 0860, 0880, 0980.

EAP 1990
English Language for Academic Purposes Special Topics
0 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

ECON 1050 Economics of Crime 3050 05,09
This course covers economics theories of crime and justice. Crime topics include: illegal drug markets, violent crime, nonviolent crime, and international crime. Economic theories and concepts such as rationality, efficiency, supply, and demand are used. The course includes international and historical comparisons of enforcement techniques from both an economic efficiency framework and an ethical perspective.

EDUC 1210 Introduction to Education 3 n/a
This course will familiarize students will the historical, philosophical, and social foundations of education. The course will be of particular interest to those students who are exploring teaching as a career or to those who currently work in classroom settings. The class is designed to provide glimpses into a variety of aspects of teaching, to promote discussion, and to encourage self-exploration. The major course topics will guide students in exploring the influences of history and society on teaching, learning, and schooling and how these influences impact what is done in classrooms today. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time.

Subject Course No. Title

EDUC 1280 Diversity in Education 3 n/a
This course is designed to help current and future educators acquire the knowledge and skills needed to become effective practitioners in culturally, racially, and linguistically diverse classrooms and schools. Students will examine current and emerging research, concepts, and debates about the education of students from both genders and from different cultural, racial, ethnic, and language groups. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time.

EDUC 1350 Foundations of Teaching Literacy
$3 n / a$
This course focuses on the literacy needs and development of today's children. The course provides background on how literacy develops and places emphasis on the stages of literacy development. It presents both the theories and strategies that are needed in order to fully understand emerging readers and writers and how learners can be empowered in today's classrooms to function competently as literate adults in the twenty-first century. As part of the course requirement, this course requires at least 10 hours of experience (e.g., service learning hours, volunteer hours, etc.) in the K-12 setting outside of class meeting time. Formerly Titled: Language and Learning

ENGL 0900 Preparation for College Writing I 3 n/a
This composition course introduces the process and strategies of writing clear, focused paragraphs. Students learn and practice the basic skills of standard American written English, including grammar, punctuation, and sentence structure. Prerequisite: College required assessment for placement

ENGL 0950 Preparation for College Writing II 4 n/a
This composition course is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure)than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. Prerequisite: College required assessment for placement

ENGL 0990 Gateway Composition 2 n/a
This composition course is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 alone provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited college-level essay. Prerequisite: College required assessment for placement OR prior successful completion of English 0900

ENGL 1140 Professional Writing 3 n/a
This course offers students the opportunity to improve their writing skills and adapt them for professional communication. Students will focus on assessing purpose, audience, credibility, style, clarity/correctness, and format to determine appropriate approaches to a range of written and electronic communication, including memos, letters, employment documents, and proposals/reports.

This course is designed to introduce students to a variety of literatures and to means to credibly examine that literature. It thus includes literary terms, critical approaches and their application to literature.

ENGL $1200 \quad$ Gateway College Writing
4
01
This class provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included.

ENGL College Writing I 120104
This class provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included.

ENGL 1202 College Writing II
201
This class focuses on the research process, textual analysis of primary and secondary sources, rhetorical strategies for argument and persuasion, and successful integration of sources into a longer academic paper utilizing MLA (or other, as appropriate) documentation format. The class may be disciplinary, interdisciplinary, or topical in content, as noted on the class registration site.Prerequisite: Engl 1200 or 1201 with a grade of $C$ or higher

ENGL 1250 Magazine Workshop 206
This workshop offers students the opportunity to gain practical editorial experience by working on the college literary/arts magazine. As members of the editorial staff, students will solicit, select, and edit stories, essays and poems for publication. May be repeated for credit.

ENGL 1260 Newspaper Writing 2 n/a
Students will meet at least one hour each week in a laboratory format to edit and publish the student newspaper. Working in collaboration with student contributors and considering local, national and global issues, students will decide what is appropriate and relevant content for the campus newspaper.

ENGL 1400 Reading Poetry 306
This course is a study of poetry: the reading and analysis of poetic works from a variety of time periods and cultures. Important figures, poetic traditions and movements, formal techniques, and other methods of evoking mood and meaning will be explored through discussion and in both written and oral projects throughout the semester.

| ENGL | 1450 | Reading Plays | 3 | 06,07 |

This course is a survey of drama as literature; plays will be read as literary texts, not as the grounds for specific performances or performance practices. Through their engagements with the dramatic literature in this course, students will be introduced to a diversity of dramatic styles and themes. Attention will also be devoted to the social and cultural contexts in which the plays were written and in which they are read. Course materials may be organized either historically or topically.Prerequisite: Engl 1200 or Engl 1201

ENGL 1900 Introduction to Creative Writing 3
This class is designed for students who want to try creative writing, perhaps for the first time, and learn more about the creative process. No previous creative writing experience is necessary. Coursework will include reading, writing, and discussion of both student and professional work in at least three of the following genres: fiction, poetry, creative nonfiction (or memoir), and drama. The focus of the class, students' creative work, will be presented and critiqued in a workshop environment.

ENGL 1940 Technical Writing 3 n/a
This course further develops writing skills as applied to technical subjects for a specialized or lay audience. Credit does not apply to the 40 MnTC credits required in the A.A. degree except in programs where students are permitted to substitute English 1940 for English 1112 or 1202.Prerequisite: Engl 1200 or Engl 1201

ENGL $1950 \quad$ Graphic Novels
306
This course will introduce students to the diverse body of literature known as graphic novels. While emphasis will be placed on works that are specifically considered graphic novels, it may also include the study of other comics-strips and books-that have significantly contributed to the development of the form. Students can expect to be exposed not only to a wide range of graphic novel types, such as autobiography, journalism, history, humor, dramatic fiction, manga, and superheroes, but also to a deeper understanding of the methods of telling stories that are unique to comics.

ENGL 2300 Children's Literature 3 06,07
In this course, students will have the pleasure of reading, discussing and evaluating childrens literature ranging from the picture book to the young adult novel. Students will explore the history of childrens literature, critical responses to it and its specific role for children and adults. Students will examine works from the genre that might include picture books, chapter books, folktales, fantasy, realistic fiction, historical fiction, poetry and nonfiction with an emphasis on how the genre and its themes have evolved over time, paying particular attention to how those themes address the role of children in society. This course will appeal to students, parents and educators. Prerequisite: Assessment score placement in Adev 0951 or above, ENGL 0950 or above, or ESOL 1230 or above. Recommendation: Completion of ENGL 1201 with a grade of C or higher.

ENGL 2310 American Short Story 306
The short story is a form that was created and refined by American writers of the 19th and 20th centuries. Students will study American short story writers, their stories, and their views of American life.

This course focuses on the structure of language as well how its rules and applications affect written communication and authorial choices in professional and academic settings. The course further intends to create confidence in written and oral expression, to support students in business, graphic arts, paralegal, and other programs.
Prerequisite: Engl 1201

ENGL 2330 Hmong American Literature 06,07
Hmong American Literature explores the works of Hmong writers as represented in the novel, nonfiction, short stories, poetry, drama/film, and Paj Ntaub (stories recorded in tapestry). To a more limited extent, characterizations of Hmong in works by non-Hmong authors may be considered, as well as relevant works by Laotian American and Asian American writers.

306,10
This course surveys literature that examines the relation between human beings and the natural world as that relationship has been variously conceived by British, American, and other writers. The literary works studied may begin with the pastoral poetry of the English Renaissance and focus on literature from the late eighteenth-century, nineteenth century, and contemporary works. The primary consideration of this course is on how a literary idea of nature has been affected and effected by variations in culture, namely, changes in politics, economics, and technology that in diverse cultural and historical contexts have created conflicts between ecological and human interests. Ultimately this study leads to considering how the green language created by the writers under study has contributed to an eco-critical ethic that allows examination of current ecological sensibilities and the language that represents them. The course may also engage oriental literature, for many American and British authors have aligned their thinking on nature with eastern religions. Additionally, the content will reference painters, philosophers, and composers whose works contribute a relevant understanding of nature-as they may lead into relevant scientific considerations of nature. Prerequisite: Engl 1200 or Engl 1201

ENGL Women and Literature 2350 06,07
This course explores women as characters in and writers of literature, including fiction, non-fiction, drama and poetry. The course may also address issues of historical context, gender, class and race as a way of understanding women in literature.

ENGL 2360 Global Literary Perspectives 063
Students will interpret world literature and film (either in translation or originally written in English) that present culturally diverse voices and viewpoints. Special attention will be given to colonial and postcolonial literatures that reflect the immigrant communities of Twin Cities college campuses, such as Egyptian, Finnish, Ethiopian, Hmong, Icelandic, Iranian, Korean, Liberian, Mexican, Norwegian, Russian, Somali, Swedish, and Vietnamese. Prerequisite: Placement into Engl 1200 or Engl 1201

| Subject | Course No. | Title | Credits | Goal Area |

| ENGL | 2370 | African American Literature | 3 | 06,07 |

This course introduces the student to the writings of African-Americans from the colonial period to the present and explores the contributions of these writers to American culture, letters, and life. The course may be organized either by historic periods or topically.

ENGL 2380 American Indian Literature 3 06,07
This course introduces the students to North American Native American Literature. Readings may include fiction, non-fiction, poetry, songs, mythology, and film from traditional and contemporary authors. Special attention may be given to Native American authors with Minnesota connections, such as Louise Erdrich, David Treuer, and Susan Power.

ENGL 2390 American Working-Class Literature 06,09
This course, providing much needed exposure to a largely overlooked body of writings, introduces students to a variety of classical and contemporary working-class texts that demonstrate literatures rich engagement with industrial, agricultural, domestic, and/or other labor in the United States. Encompassing writings by and about laborers and persons associated with labor, working-class literature reveals the often hidden ways that the material conditions and cultural expectations tied to class and work influence the shape of daily life and its literary expressions. Featuring textual, visual, and/or audio cultural productions, the course is designed to examine the problems and questions raised by working-class texts, which may include the changing nature of work, the dynamic experience of class, the historical circumstances that structure class, the intersection of literature and labor movements, the unstable definitions of literature, and the political dimensions of literature. The course may be organized historically or topically.

ENGL 2400 Utopian/Dystopian Literature 30 06,08
This course introduces students to the literature of utopias and dystopias, literary works about imaginary places, whose intention is to explore alternative models of political, cultural, and societal structures. Utopian/dystopian literatures seek to challenge existing ideas about governments, social communities, and constructions of human identity, but they also offer new, sometimes radical and transformative ideas regarding the reformation of existing human societies.

ENGL 2450 Survey of American Literature I 3 06,07
This course will provide students with a chronological overview of American literature, including major writers, literary developments (e.g. sentimentalism, gothic fiction, romanticism, transcendentalism) and key historical and social contexts, from the pre-colonial period to 1860. Prerequisite: Engl 1200 or Engl 1201

ENGL 2460 Survey of American Literature II 3 06,07
This course will provide students with a chronological overview of American literature, including major writers, literary movements (e.g. local color, realism, naturalism, modernism, and post-modernism) and social and historical contexts, from 1860 to the present. Prerequisite: Engl 1200 or Engl 1201

Students will be introduced to the fundamentals of writing theatrical plays. They will be expected to work on several creative projects throughout the semester and to participate in workshops in which they will discuss and critique one another's work. Students may also be asked to complete other writing exercises and to analyze a selection of plays to gain a better understanding of the art of playwrighting. Prerequisite: Engl 1900

ENGL 2550 Survey of British Literature I 3 06,08

This course covers the literature of Great Britain with its historical background from its beginnings to 1785. Chaucer, Shakespeare, Milton, Donne, and Swift, among others, are studied in this course. Prerequisite: Engl 1200 or Engl 1201 with coursework in literature strongly recommended.

ENGL 2560 Survey of British Literature II 3 06,08
This course covers the literature of Great Britain with its historical background from 1785 through the 20th century. The literature of the Romantic, Victorian, and Modern periods are studied in this course.Prerequisite: Engl 1200 or Engl 1201 with coursework in literature strongly recommended

ENGL 2580 Shakespeare's Plays 3 06,08
A study of the major plays of William Shakespeare that may include a close reading of the plays, consideration of acting methods, and evaluation of cinematic and theatrical presentations. Prerequisite: Engl 1200 or Engl 1201

ENGL 2900 Fantasy Literature 3 06,07
This course will introduce students to fantasy as a literary genre. It will expose students to various types of fantasy stories (such as high fantasy, sword and sorcery, urban fantasy, and/or fantasy horror). It will also address how fantasy literature can reflect or comment on issues in the real world, including how various forms of bigotry can be challenged or normalized by fantasy texts.

ENGL 2950 Mystery and Detective Fiction 3 06,09
This course will introduce students to mystery and detective fiction as a literary genre and as popular literature, examining the conventions of suspense writing, possibly including hook, twist, red herring, back story, sub-plot, procedural, clues, and the ethical concerns of investigative methods and civic life. Discussion of various sub-genre styles will engage students in critical thinking applied to historical era, culturally diverse contexts, and gender roles in mystery writing.

ENGL 2960 Creative Writing Capstone Project 1 n/a
This course is intended for students who are in the Creative Writing AFA program and within a semester of completion. This capstone experience will focus on the writing and revision of a demonstrative portfolio of writing within a single genre, multiple genres, or blended genres (poetry, fiction, scriptwriting, and/or creative nonfiction). Students will work individually with faculty to develop and polish their writing for publication submission and movement toward further study and/or career options.Prerequisite: Engl 1900 Introduction to Creative Writing

| ENGR | 1000 | Introduction to Engineering and Design | 3 | $\mathrm{n} / \mathrm{a}$ |

This course is designed for people interested in learning about the engineering profession. It provides an overview of the engineering disciplines. A project-based approach will be used to give experience in skills, tools, and problemsolving methods associated with completing engineering design solutions.

HLTH 2030 Global Health 3 n/a
This course examines the historical context of global health and emerging global health priorities, including infectious diseases, poverty, health inequity, health care systems and major global initiatives for disease prevention and health promotion.

