Teaching Interests

Creating a student-centered classroom and utilizing process writing techniques (in literature as well as composition classes) are central to my teaching philosophy. I also teach from the perspective that the ultimate value of the humanities generally, and literature/writing specifically, resides in their exploration of what it means to be human. The crucial connection between art and life --not idealized life, but students' daily lives -- is one I seek to make in every class I teach.

My interest and expertise is in the work of women and BIPOC writers, particularly but not exclusively poets, of nineteenth and twentieth century America. I am concerned that traditional curriculums continue avoid these writers, especially in general education classes, and that too often poetry is neglected in favor of the study of short fiction and the novel.

I enjoy teaching early American women's non-fiction writing as well, especially diaries, letters, and conversion narratives, and I have a deep interest in the lives and achievements of the modernist women poets, including the women of the Harlem Renaissance.

A strong background in critical theory ranging from Saussure and Derrida to Irigaray and Kristeva to the Frankfurt School has proven useful to me both in the classroom and with my poetry. Theory has heavily influenced not only some of this country's most important "experimental" (sometimes called "postmodern" or "language" or "New York School") poets but has been an important influence on my own work as well.

Finally, I truly enjoy teaching composition. It is, after all, about the creation of texts, and I use many of the same freewriting and guided writing techniques in composition courses that I do in creative writing courses. For me, as you might expect, all writing is creative. All writing is also, I believe, concerned with persuasion or argumentation, and I include the elements of rhetoric as an integral part of each course I teach.