ENGR 1200 Engineering Graphics $3 \mathrm{n} / \mathrm{a}$
This course is designed for people interested in mechanical, civil and aerospace engineering and the Bachelor of Construction Management degree. The student will learn to make AUTOCAD drawings in a Windows environment. The topics that will be covered include: drawing, editing, pan, zoom, view, laying, plotting, dimensioning, blocks, inquiry, purge, DXF, ZIP, UNZIP, XREF, and work in three dimensions.NOTE: Students who do not have access outside of class to computer hardware capable of running AutoCAD can access the program in the computer lab outside of class time.
$\begin{array}{llll}\text { ENGR } 1990 & \text { Engineering Special Topics } & \text { 1-4 } \mathrm{n} / \mathrm{a}\end{array}$
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

ENGR 2301 Statics $3 \mathrm{n} / \mathrm{a}$
This course is designed for people interested in mechanical, civil, industrial, and aerospace engineering. It is also intended for the Bachelor of Construction Management degree. The topics include: vector algebra, equilibrium of a particle, equivalent systems of forces, equilibrium of rigid bodies, distributed forces, friction, centroids, and center of mass. Prerequisite: Math 1221 and Physics 1601

ENGR 2302 Mechanics of Materials 3 n/a
This course is designed for people interested in mechanical, civil, industrial, and aerospace engineering. The topics include: stress, strain, mechanical properties of materials, axial load, torsion, bending, transverse shear, combined loadings, stress transformation and strain transformation. Prerequisite: Math 1221, Physics 1601 and Engr 2301

ENGR 2303 Dynamics 3 n/a
This course is designed for people interested in mechanical, civil, industrial, and aerospace engineering. The topics include: particle kinematics, particle kinetics, Newton's Second Law, rotation of rigid bodies, and energy momentum methods. Prerequisite: Math 1222, Physics 1601 and Engr 2301

| ENGR | 2501 | Circuit Analysis I | 4 | $\mathrm{n} / \mathrm{a}$ |

This course is designed for people interested in electrical, civil and mechanical engineering, computer science and the Bachelor of Information Networking degree. The topics to be covered include: Kirchhoff's Laws, mesh analysis, nodal analysis, source transformations, superposition, Thevenin's and Norton's Theorems, operational amplifiers, first order response of RL and RC circuits, natural and step response of RLC circuits, sinusoidal steady-state analysis and power calculations and balanced three phase circuits. This is the first course in a two course sequence. (4 hours lecture) Prerequisite: Physics 1601 and Math 1222

ENGR 2511 Circuit Analysis I Laboratory 1 n/a
This course is a laboratory which complements the lecture course Engr 2501. The topics to be covered include: resistance, voltage, current, Kirchhoff's laws, voltage divider, bridge circuits, power transfer, operational amplifiers, natural and step responses, and integrating amplifiers. (2 hours lab) Prerequisite: Engr 2501 or concurrent enrollment

ENGX 0950 English Express I 7 n/a
This course is a combination of ENGL 0900 and ENGL 0950. ENGL 0900 introduces the process and strategies of writing clear, focused paragraphs. Students learn and practice the basic skills of standard American written English, including grammar, punctuation, and sentence structure. ENGL 0950 is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. Prerequisite: Assessment score placement in ENGL 0900. Recommendation: Word processing proficiency and good computer skills.

ENGX 1201 English Express II 8 n/a
This course is a combination of ENGL 0950 and ENGL 1201. ENGL 0950 is for students who need a more intensive review of standard American written English (grammar, punctuation, and sentence structure) than English 1201 provides. The course also introduces the processes and strategies of essay writing from first thoughts through revision to the final, edited, 2-3 page essay. ENGL 1201 provides extended practice in critical reading, writing, and thinking skills. Students will develop an effective writing process and work to achieve college-level competence in reading and responding to texts, visuals, events, and ideas in a variety of written formats, with an emphasis on the academic essay. Audience awareness, interpretation and analysis, logical reasoning, and persuasive and argumentative skills will be developed. MLA style documentation of primary sources will be included. Prerequisite: College required assessment for placement or successful completion of English 0900. Recommendation: Word processing proficiency and good computer skills.

| EXSC | 1000 | Physical Fitness | 1 | $\mathrm{n} / \mathrm{a}$ |

This course is designed to provide cardiovascular and strength enhancement through participation in an aerobic super circuit program. Selected strength training and cardiovascular equipment will be utilized. A pre-assessment of one $_{7} \mathrm{~S}$ current level of fitness will aid in the ability to set goals, and a post-assessment will determine improvement/s, as well as areas needing continued emphasis. Healthy lifestyle information will also be presented in order to make fitness and wellness a lifelong goal. This course can be repeated for credit. Note: MANDATORY 2 hour orientation is required on the first day of class.

EXSC 1010 Physical Fitness 2 n/a
This course is designed to provide cardiovascular and strength enhancement through participation in an aerobic super circuit program. Selected strength training and cardiovascular equipment will be utilized. A pre-assessment of one $_{7} s$ current level of fitness will aid in the ability to set goals, and a post-assessment will determine improvement/s, as well as areas needing continued emphasis. Healthy lifestyle information will also be presented in order to make fitness and wellness a lifelong goal. This course can be repeated for credit.

EXSC 1020 Adult Fitness 0 n/a
This course is designed to explore the five main components of fitness, what it takes to set and work towards an achievable, personal fitness goal/s, and will utilize various fitness and wellness applications and the internet to record fitness endeavors/workouts.

EXSC Volleyball 1041 n/a
This course is designed to teach the beginning volleyball student the basic skills and fundamentals of the game. Through consistent participation and effort, the student will learn the rules of the game, have a basic understanding of the game, and be able to play the game at a beginning or intermediate level. Methods of communication and strategies are included.

EXSC 1042 Advanced Volleyball 1 n/a
This course is designed for students who have experience playing volleyball. Through consistent participation and effort, students will build upon their knowledge of the skills and strategies of the game of volleyball. A closer look at the strategies of the game will take place, allowing teams to match opponents strengths and expose their weaknesses. Game situational drills and game play will be implemented to learn and develop advanced player positioning and rotations, and advanced offenses and defenses of the game. Prerequisite: PE 1041 or Instructor Permission

EXSC 1050 Weight Training 1 n/a
This course is designed to introduce students to methods of lifting weights for the development of lifelong physical fitness. Students will develop the basic principles of designing and participating in a safe and effective weight training program. This course can be repeated for credit.

EXSC 1060 Advanced Weight Training
2
n/a
Advanced Weight Training is a course designed to further the students knowledge, techniques, and comprehension of advanced principles of weight training. Application of these techniques and principles to promote and maintain fitness for is the primary goal for this course. This course can be repeated for credit. Prerequisites: EXSC 1050 or Instructor Approval

EXSC 1070 Soccer 1 n/a
This course includes instruction and practice in skills of soccer through drills and game play. Rules, terminology, and strategy also are studied.

EXSC 1110 Co-Ed Softball 1 n/a
This course includes instruction and practice of skills of co-ed softball through drills and game play. History, rules, terminology and strategy are included in this course.NOTE: Students must provide their own softball glove

EXSC 1130 Leisure Time Games $1 \quad \mathrm{n} / \mathrm{a}$
Introduction and participation in selected individual and team games of a recreational nature are the core of this course. Rules and techniques are included in this course.

EXSC 1140 Recreational Games $1 \quad \mathrm{n} / \mathrm{a}$
Students learn to teach/present low organizational games. Members of the class will present and participate in the various games.

EXSC 1151 GolfI $1 \quad \mathrm{n} / \mathrm{a}$
A beginners class in fundamental skills of golf, full swing, pitching, chipping and putting, this course includes rules, terminology and strategy. Classes meet on campus and at the driving range/golf course. Students are expected to furnish golf clubs and golf balls. Additional fee charged for use of golf course.NOTE: Students must provide their own golf clubs and golf balls.

EXSC 1152 Golf II

| HLTH | 2040 | Foundations and Theory in Health | 3 | $\mathrm{n} / \mathrm{a}$ |

Foundations and theory in Health is a course which will examine how biological, psychological, and social factors work together to explain health and illness. This course will focus on current health behavior theories and models which are used to change human behavior and how they relate to health.

EXSC 1750 Yoga 1 n/a
The focus of yoga will be on the physical dimension. We will stress exercise, movements, and poses which will enhance overall mobility, flexibility, balance, and muscle training. Yoga will train used, underused, and opposing muscles which may improve one's physical quality of life. Yoga instruction will introduce the mental aspect as well. We will begin to develop, practice, and train the relationship between mind and body in order to improve the body's mental and physical communication. This course can be repeated for credit.

EXSC 1751 Yoga I
$1 \mathrm{n} / \mathrm{a}$
The focus of yoga will be on the physical dimension. We will stress exercise, movements, and poses which will enhance overall mobility, flexibility, balance, and muscle training. Yoga will train used, underused, and opposing muscles which may improve ones physical quality of life. In addition, due to the training involved, individual sport performance may also be improved. Yoga will touch on the mental aspect as well. We will begin to develop, practice, and train the relationship between mind and body in order to improve the bodys mental and physical communication. This course may be repeated for credit.NOTE: Students must be in good physical health and report any problems and/or concerns to the instructor prior to the first workout.This course may be repeated for credit.

EXSC 1752 Yoga II 1 n/a
The focus of Yoga II will be on the physical and mental dimensions. Advanced postures and breathing techniques will be introduced and practiced. A variety of yoga styles will be practice (Hatha yoga, Power yoga, and lyengar Yoga). Journaling is an integral part of this course.

EXSC 1760 Introduction to Kayaking and Canoeing 1 n/a
This course is designed for the beginner in both kayaking and canoeing. Students will learn how to get in and out of the kayak, wet entry, basic paddling strokes, and safety on the water for flat water kayaking. The canoeing portion covers safety, and proper steering paddling techniques. The course also includes a half day canoe trip and a half day kayak lake tour for skill application.

EXSC 1800 Aerobics 1 n/a
This course provides instruction and practice in a physical fitness program which involves a series of vigorous movements. Music is utilized with a combination of dancing, jogging, and jumping. This course may be repeated for credit. Good general health is recommended.

| EXSC | 1810 | Step Aerobics | 1 | $\mathrm{n} / \mathrm{a}$ |

This course provides instruction and practice in a physical fitness program which involves a series of vigorous stepping movements. Music is utilized with a combination of a stepping apparatus and an extensive upper body workout to raise the heart rate to within the exercise heart rate zone. This course may be repeated for credit. Good general health is recommended.

EXSC 1820 Boot Camp 1 n/a
This course presents a fast-paced, total body workout that focus on optimal performance training through the use of various modalities such as calisthenics, running, body weight training, functional training, and speed, agility, and quickness drills designed to promote physical fitness. Emphasis will be placed on discipline, intensity and goaloriented exercise programming. Students will also learn the fundamental principles of physical fitness and their impact on life-long health and wellness.

EXSC 1830 Social Dance $1 \quad \mathrm{n} / \mathrm{a}$
This course includes instruction and practice in basic ballroom dance technique, including dance positions and posture, basic step patterns, rhythm, and styles.

EXSC Zumba 1840 n/a
Zumba is a Latin inspired, dance-fitness class that incorporates Latin and international music and dance movements, creating a dynamic, exciting, and effective fitness system. The class combines fast and slow rhythms that tone and sculpt the body using an aerobic/fitness approach to achieve a unique blended balance of cardio and muscle-toning benefits. This course is repeatable for credit.

EXSC 1850 Yoga Core 1 n/a
The yoga core class focuses on core stability and strength. Yoga postures that emphasize core strength will be focused on. The use of medicine balls, stability balls and bosu balls will be used to isolate the basic muscles of the core/torso/back.

EXSC 1860 Total Body Strengthening 1 n/a
This class is a total body strengthening workout. It challenges all of your major muscle groups by using handheld weights. You will perform exercises that target all of your major muscle groups: squats, presses, lifts and curls. This course is in a group exercise format where music is used to motivate and push you to a high level of intensity. High intensity interval training will be used which increases body fat utilization for energy.

| EXSC | 1880 | Fundamentals of Boxing | 1 | $\mathrm{n} / \mathrm{a}$ |

This course focuses on boxing skill and techniques. Students will be introduced to punching, boxer $_{7} \mathrm{~s}$ stance, footwork, balance and stance in movement, training, safety practices, and the health and physical benefits associated with boxing. The class will utilize heavy bags, speed bags, as well as other sport-specific equipment. Methodology, strategy, and self-defense applications will also be included. Excessive force, violence, or aggression are not required or expected and will not be tolerated. All skill levels welcome.

EXSC 1990 Exercise Science Special Topics $0 \quad \mathrm{n} / \mathrm{a}$
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

EXSC 2010 Essentials of Exercise Science 3 n/a
This course provides an in-depth look into topics such as the acute and chronic physiological and psychological responses to exercise, exercise anatomy, exercise metabolism, and how the nervous, skeletal, muscular and endocrine systems respond during exercise. (3 hours lecture)Prerequisite: Placement into Engl 1201It is strongly recommended that students in the Personal Training Certificate program take EXSC 2010 and EXSC 2100 at the same time in order to sit for the NASM-CPT exam.

EXSC 2100 Concepts of Training $3 \mathrm{n} / \mathrm{a}$
This course will allow students to research, explore, discuss, and compare different training strategies based on empirical research that are designed to improve health, wellness, and performance, and to modify lifestyle behaviors. Students will comprehend how and when to apply each training method upon distinguishing individual needs and wants of different persons while adhering to current training guidelines, principles of training, and current accepted Exercise Science training theories.In order to sit for the NASM-CPT exam, it is strongly recommended that students register for both 2010 and 2100 at the same time.

EXSC $2110 \quad$ Advanced Fitness Assessment \& Exercise Prescription 30 n/a
This course is designed to expand the theoretical knowledge of fitness assessment and exercise prescription into practical application of personal training and exercise science. This course will assist students in bridging the gap of research and practical application. (2 hours lecture, 2 hours lab) Prerequisite: EXSC 2100 and EXSC 2010 with a grade of C or better

EXSC 2200 Applications of Training 2 n/a
This course will allow students to devise, apply, analyze, and practice different training strategies based on empirical research that are designed to improve health, wellness, and performance, and to modify lifestyle behaviors. Students will apply specific training methods to individuals based on the results of initial fitness testing and interview while adhering to current training guidelines, principles of training, and current accepted Exercise Science training theories. (1 hour lecture, 2 hours lab)Prerequisite: EXSC 2100 with a grade of C or better

This course presents the scientific basis for sports nutrition building upon basic nutritional concepts. Students will review, describe, and interpret the macronutrient needs and recommendations for athletic performance (this would include pre-, during, and post-exercise fueling), energy expenditure during resistance and cardiovascular exercise, the diet during training, the timing and composition of the pre- , during, and post- competition fueling, the use of nutritional supplements, and the special needs of various athletic groups. The course provides practical and scientifically based information for those entering the exercise science field as well as the competitive athlete and people of all ages wishing to incorporate nutrition into an active lifestyle.Prerequisite: HLTH 1070 with a recommended grade of $C$ or better

EXSC 2300 Concepts of Group Fitness Instruction 3 n/a
This course is designed to provide theoretical knowledge and practical skills in group fitness instruction, as well as preparation for a national certification exam in group fitness instruction. Topics include guidelines for instructing safe, effective, and purposeful exercise, essentials of the instructor ${ }_{7}$ participant relationship, the principles of $^{\text {p }}$ motivation to encourage adherence in the group fitness setting, effective instructor to participant communication techniques, methods for enhancing group leadership, and the group fitness instructor ${ }_{\gamma} \mathrm{s}\left(\mathrm{GFI}_{\rceil} \mathrm{s}\right)$ professional role.

EXSC 2390 Current Research Trends in Exercise Science 3 n/a
This course is designed for formulating, designing, and implementing meaningful research into timely and practical educational issues within the exercise science field. The study of a particular topic(s) of special importance, relevance, and currency to those going into the exercise science field will be the main theme. Course content may vary with each offering.

EXSC 2490 Kinesiology 4 n/a
Course Content includes study of human movement and the muscular system. Skeletal and major muscular systems will be studied in detail in order to better understand how human movement is produced. Students will anatomically analyze movements and be introduced to the concepts of biomechanics. (3 hours lecture, 3 hours lab) Prerequisites: BIOL 1120 or BIOL 1001 or EXSC 2010 with a grade of C or Better

EXSC 2750 Wellness Coaching \& Health Promotion 3 n/a
This course examines theoretical frameworks of evidence-based health interventions and current practices relevant to health/wellness coaching. Students will explore coaching competencies, professional ethics, and diversity all in preparation for a national certification exam in health/wellness coaching. Students will also examine the role of the wellness coach within the corporate wellness field and their ability to facilitate change among employees and corporations. Prerequisites: EXSC 2010 and EXSC 2100 with a grade of $C$ or betterlt is strongly recommended that students have already sat for and passed their CPT exam prior to sitting for the ACE Health Coach exam.

GCST 122
Practical Applications of Traditional Aikido
2
07,09
This course uses Traditional Aikido (a Japanese martial art) in order to help the student gain skills both on and off the mat, applying them to his or her profession and daily life. The student will research, study, and practice real-life scenarios and situations of de-escalation, protection, compliance, and restraint- maximizing safety, focus, awareness, and control. Aikido is a life-giving tool. This class appeals to the beginner and experienced Aikido student. It is ideal for Criminal Justice, Emergency Medical Services (EMS), Military, and Security jobs as well as other service professions. *Note: This course is an elective course in Global and Cultural Studies fulfilling the MnTC Goal Areas 7 \& 8. It will not count toward any HEALTH OR PE requirements.

GCST 1320 Community Organizing I 37,09
The focus of this course will be developing leadership skills through community organizing and empowering students to make lasting changes at the college, in their own communities and the world.Students will examine past and present social movements with a special focus on organizing in communities of color. This course will also explore the contemporary meanings of community in the United States. Students will learn to identify the leader within by examining the relationship between community and citizenship. This course will also focus on issues of diversity and sustainable communities with the practical application of active leadership techniques and creative organizing on our campus. This could include aspects of the annual Earth Week Program such as Marketing, PR, Event Planning, Budgeting, Community Partnerships, Cross Campus and Cross cultural collaborations, and curriculum integration.

GCST 2320 Community Organizing II 30803010
Building on the foundational local work of GCST 1320, this project and research based course will focus on further developing leadership skills and community connections at a local, national and global level to create student change agents. This course provides essential information for grassroots organizing and coalition building, and incorporates research on successful models locally and globally that have supported oppressed populations to create social and environmental change. Students will understand the importance of power theory and dynamics and then identify a local or global issue, creating strategies for collective action and developing and implementing these strategies into practice. Through analysis of media, culture, government policies, social movements, systemic racism and marginalization of groups, and participating in practical social change activities, students will learn to explore and synthesize multiple points of view and individual and collective responsibilities to create a more just, ethical and sustainable future. Activities could include research projects on campus, with City of Brooklyn Park, and other area, national and international organizations, data collection and analysis, research papers, presentations, creation of documentaries

GEOG 1000 Geography of the United States 207
This course provides a broad overview of those factors, cultural and physical, that identify the United States. Topics covered include climate, topography, population, language, history and regionalism. Students will gain an introductory knowledge of United States history, economics, politics, physical landscapes and culture. This course is recommended for international students or those new to the United States.

GEOG 1010 Physical Geography 03,10
This course will provide an introduction to the physical processes that are at work at all times on the surface of the earth. This course provides an introduction to the processes that influence the lithosphere, atmosphere, hydrosphere and biosphere. Topics covered include earthquakes, volcanoes, tornadoes, blizzards, winds, precipitation, the Hydrological Cycle, vegetation and soil. This course includes a basic understanding of how these systems interact and how the physical landscape interacts with the human landscape. Included in this will be discussions about environmental concerns such as acid precipitation, ozone depletion, soil degradation, desertification and rainforest destruction. This course includes lab-like coursework/exams that will enhance a student's ability to make observations, form questions, pose hypotheses, make predictions and critically evaluate scientific data and results.

GEOG 1040 Human Geography 3 07,08
This course surveys occupancy and use of the earth. The great diversity of this human experience as well as the nature of the people/land relationship are examined in terms of distinctive culture realms which have manifested varying degrees of technological and sociological development in time and space. Essential to this examination is a comparative review of the contemporary geographies of race, language, religion, political ideologies, economic activity, settlement, and population.

| GEOG | 1100 | World Geography | 3 | 08 |

This course is a region-by-region study of the world. It includes the identification of physical and human place locations, along with emphasizing whatever best explains the character of each country. This may be population, economics, resources, or any aspect of nature or humanity that gives an insightful understanding of each country.

GEOG 1190 Area Studies 3 08,10
This course provides the opportunity to use the geographic foundations of spatial relationships and apply those with concentration to specific topics. Spatial relationships will be studied using the standard geography methodology of examining phenomena--the locations of, descriptions of and interrelationships of that phenomena on the surface of the earth. Topics will include economics, politics, religion, population, flora, fauna, language and regions. This concentrated study will includes an examination of the human/land relationship.

This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

GEOL 1100 Physical Geology
4
03
A course examining the earth ${ }_{7} \mathrm{~s}$ formation, composition, structure and natural systems. Using the process of science, learners will explore the earth ${ }_{7}$ s internal and external processes and how they shape the surface of the earth. Topics include: geologic time, plate tectonics, rock and mineral identification, introduction to topographic and geologic maps, surficial processes, climate change and environmental concerns. Course is open to all students. (3 hours lecture, 3 hours lab) 4 Credits.

GEOL 1130 Rocky Mountain Field Study
4
03
This course is designed for people interested in learning about basic principles of astronomy, geology, and meteorology in an applied setting. This course is offered as a component of our Outdoor Education Program, usually during summer session. Classes meet on campus for several weeks followed by 7-10 days in the Rocky Mountains and surrounding areas. Topics include: rock and mineral identification, geologic history of the area, geologic time, plate tectonics, topographic maps, surficial processes, physical processes of weather and astronomical features. Course is open to all students. (3 hours lecture, 3 hours lab)

GEOL 1140 Historical Geology 4 03,10
A temporal survey of the development of Earth as we know it today, and the evolution of life as deciphered from the sedimentary rock and fossil record. By using the process of science to examine how the Earth and life have changed through the geologic past we can begin to get a glimpse into the effect which humans may have on it now and in the future. Topics include: principles of geology, sedimentary rocks, fossil identification and classification, plate tectonics, sea level change, geologic time, topographic and geologic maps, evolution of life, climate change, hominid development and mass extinctions. Course is open to all students. (3 hours lecture, 3 hours lab) 4 credits

Subject Course No. Title
GEOL 1150 Boundary Waters Field Geology
403,10
This lecture, lab \& field-based course is designed for people interested in learning about basic principles of astronomy, geology, and meteorology in an applied setting. This course will be offered as a component of our Outdoor Education Program, usually during summer session. Topics include: rock and mineral identification, geologic history of the area, geologic time, plate tectonics, topographic maps, surficial processes, physical processes of weather and astronomical features. Students will participate in an 8-9 day mandatory field trip to BWCA-Quetico Wilderness Area. Course is open to all students. (3 hours lecture, 3 hours lab)

GEOL 1160 Global Environmental Field Geology 40030310
An introduction to environmental geology with emphasis on the impact that globalization has on the environments and on geologic resources of various regions of the world, including the United States. Students will examine the geologic development of a particular region and how various cultures and societies approach environmental and geologic resource management problems. Students will explore their own community for the presence of globalization and they will travel to the country or region of study to meet with environmental experts and to observe first-hand the issues covered in this course. A 7-10 day field trip to the study region is mandatory. Course is open to all students. (3 hours lecture, 3 hours lab)

GEOL 1170 Minnesota Field Geology Series: Glacial Geology 2 03,10
Come explore the glacial geologic history of Minnesota! We will also examine its influence on some of the state ${ }_{\rceil} \mathrm{s}$ economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, formation, climate change and destruction of continental ice sheets, sedimentary processes, recognition of erosional and depositional glacial landforms, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits

GEOL 1180 Minnesota Field Geology Series: Caves, Karst and Ancient Seaways 203,10
Come explore Minnesota's caves and ancient ocean floors! This course will examine the hydrogeologic processes involved in cave formation and the development of karst topography. In addition, we will evaluate the evidence of ancient oceans in Minnesota using the sedimentary and fossil record. Additional topics include: plate tectonics, geologic time, hydrologic cycle, rock, mineral and fossil identification, weathering and erosion, sealevel change, marine sedimentary processes. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students.

GEOL 1190 Minnesota Field Geology Series: Fluvial Geology 2 03,10
Come explore the geologic history of Minnesota's rivers. We will examine the development of the Mississippi, Minnesota, Red, and St. Croix, and Whitewater Rivers and the influence of their development and present geomorphology on some of the state's economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, weathering and erosion, drainage patterns, flooding, fluvial landform recognition, meandering, wetlands, topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Four-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits

| GEOL | 1200 | Oceanography | 3 | 03,10 |

This course is an interdisciplinary survey of the biological, chemical, physical and geologic processes at work in the world's oceans. Using the process of science learners will examine the interplay between these processes and the implications of these interactions for life on Earth, the Earth's climate and marine environments. Topics may include waves, tides, seafloor sediments, marine biology, seawater chemistry, plate tectonics, ocean currents, El ni $\pm 0$, productivity and dead zones, sea level change, coastal processes and effects of man's influence on oceans. Course is open to all students. 3 Credits (3 hours lecture)

GEOL Oceanography Lab 1201 03,10
This course is designed to complement GEOL 1150, Oceanography. The 3 hour lab sessions will include group and individual projects that supplement concepts and topics from oceanography lecture. Learners will collect their own data and use oceanographic data from ocean science databases. Lab topics that will be covered include plate tectonics, marine sediments, temperature and salinity, water masses and ocean circulation, mapping the seafloor, marine ecosystems, coastal erosion, climate change, primary productivity, el ni $\pm 0$ and biogeochemical cycling. Course is open to All Students ( 3 hours lab) 1 credit

GEOL 1210 Minnesota Field Geology Series: Volcanic, Plutonic and Metamorphic Geology

Come explore the oldest rocks in Minnesota! This course will examine the earliest geologic history of Minnesota, which includes greenstone belts, iron ore deposits, and flood and pillow basalts. Topics include: geologic time, plate tectonics, rock cycle, rock classification and identification, Mid-continental rift, intrusive and extrusive igneous processes and products, metamorphism and mineral resources, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students.

GEOL 1990 Geology Special Topics $\quad$ 1-4 $\mathrm{n} / \mathrm{a}$
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

HCCC 1010 Awareness and Sensitivity to Client Needs 0 n/a
This course presents challenges and issues related to awareness and sensitivity needed to understand the healthcare needs of clients/individuals. Included is the impact disease has on individuals, the emotional, spiritual and social needs of clients/individuals as well as the type of care needed by different age groups. Also included is the process of death and dying and how that affects clients and their families. Prerequisite: Reading: Placement score or completion of ADEV 0952 or ESOL 0930 with a grade of C or better.

HCCC 1020 Behaviors for Success in Healthcare Settings 0 n/a
This course focuses on the requirements needed by health care personnel to effectively work in a variety of health care settings. Included are education and licensure/certification requirements, scope of work, types of interactions with clients, peer groups and team members, and the impact healthcare workers have meeting the healthcare needs of clients. In addition, types of health care facilities and systems, applying for employment, accountability and responsibility, standards of dress, workplace behavior, approaches needed to assist individuals, expectations of teams and team members, common healthcare facility policies and requirements are explored. How healthcare personnel can impact the quality of health care and balance their work and personal life to maintain wellness and encourage the wellness of others is also discussed. Prerequisites: Reading placement score or completion of ADEV 0952 or ESOL 0930 with a grade of C or better.
$\begin{array}{llll}\text { HCCC } 1030 & 1 & \mathrm{n} / \mathrm{a}\end{array}$
This course emphasizes the importance of effective communication between and among healthcare employees and their clients/individuals. Included are verbal and non-verbal communication, listening skills, interpersonal communication, team communication, documentation and reporting, and the use of electronic communication devices in health care facilities. Focus is on the development of effective communication skills to support quality client/individual care. Prerequisites: Reading Placement score or completion of ADEV 0952 or ESOL 0930

HCCC 1040 Survey of Ethics in Healthcare Settings $0 \quad$ n/a
This course emphasizes the use of sound ethical practices in healthcare. Included are ethical practices and standards as they relate to the care of clients/individuals and interactions with peers, colleagues, and team members and family healthcare and the difficult decisions that need to be made.Prerequisites: HCCC 1010 and 1020 and 1030

HCCC 1050 Legal Issues in Healthcare 0 n/a
This course focuses on the legal issues related to clients/individuals and healthcare employees. Healthcare laws, client rights and responsibilities, confidentiality, liabilility, documentation, and regulation are explored. The relationship between ethics and legal issues is discussed as well as the impact laws and regulations have on healthcare systems. Prerequisites: HCCC 1010 and 1020 and 1030

HCCC 1060 Respecting Client and Staff Diversity 0 n/a
This course provides a framework for dealing with diverse clients/individuals and staff. Included are belief systems, cultural issues, gender issues and sexuality issues. Awareness and use of effective strategies to appropriately deal with client and staff diversity are emphasized.Prerequisites: HCCC 1010 and 1020 and 1030

HCCC 1070 Healthcare Safety and Standard Precautions 0 n/a
This course focuses on the rules and standards related to regulatory policies required of healthcare facilities as well as personal safety standards and requirements to work in healthcare settings. Included are the principles and standards of infection control, Standard Precautions, healthcare facility safety policies, strategies to ensure personal and client/individual safety, and procedures to respond to emergencies.Prerequisites: HCCC 1010 and 1020 and 1030

This course examines world history from its origins to end of the 13th century. Although it is important for students of world history to have a nuanced understanding of cultures, states, and other entities that constitute the fabric of human history, the primary focus of the world historian is the study of phenomena that transcends single states, regions, or cultures. In other words, world history is not the study of the histories of discrete cultures and states one after another and in isolation from one another: world history is transregional, transnational, and transcultural. As long as one focuses on the big picture of cultural interchange and/or comparative history, one is a practicing world historian.

HIST World History: 1300 to Present 30 05,08
This course examines world history from the 14th century to the present. Although it is important for students of world history to have a nuanced understanding of cultures, states, and other entities that constitute the fabric of human history, the primary focus of the world historian is the study of phenomena that transcends single states, regions, or cultures. In other words, world history is not the study of the histories of discrete cultures and states one after another and in isolation from one another: world history is transregional, transnational, and transcultural. As long as one focuses on the big picture of cultural interchange and/or comparative history, one is a practicing world historian.

1030 Colonial History of the Americas 3 05,08
This course examines the human migratory phase that led to the initial peopling of the Americas beginning ca. 35,000 BCE; it explores the first colonial period that began ca. 7500 BCE with the rise of domesticated agriculture and the consequent establishment of major civilizations in South America, Meso-America, and North America; and it covers the second colonial period initiated by the arrival of the Spanish in 1492 and that began drawing to a conclusion in the late eighteenth century. Study of the second colonial period includes the colonization of North America, Central America, The Caribbean, and South America by six European empires: the Spanish, Portuguese, French, Dutch, Russian, and English.

HIST 1110 History of Western Civilization Pre 1550 05,08
This course examines the development of Western Civilization from ancient origins through the Reformation. We will consider various western civilizations ranging from ancient Mesopotamian civilizations to Early Modern Europe, following a chronological progression, while maintaining a broad geographic scope. Students are expected to gain a working knowledge of the different Western civilizations and the periods in which they flourished, as well as begin to develop the skills necessary to analyze documents as historical evidence.

HIST 1120 History of Western Civilization 1550 to Present 3 05,08
This course examines the development of Western Civilization from the Reformation to the present. The course will focus on social, political, and cultural developments in Europe, covering topics such as the Industrial Revolution and Globalization in the 20th century. The course will also examine how these developments affected the rest of the world. Students are expected to gain a working knowledge of the history of the period, as well as begin to develop the skills necessary to analyze documents as historical evidence, and to present a historical argument.

| HIST 1130 | History of the Medieval West | 3 | 05,08 |
| :--- | :--- | :--- | :--- |

This course examines the development of the three major Western cultures that emerged during the Middle Ages: Western Europe, Byzantium, and Islam. Specific emphasis will be given to the interactions between these three cultures, both positive and negative. Students are expected to gain a working knowledge of the history of the period, as well as begin to develop the skills necessary to analyze documents as historical evidence, and to present a historical argument.

HIST 1140 History of the Ancient West 3 05,08
This course examines the origins and development of civilizations surrounding the Mediterranean, such as the Egyptians, Hittites, Greeks, and Romans, during the ancient period, from about 3000 BC through about AD 300. The course will explore the contact between the various ancient civilizations, and will seek to understand both the tendency toward empire-creation in the ancient world, and the proclivity of those empires to collapse. Students are expected to gain a working knowledge of the history of the period, as well as begin to develop the skills necessary to analyze documents as historical evidence, and to present a historical argument.
$\begin{array}{llll}\text { HIST } 1200 & \text { History of United States Through } 1877 & 3 & \text { 05,07 }\end{array}$
This course focuses on the major cultural, social, and political issues in United States history from the revolutionary period through Reconstruction. We look at the ideas that led to the revolution, how the thirteen colonies assembled themselves into a republic, the consequences of slave culture to the course of American history, and the promises and failures of Reconstruction. The student will come to understand the multiple and inter-related forces relevant to the early years of the republic.

HIST 1210 History of the United States Since 1877 05,07
This course focuses on the major social and cultural issues in United This course focuses on the major cultural, social and political issues in United States history from the late nineteenth century Gilded Age through the end of the twentieth century. We look at the influence of the industrial revolution, the impact of increasing levels of European and Asian immigration, the rise of organized labor, the Great Depression, the Cold War, the impact of United States foreign policy, and countercultural movements. The student will gain insight into the aspects that are most crucial for a solid understanding of the nation's history.

1270 Race in America 3 05,07
This course investigates the role played by race in the shaping of United States history. We examine the concept of race and the historical relationships in America between those of African, Asian, European, and Native descents. We will examine Reconstruction, the Civil Rights Movement and current racial issues. The goal is to broaden student understanding of United States history by a focused study of its multi-faceted racial relationships throughout the centuries.

1990 History Special Topics 1-4 $\quad$ n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

Subject Course No. Title
HIST $2500 \quad$ World Regional History
305,08
Each semester this course is devoted to the history of a specific world region, and the region will change from semester to semester. The goal is to provide the student with the opportunity for an in-depth study of specific societies and specific cultures from around the world. The course may be repeated for credit under a different subtitle as the subject matter changes.

HIST Intellectual History 2600 05,09
This course will examine cultural, religious, artistic, and scientific ideas in their historical contexts, explore arguments regarding the manner in which particular ideas both reflect and create the values of their own time, and investigate the manner in which certain ideas are viewed retrospectively from various subsequent historical periods. The class will read a variety of intellectual and imaginative works that will illustrate the process by which ideas are transmitted historically, and specific ideas considered will include but will not be limited to fundamentalism, nationalism, romanticism, and totalitarianism.

HIST History and Popular Culture 2700 05,09
This course examines the relationship between history and popular culture, with an emphasis on the value of popular culture entertainment as a historical source for both the past and the present. We will examine several examples of popular culture entertainment (including but not limited to film, novels, comics, etc) that are set in a historical period. Students are expected to gain a working knowledge of the historical periods depicted in selected popular culture sources, as well as the historical periods in which the sources were produced. Students will also examine questions of ethical representation of the past in popular culture. Through this course, students will begin to develop the skills necessary to analyze various types of sources as historical evidence. It is recommended that students complete a 1000-level history course and a semester of college English before taking this course.
HIST Applied History 2900 n/a

This course is a writing-intensive research methods course that incorporates a service-learning component. Students will learn how to use and interpret various historical sources, such as archival material, oral history, photographs and video. Students will also learn how to use and interpret secondary source materials. The goal of the course is for the students to produce a publishable-quality research paper on a topic related to local history, with an emphasis on the relationship between local history and larger historical developments at the state, national, and/or global level. Prerequisite: Any 1000 level history class; English 1201-1202 Sequence

HLTH 1010 Health Terminology 3 n/a
This is a course for all health professionals to become familiar with, and knowledgeable in, the workings of the human body. They will learn correct terms and terminology as it applies to each human body system.

HLTH 1030 Personal and Community Health 3 n/a
Personal and Community Healtháaddresses itself to the needs and issues of the individual as related to current health matters in today's society.á Our life style and modern society both contribute and detract from the holistic health concept.á Thisá class will assist the student in developing a plan for achieving and maintaining his/her personal health.

Subject Course No. Title
HLTH $1040 \quad$ Current Health Issues and Human Behavior
3 n/a
Current Health Issues and Human Behavior is a course which will examine how biological, psychological, and social factors work together to explain health and illness. This course will focus on current health models, such as the biopsychosocial model, that help explain why some people become ill and others do not. This class has an integrative health approach in treating the whole person who may have disease and illness caused by genetic factors and/or environmental factors. Another very important aspect of this course will be to interpret and discuss the various theories of change in human behavior and how they relate to health. After participating and completing coursework, students should understand the (positive and negative) contributing roles that psychological and social factors have on biological processes in the body.

HLTH 1050 Stress Management
3 n/a
Stress is one of the most commonly referred to, but least understood, of all health problems. This class is designed to examine the differences between stress and personal challenges with an emphasis on the importance of the role of perception in distinguishing between the two. This course will also examine the many common sources of stress for most people and practice strategies for managing these stressors. The students will also discover how to control their stress instead of letting their stress control them.

HLTH Drugs and Health 1060 n/a
This course examines how drugs will relate with and affect holistic health, with a focus on the physiological, sociological and psychological effects these drugs may have on an individual and their relationships. The emphasis of this course is on the basic tools and information needed to understand and interact with individuals who may have problems with chemicals. It is designed to provide current information regarding the various drugs in society today.

HLTH Nutrition 1070 n/a
This course is designed to introduce the student to the fundamental truths of nutrition principles, health promotion and disease prevention throughout life.á áTopics include, in part, the study of carbohydrates, fats, protein, vitamins, and minerals and their function and role in healthy living.á lt will provide introductory nutritional information for career paths in nursing and other similar fields of study.

HLTH Consumer Health 1080 n/a
This course examines current consumer health issues in society. Class content will include the examination of health care products, the food and drug industry, and our ability to create a safe living environment. This course will also include plans of action that we, as a society, can take to become better health consumers.

HLTH 1100 Responding to Emergencies: First Aid 3 n/a
This course is designed to provide students with basic First Aid. Students will learn basic knowledge of body functions, skills, and techniques to correctly and appropriately manage emergency care. At the close of the semester, a successful student will receive the current certification for community CPR, AED, and First Aid.

| HLTH | 1250 | Wellness for Life | 3 | $\mathrm{n} / \mathrm{a}$ |

This course is designed to investigate the implications of exercise, diet, nutrition, stress, and physical activity in the total health of the individual. EXSC 1250 and HLTH 1250 are the same: credit may not be earned for both. (2 hrs lecture, 2 hrs lab)

HLTH 1600 Emergency Medical Responder $3 \mathrm{n} / \mathrm{a}$
The course provides training in emergency medical care for persons who are apt to be responding to accidents. The course emphasizes the development of skills in patient assessment and emergency medical procedures. The goal is to prepare you for work in the emergency medical arena as a first responder. The course will provide you with the information needed to make competent decisions regarding medical and trauma patients.

HLTH 1900 Healthy Sexuality 3 n/a
Healthy Sexuality will examine how the dimensions of wellness--physical, intellectual, emotional, social, spiritual, environmental and occupational-- influence our sexual health. It is also the intention of this class to show how healthy expressions of sexuality can improve one's overall wellness.

HLTH 1990 Health Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

HLTH Introduction to Health 2020 n/a
This course will introduce students to various public and community health services, the history of community and public health and the role and functions of health programs and their relationships between holistic health aspects. This course will explore the knowledge, skills and competencies of health educators in various community settings, occupations and careers.

HLTH 2070 Socio-Cultural Aspects of Nutriton 3 n/a
Students in this course will explore nutrition in the context of culture ${ }_{7}$ looking at common dishes, special occasion foods, and cultural foods with therapeutic uses. Students will examine how cultural values, health beliefs, economic status, and learned food practices shape the development of meal patterns, eating customs, and the nutritional status of ethnic, religious, and regional groups. Students will also be given the opportunity to prepare and taste cultural foods, like amaranth, epozote, plantains, miso, and mung beans from the various regions studied.

HLTH 2080 Environmental Health $3 \mathrm{n} / \mathrm{a}$
The purpose of this class is to inform the student about the key areas of environmental health and instill awareness about the crucial role of the environment in the health of the planet and all living organisms. It is designed to promote awareness of the environmental influences on health.

The Honors Seminar is an in-depth exploration of a specific topic using various avenues or techniques of inquiry. The topics will cover a wide variety of issues based on faculty expertise and interest.Students must be members of the Honors Program, members of Phi Theta Kappa, have a minimum cumulative GPA of 3.5, or have instructor permission.

HONR 2000 Undergraduate Research - Literature Review 0 n/a
Students will be engaged in the investigation of the state of a specific scholarly question under the guidance of a faculty member. Research projects will focus on using discipline-appropriate resources and literature to understand the origins and development of a particular scholarly topic within the context of the relevant discipline(s), significant approaches to the topic, and current avenues that are being used to develop the topic. This course may be repeated for credit.

HONR 2010 Undergraduate Research-Research Assistant 0 n/a
Students will assist in an ongoing scholarly research project under the guidance of a faculty member. Students will learn data-collection and/or analysis using discipline-appropriate methods that contribute to the objectives of the research project. This course may be repeated for credit.

HONR 2020 Undergraduate Research - Original Research 0 n/a
Students will be engaged in an original research project under the guidance of the faculty member. Research projects will: have clearly communicated purposes and objectives, have well-defined discipline-appropriate methods, be ambitious in scope, have a reasonable chance of completion within the agreed-upon timeframe, require use of discipline-appropriate scholarly literature, require use of advanced concepts, build upon current scholarly understanding, and result in work suitable for conference presentation or publication. This course may be repeated for credit.

HONR 2030 Undergraduate Research - Creative Work 0 n/a
Students will be engaged in the production of an original creative work under the guidance of the faculty member. The creative work will: use discipline-appropriate methods, be ambitious in scope, have a reasonable chance of completion within the agreed-upon timeframe, and require use of advanced concepts and technique. The result should be of a quality suitable for presentation, production, or publication. This course may be repeated for credit.

HONR 2900
Honors Capstone
$1 \mathrm{n} / \mathrm{a}$
The Honors Capstone course provides a culminating experience of a student's academic life. Students develop and implement a project that integrates their undergraduate experiences while helping them to prepare for their intended career paths. Students will work with two (Honors and High Honors) or three (Highest Honors) faculty to develop an integrative project that incorporates two (Honors and High Honors) or three subjects (Highest Honors) the student has studied over the course of their college career. Projects must demonstrate student competency in each of the four NHCC Essential Learning Outcomes (ELOs) as well as student ability to establish short- and longterm goals. Approval of the Honors Program and instructor permission.

| HSER | 1100 | Introduction to Human Services | 3 | n/a |

This course introduces students to the field of Human Services. Course describes history, worker roles, and current career trends in the field. Recommended completion of, or concurrent enrollment in EAP 1260: College Writing Skills Development plus EAP 1230: College Reading and Study Skills or above with a grade of C or better.

HSER 1200 Multicultural Awareness in Human Services 3 n/a
This class examines attitudes and enhances knowledge and skills that are necessary to work effectively with culturally diverse populations in the human services field. Students will explore their own and other's cultural identities, values, attitudes, and behaviors. Adjusting services to the multicultural needs of individuals who are served will be emphasized.Recommended completion of, or concurrent enrollment in EAP 1260: College Writing Skills Development plus EAP 1230: College Reading and Study Skills or above with a grade of C or better

HSER 1300 Crisis Assessment and Intervention 3 n/a
Presents basic concepts of crisis assessment, intervention, and referral. The application of strategies and techniques with a discussion of intervention, assessment, and referral models is included. An overview of interventions for specific crisis will be reviewed. An assessment model for making appropriate referrals is presented.

HSER 1400 Basic Counseling Skills 3 n/a
Introduces basic counseling and interviewing skills. Students will learn and apply skills that range from basic attending and listening skills to chart documentation and treatment planning. Prerequisites: HSER 1100 and HSER 1200

HSER Group Processes 1500 n/a
Focuses on the development of communication skills and self-awareness important in the roles of group membership and leadership. Provides an understanding of the evolution and function of therapeutic groups. Emphasizes the development of knowledge and skills.Prerequisites: HSER 1100, HSER 1200 and HSER 1400

HSER Loss and Grief 1600 n/a
Review dynamics of loss and grief across the lifespan and how grief impacts families and children. Students will learn to identify, assess, and intervene in grief situations while exploring gender differences. The course will incorporate journal assignments and experiential activities designed in the healing of each persons grief journey.

HSER 1700 Family Functions and Interactions 3 n/a
The course offers an introduction to family systems theory, normal and problematic family systems and family functioning concepts. The impact and effects of family on individual development is also explored. Students will examine family violence including the impact of chemical dependency, social and the psychological roots of violence.

| POLS | 1140 | State and Local Politics | 3 | 05,09 |

This course studies the operation and structure of state governments including executive, legislative, judicial functions as well as elections and policy formation, with an emphasis on Minnesota.

HSER 1800 Mental Disorders Through the Life Span 3 n/a
The course introduces an overview of the range of mental disorders throughout the lifespan including those impacting children and the elderly. Students will learn to identify signs and symptoms of each disorder in addition to learning basic skills and therapeutic treatments that effectively help individuals who have mental disorders.
Prerequisite: HSER 1400

HSER 1900 Current Human Services Topics 3 n/a
This course examines current topics and issues specific to the field of Human Services. Students will take an active role in the research and presentation of topics in the course.

HSER 2100 Human Services Seminar 1 n/a
The course provides an opportunity for human services students to create and implement projects for the development of personal knowledge and skill using a seminar approach. Students should be aware that a Minnesota Department of Human Services background study and fingerprinting is required.

HSER 2101 Human Services Internship 6 n/a
This course is a capstone off campus experiential-learning component for the Human Services program. Students will spend 240 hours at a human services internship site to have the opportunity to gain experience, enhance their knowledge and further develop skills learned in the program. Students should be aware that a Minnesota Department of Human Services background study and fingerprinting is required.Prerequisites: HSER 1100, HSER 1400, and HSER 1500

HTN Clinical Laboratory Basics 1000 n/a
This course will introduce the student to the general role of health care provider as well as the specific role of the Histoechnician. Basic aspects of chemical safety, laboratory safety, quality assurance, microscopy, pipetting techniques, and laboratory mathematics also will be presented.Prerequisite: Admission to the Histotechnology Program

HTN 1001 Histotechniques I
4 n/a
This course will introduce current theory and practice in histotechnology including specimen processing and preservation, tissue embedding, histology instrumentation, microtomy, and the theory of routine H\&E staining. Prerequisite: Biol 1001

| HTN |
| Histotechniques II |

This course is a continuation of Histotechnique I with emphasis on reinforcement of fundamental principles of histology. Procedures and maintenance of basic histology instruments will be introduced. Students will be expected to achieve entry-level competencies in basic lab techniques and additional techniques will be practiced. Prerequisites: HTN 1001

HTN 2003 Histotechniques III 3 n/a
This course is a continuation of Histotechnique II with emphasis on additional reagents used for techniques previously covered, maintenance of instrumentation, slide preparation, and processing of biopsy specimens.
Prerequisites: HTN 1002

HTN 2100 Special Stains 4 n/a
Preparation of chemical reagents for the histology lab will be discussed and performed. The theory, practice, and microscopic evaluation of staining procedures for various applications will be covered.Prerequisites: Concurrent with HTN 2003

HTN 2150 Special Procedures 2 n/a
Lectures and labs will build on skills learned and practiced in Histotechnique I and II. Reprocessing specimens for better results will be practiced with the use of simulated labs to emphasize organization and teamwork. Specialized procedures will be introduced including cryotomy, immuno-histochemistry, and cytology preparation. Prerequisites: Concurrent with HTN 2003
HTN 2200 Histo-Anatomy 1 n/a

This course focuses on the description of microstructures of human organs and on cellular components of specific organs. Microscopic identification of these cellular components will be practiced.Prerequisites: Biol 2111 and Biol 2112

HTN 2300
Histology Clinical Experience
12
n/a
This course gives students clinical experience necessary to develop entry-level technical skills in all aspects of the histology laboratory under the supervision of certified histotechnicians, histotechnologists, and pathologists. Emphasis will also be placed on acquiring effective team skills and preparation for the practical component of the certification exam.Prerequisites: Successful completion of all program-required general education and histotechnology courses

| MATH | 0700 | Basic Mathematics | 1 | $\mathrm{n} / \mathrm{a}$ |

This course focuses on developing number sense and by-hand operation skills on whole numbers: addition, subtraction, multiplication, and division. Other topics include place-value and order, rounding and estimation, fraction number sense, order of operations, and straightforward one-step application problems. Optional topics may include geometry, simplifying fractions, the four operations with fractions, and number sense regarding decimals. Credit does not apply to a degree. This course is graded on a pass/no credit basis.Students needing work with the four operations on whole numbers should take this course before taking Math 0800.
MATH Pre-Algebra 0800 n/a

The focus of this course is preparing students for the algebra sequence. Application of topics should be emphasized. Topics covered include: performing operations with integers, fractions, \& decimals; solving application problems involving integers, fractions, \& decimals; performing basic algebra skills including identifying algebraic components, combining like terms, \& using the distributive property; \& introduction to percents. Credit does not apply to a degree. Prerequisite: Placement Test

MATH 0801 Math Foundations
$1 \quad \mathrm{n} / \mathrm{a}$
This is a skills based course meant to prepare students for Math 0900, Mathematical Literacy. Students will improve their number sense and by-hand operation skills with whole numbers, fractions, mixed numbers, and decimals. Other topics will include place-value and order, rounding and estimation, and order of operations, all with a focus on fractions and decimals. Credit does not apply to a degree.Prerequisite: Placement Exam

MATH Mathematical Literacy 0900 n
In this course, students will develop the necessary mathematical reasoning skills to succeed in a wide variety of college-level courses, including Math 1010, 1031, 1130, 1140 and other courses outside the math department. Students will solve realistic, interesting problems incorporating numeracy, proportional reasoning, algebraic reasoning, and functions. Students will be expected to use mathematical terminology appropriately in written communication.Additional coursework may be required for students pursuing a STEM degree.Prerequisites: Placement test or successful completion of Math 0800 or Math 0801

POLS 1600 Comparative Politics
305,08
This course examines and compares the organization and politics of modern governments around the world. Countries studied exemplify larger course themes of political institutions, political culture, elections, public policy, democratization, economic development, and comparative methodology.
MATH 0901 Introduction to Algebra 4 n/a

This course assumes only that the student have a working knowledge of operations with real numbers and prealgebra. Topics include solving and graphing linear equations and inequalities, integer exponents, polynomial algebra, polynomial factoring, proportional reasoning (rates, ratios, proportions, and percents), units and unit/dimensional analysis (including the metric system), geometry of two and three-dimensional figures. This course emphasizes applications for all topics and the acquisition of by-hand skill. Credit does not apply to a degree.
Prerequisite: Placement Test or successful completion of Math 0800.

| MATH | 0902 | Intermediate Algebra | 4 | $\mathrm{n} / \mathrm{a}$ |

Topics include introduction to functions, rational expressions and equations, radicals and rational exponents, quadratic equations and inequalities, absolute value equations, and systems of linear equations. This course emphasizes applications for all topics and the acquisition of by-hand skill. Credit does not apply to a degree. Prerequisite: Placement test or successful completion of Math 0901 with a C or better.

MATH 0970 Bridge to College Algebra 2 n/a
This course is designed for students who have successfully completed Math 900 or Math 990 and wish to prepare for Math 1150. Topics covered include linear equations and inequalities, integer and rational exponents, polynomial algebra, polynomial factoring, rational expression algebra, complex numbers, and quadratic equations. This course emphasizes the acquisition of by-hand skill. Credit does not apply to a degree. Prerequisite: Successful Completion of Math 900, Math 990 or placement exam

MATH Pre College Algebra 0980 n/a
This course is a thorough treatment of the algebra necessary for success in college-level math classes and is a prerequisite for Math 1150, Math 1140, Math 1130, Math 1010, and Math 1031. A student who earns an A in this class can also petition for permission to use it as a prerequisite for Math 1180. Topics covered include solving linear equations and inequalities, graphing linear equations, integer and rational exponents, radicals, complex numbers, polynomial algebra, polynomial factoring, rational expression algebra, introduction to functions and graphs of functions, quadratic equations and inequalities, graphing quadratic equations, and systems of linear equations. Additional topics may include exponential and logarithmic functions and their graphs. This course emphasizes applications of all topics and the acquisition of by-hand skill. Credit does not apply to a degree. Prerequisite: Placement Test or or successful completion of Math 0901 with grade of C or better

MATH Statway Statistics I 0990 n/a
This is the first course in a two-course sequence. Students in this course are required to take the following course, Math 1090 in the following semester. Topics for both courses include concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests. Prerequisite: Math 0800 or Placement Test

MATH Math Special Topics 0999 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

Designed for the liberal arts student, this course explores the diversity of math and is focused on developing quantitative skill and reasoning ability. Topics are chosen by the instructor and may include but are not limited to: logic, problem solving, and data analysis, mathematics of social choice, geometry, financial mathematics, infinity, topology, and probability.Prerequisites: College math placement level or successful completion of Math 0900 or 0902 or 0980 or 1031 or 1130 or 1140 with grade of C or better.Please Note: If you have taken a 1000 level Math Course (or higher) from another institution, and have submitted your official transcript, please contact the Records and Registration Department in order to register for this course.
MATH 1031 Math for Elementary Education I 304

This is the first of a two-course sequence designed for prospective elementary education majors. Students will develop a deep understanding of elementary mathematics and the ability to effectively communicate mathematical ideas. The course focuses on heuristics for mathematical problem solving in the contexts of place value and number systems; operations with whole numbers, integers, fractions, and decimals; and rates, ratios, proportions, and percentages. Prerequisites: College math placement level or successful completion of Math 0900 or 0902 or 0980 or 1010 or 1130 or 1140 with a grade of C or better. Please Note: If you have taken a 1000 level Math Course (or higher) from another institution, and have submitted your official transcript, please contact the Records and Registration Department in order to register for this course.

MATH 1032 Math for Elementary Education II
3
04
This is the second of a two-course sequence designed for prospective elementary education majors. Students will develop a deep understanding of elementary mathematics and the ability to effectively communicate mathematical ideas. The course focuses on heuristics for mathematical problem solving and reasoning in the contexts of geometry, measurement, probability, and statistics. Prerequisites: Successful completion of Math 1031 with grade of $C$ or better.

MATH 1090 Statway Statistics II
402,04
This is the second course in a two-course sequence. Students in this course are required to have taken the preceding course, Math 0990 in the previous semester. Topics for both courses include concepts and methods of statistics with an emphasis on data analysis. Topics include methods for collecting data, graphical and numerical descriptive statistics, correlation, simple linear regression, basic concepts of probability, confidence intervals and hypothesis tests for means and proportions, and chi-square tests.
$\begin{array}{llll}\text { MATH } & 1130 & 3 & 3\end{array}$
This is an introductory course in descriptive statistics, probability, random variables, and inferential statistics. Topics include exploratory data analysis, measures of central tendency, measures of dispersion, linear regression, basic probability, binomial and normal distributions, the central limit theorem, confidence intervals and hypothesis tests. Additional topics may include inferential procedures for two populations, analysis of variance and chi-squared tests. Prerequisites: College math placement level or successful completion of Math 0900 or 0902 or 0980 or 1010 or 1031 or 1140 with grade of $C$ or better.

| POLS | 1700 | World Politics | 3 | 05,08 |

This course is a general introduction to international relations with emphasis on great power politics, international organizations, security studies, international political economy, and global environmental politics.

MATH 1140
Finite Mathematics
3
04
This course is designed primarily for the non-science major. Several business and financial applications are covered. These applications may include systems of equations, linear programming (maximizing profit, minimizing cost), the interdependence of different sectors in an economy, and interest rates as they pertain to credit cards, short-term loans, and mortgages. Although some computer applications may be included, no prior experience is necessary. Additional topics may include: introductory statistics and probability, combinatorics (the number of ways of arranging objects), game theory, coding, and Markov chains (multi-step games/decisions). Prerequisite: Placement into Math 902 or successful completion of Math 0900 or 0901 or 0980 or 1010 or 1031 or 1130 with grade of C or better.Please Note: If you have taken a 1000 level Math Course (or higher) from another institution, and have submitted your official transcript, please contact the Records and Registration Department in order to register for this course.

MATH $1150 \quad$ College Algebra
3
04
This college-level course continues the study of algebra conducted in the developmental algebra courses. Topics include polynomial, rational, inverse, exponential, and logarithmic functions and their applications. Additional topics include systems of non-linear equations, systems of linear equations, and matrices. Prerequisites: College math placement level or successful completion of Math 0970 or 0980 with grade of C or better

MATH 1170
Pre-Calculus
4
04
This is a comprehensive course in trigonometry and extended topics in algebra. Topics include trigonometric functions and their graphs, inverse trigonometric functions and their graphs, trigonometric identities and equations, applications of trigonometry, conic sections, the binomial theorem, and sequences and series. Additional topics may include mathematical induction, combinations and permutations, and systems of nonlinear equations. Prerequisites: College math placement level or successful completion of Math 1150 with grade of C or better

MATH 1180 College Algebra and Pre-Calculus
5
04
This course is a very accelerated combination of Math 1150 and 1170 in one semester. It is recommended for strong students or can be used also as a refresher course for students who have successfully completed those two courses in the past. Topics include polynomial, rational, exponential, logarithmic, trigonometric, inverse trigonometric functions, vectors, conic sections, and sequences and series. Additional topics may include polar coordinates or parametric equations.

| Subject | Course No. | Title | Credits | Goal Area |

| MATH | 1200 | Calculus Survey | 3 | 04 |

This course in differential and integral calculus is designed for those students who require only one semester of calculus. The emphasis is on methods and applications of calculus rather than on theory, with the applications primarily from business. Students who wish to take more than one semester of calculus should enroll in Math 1221. Prerequisites: College math placement level or successful completion of Math 1150 or Math 1180 with grade of C or better

MATH 1210 Applied Statistics
$4 \quad 02,04$
This course provides students with practical statistical tools for analyzing a variety of data. Students will learn how to choose which statistical test to implement, how to apply computer software to conduct tests, and how to interpret the statistical results. Topics include discussion of frequency distributions, measures of central tendency and variation, exploratory data analysis, probability, hypothesis testing and inferences about proportions and means (one and two populations), analysis of variance, correlation, linear regression, and nonparametric statistics. Prerequisites: College math placement above Math 1150 or successful completion of Math 1150 or higher with grade of C or better.

MATH 1221 Calculus I
$5 \quad 04$
This course is a thorough treatment of differentiation and an introduction to integration. Topics include the definition of derivative, limits and continuity, differentiation, applications of the derivative, definite and indefinite integrals, the Fundamental Theorem of Calculus, techniques of integration, and applications of integration. Prerequisites: College math placement level or successful completion of Math 1170 or Math 1180 with grade of C or better

MATH 1222 Calculus II
$5 \quad 04$
This course continues the study of the definite and indefinite integrals and leads to a study of improper integrals and infinite series. Topics include advanced techniques of anti-differentiation, numerical integration techniques and error bounding, applications of the integral, improper integrals, an introduction to differential equations, infinite series, parametric equations, and polar coordinates.Prerequisites: Successful completion of Math 1221 with grade of $C$ or better

MATH 1990 Math Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

MATH 2000 Discrete Mathematical Structures 4 n/a
This course includes topics of the mathematical methods of computer science: logic, combinatorics, recursion, complexity analysis, graph theory, Boolean algebra, and mathematical induction. Prerequisite: Math 1221

This is a calculus-based first course in the study of probability and statistics. Topics include descriptive statistics, general probability theory, random variables, sampling distributions, estimation, and hypothesis testing. Additional topics may include two-sample inference, linear regression, analysis of categorical data, analysis of variance, and quality and reliability.Prerequisite: Math 1222 with grade of $C$ or better

MATH 2220 Calculus III
5 04

Topics in this course include solid analytic geometry, vectors in space, scalar and vector products, vector functions and derivatives/integrals, multi-variable functions, partial derivatives, alternative coordinate systems, and double and triple integrals. The geometry of space curves, line and surface integrals, cural and gradient divergence, and Stokes' theorem are also included. Emphasis will be on learning relevant mathematical methods.Prerequisites: Successful completion of Math 1222 with a grade of C or better
$\begin{array}{lll}\text { MATH Linear Algebra } 2300 & 3\end{array}$
This course includes vectors and vector spaces, matrices, matrix algebra, linear systems of equations, determinants, linear transformations, eigenvalues and eigenvectors.Prerequisites: Successful completion of Math 1222 with grade of C or better

MATH 2400 Differential Equations 304
The content of this course covers first and second ordinary differential equations with applications, higher order linear equations, constant coefficients, differential operators, variation of parameters, power series methods and Laplace transforms. Prerequisites: Successful completion of Math 1222 with grade of $C$ or better

MLT Clinical Laboratory Basics 1000 n/a
This course will introduce the student to the general role of health care provider as well as the specific role of the Medical Laboratory Technician. Basic aspects of medical terminology, laboratory safety, quality control, microscopy, pipetting techniques, laboratory mathematics, and venipuncture technique also will be presented. Prerequisite: Admission to MLT Program

MLT 1100 Clinical Urinalysis/Body Fluids 2 n/a
This course will include lab skills such as pipetting, microscopy and centrifugation; review of the anatomy and physiology of the kidney, role of the kidney in disease; physical, chemical and microscopic properties of urine; and clinical correlation of lab results. Other body fluids and seminal fluid analysis will be reviewed in the lecture portion and laboratory portion.Prerequisite: Admission to the MLT programStrongly Recommended: BIOL 1001 and BIOL

MLT 2050 Clinical Hematology 4 n/a
The course will include development, normal and abnormal characteristics of the cellular elements of the blood; the basic techniques and instrumentation utilized in the hematology laboratory; the theory and techniques of coagulation studies; and the clinical correlation of all procedures. This course will include development, normal and abnormal characteristics of the cellular elements of blood; the basic techniques and instrumentation utilized in the hematology laboratory; the theory and techniques of coagulation studies; and the clinical correlation of all procedures.Prerequisite: Admission to the MLT Program MLT 1000, 1100 and 1200

MLT 2080 Clinical Microbiology 4 n/a
This course covers the isolation, identification, and significance of clinically associate bacteria, mycobacteria, fungi, and parasites.Prerequisite: Admission to the MLT Program and Biol 1001 or Biol 1101

MLT 2100 Clinical Chemistry 4 n/a
This course introduces the basic principles, procedures, and correlations of the clinical chemistry laboratory. The theory of basic laboratory instrumentation and procedures will be discussed and practiced. Prerequisite: Admission to the MLT Program; MLT 1000 and 1200 and Chem 1062.

MLT Clinical Immunohematology 2150 n/a
This course will include principles of immunohematology and transfusion service procedures, including blood typing, antibody screening, compatibility testing, antibody identification, problem resolution, hemolytic disease of the newborn, and transfusion therapy. (two hours lecture, three hours lab) Prerequisite: Admission to the MLT Program; MLT 1250 and MLT 2050.

Subject Course No.
$1 \mathrm{n} / \mathrm{a}$
The course provides the student with experience in phlebotomy skills.Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses

MLT 2320 Applied Hematology 2 n/a
This course is designed to give the student clinical experience in the area of hematology and body fluids. Prerequisite: Admission to the MLT Program. Completion of MLT Didactic Courses

MLT 2330 Applied Coagulation
1 n/a
This course is designed to give the student clinical experience in the area of coagulation.Prerequisite: Admission to the MLT Program; Completion of MLT Didactic courses

MLT 2340 Applied Urinalysis 1 n/a
This course is designed to give the student clinical experience in the area of urinalysis. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses

MLT 2350 Applied Microbiology 2 n a
The course is designed to give the student clinical experience in the area of microbiology. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses

MLT 2360 Applied Immunohematology 2 n/a
This course is the application of immunohematology policies and procedures in the clinical transfusion service setting. Students will perform pretransfusion compatibility testing in accordance with the American Association of Blood Bank Standards. Prerequisite: Admission to the MLT Program; Completion of MLT Didactic Courses

## MLT 2380 <br> Applied Chemistry <br> 2 n/a

The course provides the student with experience in the clinical chemistry laboratory as well as study in the theory and principles involved. Prerequisite: Completion of MLT Didactic Courses
$\begin{array}{llll}\text { MUSC } 1130 \text { College Choir } & 1 & 06\end{array}$
This course includes the study and performance of choral repertoire. Through active learning students will participate in collaborative artistic study culminating in choral performance of works from a variety of cultures and historical periods. The day section of choir meets twice per week and the night section of choir meets once per week. May be repeated for credit.

This course includes the study and performance of choral repertoire. Through active learning students will participate in collaborative artistic study culminating in choral performance of works from a variety of cultures and historical periods. The day section of choir meets twice per week and the night section of choir meets once per week.

MUSC 1150 Chamber Singers 1 n/a
This course is a select auditioned group of singers which will perform a wide spectrum of choral repertoire from Madrigals to Vocal Jazz. Auditions will be held early fall semester for the yearly commitment. This group meets twice per week. May be repeated for credit.
$\begin{array}{llll}\text { MUSC } & 1160 & \text { Large Instrumental Ensemble } & 1\end{array}$
This course is an instrumental performance ensemble that plays a variety of musical literature. Enrollment is open to all students who are able to minimally play their instrument at a High School level. The ensemble is open to all students who meet this criterion. Students should provide their own instrument. Percussionists should provide their own sticks/mallets. This group meets once/week.May be repeated for credit.NOTE: Student should be able to minimally play instrument at a High School leveINOTE: Student should be able to minimally play their instrument at a High School level

MUSC 1161 Community Band 0 n/a
This course is an instrumental performance ensemble that plays a variety of musical literature. Enrollment is open to all students who are able to minimally play their instrument at a High School level. The ensemble is open to all students who meet this criterion. Students should provide their own instrument. Percussionists should provide their own sticks/mallets. This group meets once/week.

This course is an instrumental performance ensemble that plays a variety of jazz literature. Enrollment is open to all students who are able to read written musical notation for their instrument. Ensemble is open to all students. Students should provide their own instrument. This group meets once per week. May be repeated for credit. NOTE: Student should be able to minimally play instrument at a High School level

MUSC 1171 Community Jazz Ensemble 0 n/a
This course is an instrumental performance ensemble that plays a variety of jazz literature. Enrollment is open to all students who are able to read written musical notation for their instrument. Ensemble is open to all students. Students should provide their own instrument. This group meets once per week.

This course is a small ensemble performance opportunity. An ensemble work may be made up of strings, percussion, winds, guitars, voice, or any instrumental grouping that may be possible depending on need and interest. Depending on their primary instrument, a student will be placed in a section of this course that corresponds to their instrument. The ensemble will play a variety of composed and/or improvised literature. Primarily for AFA music students, the course is open to all who have the ability to read musical notation and perform competently. However, permission for placement into the course is required. Music faculty must be consulted for placement in the appropriate section. Weekly rehearsals and end-of-semester performance is required. Additional rehearsals may be required. May be repeated for credit.

MUSC 1190 Garage Band
206
Ensemble course devoted to various musical styles found in contemporary rock and hip-hop (punk/blues/metal/rap/etc). Open to all majors, Garage Band (as in, start a band that plays blues/rock/metal/punk type music). Students can play any instrument, but bass/drums/electric guitar would be the focus. Coach to play cover songs and develop basic songwriting skills. Already established bands welcome to register.

MUSC $1200 \quad$ Fundamentals of Music
306
This general course in music fundamentals includes basic theory, sight singing, piano keyboard, creative activity, and student demonstration. Through the understanding and application of the elements of music, students will be able to distinguish cultural styles and genres.

MUSC 1220 Survey of Western Music 30 06,08
This general cultural course is designed to develop an understanding and enjoyment of music. It includes a study of music in western civilization. In addition some world music topics will be addressed. Emphasis is upon class listening supplemented by historical background. Live concert attendance may be required.

MUSC 1241 Music Theory I 306
This course is the first of a four semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory I and Music Theory II are: notation, intervals, rhythm, scale patterns, melodic forms, harmonic conventions, four-part chorale structure, formal structure (binary, ternary). While this course is open to all, to be successful in this course, entering students must have a solid knowledge of note names, scale patterns and note rhythms such as that learned in MUSC 1200 Fundamentals of Music. This course is required for AFA music majors.
$\begin{array}{lll}\text { MUSC } 1242 \text { Music Theory II } & 306\end{array}$
A continuation of Music Theory I, this course is the second of a four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory I and Music Theory II are: notation, intervals, rhythm, scale patterns, melodic forms, harmonic conventions, four-part chorale structure, formal structure (binary, ternary). This course is required for AFA music majors.

| MUSC | 1251 | Ear Training and Sight Singing I | n/a |
| :--- | :--- | :--- | :--- | :--- |

This course is the first of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. While this course is open to all, to be successful in this course, entering students must have a solid knowledge of note names, scale patterns and note rhythms such as that learned in MUSC 1200 Fundamentals of Music. This course is required for AFA music majors.

MUSC 1252 Ear Training and Sight Singing II
$2 n / a$
This course is the second of a four-semester series of courses that trains students to read music immediately and accurately at sight and to recognize and play sound patterns, intervals, and rhythms. Students will learn to take musical dictation, sing melodies, rhythm patterns and intervals at sight, and play patterns, rhythms, and intervals on the keyboard without hesitation. This course is required for AFA music majors.
$\begin{array}{llll}\text { MUSC } 1300 & \text { 06,08 }\end{array}$
This course teaches music primarily from non-Eurocentric cultures which may include but is not limited to Indian, Indonesian, Chinese, Japanese, Middle Eastern, African, Native American, and African American. Through their studies of the diversity of world music, students will develop a broader understanding and appreciation of other cultures.

MUSC 1350 History of Rock 'n Roll 306
This course may include but is not limited to early American music, jazz, American musical theater, pop, rock, and rap. The history of popular music in Western Culture will be presented. Students will learn to identify the music styles contained under the broad umbrella of Rock 'n Roll. Students will also learn about the historical, social, cultural and political influences on popular music.

MUSC 1501 Class Guitar I 206
This course is open to all students. It is designed for beginners or for guitar students wishing to fill in gaps in their knowledge from previous musical experience. It covers basic guitar techniques and musicianship skills used in a variety of different styles of music. Students will also study different types of written musical notation. It also introduces improvisation and song writing. Student must provide their own guitar (preferably acoustic) in good playing condition.

MUSC 1502 Class Guitar II
206
This course is for the advanced beginning guitar student who has completed MUSC 1501, Class Guitar I, guitar students wanting to fill in gaps in their knowledge from previous musical experience, or wanting to continue their guitar studies in a classroom environment. To be successful in this class, the student should have completed MUSC 1501 Guitar Class I or be at the appropriate skill level.It covers guitar techniques and musicianship skills used in a variety of different styles of music. Students will also study different types of written musical notation, as well as improvisation and song writing. Student must provide their own guitar (preferably acoustic) in good playing condition.

Subject Course No. Title
MUSC 1510 Applied Music: Guitar
1
This course is open to all students and consists of private guitar instruction lessons of $1 / 2$ hour per week (during fall and spring semesters). Students, beginners through advanced, can, in consultation instructor, pick areas of focus depending on their tastes and needs. These may include: guitar technique (i.e. chords, scales finger-picking) theory, reading, ear-training, analysis, improvisation, repertoire development and interpretation. This course may be repeated for credit. Special Music Fees apply.Student must provide their own guitar (preferably acoustic) in good playing condition.

MUSC 1600 Class Voice 206
This course is devoted to basic vocal techniques and skills. Students will learn different styles of song from various cultures and historical periods and will learn to evaluate the fundamentals of the creative process as expressed through vocal performance. This course is open to non-music majors.

MUSC 1610 Applied Music: Voice 106
This course is private voice instruction with lessons of one-half hour per week. Students will expand upon basic vocal technique and skills and will extend their technical ability and style interpretation skill through vocal repertoire from various cultures and historical periods. Students will extend their ability to interpret and create artistic expression through song. This course may be repeated for credit. Special Music Fees apply. MUSC 1600 Class Voice strongly recommended before taking this course.

MUSC 1801 Class Piano I 206
This course offers basic piano instruction and technique for the student with no previous training in piano. Students will learn basic piano techniques and skills and be introduced to different playing styles. Students will be introduced to music and history of different cultures as related to the piano.

MUSC 1802 Class Piano II 206
The purpose of the course is to build upon skills and musicianship begun in Class Piano I, allowing the student to continue gaining a better understanding of playing the piano and a greater appreciation of music in general. Both technique and musicianship will be addressed. Scales and/or exercises and music theory will be part of every class lesson. To be successful in this class, the student should have completed MUSC 1801 Class Piano I or be at the equivalent skill level.

MUSC 1810 Applied Music: Piano
106
This course is private piano instruction with lessons of $1 / 2$ hour per week (during fall and spring semesters). Students will expand upon basic piano technique and skills and will extend their technical ability and style interpretation skill through piano repertoire from various cultures and historical periods. Students will extend their ability to interpret and create artistic expression through piano literature and performance. This course may be repeated for credit. Special Music Fees apply.

This course is private instruction on a stringed instrument (violin, viola, cello, bass) lessons of $1 / 2$ hour per week (during fall and spring semesters). Students will expand upon basic technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.This course may be repeated for credit. Special Music Fees apply.

MUSC 1850 Applied Music: Percussion 106
This course is private instruction on percussion instruments (e.g., drums, xylophone, marimba, or tympani) lessons of
$1 / 2$ hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.This course may be repeated for credit. Special Music Fees apply.

MUSC 1860 Applied Music: Brass 106
This course is private instruction on a brass instrument (e.g., trumpet, trombone, French horn, baritone, tuba) lessons of $1 / 2$ hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.This course may be repeated for credit. Special Music Fees apply.

MUSC 1870 Applied Music: Woodwinds 106
This course is private instruction on a woodwind instrument (saxophone, flute, clarinet, oboe or bassoon) lessons of 1/2 hour per week (during fall and spring semesters). Students will expand upon their technique and skills, extending their technical ability and style interpretation through repertoire from various cultures and historical periods. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on the instrument. Student must provide their own instrument.This course may be repeated for credit. Special Music Fees apply.

MUSC 1990 Music Special Topics 1-4 $\quad$ n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

This course is private instruction for advanced students on their instrument (voice, piano, guitar, brass, woodwinds, strings, percussion) with lessons of one hour per week. Students will extend their ability to interpret their musical performance and create artistic expression through solo repertoire performed on their instrument. Students' advanced technical expertise will be incorporated into artistic expression and interpretation of repertoire that challenges their technique and demands artistic finesse and critical analysis. Student must provide their own instrument.This course may be repeated for credit. Special Music Fees apply. Admission to this course is by permission only. PLEASE CONTACT THE INSTRUCTOR FOR PERMISSION TO REGISTER.

MUSC 2170 History of Music I: Medieval Through Classical Eras 3 06,08
This course is a historical survey primarily of music rooted in the European tradition. The timeframe of study will focus on eras referred to as the Medieval, Renaissance and Baroque periods with some references to the roots of western music in ancient cultures. Music will be studied from the viewpoints of musical styles, genres, performance practices, as well as cultural and historical contexts of those eras.

MUSC 2180 History of Music II: Romantic Era to the 21st Century 3 06,08
This course is a historical survey primarily of music rooted in the European traditions. The timeframe of study will focus on eras referred to as the Romantic and late Romantic periods through the 20th century. Music will be studied from the viewpoints of musical styles, genres, performance practices, as well as cultural and historical contexts of those eras.

MUSC 2241 Music Theory III 306
A continuation of Music Theory I \& II, this course is the third of a four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory III and Music Theory IV are: Sixth, ninth, eleventh, thirteenth chords and their variants; counterpoint (two-voice), formal structures (fugue, sonata allegro, rondo, variation); pre-20th century tonality and 20th century atonality; music composition not based in tonal sound. This course is required for AFA music majors.

MUSC 2242 Music Theory IV 306
A continuation of Music Theory III, this course is the final in four-semester series of courses that study the theoretical and structural basis of music. Among the major topics covered in Music Theory III and Music Theory IV are: Sixth, ninth, eleventh, thirteenth chords and their variants; counterpoint (two-voice), formal structures (fugue, sonata allegro, rondo, variation); pre-20th century tonality and 20th century atonality; music composition not based in tonal sound. MUSC 2970 Music Appreciation Field Trip 106
This course consists of a series of concert or music experiences in the Twin Cities area or another cultural center, e.g. New York, Washington, D.C., to experience a variety of musical performances, lectures, demonstrations, and facilities. Students will study and experience the components that go into live music performances. In addition to live performances, students may tour architecture, museums and galleries to better analyze and understand the background against which the musical performances take place. Special fees may be applied. This course may be repeated for credit.Students will need to provide their own transportation to area concerts, museums or other venues.

NSCI 1000 Conceptual Physics
4
03
This course is a combined lecture and laboratory course designed for people who want to learn about the fundamental laws and principles that form the basis of the working of the physical universe. This course helps the student understand and appreciate how and why a wide range of common and everyday physical phenomena occur.

Topics include: laws of motion, work, energy, momentum, fluids, heat, vibration, wave motion, electricity, magnetism, and light. Some algebra is used in the presentation, so a mathematical preparation equivalent to Math 0902 is recommended. (3 hours lecture, 2 hours lab)

NSCI $1010 \quad$ Science of Disaster Workshop I
1
03
These courses examine the scientific mechanisms and basis of hazards that are of local, regional, national and global concern for public health, safety and environmental impact. Scientific background of distributions, risks, and case histories for each major hazard will be presented. Topics are divided as follows: 1010 Disasters related to the Lithosphere (rigid portion of earth's surface); 1020 Disasters related to the Hydrosphere (water) and Atmosphere (air); 1030 Disasters related to the Biosphere (realm where life exists), including those societally-induced. This course includes a lab-like experience. Take-home final exam and/or paper/projects required.

This course takes a big picture look at the universe as a whole. Topics include history of astronomy, origin and features of the planets and the Solar System, the lives and deaths of stars, cosmology and the fate of the universe. It also covers recent discoveries and current topics in astronomy. The laboratory component provides a variety of methods to more fully investigate the process of astronomy. The course meets requirements as a natural sciences lab course under Goal Area 3 of the Minnesota Transfer Curriculum. (3 hours lecture/week, 2 hours lab/week)

NSCI 1060 The Solar System 3
This course provides an introduction to astronomy with emphasis on our Solar System. Topics include the origin, structure, and history of the Solar System; the properties of light; the function and use of telescopes, understanding the processes that have shaped the planets, their moons and ring systems; comets, asteroids and other space debris. Recent discoveries and current topics from the exploration of the Solar System are also discussed. This course includes a lab-like experience. (3 hours lecture; satisfies MnTC Goal Area 3)

An optional course laboratory course designed to complement The Solar System lecture class. It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, internet exercises, videos and observational sessions may be used within the course. ( $2 \mathrm{hrs} /$ week)Prerequisite: Prior or concurrent enrollment in Phys/NSci 1060 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1060, you must obtain instructor permission and complete appropriate paperwork for pre-requisite override.

NSCI $1070 \quad$ Concepts of the Stars and Universe 3

This course provides an introduction to astronomy with an emphasis on stars and galaxies. Topics include understanding the Sun as a star; revealing the messages hidden in starlight; stellar birth, maturation, and death; black holes, white dwarfs, pulsars, quasars, and supernova explosions; the Milky Way and other galaxies; the origin and the fate of the universe. Current topics and discoveries from stellar astronomy and cosmology are also discussed. This course includes a lab-like experience. (3 hours lecture; meets MnTC Goal Area 3 requirements)

Subject Course No. Title
NSCI $1071 \quad$ Stars and the Universe Lab
1
An optional course laboratory course designed to complement the Concepts of Stars and the Universe lecture class, It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, Internet exercises, videotapes and observational sessions may be used within the course. (2 hrs/week)Prerequisite: Prior or concurrent enrollment in Phys/NSci 1070 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1070, you must obtain instructor permission and complete appropriate paperwork for pre-requisite override.

NSCI Physical Geology 1100 4 03
A course examining the earth ${ }^{7}$ s formation, composition, structure and natural systems. Using the process of science, learners will explore the earth ${ }_{7}$ s internal and external processes and how they shape the surface of the earth. Topics include: geologic time, plate tectonics, rock and mineral identification, introduction to topographic and geologic maps, surficial processes, climate change and environmental concerns. Course is open to all students. (3 hours lecture, 3 hours lab) 4 Credits.

NSCI $1110 \quad$ Minnesota's Natural History
403,10
This course is a team-taught, field-based introduction to the flora, fauna, ecology, and geologic development of Minnesota. A series of in-class sessions will prepare students for recognition and identification of plants, animals, habitats, and geologic features and for the integration of these biotic and abiotic components of ecosystems. This course will include an examination of natural resource issues and policies in the context of Minnesota's politics and economy. Two weekend field trips are mandatory. These field trips will begin on Friday afternoon and end on Sunday afternoon or early evening. This course fulfills lab requirement for Goal Area 3. (3 hours lecture, 3 hours lab)

NSCI 1120 Meteorology
403
This course is designed for people who desire to learn about the weather. This course helps the student learn to observe and interpret the sky, to read weather maps, and to understand the sequence of meteorological phenomena. The topics to be covered include: air temperature, humidity, condensation, clouds, air pressure, wind, atmospheric circulation, weather forecasting, computer modeling, thunderstorms, tornadoes and hurricanes. (3 hours lecture, 2 hours lab)
$\begin{array}{llll}\mathrm{NSCI} & 1140 \text { Historical Geology } & 4 & 03,10\end{array}$
A temporal survey of the development of Earth as we know it today, and the evolution of life as deciphered from the sedimentary rock and fossil record. By using the process of science to examine how the Earth and life have changed through the geologic past we can begin to get a glimpse into the effect which humans may have on it now and in the future. Topics include: principles of geology, sedimentary rocks, fossil identification and classification, plate tectonics, sea level change, geologic time, topographic and geologic maps, evolution of life, climate change, hominid development and mass extinctions. Course is open to all students. (3 hours lecture, 3 hours lab) 4 credits
$\begin{array}{llll}\text { NSCI } 1170 & 2 & 2 & \text { 03,10 }\end{array}$
Come explore the glacial geologic history of Minnesota! We will also examine its influence on some of the state ${ }_{ך} s$ economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, formation, climate change and destruction of continental ice sheets, sedimentary processes, recognition of erosional and depositional glacial landforms, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits

## $\begin{array}{llll}\text { NSCI } 1180 & \text { Minnesota Field Geology Series: Caves, Karst and Ancient Seaways } 20,10\end{array}$

Come explore Minnesota's caves and ancient ocean floors! This course will examine the hydrogeologic processes involved in cave formation and the development of karst topography. In addition, we will evaluate the evidence of ancient oceans in Minnesota using the sedimentary and fossil record. Additional topics include: plate tectonics, geologic time, hydrologic cycle, rock, mineral and fossil identification, weathering and erosion, sealevel change, marine sedimentary processes. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students.

NSCI 1190 Minnesota Field Geology Series: Fluvial Geology 2 03,10
Come explore the geologic history of Minnesota ${ }_{\rceil}$s rivers. We will examine the development of the Mississippi, Minnesota, Red, and St. Croix, and Whitewater Rivers and the influence of their development and present geomorphology on some of the state ${ }_{7} s$ economic, environmental and political issues. Topics include: geologic time, plate tectonics, hydrologic cycle, rock cycle, rock classification and identification, weathering and erosion, drainage patterns, flooding, fluvial landform recognition, meandering, wetlands, topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Four-day field trip around Minnesota is mandatory. Course is open to all students. 2 credits

1200 Oceanography $\begin{array}{lll}\text { NSCI } 103,10\end{array}$
This course is an interdisciplinary survey of the biological, chemical, physical and geologic processes at work in the world $_{7}$ s oceans. Using the process of science learners will examine the interplay between these processes and the implications of these interactions for life on Earth, the Earth ${ }_{7} s$ climate and marine environments. Topics may include waves, tides, seafloor sediments, marine biology, seawater chemistry, plate tectonics, ocean currents, El ni $\pm 0$, productivity and dead zones, sea level change, coastal processes and effects of $\operatorname{man}_{7} s$ influence on oceans. Course is open to all students. 3 Credits (3 hours lecture)

1201 Oceanography Lab $\begin{array}{llll}\text { NSCI 03,10 }\end{array}$
This course is designed to complement GEOL 1150, Oceanography. The 3 hour lab sessions will include group and individual projects that supplement concepts and topics from oceanography lecture. Learners will collect their own data and use oceanographic data from ocean science databases. Lab topics that will be covered include plate tectonics, marine sediments, temperature and salinity, water masses and ocean circulation, mapping the seafloor, marine ecosystems, coastal erosion, climate change, primary productivity, el ni $\pm 0$ and biogeochemical cycling. Course is open to All Students (3 hours lab) 1 credit Geology

Come explore the oldest rocks in Minnesota! This course will examine the earliest geologic history of Minnesota, which includes greenstone belts, iron ore deposits, and flood and pillow basalts. Topics include: geologic time, plate tectonics, rock cycle, rock classification and identification, Mid-continental rift, intrusive and extrusive igneous processes and products, metamorphism and mineral resources, and topographic map usage. This course is a field experience including observations, hypothesis, predictions, and evaluation of scientific data and results. Three-day field trip around Minnesota is mandatory. Course is open to all students.
$\begin{array}{llll}\text { NSCI } & 1990 \text { Natural Science Special Topics } & \text { 1-4 }\end{array}$
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

NURS 1001 Nursing Assistant/Home Health Aide 4 n/a
The Nursing Assistant/Home Health Aide Certificate course prepares the student to provide physical nursing care to individuals in long term care facilities, hospitals, board and care homes. Attendance in classroom, lab and clinical are mandatory per MN Department of Health regulations. Students completing this course are ready to take the Pearson VUE Nursing Assistant Competency Test. After passing this test students can be placed on the Minnesota Department of Health Nursing Assistant Registry

NURS 1990 Nursing Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

NURS 2010 Nursing Summer Clinical Internship 1 n/a
This elective clinical internship course provides learning opportunities to apply nursing theory to nursing practice. The focus will be on gaining depth of understanding of the role of the registered nurse as well as strengthening nursing skills in the clinical setting. Students will be precepted by nurses in the clinical practice setting and by nursing faculty. Prerequisite: Successful completion of 3rd and 4th semester nursing courses: NURS 2700 or 2720, NURS 2750, NURS 2800, NURS 2820, NURS 2850 with a grade of C or better in each course.

NURS 2700 Foundations of Nursing - Health Promotion 9 n/a
This course introduces the student to the role of the professional nurse. The emphasis on health promotion across the lifespan includes learning about self-health, as well as holistic client health practices. Students learn to access and apply research evidence to guide safe preventative care. The student will incorporate communication and growth and development theory in a caring and culturally sensitive manner. The student will work as an ethical member of multi-disciplinary teams giving and receiving feedback about performance and use reflective thinking about their practice. Within the context of the nursing process, populations studied will include children, adults, older adults and the family experiencing a normal pregnancy. Prerequisites: Admission to Nursing program, BIOL 2100, BIOL 2111, PSYC 1250 and COMM 1110 Co-requisite: NURS 2750Strongly Recommended to be taken prior to or concurrently: BIOL 2112

Subject Course No. Title
NURS 2720 Transition to the Role of the Professional Nurse
4 n/a
This course is designed to expand the knowledge and skills of the LPN as they transition to the professional role within nursing. Emphasis is placed on health promotion through the lifespan and incorporates theories related to evidence-based practice, quality and safety, communication, collaboration, clinical decision-making/reasoning, informatics, assessment, caring, and health- illness continuum. Prerequisites: Admission to the Nursing Program: LPN-Mobility Option, BIOL 2100, BIOL 2111, PSYC 1250, and COMM 1110. Co-requisite: NURS 2750Strongly Recommended to be taken prior to or concurrently: BIOL 2112 concurrently

NURS 2750 Nutrition and the Role of the Professional Nurse 2 n/a
This course introduces the student to the role of the nurse in promoting and supporting nutritional health. Emphasis is on the role nutrition plays in health promotion/prevention of illness, recovery from acute illness and/or management of chronic illness. Students learn to access evidence to support healthy nutritional choices that reduce risk factors for disease and/or illness across the lifespan. Students explore how culture, ethnicity, socio-economic status, nutritional trends and controversies, and integrative therapies influence the nutritional health of the client. Prerequisites: Admission to Nursing program, BIOL 2100, BIOL 2111, PSYC 1250, and COMM 1110Co-requisites: NURS 2700 or NURS 2720Strongly Recommended to be taken prior to or concurrently: BIOL 2112

NURS 2800 Chronic and Palliative Care 7 n/a
This course focuses on the nursing care of clients experiencing chronic illness and/or end of life. Emphasis is placed on understanding the lived experience of clients and families. Ethical issues related to advocacy, self-determination, and autonomy are explored. Evidence-based practice is used to support appropriate focused assessments and management of care of clients experiencing concurrent illnesses/co-morbidities.Prerequisites: BIOL 2112, NURS 2700 or 2720, and NURS 2750Co-requisites: NURS 2850 and 2820Strongly Recommended to be taken prior to or concurrently: SOC 1110

NURS 2820 Pharmacology and the Role of the Professional Nurse 3 n/a
This course introduces theoretical concepts that enable students to provide safe and effective care related to pharmaceuticals and natural products to diverse clients across the lifespan. A framework is presented for approaching the study of pharmacotherapeutics including pharmaceutical research and regulation, quality and safety, major drug classifications, and clinical management. Prerequisites: Admission to the Nursing Program, BIOL 2112, NURS 2700 or 2720, and NURS 2750Co-requisites: NURS 2800 and 2850Strongly Recommended to be taken prior to or concurrently: SOC 1110

NURS 2850 Applied Pathophysiology for Nursing I 2 n/a
This course introduces a holistic perspective of pathophysiological processes and the disruption in normal body function. Emphasis will be on objective and subjective manifestations of common chronic health problems resulting from environmental, genetic, and stress-related maladaptations to provide a foundation for nursing care. This course complements selected topics addressed in Chronicity and End of Life to provide a comprehensive understanding of disease processes. Prerequisites: Admission to the Nursing Program, BIOL 2112, NURS 2700 or 2720, and NURS 2750Co-requisites: NURS 2800 and 2820Strongly Recommended to be taken prior to or concurrently: SOC 1110

| NURS | 2900 | Acute and Complex Care | 7 | $\mathrm{n} / \mathrm{a}$ |

This course focuses on the nursing care of clients experiencing acute disruptions of health and/or end of life issues. Emphasis is placed on understanding and application of theory and skills required to provide nursing care to clients with complex and/or unstable conditions. Evidence-based practice is used to support appropriate focused assessments, and effective, efficient nursing interventions. Knowledge of life span, developmental factors, cultural variables and legal aspects of care guide the ethical decision making in delivery of care.Prerequisites: Completion of NURS 2800, 2820, 2850; SOC 1110Co-requisites: NURS 2920 and 2950Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or 1220

NURS 2920 Applied Pathophysiology for Nursing II 2 n/a
This course will facilitate ongoing critical thinking and analysis of pathophysiological concepts. Emphasis will be on interpretation and prioritization of data resulting from environmental, genetic, and stress-related maladaptations. This course complements the selected topics addressed in Acute \& Complex Care to provide a comprehensive understanding of disease processes.Prerequisites: NURS 2800, NURS 2820, NURS 2850; SOC 1110 Co-requisites: NURS 2900 and NURS 2950Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or PHIL 1220

NURS 2950 Nursing Leadership I 3 n/a
This course focuses on prioritization, delegation, and supervision of nursing care of clients across the lifespan. Healthcare policy, finance, and regulatory environment issues are analyzed. Emphasis is on planning, collaborating and coordinating care for individuals and groups across the care continuum. Prerequisites: NURS 2800, NURS 2820, NURS 2850 and SOC 1110 Co-requisites: NURS 2900 and NURS 2920Strongly Recommended to be taken prior to or concurrently: PHIL 1020 or PHIL 1220

PHIL 1010 Introduction to Philosophy 306
This course will introduce students to philosophical inquiry and major problems philosophers think about (including the nature of existence and the difficulty of saying whether any knowledge is certain). Students will be encouraged to question their basic beliefs and recognize their philosophical assumptions. No definite conclusions will be reached.

PHIL Ethics 1020 06,09
This course will introduce students to both the methods and issues connected with thinking about morality and ethical systems. Moral skepticism will also be examined. The aim of this class is to allow students to be more aware of their own ethical modes of thinking and the diversity of ways morality enters into human lives.

PHIL 1030 Eastern Religions 06,08
A study of Eastern religions (Hinduism, Buddhism, Confucianism, and Taoism). The emphasis of the course is to develop knowledge of these belief systems and how they deal with philosophical and spiritual questions.

| Subject | Course No. | Title | Credits | Goal Area |
| :--- | :--- | :--- | :---: | :---: |
| PHIL | 1040 | Western Religions | 3 | 06,07 |

This course is a study of Western religions including Judaism, Christianity and Islam. The emphasis of this course is to develop knowledge of these belief systems and how they deal with philosophical and spiritual questions.
$\begin{array}{lll}\text { PHIL Introduction to Logic } 1050 & 3\end{array}$
Investigation of the principles of deductive and inductive reasoning. The course includes Aristotelian logic, propositional and symbolic logic, validity, invalidity, and proofs. Since this course can be taken to fulfill the Mathematical-Logical Reasoning general education requirement, students should expect a Math-like course, with exercises, and exams.

PHIL 1060 Philosophy of Religion
3 06,08
This course will examine some of the basic questions in the field of philosophy of religion: Does God exist? Can God's existence or nonexistence be rationally proven? Can people be religious in light of the discoveries of science? What does it mean to be religious or nonreligious? Students will be encouraged to draw from their own experience and beliefs to critically think about the issues in this class.

PHIL Political Philosophy 1070 06,09
In this course we will examine issues in political philosophy through discussion of a range of primary western and non-western historical texts from ancient, medieval, and modern political writers. In the process of this examination of the historical development of political philosophy, a variety of topics will be explored such as: diverse theories of human nature and their implications for the role of government, the dynamics of power, the ideals of duty, justice, liberty and equality, and justifications for private property, profit, and civil disobedience.
$\begin{array}{llll}\text { PHIL } 1110 & \text { Informal Reasoning for Problem Solving } & 3 & \text { 02,09 }\end{array}$
This course studies methods of problem solving, utilizing principles that distinguish good reasoning from poor reasoning. Students will evaluate claims and arguments in natural language, applying the concepts of validity, truth, induction, deduction, and relevance. Students will develop clear thinking, and recognize, criticize and avoid common fallacies. Conceptual analysis will be applied to areas of practical reasoning, to human values, to develop science and media literacy, and to further student self-awareness.

PHIL 1200 Environmental Philosophy
306,10
Environmental Philosophy is concerned with developing rational and moral theories of dealing with our environmental concerns and discussing ways of putting them into practice. Using a variety of specific philosophical perspectives, we will examine the effects of population growth, ecosystem destruction, species extinction, pollution, climate change, resource extraction, agriculture, etc. on humans and the environment. We will develop ways of understanding relationships between humans and the environment and ways of acting on our responsibilities to the natural world and its inhabitants.

| PHIL | 1210 | Global Justice, Peace and Conflict |

This course acquaints the student with the major philosophical and ethical dilemmas arising from conflicts within and between societies, with an effort to promote critical awareness and communication around peace and global justice. From a range of philosophical perspectives, students will consider global conflicts, such as those arising from war, nationalism, immigration, environmental crises, discrimination, terrorism, and global poverty. Students will seek to understand such concepts as justice, tolerance, self-determination, equality, fairness, and governance, in an effort to draw conclusions about causes of and solutions to global crises. Students will consider personal and societal strategies for conflict resolution and nonviolent change.

PHIL 1220 Health Care Ethics
$302,06,09$
This course looks at the underlying assumptions that affect beliefs, practices, and policies in contemporary health care.Emphasis will be placed on understanding of the ethical principles and theories related to health care. A wide variety of health care issues and the challenges they present will be studied. Critical thinking skills will be emphasized in determining the best course of action for making ethical decisions in the health care field.
$\begin{array}{lllll}\text { PHIL } 1990 & \text { Philosophy Special Topics } & \text { 1-4 } \mathrm{n} / \mathrm{a}\end{array}$

## PHYS $1000 \quad$ Conceptual Physics <br> 4 <br> 03

This course is a combined lecture and laboratory course designed for people who want to learn about the fundamental laws and principles that form the basis of the working of the physical universe. This course helps the student understand and appreciate how and why a wide range of common and everyday physical phenomena occur.

Topics include: laws of motion, work, energy, momentum, fluids, heat, vibration, wave motion, electricity, magnetism, and light. Some algebra is used in the presentation, so a mathematical preparation equivalent to Math 0902 is recommended. (3 hours lecture, 2 hours lab)

PHYS 1030 Introduction to Physical Sciences 03
In this course, students will explore the basics of chemistry and physics by examining such concepts as understanding and measuring matter; atoms, elements, compounds and mixtures; physical and chemical properties of matter; states of matter; chemistry fundamentals, the periodic table; bonding and types of compounds; mixtures and solutions; chemical reactions; properties and sources of energy; heat; electricity, circuits, and power; properties of sound \& light; the behavior of sound \& light; forces and motion; work and simple machines. This course is intended for students who wish to complete a science course with a lab. It is not a prerequisite for any science or health programs. This course may not be used as a substitute for a chemistry course or a physics course. ( 3 hours lecture, 3 hours lab)Math 0901 (Intro to Algebra) or basic math skills are highly recommended.

Astronom
This course takes a big picture look at the universe as a whole. Topics include history of astronomy, origin and features of the planets and the Solar System, the lives and deaths of stars, cosmology and the fate of the universe. It also covers recent discoveries and current topics in astronomy. The laboratory component provides a variety of methods to more fully investigate the process of astronomy. The course meets requirements as a natural sciences lab course under Goal Area 3 of the Minnesota Transfer Curriculum. (3 hours lecture/week, 2 hours lab/week)

PHYS 1060 The Solar System
3
03
This course provides an introduction to astronomy with emphasis on our Solar System. Topics include the origin, structure, and history of the Solar System; the properties of light; the function and use of telescopes, understanding the processes that have shaped the planets, their moons and ring systems; comets, asteroids and other space debris. Recent discoveries and current topics from the exploration of the Solar System are also discussed. This course includes a lab-like experience. (3 hours lecture; satisfies MnTC Goal Area 3)

PHYS 1061 Solar System Lab 103
An optional course laboratory course designed to complement The Solar System lecture class. It will involve investigation of the process of astronomy through the analysis of astronomical data. Computer simulation software, internet exercises, videos and observational sessions may be used within the course. ( $2 \mathrm{hrs} /$ week)Prerequisite: Prior or concurrent enrollment in Phys/NSci 1060 AND Math 0902 or equivalent. If taking this course concurrently with PHYS 1060, you must obtain instructor permission and complete appropriate paperwork for pre-requisite override.

PHYS 1070 Concepts of the Stars and Universe 3
This course provides an introduction to astronomy with an emphasis on stars and galaxies. Topics include understanding the Sun as a star; revealing the messages hidden in starlight; stellar birth, maturation, and death; black holes, white dwarfs, pulsars, quasars, and supernova explosions; the Milky Way and other galaxies; the origin and the fate of the universe. Current topics and discoveries from stellar astronomy and cosmology are also discussed. This course includes a lab-like experience. (3 hours lecture; meets MnTC Goal Area 3 requirements)

| PHYS | 1120 | Meteorology | 4 | 03 |

This course is designed for people who desire to learn about the weather. This course helps the student learn to observe and interpret the sky, to read weather maps, and to understand the sequence of meteorological phenomena. The topics to be covered include: air temperature, humidity, condensation, clouds, air pressure, wind, atmospheric circulation, weather forecasting, computer modeling, thunderstorms, tornadoes and hurricanes. (3 hours lecture, 2 hours lab)

PHYS 1140 Energy Aspects of Our Physical Environment
3
This course is designed for people who desire to learn about the various sources of energy and the problems associated with its production and consumption on the local, state, national, and international levels. Topics to be covered include: energy principles, fossil fuels, electric energy, acid precipitation, energy conservation, infringements on the global atmosphere, the principles of sustainability, and the orderly translation from our current energy mix to a new mix utilizing nuclear, solar, wind, geothermal, and new emerging technologies. This course includes a lab-like experience. (3 hours lecture)
$\begin{array}{llll}\text { PHYS } 1201 & \text { Principles of Physics I } & 503\end{array}$
This course is the first of an algebra-based two-semester introductory physics sequence.Topics to be covered include: motion in one and two dimensions, Newton's laws of motion, energy, momentum, rotational motion, static equilibrium, oscillations, gravitation, fluids. Concepts of right-triangle trigonometry will be introduced as needed. (4 hours lecture, 2 hours lab). Prerequisite: Successful completion of either MATH 1150 or MATH 1180 with a C or better OR eligibility for either MATH 1170 or MATH 1221 through College math placement score.

PHYS Principles of Physics II 120203
This course is the second of a two-semester introductory physics course for students with a mathematics preparation of algebra and some trigonometry. Topics to be covered include: wave motion, electricity, magnetism, electromagnetic waves, and light. (4 hours lecture, 2 hours lab)Prerequisite: Physics 1201 or consent of instructor

PHYS 1220 Allied Health Physics 2 n/a
This course provides the allied health or paramedical student with a concentrated treatment the basic physics principles of ultrasound which would be needed for follow on courses in the Allied Health field. Completion of one college level science course and college algebra is strongly recommended.

PHYS 1601 General Physics I
5
03
This is the first course of a two-semester introductory physics sequence for students with a mathematical preparation of one semester of calculus. The topics to be covered include: motion in one and two dimensions, Newton's laws of motion, energy, momentum, rotational motion, oscillations, gravitation, fluids and wave motion. ( 4 hours lecture, 2 hours laboratory) Prerequisite: Math 1221

This is the second course of a two-semester introductory physics sequence for students with a mathematical preparation of two semesters of calculus. The topics to be covered include: thermodynamics, electricity, magnetism, electromagnetic waves, and optics. (4 hours lecture, 2 hours laboratory) Prerequisite: Phys 1601; Math 1222

PHYS 1990 Physics Special Topics 1-4 n/a
This course will provide flexibility in offering an in-depth review of topics of immediate importance and topical interest. These topics will go beyond the introductory courses in examining specific aspects of the subject matter.

PLA Individualized Studies Development 1010 n/a
This course will assist students in developing their individualized studies degree plan while focusing on the central question of what does it mean to be an educated person. Upon completion of the course, students will have a completed Degree Plan. This course is by permission only and can only be registered upon after acceptance into the Individualized Studies Program.

PLA 1020 Prior Learning Portfolio Development 1 n/a
This course will assist students in assessing what they have learned, whether some of that learning may be appropriate for assessment of college credit, and how to go about earning that credit. This course will allow students to begin the development of a portfolio for assessment of credit by a faculty member.

1025 Prior Learning Assessment (PLA) Preparation Workshop 0 n/a
This workshop will help develop a plan of action to determine if Credit for Prior Learning is an option for the degreeseeking student. After completing this workshop, the student will know if they have the necessary components and knowledge to move forward to earn credit alternatively.

PLEG 1111 Introduction to Law and Paralegal Studies 3 n/a
This course introduces students to the paralegal profession, including the nature of paralegal work, job requirements and opportunities. Students will study the Minnesota Rules of Professional Conduct and the ethical standards applicable to paralegals. The students will learn about the American legal system, including sources of law, court systems and procedures. The students will study the relationship between state and federal laws and procedure and alternative dispute resolution. Students will also study the substantive areas of torts and criminal law.PSEO students may not register for this course until they have completed all general education courses required for the Paralegal A.S. degree.

| PLEG | 1210 | Computer Applications in the Legal Profession | 2 | $\mathrm{n} / \mathrm{a}$ |

This course presents a study of the computer software commonly used in legal organizations, including programs in word processing, spreadsheets, database management systems, timekeeping and billing, case management and docket control, litigation support, presentation graphics, and electronic mail. Students will also study legal ethics as applied to the use of computer technology in the law office. CIS 1000 or knowledge of keyboard recommended. Prerequisite: PLeg 1111

PLEG Family Law 1330 n/a
This course presents a study of the processes and procedures undertaken in a family law practice. Students will study the procedures applicable to marriage dissolution and learn to prepare the legal documents associated with such procedures. Students will also study other substantive family law topics such as marriage and premarital agreements, child custody and support, domestic abuse, and adoption. In addition, this course examines the ethical considerations relating to a family law practice. Prerequisite: PLeg 1111

## PLEG 1411 Litigation <br> $3 n / a$

This course is the first part of a two-part Litigation course. This course presents a study of the processes and procedures undertaken in litigation and the role of the paralegal in a litigation practice. Students will study the requirements and applications of the Rules of Civil Procedure and the general rules of practice in District Court. Students will also study the various methods of alternative dispute resolution and their application to a litigation practice. Students will learn to prepare the documents essential to a litigation practice, such as complaints, discovery requests and discovery responses. This course also examines the ethical considerations relating to litigation.Prerequisite: PLeg 1111

PLEG Litigation II 1412 n/a
This course is the second part of a two part Litigation course. This course presents a study of the processes and procedures undertaken in litigation and the role of the paralegal in a litigation practice. Students will study the requirements and applications of the Rules of Civil Procedure and the general rules of practice in District Court. Students will also study the various methods of alternative dispute resolution and their application to a litigation practice. Students will draft litigation documents and learn the role of the paralegal before, during and after trial.
